GREAVES'S BLUE LIAS LIME.—The superior manner in which the above is ground renders it cheaper for concrete or stucco than any other lime or cement. The shell lime for mortar is burnt on an improved principle, leaving scarcely any core. The satisfaction constantly expressed by Engineers, Architects, and Contractors, of the above, is its best recommendation.
Gibbs, Canning, and Co.'s Blue Vitrified Bricks, Pipes, Junctions, Bends, and Fire Goods.
ROMAN, PORTLAND, PARIAN, ANSTON, and LIAS Cements of the best quality
SCOTCH, PAYDON'S, STOCKS, and other Bricks.
CHARLES RICHARDSON, 6, South Wharf, Paddington

ATKINSON'S CEMENT, so long known and esteemed in London, for plastering purposes, is a quick-setting Cement, that requires no colouring. Sold exclusively by JOHN BAZLEY WHITE and BROTHERS, Millbank street, Westminster; and Seel-street, Liverpool.

ROMAN and OTHER CEMENTS, Manufactured by J. M. BLASHFIELD, successor to the Patentees, PARKER and WYATT, who, in 1796, first introduced PARKER'S ROMAN CEMENT, also Tarras and Portland Cements, English and French Plaster, Terra Cotta Chimney Pots, Trusses, &c.
Manufactory, Mill Wall, Poplar; Depôts, Commercial-road, Lambeth; and Paddington-basin.

ARTIFICIAL HYDRAULIC or PORTLAND CEMENT combines the valuable qualities of the natural Cements with the additional advantage that it greatly excels them in its cementitious properties; that it is not affected by frost, and does not vegetate in damp situations. Account of COMPARATIVE EXPERIMENTS on the strength of this and other Cements (read at the Institute of Civil Engineers), to be obtained from the makers, JOHN BAZLEY WHITE and BROTHERS, Millbank-street, Westminster, who prepare one quality only of Portland Cement.

GEO. & THOS. EARLE, CEMENT MANUFACTURERS, HULL.—Light and Dark, equal to any made. Manufacturers also, and dealers in Plaster, Parts White, Mastic, Hair, Lias Lime, Laths, Slates, and Slate Slabs, Firebricks, Grindstones, Cement Chimney-tops, ditto Vases, Ridging, &c Paints, Stucco, &c. Marble Merchants and Importers of Pozzolano.

PORTLAND CEMENT WORKS, NORTHFLEET, KENT.—Messrs. ROBINS and CO. with much pleasure announce to their Friends and the Public, that they have completed the enlargement of their works, in order to meet the great increasing demand for their Cement; and are now prepared to supply any quantity of the very best PORTLAND CEMENT, manufactured by them for all the purposes Cement is applicable.—Orders received at Great Scotland-yard, and at the Works

ITALIAN POZZOLANA.—A few hundred TONS of this article, of best quality, on SALE.—Apply to G. and T. EARLE, Hull.

TO BUILDERS, HOUSE DECORATORS, AND UPHOLSTERERS
THE most extensive assortment of UPHOLSTERERS' CLOTHS, BAIZES, and DRUGGETS, in every shade of colour, width, and quality, at HILL and SON'S, 98 and 99, St. Martin's-lane, London.
N.B. Patterns sent if required.

ALBERT LIFE ASSURANCE COMPANY, established 1838. Eastern Branch, 7, Finsbury-square. LOANS granted, in connection with Life Assurance, on freehold, leasehold, and personal security.
W. S VARDY, Manager.

BRITON LIFE ASSOCIATION, 36a, Moorgate-street.
Assurers in this Office may receive the amount assured during Life, without increased Premium.
Loans can all times be obtained and repaid by small instalments.
Investment Policies secure a payment of the amount assured in 13, 10, or 7 years, or at death if it should previously occur, on which no fines can be obtained
Persons about to subscribe to Building Societies, will find the Building Policies issued by this Office combine the Assurance of Life with all the advantages derived from a Building Society.
Medical Gentlemen remunerated in all cases for their reports.
Annuities granted. All descriptions of Life Assurance transacted
Policies indisputable. Office hours from 10 a.m. to 4 p.m.
EDWARD PARSONS, Secretary.

ARGUS LIFE ASSURANCE COMPANY, 39, THROGMORTON-STREET, BANK, and 14, PALL-MALL.
Thomas Farncomb, esq Alderman, Chairman.
William Leaf, Esq. Deputy-Chairman.

Richard E Arden, esq.	Rupert Ingleby, esq.
Edward Bates, esq	Thomas Keily, esq Ald.
Thomas Cannings, esq.	Jeremiah Pilcher, esq.
James Clift, esq.	Lewis Pocock, esq.
John Humphery, esq. Ald.	

PHYSICIAN—Dr. Jeaffreson, 2, Finsbury-square
SURGEON—W. Coulson, esq. 2 Frederick's-place, Old Jewry.
CONSULTING ACTUARY—Professor Hall, M.A. of King's College.
ADVANTAGES OF ASSURING WITH THIS COMPANY
The Premiums are on the lowest scale consistent with security.
The Assured are protected by an ample subscribed capital—an Assurance Fund of 380,000l. invested on Mortgage and in the Government Stocks—and an income of 80,000l. a year.

Premiums to Assure 100l.			Whole Term.	
Age	One Year.	Seven Years.	With Profits	Without Profits.
20	£0 17 8	£0 19 9	£1 15 10	£1 11 10
30	1 1 4	1 2 7	2 5 5	2 0 7
40	1 5 0	1 6 0	3 0 7	2 14 10
50	1 14 8	1 19 10	4 6 8	4 0 11
60	3 2 4	3 17 0	6 12 9	6 0 10

MUTUAL BRANCH.
Assurers on the Bonus system are entitled, at the end of five years, and afterwards annually, to participate in four-fifths, or 80 per cent. of the profits.
The profits assigned to each policy can be added to the sum assured, applied in the reduction of the annual premium, or be received in cash
At the first division a return of 20 per cent. in cash on the premiums paid was declared; this will allow a permanent reduction in the future annual payments for life of from 3s 6d to 11 per cent. according to the age, and a reversionary increase varying from 66 to 28 per cent. on the premiums, or from 1 to 3 per cent. on the sum assured.
Should half of the "whole term" premium may remain on credit for seven years, or one-third of the premium may remain for life as a debt upon the policy at 5 per cent. or may be paid off at any time without notice.
Claims paid in one month after proofs have been approved.
Loans upon approved security.
No charge for policy stamps.
Medical attendants paid for their reports.
Persons may proceed to or reside in any part of Europe or British North America without extra charge.
The medical officers attend every day at Throgmorton-street, at a quarter before two o'clock.
E. BATES, Resident Director.

HAND-IN-HAND FIRE and LIFE INSURANCE SOCIETY, 1, New Bridge-street, Blackfriars, London. Instituted in 1696. Extended to Life Insurance, 1836. Immediate, Deferred, and Survivorship Annuities granted.

DIRECTORS

The Hon. William Ashley.	John Gurney Hoare, esq.
The Hon. Sir Edward Cust.	E. Fuller Maitland, esq.
Arthur Eden, esq.	William Scott, esq.
John Jeffcott Elliot, esq.	John Sperling, esq.
James Fedaile, esq.	Henry Wilson, esq.
Harvie M. Farquhar, esq	W. Esdaile Winter, esq.

LIFE DEPARTMENT. Insurances effected before the 24th June next, will participate in profits one year earlier than if effected after that date.
In the years 1845, 1850, 1851, 1852, 1853, and 1854, the Premiums on all policies entitled to participate WERE ABATED 25 per Cent.—that is to say, a PREMIUM of 100l. WAS REDUCED to 47l. 10s. No charge for stamps.
FIRE DEPARTMENT. Insurances are effected on every description of property, at the usual rates.—By order,
RICHARD RAY, Secretary.

WESTMINSTER FIRE OFFICE.

The Right Hon. Lord Erskine. | Sir Edward Graham, bart.
10l. to 100l. advanced on personal or other security. Bills of Exchange cashed. Five per cent. interest on deposits payable in January and July. Forms forwarded on receipt of twelve postage stamps.

TO ARCHITECTS, BUILDERS, CONTRACTORS, &c.

HARTLEY'S PATENT ROUGH PLATE GLASS

1-8th thick, or 2 lbs. to the foot; 3-16ths, or 3 lbs.; and 1-4th, or 4 lbs. to the foot, for

RIDGE AND FURROW ROOFS, GREENHOUSES, RAILWAY STATIONS, ENGINE SHEDS, MILLS, MARKET HALLS, AND PUBLIC BUILDINGS GENERALLY.

It being universally admitted that Glass in Roofs of a permanent character should not be less than one eighth of an inch thick, weighing two pounds to the foot, Messrs. JAMES HARTLEY and CO. have directed their attention to the manufacture of a description of

ROUGH PLATE GLASS, THAT COMBINES SIZE AND STRENGTH WITH ECONOMY OF COST.

The PATENT ROUGH PLATE is manufactured in sizes expressly for Ridge and Furrow Roofs, giving a span of from 5 to 12 feet, at a price not exceeding weight for weight that of common Crown Glass. Not being translucent, lights are unnecessary, and when used in Greenhouses no scorching occurs. Its NON-TRANSPARENCY and strength render it eminently suitable for the Glazing of Conservatories and Roofs of all kinds; also Factories, Workshops, &c. for which purposes it is supplied in squares of all sizes, from 8 by 6 inches and upwards.

For further information apply to Messrs. JAMES HARTLEY and CO. Wear Glass Works, Sunderland.

N.B.—The Patent Rough Plate is supplied at a much lower cost than the common Rough Plate. May 1, 1854.

GLASS.—HARTLEY AND CO.'S GLASS TARIFF NEWSPAPER

Will be forwarded Gratis, on application, "post-paid," to

Messrs. JAMES HARTLEY and CO. Wear Glass-works, Sunderland; or Purfleet Wharf, Earl-street, Blackfriars, London.

Transparent blinds in great variety. Engravings, with prices and discounts to builders and the trade, forwarded on application, post free.

GUERNSEY GRANITE.—C. D. BENNETT, Stone Merchant and Quarry Proprietor, Saint Sampson's, Guernsey, respectfully returns thanks for past favours to supply them with granite in blocks and other shapes, and hopes by strict attention to merit a continuance of their favours. Granite for building purposes, and other shapes, prepared and shipped from a single cargo to 20,000 tons or upwards.

N.B.—Pitching, Curb, &c. as usual.

GRANITE.—The Cheesewring Granite Company, of Liskeard, Cornwall, are now prepared to supply Granite of excellent quality, and the largest sized blocks. Prices may be ascertained on application to N. TREGELLES, 3, Pinner's court, Old Broad-street, City; or to JAS. J. TRATHAN, Liskeard.

PAVING, in great varieties.—Sinks, sills, steps, &c., rubble coping, tooled ditto, curb and tooled sills; Harehill and scabbled slabs, Yorkstone paving, pipes and tops, &c. all at low prices. Builders and masons are invited to inspect a list sent free on application to E. and W. STURGE, Bridge-wharf, City-road.—Established 1821.

MARBLE.—Mr. J. FABBRICOTTI, of Carrara, Italy, Proprietor of Marble Quarries, and the only person in the United Kingd m selling Italian Marble the produce of his own quarries, begs to inform the gentlemen connected with the Marble Trade that he has established, in London, the most extensive Depôt of Statuary, Veined, Sculptural, Dove, and Black and Gold Marbles, at CARRARA WHARF, THAMES BANK, PIMLICO, at foot of Vauxhall-bridge. Office, 3, Crescent-terrace, Millbank. Mr. THOS. THOMPSON, Agent.

MARKET-WHARF, REGENT'S-PARK-BASIN.—WEST-END DEPOT, for Yorkshire Paving, Portland and Derby stone, Bangor Slates, Slabs, &c. Also Bricks, Lime, Cement, Plaster, Tiles, Laths, and Fire Goods. MARTIN and WOOD invite the attention of Builders, Masons, and others, to their Stock as above, where everything will be found at the lowest prices. Headstones, Ledgers, Steps, Landings, &c. cut on the shortest notice. Country orders promptly attended to.

TO BUILDERS, MASONS, AND CONTRACTORS.

OBSERVE!!! the cheapest Depôt in England for MARBLE CHIMNEY PIECES of superior quality and workmanship is the Westminster Marble Company's Patent Works, Earl-street, Holywell street, Millbank. An inspection of their extensive Stock of Statuary, Siennas, Black and Gold, Vein, and other Chimney-pieces, Tombs, Monuments, Tablets, &c. is earnestly solicited.

SERPENTINE MARBLE of choice quality ON SALE, in blocks and slabs, at moderate prices. THOMAS JACKSON, Commercial-road, Pimlico.

MARBLE CHIMNEY-PIECES manufactured by Machinery, improved by the proprietor's own invention, that defy competition in price and quality. The trade supplied with Marble and Stone Chimney-pieces, Slabs, &c. at the Marble and Stone Sawing-mills, Cambridge-heath, Hackney. WM. HUNTLEY, Proprietor.

MARBLE WORKS by PATENT MACHINERY, Commercial-road, Pimlico, London. THOMAS JACKSON begs to draw the attention of the public to the most extensive stock of Marble Chimney-Pieces in the Metropolis; consisting of a selection of upwards of two hundred, all manufactured by steam power from the finest Italian and other marble, and with that careful attention to the details and finish so necessary in good marble work. The Stock consists of elegant Drawing-Room Chimney-Pieces in Statuary Marble bold, massive Chimney-Pieces in Black and Gold, Bardilla, Siena, Verd Antique, Brocatella, Dove St. Ann's, and Serpentine Marble, suitable for Dining-Rooms, Libraries, Vestibules, and Entrance Halls; and a great variety of others in Veined, San Juan, Emperor's Red and Amber Marble, for Boudoirs, Breakfast-Rooms, best and secondary Bed-Rooms, &c.; also, Monuments, Tombs, Tablets, and Pedestals for Busts and Statues, and Slabs for Cabinet Work, &c.; the whole executed from the most classical designs, and in all the varieties of the finest Italian and British Marble, at the lowest remunerative prices.

TO BE SOLD.—To Architects, Builders, and Masons.—Several handsome carved Statuary Chimney-pieces, with Trusses; also Black and Gold and Veined Marble, of different sizes. Some Bed-hangings for the Mansion of Councillor Stable to imitate Marbles the PAINTER in ORDINARY to HER MAJESTY, PRINCE ALBERT, the chief of our nobility, and almost every Architect, Builder, and Decorator of any note, and having been rewarded with the MEDAL of the SOCIETY of ARTS and the PRIZE MEDAL of the GREAT EXHIBITION, finds that his success has given rise to a number of petty imitators, who, though they may not affect him in a pecuniary light, inflict vast injury by their wretched imitations of his productions, which are, in most cases, passed off as "MAGNUS'S ENAMELLED SLATE." He therefore respectfully requests those who are disposed to patronise his establishment, to assure themselves that they are supplied from his manufactory, as unfortunately NOT LESS THAN HALF THE COST AND LABOUR NECESSARY TO SECURE PERMANENCY, is economised in the inside which will not core, and damages the reputation of his Enamelled Slate. This caution is particularly necessary in regard to the fittings of the retiring places at railway stations, and wherever there is much wear. N.B. The Tariff for 1854 is now ready.

Pimlico Slate Works, 39 and 40, Upper Belgrave-place.

ABERDEEN and PETERHEAD POLISHED GRANITE. — Chimneypieces, Monuments, Columns, Pedestals, Vases, Monumental Urns, &c executed on the shortest notice, and at the lowest possible prices, on application to JAMES WRIGHT, Manufacturer, 112, John-street, Aberdeen; or A. and F. MANUELLE, Granite Merchants, 12, Trinity-square, Tower-hill, London.

VALENTIA SLATE SLABS.— The Valentia Slab Company invite attention to their Slabs now supplied, of very large dimensions and of superior quality. They have been used at the British Museum, National Gallery, Bethlem Hospital, various Lunatic Asylums, the Ordnance Works, Model Prison, Pentonville, and other Penitentiaries, Malting Floors in Bedford-hire and Hertfordshire, Breweries, the Race Stand at Brighton, Portsmouth Barracks, and are kept in stock in large quantities by Messrs. FREEMAN, Millbank-street; also by Messrs. Sharpe, Tooley-street; and Messrs. Braby's, Belvidere-road, where terms may be obtained.

SLATES, Slabs, Cisterns, Enamelled Chimney-pieces, Paving, Urinals, Baths, Sinks, Lining, Skirting, Roofing, Mailine Floors, Patent Rubs and Roll, and Slab-work generally. Export orders supplied without detention, a large stock of slates and manufactured goods being usually kept on hand Price-lists may be had upon application, either personally, or by post.—Address, JOSEPH BRINDLEY, Slate Merchant, Steam Slate-works, Bermondsey-wall, London.
N.B. Wharf opposite the Wapping Entrance of London Docks.

By Her Majesty's — Royal Letters Patent.

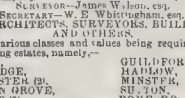
Country Agents, and Railway Engineers and Contractors, supplied with the best Bitumen for covering Bridges and Arches.

TO ARCHITECTS AND BUILDERS
CHURCH DECORATIONS, Oak Carvings, Metal Work, Altars, Cloths, Carpets, Communion Linen, Curtains, &c. may be inspected at FRANCIS SMITH'S ECCLESIASTICAL WAREROOMS, 36, 8 uthampton-street, Strand, London. An illustrated priced Catalogue, small 4to. on application.

SMOKE CONSUMED or PREVENTED.— Of all the numerous patents obtained for this purpose, no ONE plan can be made effective to burn or prevent smoke to every description of boiler, copper, pan, oven, or fire used for manufacturing purposes. To obtain this object, the SMOKE CONSUMING COMPANY have made arrangements to use, sell, and dispose of Seven different Patents & Plans specified below, from which will be selected those best adapted to the various descriptions of fireplaces. The application of Chanter's Reciprocating Moveable Fire Bars so admitted to be a great advantage to all Smoke-Consuming Apparatus, by allowing a greater supply of air to pass through the bars. Above 500 are now in daily use; and the patent right has been reduced since January, 1854, from 25 to 40 per cent. Smoke Patents referred to above are:—Bestow and Attwood's Patent; James Robertson's Two Patents; Chanter and Co's Two Patents; John Macintosh's Patent; Collins's Patent.—For Licences to use, with prices, further particulars, and references to see them in operation, apply to the SMOKE CONSUMING COMPANY, 20, Little Tower-street; 2, Arnold-terrace, Bow-road; or at the Manufactory, Gloucester-place, Salmon's-lane, Limehouse, London.

CHEAP AND DURABLE ROOFING.
By Her Majesty's — Royal Letters Patent.

F. McNEILL and CO. of LAMB'S-BUILDINGS, BUNHILL-ROW, LONDON, Manufacturers and ONLY Patentees of
THE PATENT ASPHALTED FELT, FOR ROOFING HOUSES, VERANDAHS, SHEDS, &c.
Patronized by
HER MAJESTY'S WOODS AND FORESTS,
HER MAJESTY'S COMMISSION OF CUSTOMS,
HONOURABLE EAST INDIA COMPANY,
HONOURABLE BOARD OF ORDNANCE,
HER MAJESTY'S ESTATE, ISLE OF WIGHT,
ROYAL BOTANICAL GARDENS, REGENT'S PARK,
And by the most eminent members of the Royal Agricultural Societies of England, Scotland, and Ireland; at whose great national shows it has been exhibited, and OBTAINED THE PRIZE, it being the best and cheapest article for roofing; also used for under slates at the Royal Agricultural Society's House, at Hanover-square Its advantages are lightness, warmth, durability, and economy. It is impervious to rain, snow, and frost, and is non-conductor of heat and sound. The Felt can be cut to any length, by 32 inches wide. The price is only ONE PENNY PER SQUARE FOOT Samples, with full directions as to its uses and the manner of applying it, with TESTIMONIALS, some of them of seven years' experience, from Architects, Builders, Noblemen, and Gentlemen who have extensively used it, sent free to any part of the town or country. A Dry-hair Felt, for covering Boilers, &c. is also manufactured, by which a saving of about 25 per cent in fuel is effected The TRADE are respectfully enjoined to send their orders DIRECT to the FACTORY, as the surest means of being supplied with the genuine article, and in lengths best suited to their roofs They are likewise CAUTIONED against MISDESCRIPTION as the only Works in Great Britain where the above roofing is made are F. McNEILL and CO's Manufactories, LAMB'S-BUILDINGS, BUNHILL-ROW. Roofs covered with the Felt to be seen at the Factory, also the new Vice-Chancellor's Courts the passages and offices leading to Westminster Hall, and other buildings at the New Houses of Parliament.—A Liberal Discount allowed to the Trade.



SEYSSEL ASPHALTE COMPANY,
STANGATE, NEAR WESTMINSTER-BRIDGE, LONDON.
ESTABLISHED 1838.
CLARIDGE'S PATENT.—Frequent complaints having been made by ARCHITECTS and others of the failure of certain works supposed to have been done by this Company (but which in fact were executed with spurious materials), a list of works executed with the
GENUINE SEYSSEL ASPHALTE
is kept at the Office, that it may be at any time ascertained whether any work in which a failure has taken place was executed by this Company J. FARRELL, Secretary.
N.B. THE EXCLUSIVE SUPPLY OF ASPHALTE from the Mines of Pyrimont Seyssel being conceded to this Company, the Directors particularly recommend Architects, Builders, and others (for the purpose of securing the use of the genuine article) to insert in their specifications
"PYRIMONT SEYSSEL ASPHALTE, CLARIDGE'S PATENT,"
and not merely "Asphalte," or "Bitumen," as in many cases where these terms have been used, gastar, and other worthless and offensive compositions have been introduced.
1853.

GENUINE SEYSSEL ASPHALTE.
ORSI AND ARMANI.
THE EXCLUSIVE SUPPLY OF SEYSSEL ASPHALTE (FRANGY)
DIRECT FROM THE MINES.
REDUCTION IN THE PRICE FOR VARIOUS WORKS FIFTEEN PER CENT.
AND THE
WORK GUARANTEED FOR THREE YEARS.
Offices, No. 6, Guildhall Chambers, Basinghall-street, City.

PATENT METALLIC LAVA.
A printed List of the important Works for Flooring, Roofing, Covering of Arches, &c. &c. executed from 1848 to 1852, with this Material, may be obtained at the Office of
ORSI AND ARMANI.
THEIR PATENT METALLIC LAVA IS FIFTEEN PER CENT. CHEAPER
THAN THE GENUINE SEYSSEL ASPHALTE OF MESSRS. O. AND A.
OR THIRTY PER CENT. LOWER THAN ANY OTHER MATERIAL CALLED BITUMEN OR ASPHALTE.
Offices, No. 6, Guildhall Chambers, Basinghall-street, City.

THE UNIVERSAL SMOKE-CONSUMING COMPANY.—WITTY'S PATENT, 1853.—This invention consumes within the furnace all the smoke generated from coal. Is at once chemical and mechanical, inexpensive in cost, and may be applied in a few hours, not only to a steam-engine boiler furnace, but to any other furnace, having a bridge; saving in fuel upwards of 30 per cent. Particulars, with charges for licensing and setting up the invention, to be had on applying at the Company's Offices, 4, Furnival's-inn, London, where models of the invention may be seen, and references given, which will testify the efficiency of the invention.

SUCCESSFUL VENTILATION.—WATSON'S PATENT SELF-ACTING DOUBLE-CURRENT VENTILATORS have been successfully applied to Churches, Chapels, Public Halls, Stables, and almost every kind of Building, as well as to withdraw steam, Smoke, Dust, and Heat Testimonials and other information forwarded on receipt of a postage stamp. The Ventilators delivered carriage free in London and Bristol Instructions sent for fixing.—Apply at the Manufactory to CHARLES WATSON, King Cross-lane, Halifax, Yorkshire, who is the patentee and sole maker.

VENTILATION.—PURE AIR.
Sheringham's Ventilator for the admission of pure air through an

EXTERNAL WALL.
With single pulley, from 6s. each; with leading pulley, from 6s. 6d
These Ventilators are arranged that the requisite quantity of air may be admitted for the due ventilation of an apartment without the slightest draught being felt by the occupants, and as they are placed in the external wall, their action is not impeded when the house is closed for the evening at which time a good supply of fresh air is most required.—HAYWARD, ROTHERS, sole Manufacturers, 156, Blackfriars-road; and 117 Union-street, Borough; and of all respectable ironmongers, builders &c

NATIONAL FREEHOLD LAND SOCIETY.
TRUSTEES
Richard Colden, esq. M.P. — Samuel Morley, esq.
Charles Gilpin, esq. — W. A. Wilkinson, esq. M.P.
SURVEYOR—James Watson, esq.
SECRETARY—W. E. Whittingham, esq.
TO ARCHITECTS, SURVEYORS, BUILDERS, AND OTHERS.
Houses of various classes and values being required to be built on the following estates, namely,—

BARNET,	GUILDFORD,
CAMBRIDGE,	HADLOW,
COLCHESTER (2),	MINSTER,
CROYDON GROVE,	SUTTON,
ENFIELD (2),	ROMFORD,

The Directors will be prepared to receive plans and particulars of houses suitable for the several situations, and Tenders to build the same.—Particulars of the Lots to be built upon, the classes of houses required, and the conditions of building, may be had either personally, or by letter; and the Designs, &c. are to be sent in on or before WEDNESDAY, the 17th of MAY next.
JAMES WYLSON, Surveyor.
14, Moorgate-street, London, 22nd March, 1854.

LONDON and COUNTY FREEHOLD LAND and BUILDING SOCIETY.
Certified under 6 & 7 Wm. 4, c. 32. Whole Shares, 40l.; Half Shares, 20l. Entrance Fee for each, 1s. Subscriptions, 1s. per week, or 4s. per month Half Subscriptions for Half Shares. No subscription is ever forfeited.
Members may obtain advances on house property already in their possession.
The Society will undertake, at a small per centage, the erection of houses on land belonging to members, thus insuring strength, uniformity, and beauty of design
No partnership liability, as in a Joint-Stock Company.
The whole of the profits will be divided among the members *pro rata*.
The Society will, on request, effect arrangements with an Assurance Company, whereby the property of any member (if mortgaged) may become free and unencumbered, if he should die during the period of repayment.
The system of balloting is based on the most equitable principle, and entirely different from what is generally adopted.
Temporary Office No. 3, Bond-court, Walbrook Open daily from Ten to Four p.m. A. W. HAYMAN Secretary.

NEARLY 7,000 SHARES ISSUED
CITY of LONDON and COUNTIES FREEHOLD LAND SOCIETY. Offices, 79, Farringdon-street.
Members enrolled daily. Office hours Ten to Five; on Tuesdays Ten to Eight.
Shares, 30l. each; entrance-fee (including rules), 1s. Monthly subscriptions, 4s. payable every twenty-eight days. Transfer fee, 1s. per share.
The committee have the pleasure to announce that a very eligible estate at Forest-hill, near Sydenham, has been purchased, and will be submitted to the members entitled to choose as soon as the conveyance has been completed. A ballot takes place at the Offices of the Society every Wednesday evening at Seven o'clock precisely. New shares are entitled to participate in the next ballot.
J. HIGHAM, Secretary.

LAMBETH and PROVINCIAL FREEHOLD LAND SOCIETY.—REMOVAL of OFFICES to 211, HIGH-STREET, Borough.

SLOUGH, BUCKS.—The Directors of the NATIONAL PROVIDENT FREEHOLD LAND SOCIETY are happy to announce that a very eligible estate, adjoining the Slough Station on the Great Western Railway, and commanding a splendid view of Windsor Castle, has been purchased for allotment amongst the members.
The next ballot will shortly take place, of which due notice will be given. All shares previously taken will participate
472, New Oxford-street. JOHN P. COX, Secretary.

ORNAMENTAL GROUND WORK, PLANTING, &c. undertaken on any scale or design, either by contract or otherwise.—Apply to W. SHORT, 87, High street, Portland-town, London.

LITHOGRAPHY.—C. MOODY executes every description of LITHOGRAPHY for Professional persons or the Trade. Portraits, landscapes, &c sketched or copied from the roughest drawings. Engineering and Mechanical drawing correctly detailed by experienced hands. Presses, stones, chalks, &c. Artists and amateurs supplied with sketch-books, pencils, and every requisite for drawing and painting specimens of every class of work for inspection; estimates given; instructions afforded.—257, High Holborn.

MINTON and CO.'S ENCAUSTIC and other PATENT TILES, for Churches, Entrance Halls, Conservatories, Balconies, &c.; Antique, Geometrical and Alhambric Mosaics, manufactures of a highly decorative character, and extreme durability, Slabs and Tiles for Fire-places and Hearths, Covings for Grates, Door Furniture, White Glazed and Ornamental Tiles for Baths, Dairies, and Kitchen Ranges, may be had in great variety at their Warehouse, 2, Albion-place, Blackfriars-bridge, London; and at their Manufactory, Stoke-upon-Trent, Staffordshire.

PEAKE'S TERRO-METALLIC TILES, PIPES, &c.—Notice is hereby most respectfully given, that the LONDON DEPOT for this WARE is REMOVED to No. 21 WHARF, Maccle.field-street North, City-road Basin. Secondly, that the trade term, "Terro-Metallic," is the exclusive right of the Proprietor; and, thirdly, that the "REPORTS OF THE JURIES," page 281, of the Great Exhibition, rank the Manufactories known so long as "The Tileries," Tunstall, Staffordshire, as the first of the kind in the world.

MAW'S ENCAUSTIC TILE PAVEMENTS
MAW and CO. send free, per post, their NEW BOOK OF DESIGNS,
with prices, adapting this most durable, economical, and decorative production of mediæval art to entrance-halls, passages, conservatories, verandahs, and every description of modern and ancient building
BENTHALL WORKS, near Broseley, Shropshire.
Specimens at 11, Aldersgate-street.

GREAT EXHIBITION 1851, Class 27, No. 111 JAMES LUFF, Manufacturer of all kinds of Ornamental Bricks and Tiles, Red and White of the best quality, suitable for chimney-shafts, ridge-crests, cornices, and mouldings of every description, TUDDENHAM, IPSWICH.
N.B. Builders furnishing detail drawings can have all sorts of ornamental designs executed; a small additional charge made for the moulds.

BRICKS! BRICKS! BRICKS!—PARK ESTATE BRICKFIELDS, near the Royal Arsenal, Woolwich.—Price for the present Month, and until further notice—Stocks, 30s.; Place, 30s. per thousand. Ready money on the field.
February 20, 1854. L. DAVIS, Proprietor.

BRICKS from COWLEY and KENT.
Also WHITE, YELLOW, and RED FACING BRICKS.
BLUE VITRIFIED BRICKS;
Fire Bricks, Lumps, and Tiles.
CHARLES RICHARDSON, 6, SOUTH WHARF, PADDINGTON.

WHITE, SUFFOLK, and RED FACING BRICKS; Kent, Grey Stocks, Malm Fronts, Shippers, &c Apply to Mr. W. ALLAWAY, 4, Catherine-court, Tower-hill.

BRICKS.—Malm Cutters, Yellow and Pale Seconds, Paviors, and Pecklugs, of good and sound quality, constantly on sale at H. DODD'S Brickfields, which are only a quarter of an hour's walk from the City. H. D. earnestly requests purchasers to favour him with a visit, in order to inspect his stock, and to judge for themselves.
Malm Place, half-washed Stocks, and Place Bricks, also on sale. These bricks are sound, well burnt, and unusually free from defects; a very large proportion of the stock being suitable for external facing.
Apply to HENRY DODD and CO. at the Counting-house, Hoxton Brickfields, Grange-walk, near the Rosemary Branch, Hoxton.
N.B. Light-coloured Pit Sand of approved quality constantly on sale upon reasonable terms. This Sand, from its not containing any saline matter, is acknowledged to be preferable to river sand.

FIRE-BRICKS, FIRE-LUMPS, and TILES, FIRE CLAY, &c.—In addition to their usual stock of ALLOA FIRE-BRICKS, TRAQUAIR and MORGAN have now got to hand a most extensive assortment of FIRE-LUMPS and TILES of the same unequalled quality, to which they most respectfully invite the attention of Engineers, Furnace Builders, and consumers generally.
N.B. TRAQUAIR and MORGAN, 9, Bankside, Southwark, close to Southwark-bridge.

BRICKS, PANTILES, &c.—J. and C. ANDREWS, Wabash, Camdridgeshire, beg to offer BRICKS at 35s. per 1,000; PANTILES, at 47s. 6d. per 1,000; HALF BRICKS and 6-inch PAVINGS, at 40s. cash prices—Delivered at Bishopsgate Station, London. All kinds of DRAIN-PIPES.

BRICKS.—WANTED to PURCHASE, about 100,000 STOCK and PLACE BRICKS; to be delivered either at Deptford-creek, or the Forest-hill Station of the South-Eastern Railway.—Letters stating cash price per thousand for each sort, and where they may be seen, directed to W. H. Lambeth Freehold Land Society, 211, Borough High-street, will be attended to.

GOOD OLD BRICKS for SALE, at 16s. per 1,000, now pulling down in Lombard-street, City. Apply on the Premises; of J. DAVIS; or of J. W. BROOKER, Dealer in Building Materials, Rodney Buildings, New Kent-road.

BRICKS! BRICKS!—A constant supply of SOUND KILN BRICKS adapted for facings, and superior to any stocks, delivered at the Brickmakers' Arms, or any station between Redhill and Norwood; also a large quantity of Clamp Bricks.—Apply to Mr. HURLEY, 11, Terrace, Walworth, where samples may be seen.

BRICKFIELDS, LEWISHAM.—J. PARKS begs to inform builders, and all parties wanting Bricks, he has commenced sending out NEW ONES, which are first-rate, both in colour and quality, 50 per cent. better than any to be bought of the old Stock in hand. Tiles and Drain Pipes manufactured of all descriptions. Easy distance to Sydenham and Bromley.

DUTCH CLINKERS! DUTCH CLINKERS.—The duty which was on this article, and the very short supply caused for a time a substitute to be made in the place of the well-known and unsurpassable DUTCH CLINKERS. But now they can be had in regular supply, they are again used where strength and durability is required. They look neat when down, and are everlasting wear. Many of the Dutch roads are paved with them.—To be had of H. VAN KEMPEN, Importer, 4, Bread-court, Philpot lane, City.

HOUSE ASHES and BREEZE and GAS ASHES FOR SALE, in any quantity. Apply to J. A. SMITH, Great Northern Wharf, Fore-street, Lambeth. ONE MILLION of BEST KENTISH GREY STOCKS ready for delivery, by barge, at a low price, for cash.

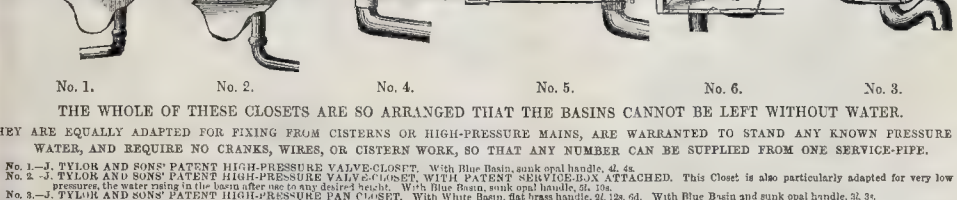
FOR WATERING GARDENS, DISTRIBUTING LIQUID MANURE, &c.—JAMES LYNE HANCOCK'S VULCANIZED INDIA RUBBER TUBING is now manufactured especially for the above purposes, and is of greater flexibility than any other description of hose or tubing. It is also manufactured to resist great pressure, suitable for attaching to the mains of water works or to tanks or water-butts, of high elevations. WATERING HOSE fitted up with brass joints, branches, stop-cocks, roses, and jets complete. Vulcanized India rubber suction-pipes for pumps, any length or size, to order; HOSE for brewers' use, fire-engines, &c. VULCANIZED INDIA-RUBBER WASHERS for STEAM and WATER JOINTS, and VULCANIZED RUBBER in SHEETS of ANY SIZE and THICKNESS. Solid vulcanized India-rubber tubing and cord for the joints of glass doors, sashes, frames, &c.—Prices and every information may be had on application at the Manufactory Goswell-mews, Goswell-road, London.

THE PERMANENT WAY COMPANY call the attention of Railway Directors and Engineers to their PATENT RAILS, SLEEPERS, FISH JOINTS, and other important improvements, now in use on upwards of 2,000 miles of railway.
Extract from the half-yearly report of the Directors of the Midland Railway, February 14, 1854:—
"An important feature in the contract for the maintenance of the Permanent Way is that the contractors are bound to reduce their charges 50l. per mile per annum, whenever the Fish Joint, or certain other improvements, are hereafter introduced."
Every information may be obtained on application to Mr. CHARLES MAY, C.E. the Manager; or Mr. WILLIAM HOWDEN, the Secretary, 20, Great George street, Westminster.

PRIZE MEDAL, CLASS 22.
HIGH-PRESSURE VALVE COCKS.—LAMBERT'S PATENT.

These Cocks have, during the last five years, been extensively and most successfully used in many Towns under continuous high pressure, varying from 100 to 350 feet; their efficiency and durability is by experience established.
The Equilibrium Ball-valve is simple and certain in its action, and is cheaper than the common Cocks now in use.
Enamelled iron, self acting, and other closets, upon economic arrangements, suitable for public buildings, cottages, asylums, &c.
THOMAS LAMBERT and SON,
Brass and Iron Founders, Short-street, New-cut, Lambeth.

TO WATER COMPANIES AND PLUMBERS.
HIGH-PRESSURE COCKS & CLOSETS.



The Health of Towns Commissioners having recommended the adoption of the high-pressure principle in all towns, WARNER'S HIGH-PRESSURE COCK is recommended as a Cock free from leakage, and applicable for all purposes and situations. Patent Closets and Basins with supply-valve for attaching direct to main pipes without a cistern, cocks, or wire.
LEAD, IRON, and TIN PIPE.
JOHN WARNER and SONS, Manufacturers, 8, Crescent, Jewin-street, London.

W. TAYLOR and SON, PLASTERERS and MODELLERS, No. 47, Whittlebury-street, Euston-square, beg to inform all those who require sound and well-finished PLASTERING and effective MODELLING, that they are now ready to execute the same at very low prices, in town or country. ORNAMENT only executed with any material on the shortest notice.
N.B. A large collection on view.

HEAL & SON'S SPRING MATTRESSES. The most durable Bedding is a well-made SPRING MATTRESS; it retains its elasticity, and will wear longer without repair than any other mattress, and with ONE French Wool and Hair Mattress on it is a most luxurious Bed. HEAL and SON make them in three varieties. For prices of the different sizes and qualities, apply for Heal and Son's Illustrated Catalogue of Bedsteads and Priced List of Bedding. It contains designs and prices of 100 kinds of Bedsteads, and prices of every description of Bedding, and is sent free by post. HEAL and SON, 196, Tottenham-court-road.

PURE GAS.—TO GAS COMPANIES, ENGINEERS, MANUFACTURERS, and OTHERS.
PATENT CLAY PURIFICATION.—No cheap process has yet been discovered for freeing gas from ammonia and the removal of the bi-sulphuret of carbon (the monster nuisance of gas-making) has been given up in despair. Clay removes both these impurities, and when taken from the purifiers the bi-sulphuret of carbon is visible, completely blackening the clay. The light of the gas is increased in proportion to its thorough purification. The proprietors of this patent are now ready to grant licenses for its use.—Terms, and directions for the employment of clay, may be obtained from Mr. JOHN WHITTAKER, Agent to the Patentee, Gas Works, Wakefield.

J. TYLOR AND SONS'
PATENT HIGH-PRESSURE CLOSETS, FOR THE MAIN SERVICE.

No. 1. No. 2. No. 4. No. 5. No. 6. No. 3.

THE WHOLE OF THESE CLOSETS ARE SO ARRANGED THAT THE BASINS CANNOT BE LEFT WITHOUT WATER.

THEY ARE EQUALLY ADAPTED FOR FIXING FROM CISTERNS OR HIGH-PRESSURE MAINS, ARE WARRANTED TO STAND ANY KNOWN PRESSURE OF WATER, AND REQUIRE NO CRANKS, WIRES, OR CISTERN WORK, SO THAT ANY NUMBER CAN BE SUPPLIED FROM ONE SERVICE-PIPE.

No. 1.—J. TYLOR AND SONS' PATENT HIGH-PRESSURE VALVE-CLOSET. With Blue Basin, sunk opal handle, 2l. 4s.
No. 2.—J. TYLOR AND SONS' PATENT HIGH-PRESSURE VALVE-CLOSET, WITH PATENT SERVICE-BOX ATTACHED. This Closet is also particularly adapted for very low pressures, the water rising in the basin after use to any desired height. With Blue Basin, sunk opal handle, 2l. 10s.
No. 3.—J. TYLOR AND SONS' PATENT HIGH-PRESSURE PAN CLOSET. With White Basin, flat brass handle, 2l. 12s. 6d. With Blue Basin and sunk opal handle, 2l. 3s.
No. 4.—J. TYLOR AND SONS' PATENT HIGH-PRESSURE HOPPER CLOSET. With Enamelled Iron Hopper, sunk brass handle, and cast-iron trap, 1l. 13s. Enamelled Iron Trap, extra, 4s. 6d.
No. 5.—J. TYLOR AND SONS' PATENT HIGH-PRESSURE HOPPER CLOSET, TO WORK FROM THE DOOR. With Enamelled Iron Hopper, cast-iron trap, and door action, 1l. 13s. Extra for Enamelled Iron Trap, 4s. 6d. This Closet is particularly adapted for Public Buildings, for which purpose it is made with a larger Valve. With large Valve, Enamelled Iron Hopper and Door Action, 2l. 2s. Enamelled Iron Trap, 4s. 6d. extra.
No. 6.—J. TYLOR AND SONS' PATENT HIGH-PRESSURE STOOL-VALVE. This Valve is particularly short in its action. ¾-inch Valve, with sunk handle, 14s. 6d.

J. TYLOR AND SON'S PATENT HIGH-PRESSURE BALL-VALVES.

These Ball-valves can be recommended with the greatest confidence as the most powerful and easy action ball-valve ever offered to the public. They are entirely free from all those objections of fittings such as spindles, slides, and cylinder fittings, so fatal to Ball-valves generally. They are perfectly quiet in action, and cannot by any means stick fast, there being no point of friction from fittings in their construction. They are so arranged as to accumulate the power of closing against the column of water when most required, and are warranted to stand any known pressure of water.

	½	¾	1 inch.
Complete with Balls:—Plain shank	5s.	6s. 6d.	7s. 3d.	12s. 6d. each.
" " Screw ferrule	6s.	6s. 6d.	7s. 6d.	8s. 3d.	14s. 6d. each.

ILLUSTRATED CATALOGUES TO BE HAD ON APPLICATION.

N.B.—ARCHITECTS ARE RESPECTFULLY INFORMED THAT THESE ARE CORRECT PRICES FOR INSERTING IN SPECIFICATIONS.

J. TYLOR AND SONS', WARWICK-LANE, NEWGATE-STREET, LONDON.

Patent Pump, with 15 feet of lead pipe attached, and bolts and nuts ready for fixing..... 2 0 0
Larger sizes if required.

The smaller sizes are also much used for supplying Hot, Forcing, and Plant Houses, from underground Water Tanks, and can be readily fixed in any situation.

May be obtained of any Ironmonger or Plumber in town or country, or of the Patentees and Manufacturers,

JOHN WARNER AND SONS,
8, CRESCENT, JEWIN-STREET, LONDON.

Every description of Machinery for raising Water, Fire Engines, &c.
The usual allowance to the Trade.

M. A. RICHARDS and SON, PUMP MANUFACTURERS and ENGINEERS.

Pumps in Wrought and Cast Iron and Brass, bored by machinery, and fitted in the best possible manner, suitable for excavators, roads, brickmakers, farms, gardens, stables, liquid manure, ships, barges, well-sinking, &c adapted for any depth. Hydraulic Pumps for deep wells.

PUMPS ON HIRE.

Pumps of any size, single or double barrel, up to double 12 in. diameter, kept ready for use at reduced prices.

N.B. The above can be worked either by hand, horse, or engine power.

Iron Pails 38s per doz. painted.
Ditto .... 48s. per doz. galvanized

Upper Ground street, Blackfriars Bridge, Surrey Side.

CENTRIFUGAL PUMPS.

Contractors, Builders, Engineers, Paper-makers, Brewers, Manufacturers, and all who may have water, or other liquids, to forward to raise, will find it their interest to use these Pumps For ECONOMY, EFFICIENCY, SIMPLICITY, DURABILITY, & POWER, they have no equal. Every information can be had on application to

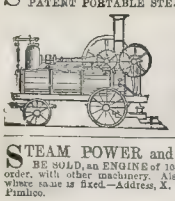
GWYNNE and CO. Essex Wharf, Essex street, Strand.

DOUBLE-ACTION FORCE and LIFT PUMP.—STEPHEN HOLMAN, Inventor and Patentee.

One man with a 3-inch Pump can raise 1,200 gallons per hour. This invention now commands much public attention, and the increasing patronage it receives is abundant proof of its efficient operation. Its advantages are

1st. Universal application.
2nd. An entire lever dispensing with slings and guides.
3rd Speedy access to all the valves at once, by the removal of one door, secured only by one screw.
4th Great quantity raised with little power.

This Pump is well worthy the attention of Water Companies, Builders and Brewers; it is applicable for all ordinary purposes of pumping, farm irrigating, &c. and being portable, is invaluable for land or ship fire-engines. All further particulars may be obtained on application to the Inventor S. HOLMAN, Engineer, Asylum, Colney Hatch; or of Mr. B FOWLER, Pump Manufacturer, White Friars-street, Fleet-street.



TO CONTRACTORS.

PATENT PORTABLE PUMPING ENGINES,

mounted on strong waggon-wheels, iron chimney horse-boats complete. Strong, simple, for immediate use. Several are ready for delivery, from six-horse power to twenty-five-horse power and upwards, adapted to contractors' work generally. May be hired as a rental, or purchased, and can be seen at work at Messrs. MEDWIN and HALL'S, Engineers and Portable Engine Makers, 92, Blackfriars-road. These engines have been successfully employed for years.

STEAM PUMPING ENGINES.—PATENT PORTABLE STEAM-ENGINES,

from four to ten horse power, always ready to let on hire, by the week or month, for pumping, sawing, pile-driving, raising materials, &c. &c.

Contracts taken for pumping any quantity of water.

JAMES BURTON & SONS, Engineers and Contractors, John's-place, Holland-street, Southwark, London.

STEAM POWER and PREMISES.—TO BE SOLD, an ENGINE of 10-horse power, in good working order, with other machinery. Also the PREMISES TO LET, where same is fixed.—Address, X. Y. Post-office, Victoria-road, Pimlico.

TO BE SOLD, a bargain, a nearly new SIX-HORSE POWER HIGH-PRESSURE TABLE ENGINE,

with boiler, large fly-wheel, pump, &c. Price 50l.—Apply to F. K. H. Constitution Villa, Gravesend.

PURE WATER, for manufacturing purposes,

may be obtained at very moderate cost by RANSOME'S FILTERING STONE. Estimates given for large or small quantities. Builders and Plumbers supplied with the association and other Filters at trade prices. These filters, a one, two, three, and four guinea each, yielding 30, 144, 256, and 500 gallons per diem, will be found sufficient for ordinary domestic requirements; are self-acting, and not liable to get out of order. Reference to parties satisfactorily supplied with quantities up to 30,000 gallons per diem, may be obtained on application at the depôt, 71, Baker-street, Portman-square, London.

GALVANIZING WORKS.—SKAIFE'S PATENT GALVANIZED IRON (Superior Process)

Works at the Regent's canal-basin, Commercial-road, Limehouse, London.—J. SKAIFE supplies this Metal in every form, viz. sheets, plain and corrugated, of all sizes and gauges. Wire of every gauge, and Wire Netting of all descriptions; Guttering, Rain-water, Screwed Gas and Water-pipes; Hooping, Castings, Furnace-pans, Baths, Buckets, &c wholesale retail and for export. Every description of Ship's Ironwork Galvanized; Deck-spikes, nails, &c. kept ready Galvanized. Estimates and drawings given for roofs and buildings fixed complete.—J. SKAIFE is also Agent for Morewood and Rogers's Patent Galvanized Tinned Iron, both flat and corrugated; also for Morewood and Rogers's Patent Galvanized Tinned Iron Tiles, for exportation, and Plumbac Zinc. Portable Emigrants' Houses and Substantial Stores supplied at moderate prices, and on the shortest notice. An allowance to the Trade.

TO BARGE BUILDERS, LIGHTERMEN, &c.

WANTED to PURCHASE, immediately,

Three or Four first-class SAILING BARGES, from 80 to 100 tons. They must pass the locks on the Regent's canal.—Address, with full particulars, to H. W. 46, High-street, Camden-town.

TO BUILDERS AND OTHERS.

MONEY to a LARGE AMOUNT READY

to be ADVANCED immediately upon Freehold, Copyhold, or Leasehold Houses or Land, Ground Rents, Reversions, Deposit of Deeds, and approved personal security. Also in the PURCHASE thereof. Apply, with particulars, to Mr. WRAY, 3, Harcourt-buildings, Temple.

LOANS.—Persons desirous of obtaining ADVANCES from 50l. to 250l. upon approved personal security, repayable by easy instalments, extending over a lengthened period, are invited to examine the principles of the BRITISH MUTUAL SUBSCRIPTION LOAN ASSURANCE CLASSES.—Prospectuses, reports, and every information may be obtained on applicat on at the First an Mutual Life office, 17, New Bridge-street, Blackfriars. Rules 6d. each copy, or 1s. per post. Note.—Four new classes are now in course of formation for London, and will immediately commence operations.

GUTTA PERCHA TUBING.—May be

buried for years, without injury, and it is therefore valuable for conveying water, chemicals, &c. It is peculiarly valuable for liquid manure, drain, and soil pipes. Being a non-conductor, it is not affected by the frost of winter or drought of summer, like metal or leather. Its strength is extraordinary; the small half-inch diameter tubing having resisted a pressure of 250 lbs. on the square inch, without bursting. The smaller sizes may be had in 100 feet, and the larger in 50 feet lengths. The joints are easily made. As a conductor of sound it is most valuable for conveying messages in lieu of bells. ELECTRIC TELEGRAPH WIRES INSULATED WITH GUTTA PERCHA. The GUTTA PERCHA COMPANY, Patentees, 18, Wharf road, City-road, London.

C. LEFTWICH, VARNISH MANUFACTURER, LEAD, GLASS, and COLOUR WAREHOUSE,

21, Munster-street, Regent's-park. 20s. per cwt. given for old Lead. C. L. begs to call the attention of the Trade, Builders, &c to his stock of plumbers' cast-handles, plug ditto, brass-work, &c sheet-lead, and patent pipe-plate, patent plate, sheet and crown glass, white-lead, oils, colours, &c. Glass illuminators for floors or pavements, vaults, &c. in iron frames or not.

JAMES STIFF, MANUFACTURER of GLAZED STONE-WARE DRAIN PIPES,

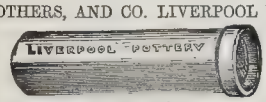
BENDS, JUNCTIONS, TRAPS, &c. 39, HIGH-STREET, LAMBETH, LONDON. Established 1731.

Water-Closet Pans, with Syphon Traps, 7s. 6d. each.

STRAIGHT TUBES, in Socket Joints, in Two Feet Lengths.

The great advantages attending the use of these articles are now so generally understood, as to render any enumeration of them almost superfluous. Their cheapness, efficiency, and durability, are universally admitted; while the rapidly increasing demand for them proves their estimated superiority over every other kind hitherto before the public for similar purposes.

Inspection is invited to an assorted Stock of Drain Tubes, of every form and size, adapted to the various situations for which they may be required; as also to the WATER-CLOSET PANS OF IMPROVED CONSTRUCTION, and interior glaze, far surpassing any other manufactured of Brown Stone Ware.



N.B. These are made without the discharge-hole being turned downwards.

May be had also at Messrs. GLADDISH'S LIME WHARFS, Pedlar's-acre, Westminster-bridge; City-road Wharf, City Basin; Dock-head, Bermondsey; Danver's Wharf, foot of Battersea-bridge, Chelsea; Pratt Wharf, King's-road, Camden New Town. J. TURNER, 2, South Wharf, Pread-street, Paddington; and at COLWILL, Brothers, 39, Brydges-street Covent Garden.

Drawings and List of Prices will be forwarded free, on application.

DOULTON AND WATTS'S

REGISTERED CLOSET PANS IN

ENAMELLED STONE WARE,

LAMBETH POTTERY, LONDON.

These Closet Pans are manufactured in a new kind of stone-ware, HIGHLY GLAZED, vitreous, of a white colour, are much improved in form, and are used and recommended by the engineers connected with the General Board of Health.

The Traps are smaller at the inlet, gradually enlarging towards the outlet, as a security against the introduction of improper substances into the drain.

They may also be had turned down.

PRICE 7s. 6d. each,

The same as for ordinary stone-ware, and may be had fitted with copper fans of the best construction at 1s. 3d. each extra.

STEPHEN GREEN'S IMPERIAL POTTERIES, LAMBETH.

yphon Pan, with or without STEPHEN GREEN'S Patent Air-tight Valve.

egistered Flushing Basin.—the most effective Syphon-trap yet offered to the public.

IMPORTANT TESTIMONIALS

TO THE EFFICIENT WORKING OF

STEPHEN GREEN'S

PATENT SYPHON FLUSHING BASIN,

AND

SELF-ACTING CLOSET CONNECTIONS.

Oxford, November, 1849.

GENTLEMEN,—Sixteen of your Closets having been put into operation at Christ Church College, I have great pleasure in giving my testimony as to their efficiency and simplicity.

HENRY J. UNDERWOOD, Architect.
R. S. HOGGAN, Engineer.

Royal Arsenal, Woolwich, June 24, 1852.

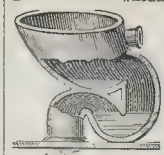
GENTLEMEN,—I have much pleasure in giving my testimony in favour of your Patent Syphon Flushing Basin, with Self-acting Closet Connections. There are several fixed here, which have been in use for upwards of twelve months, giving perfect satisfaction.

I am, Gentlemen,
Your obedient Servant,
WILLIAM CARTWRIGHT.

This effective article has not any Crank or Wire to get out of order, and is all complete and ready for use, and may be seen in operation at STEPHEN GREEN'S Manufactory, Lambeth.

LOCAL BOARDS OF HEALTH, WATER COMPANIES &c.

DESIDERATUM in SLUICE-VALVES.



FREEMAN ROE'S Patent Sluice-valve, can be repaired hout being removed from the main. All sizes, from 2 inch to inch. Patent Hydrants, self-closing Cocks, fire and other ups, Hot-water Apparatus, Baths, &c. Surveys made, and estiates given by FREEMAN ROE, Hydraulic, Sanitary, and Gas gineer, 70, Strand, and Upper Marsh, Lambeth.

GEORGE JENNINGS,
ENGINEER AND PLUMBERS' BRASSFOUNDER,
29, Great Charlotte-street, Blackfriars road.

SUPERIOR GLAZED STONEWARE

DRAIN PIPES, invented and manufactured by
WILLIAM NORTHEN, UNION POTTERY, No. 14, VAUXHALL-WALK, LAMBETH.

W. NORTHEN begs to inform surveyors, contractors, builders, water companies, &c. that he has completed "Spencer's" new patent machinery for making GLAZED STONEWARE DRAIN PIPES, JUNCTIONS, BENDS, ELBOWS, SYPHON-TRAPS, &c. &c. Amongst the many advantages of pipes made by this machinery over all others may be mentioned, that it insures perfect uniformity in form and size, both of pipes and sockets, the dies being of a different and better construction than any others now in use; and the pipes and sockets being made by one process are secure from separation.

W. N. invites particular attention to the superior quality of the glaze used in his manufacture, which is equal to glass, and rendering stoppage in the drains impossible.

W. NORTHEN'S PIPES MAY BE INSPECTED AT THE FOLLOWING PLACES, WHERE ORDERS ARE RECEIVED:—

Rosher and Co.'s Wharfs: Kingsland, Blackfriars, and Mill bank.—Martin and Wood's Market Wharf, Regent's-park Basin.—J. C. Hilton's, Crown and Horse-shoe Wharf, No. 6, Upper Thames-street.—W. Peters's, North Wharf, Paddington.—C. Richardson's, South Wharf, ditto.—G. Erith's, Cambridge Heath Wharf, Hackney. Millwood and Co.'s Wharfs, Kennington Basin, and Creek Wharf, Hammersmith.—J. Corbet's Depôt, Britton-street, Clerkenwell; and at the Pottery.

VICTORIA POTTERY, LEIGH,

NEAR SOUTHEND, ESSEX.

DAVID MOUNTAGUE,

MANUFACTURER of superior GLAZED STONEWARE PIPES (in accordance with the rules established by the Commissioners of Sewers), Bends, Traps, Closet-pans, Jars, Bottles, and every article in Stone Ware on advantageous terms. Also MANUFACTURER of superior Roman Cement and Plaster of Paris at Orchard House, Blackwall. Orders executed from the above places, from Falcon-wharf, so, Bankside, Blackfriars, and from Harrow-bridge-wharf, Stratford, Essex.

TO WATER COMPANIES AND PLUMBERS.

DEVEY and DALE'S CYLINDER BALL-

VALVE and BALL, Registered Oct. 28, 1853. No. 3,226.

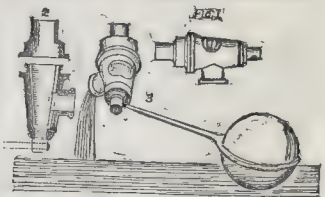

Fig. 1 represents the Cylinder Ball-valve in elevation. Fig. 2 is a Section of the Interior, showing the uninterrupted course of the Fluid. Fig 3 shows the Cylinder Ball valve in Action.

This Valve is peculiarly suited to High-pressure. The greater the weight of fluid, the more secure the Valve becomes, and the more effectually prevents waste. Manufactured solely by DEVEY and DALE, 8 and 9, Shoe-lane, and may be had of respectable Plumbers.

MILL WALL POTTERY (near Scott

Russell's).—Messrs. WILLCOX and CO. invite the attention of Contractors, Builders, and Wholesale Dealers to their extensive assortment of articles in WHITE EARTHENWARE for sanitary purposes. The only manufactory of the kind in the neighbourhood of London. Particulars forwarded on application.

JOHN WARNER and SONS, Patentees of

IMPROVEMENTS in the MANUFACTURE of LARGE BELLS.

J. W. & SONS having of late years devoted much time and study to the long neglected art of Bell Casting, have recently invented and patented a new process connected therewith, by which they are enabled to manufacture Bells of any size, note, weight, of superior tone, truer in form, and at less cost than has heretofore been accomplished.

Bells for Churches, Chapels, Colleges, Schools, Turret Clocks, &c. cast for any size, note, or weight, singly or in peals.

TUNED BY MACHINERY.

Stocked and wheels ready for fixing. Old Bells recast or taken in exchange.

MUSICAL HAND-BELLS tuned to the Chromatic Scale, with improved Clappers, and pegged on a new system, which gives a superior tone and facility for ringing.

SALES BY AUCTION.

The Gwydir Slate and Slab Works, near Pwllheli, North Wales.

MR. LEIFCHILD is instructed by the Proprietors to offer, for PUBLIC SALE, at GARRAWAYS, on MONDAY, MAY 8, at TWELVE o'CLOCK, that well known, important, and highly valuable freehold MINERAL PROPERTY, which forms a finer and more certain investment for capital than any others in the principality. The quarry is advantageously situate by the side of the excellent road from Pwllheli to Llanwrst, in the parish of Dolbenmaen in the county of Carnarvon, and the workings commence on the level of the road in the south-eastern face of the mountain, into which they extend in a north-westerly direction, the vein increasing rapidly in height and width as it advances. The space at present wrought out is about 50 feet long by 45 feet wide, and the height of the metal from the road is 62 feet; the depth from grass is nowise ascertained. The slate, which is bluish gray, and of undoubted first-rate quality, lies well for working, easily splitting for 40 feet in length, and at right angles with the cleavage planes. The buildings are all new, and are in substantial, there is a large manufactory room containing seven saws, with planing tackle, all driven from the quarry to the tide by a 12 horse steam engine, which works the whole being worked by a powerful water wheel 36 feet in diameter, with 2 feet 6 inches breast, for which the supply of water is ample and constant. The slate rock has been traced on its course to within the limits of this quarry, and the best test of the quality of the slate and slabs is the fact that they are ready sold as fast as they are manufactured, at the best Bangor prices. The whole concern is in first-rate working order, and there is immediate capability for making 50 tons per week, with a monthly increase of 10 or 15 tons more. The slates, when made, are carted to Trefriew Quarry, at a cost of 8s. 6d. per ton, which will be much lessened by the construction of one or two of the railways which are now before Parliament. The quarry is held from Lord Willoughby d'Eresby, of Gwydir Castle, on a long lease, at a nominal rent. The unprecedented and daily increasing demand for slates and slabs both at home and for the colonies, renders this property a most safe and profitable investment of capital, more especially as no outlay is required except for the working, as the whole machinery of the slate-Particulars and conditions of sale, with a plan of the works, and also reports from mineral surveyors, may be had of Mr. Lamborn, who is fully authorized to treat for the property by private contract London, 62, Mount-street.

TO LAND AND BUILDING SOCIETIES, MARKET GARDENERS, HERALISTS, AND OTHERS.

MESSRS. CRAWTER will SELL by AUCTION, at GARRAWAY'S COFFEE HOUSE, Change-alley, Corn-hill, London, on TUESDAY, MAY 23 1854, at ONE o'clock precisely, in lots, by direction of the trustee of Mr. Skelton and others desirable and important freehold and COPYHOLD PROPERTIES, situate at Upper Mitcham, Surrey, near Tooting, Streatham, and only three miles from Croydon, containing about 6 acres, consisting of a superior orchard, well stocked with standard and other fruit trees; also fine tillage land of first-rate quality, with common rights, and the advantage of eligible frontages available for building purposes situate in one of the most preferable parts of the parish, close to the common, in a good neighbourhood, with excellent roads and only a short distance from the Wimbledon and Croydon Railway line. May be viewed, and particulars had forthwith days prior to the sale, on application to Messrs. Cole, Solicitors, No. 4, Adelphi-terrace; at Garraway's; of Mr. E. Chart, Surveyor; and at the Three Kings, near the property; also the Duke's Head and Black's Head, Mitcham; Cock Inn, Sutton; principal Inns at Tooting, Merton, Car-hilton, Epsom, and Croydon; and of Messrs. Crawter, Surveyors, Land Agents, &c, 5, Bedford-row, and Cobham, Surrey.

FARRINGDON-STREET EXTENSION. Building Materials of Thirty Houses.

PULLEN and SON have the honour to announce that they will SELL by AUCTION, on the PREMISES, on THURSDAY, MAY 11, and following day, at TWELVE, by order of the Improvement Committee of the Corporation of the City of London, the whole of the valuable BUILDING MATERIALS of about thirty houses, factories, stabling, and premises in the Farringdon-street Extension, Charles-court, Castle street, and Great Saffron-hill, Cowkeswell, comprising about 600 yards of iron railing, several tons of lead, plain and ornamental prime oak and fir timber in roofs and floors, sashes, doors, and fittings, stone paving, shop fronts, counters, and drawers, stoves, ranges, sinks, lifting-jacks, copper, steam boiler, and various trade fixtures, and a great variety of useful materials. May be viewed two days previous. Catalogues had at the Architect's Office, Guildhall; and of Pullen and Son, 80, Fore-street, Cripplegate.

MAIZE HILL, GREENWICH. Capital Building Materials of a large Mansion adjoining Vanbrugh Castle

PENGE AND SYDENHAM, KENT, in the immediate vicinity of the Crystal Palace Very important Freehold Building Land, comprising about Nineteen Acres in hand, of which 10 acres will be given.

MESSRS. FAREBROTHER, CLARK, and LYE are instructed to SELL, at GARRAWAY'S, on MAY, in One Lot, by direction of the Trustees of the late John Laurie, an very important and valuable FREEHOLD ESTATE, situate adjoining to the village of Penge, in the immediate vicinity of the Crystal Palace, fronting the high road, and the Junction of the Brighton and South Coast and Croydon Railways with the Branch railway to the Palace, and midway between the Anerley and Sydenham stations. The whole estate contains about Nineteen Acres, and presents one of the most eligible sites for the erection of first-class residences now so much sought after in this rapidly rising neighbourhood. The property is most favourably situated from the Palace and grounds by the railroad, and it commands uninterrupted views over the whole together with the lovely and picturesque scenery in the neighbourhood. The property forms the remaining portion of Sydenham Park, which Messrs. Farebrother, Clark, and Lye sold to the Crystal Palace Company last year. The estate in hand [possession will be given May be viewed, and particulars with plans had at the Penge Tollbar; of A. Dodd, Esq. Solicitor, 2, Lancaster-place, Strand; at Garraway's; and at the Offices of Messrs. Farebrother, Clark, and Lye, Lancaster-place, Strand.

LEYTON AND WALTHAMSTOW.—Important Freehold Estates, comprising a Mansion known as the Poplars, with beautiful park like Lands, a Private Residence, with excellent Offices, and Pleasure grounds, the whole containing about 45 acres, especially adapted for building purposes

MESSRS. FAREBROTHER, CLARK, and LYE are instructed to SELL, at GARRAWAY'S, on WEDNESDAY, MAY 17, in Lots, unless previously disposed of by private contract, an important and valuable FREEHOLD ESTATE, situate in the parishes of Leyton and Walthamstow, about five miles from London, and only three-quarters of a mile from Leyton Station on the Eastern Counties Railway, and at a short distance from the Leabridge to Shernfold-lane, and from Leyton to Walthamstow, at Leyton Corner, comprising a valuable and beautiful freehold property, known as the Poplars, from the road by a carriage-sweep, screened by a wall and iron railing commanding rawing and dining rooms, 10 bed rooms, dressing room, &c. Bath room with hot and cold supply, and detached range of coach-houses, stabling, &c. with farm-yard, walled kitchen garden, conservatories, greenhouses, hot-house, rather garden, flower garden, and orchard, pleasure and park like grounds, from the road by a carriage-sweep, screened by a wall and iron railing containing rawing and dining rooms, 10 bed rooms, dressing room, &c. Bath room with hot and cold supply, and detached range of coach-houses, stabling, &c. with farm-yard, walled kitchen garden, conservatories, greenhouses, hot-house, rather garden, flower garden, and orchard, pleasure and park like grounds, and planted with choice shrubs and stately timber. A delightful retreat after the Wilderness, with excellent walks and fish-pond, together with sundry enclosures of highly productive pasture land, lying within a ring fence, and bolted by plantations, comprising about 20 acres, mainly Inclosures of Meadow and Arable Land, abutting on the Leabridge-road, containing about 14 acres. Also a capital brick-built Residence, situate at the corner of Grove-lane, Walthamstow, with excellent offices, conservatory, pleasure grounds, and a building estate of about 5 acres, in the occupation of Enoch Coller, Esq. at 120 per annum. The whole estate is laid out in building plots varying from one to five acres in extent. The situation of the property, its proximity to London and a railway, and possessing frontages of nearly two miles to the main roads, renders it particularly eligible for the erection of villa residences and a building estate of the first class.—To be viewed by tickets only, which, with particulars and plans, may be had of Messrs. Farebrother, Clark, and Lye, Lancaster-place, Strand. Particulars also of Messrs. Brundell, Randall, & Simmons, Solicitors, 16, Kings bench-walk, Temple; on the Estate, of the Gardener, who will show the property; and at Garraway's.

WALTHAMSTOW, ESSEX.—Valuable Freehold Estates, comprising two Mansions, a Newsagency, and 15 acres of principally Meadow Land, eligible for building purposes, and producing a present rental of £87 per annum

MESSRS. FARLBROTHER, CLARK, and LYE are instructed by the Trustees to SELL, at GARRAWAYS, on WEDNESDAY, MAY 17, at TWELVE o'clock, unless previously disposed of by private contract, very valuable FREEHOLD ESTATES, situate in Clay-street, Walthamstow; comprising a capital mansion, with stabling, gardens, orchard, and 5a. 1r. of meadow land, let to Mr. Morris for one year, at the moderate rent of £8, a detached residence, with stable, garden, and 2r. 22p. of meadow land, let to Mr. J. H. Fox, at £22, per annum; several cottages, let to Mr. Hall, at £20 per annum; several enclosures of valuable arable land, containing about 9 acres, with extensive frontages, and lately let at £22. 8s. per annum; and lastly, a piece of land, containing 2a. 2r. 15p. let to Mr. Bocking at £7 per annum, the whole affording a most eligible opportunity for a building speculation on an extensive scale.—Particulars and plans are preparing, which will in due time be had of the Estate Agents, Walthamstow; and at the Offices of Messrs. Maltby, Robinson, and Jackson, Solicitors, Bank-buildings; at Garraway's; and of Messrs. Farebrother, Clark, and Lye, 6, Lancaster place, Strand.

TO IRONMONGERS, BUILDERS, AND OTHERS.

MR. BILLINGAY is instructed to SELL by AUCTION, at the ROOMS, 29, Old Bond-street, on WEDNESDAY next, MAY 10, at TWELVE o'clock, a variety of superior Bright and Black REGISTER STOVES, by Sharp's Patent Ventilating Gill; with hob-grates, Marble Mantle-pieces, fenders, fire irons, &c.; a quantity of superior furnishing ironmongery, removed from Regent-street May be viewed the day prior and on the morning of sale.—Catalogues had at the Rooms and of Messrs. Chilton, Bowers, and Johnson, Solicitors, 7, Chancery-lane; and of Mr. Billingay, Valuer and Auctioneer to the Metal Trades, 31, Coleman-street, City.

TO BUILDING SOCIETIES, BUILDERS, AND OTHERS.

MR. W. C. FOULKES has received instructions to treat for the SALE of about 13 Acres of highly important FREEHOLD BUILDING GROUND, situate within 3 miles from London-bridge, in a locality much admired for the beauty of its scenery, and for the healthiness of its situation, and which is now undergoing considerable improvement, and will shortly be opened with a new station on the Croydon railway. The property is very favourably situated for building purposes, and from its proximity to the Crystal Palace, and the railway communication which will be afforded, must of necessity become greatly enhanced in value. There is very facility of access, both to the Palace and the City, and the property altogether offers a most eligible opportunity for investment. For further particulars, apply to Mr. Foulkes, Land and Mine Agent, 58, Old Broad street, City.

SALES BY AUCTION.

HALL'S WHARF, 232, HIGH-STREET, WAPPING.—TO SLATE MERCHANTS, SLATERS, BUILDERS, and Others.

MR. PEAKE is directed to SELL by AUCTION, on the PREMISES, as above, on TUESDAY, MAY 9, 1854 at TWELVE o'clock, in lots, about 20,000 Blue Hangor Slate, Queens, Princesses, Duchesses, and Ladies, all to measure as they rise from the vessel on the day of sale; and catalogues obtained on the Premises, and at Mr. Peake's offices, 14, Tooley-street.

DRAYTON-GREEN PALING, MIDDLESEX

MESSRS. PRICKETT and SON will SELL by AUCTION at the MART, on THURSDAY, MAY 11, at TWELVE in eight lots, several PLOTS of eligible BUILDING GROUND, situate about three-quarters of a mile from the Ealing Station, and nearly abutting on the Great Western Railway, admirably adapted for the erection of semi-detached or other first class residences, commanding views of Harrow, Richmond-hill, and Banstead-downs; containing frontages of 80 feet by depths of about 200 feet each. Particulars, with plans, may be obtained on application at the Mart; of Messrs. Clarence and Langdale, Solicitors, No. 48, end of Messrs. Prickett and Son, Auctioneers and Surveyors, 34, Southampton-buildings, Chancery-lane, and Highgate, Middlesex.

TO BUILDERS, CARPENTERS, CABINETMAKERS, AND OTHERS.

MR. LEREW will SELL by AUCTION, on the PREMISES, No. 42, Union-street Somers-town, on MONDAY, MAY 8, at ELEVEN for TWELVE, on account of the Executors of the late Mr. Bell, an excellent STOCK of a BUILDER, viz. 350 pine and 200 yellow and white planks, deals, and battens; 18,000 feet dry, wide pine boards; 10,000 feet quartering, 50 squares prepared 1 inch match boarding, dry and seasoned, fifty scaffold poles, forty ditto boards, and six dozen cords; fifty putlogs, 10 ladders, truck, bins, sieves, screens, sixty chimney pots, drain pipes, trowels, bow benders, gas-fittings, well-tackle, bucket, sashes and frames, doors, veneers, roofing tiles, sundry old materials, and useful items.—May be viewed on Saturday prior and morning of sale; and catalogues had on the Premises; and of Mr. Lerew, Auctioneer and Valuer, 3, Cardington-street, Hampstead-road, near the Euston-station

SOUTH COAST RAILWAY.—100 Acres adjoining a first-class station. Valuable Freehold Estate, very eligible for Building Sites.—TO BE SUBMITTED for PUBLIC COMPETITION, in the month of JUNE next, unless previously disposed of by private contract, a most desirable FREEHOLD ESTATE, comprising about 100 acres, adjoining the Junction Station at Polegate of the several railways leading to Brighton, Lewes, and London, to Hastings, to Eastbourne, and to Hadlham, and surrounded by excellent roads. Rarely does a property present such capabilities as the present of being conveniently and immediately divided and with excellent building sites, commanding such extensive views of the scenery of the Weald of Sussex, the South Downs, Pevensey Bay, &c. and being in the centre of the South Down Fox-hunt, within ten minutes by rail of the rapidly-increasing watering-place of Eastbourne, and within thirty minutes of Hastings, St. Leonard's, and Lewes. The property is divided by the railway, the station which adjoins is a first-class station, and twenty-eight passenger trains run from it in the course of the day. The property abounds in excellent Brick-earth of unlimited extent, and is well supplied with water, and the whole might be covered with buildings from bricks made upon the ground, in addition to supplying the great demand for bricks at Eastbourne, St. Leonard's, and Bexhill. To any person contracting portions of this property into brick-fields for the supply of the new town of Eastbourne alone, a handsome income might be realised; but the eligibility of the site for building is such that the property will soon become too valuable for such purpose.—Further particulars may be obtained, and a plan of the estate seen by applying to Messrs. Dallman and Whitmarsh, Solicitors, Battle, Sussex.

NOTICE.—The next Liverpool PERIODICAL SALE of Cabinet-making, Machine-making, Fancy and Furniture WOODS, &c. will take place on WEDNESDAY, the 26th MAY, 1854, at TWELVE o'clock at noon, in the Sheds, Brunswick-dock, Liverpool (not on account of the importer and others). EDWARD CHALONER, Broker, No. 6, East side Queen's Dock, Liverpool, Where Catalogues may now be had, or they may be seen at the Office of this paper.

ROYAL ACADEMY of ARTS, Trafalgar-square.—The Exhibition of the Royal Academy is NOW OPEN Admission (from Eight o'clock till Seven). One Shilling. Catalogue, One Shilling.

JOHN PRESCOTT KNIGHT, R.A. Secretary.

SOCIETY of PAINTERS in WATER-COLOURS.—The Fiftieth Annual Exhibition is NOW OPEN at their Gallery, 53, Pall Mall East. Admittance, 1s. Catalogue, 6d. JOSEPH J. JENKINS, Secretary.

COMPETITIONS.

TO ARCHITECTS, SURVEYORS, AND OTHERS.

PLANS, DESIGNS, and DRAWINGS are required for building TWO CEMETERY CHAPELS adjoining each other and LODGE, for the Holbeach Burial-ground. The expense of the chapels is not to exceed 600l. and the lodge 30l. Plans to comprise elevations and ground plans accompanied by approximating estimate of the expense. 5l is offered for the plan considered to be the best (unless the architect shall also contract for the works); 3l for the second best, and 2l for the third best. The plans to be sent to the Clerk, sealed and indorsed, on or before the 31st of MAY next.

By order of the Burial Board,
EDWARD GEORGE AYLIFF, Clerk.

Holbeach, May 3, 1854.

TO STONEWARE PIPE MANUFACTURERS

MESSRS. FASSNIDGE and SON, Builders, of Uxbridge, would be glad to receive TENDERS from persons willing to supply about 500 of each 6-inch and 9-inch GLAZED SOCKETED DRAIN-PIPES, delivered alongside at Uxbridge, or at the West Drayton Station of the Great Western Railway.

CONTRACTS.

TO CONTRACTORS

Royal Engineers' Office, Chatham, April 27, 1854.

NOTICE is hereby given, that TENDERS will be received at the Ordnance Office, Pall-mall, London, on or before MONDAY, the 22nd day of MAY next, from Persons desirous of Contracting with the Honourable Board of Ordnance,

For FURNISHING and ERECTING a CAST-IRON TANK, capable of containing 18,000 gallons, at BROMPTON BARRACKS, near CHATHAM.

Plans and specifications of the work are to be seen, and forms of Tender obtained, on application at the Royal Engineer Office, Chatham, between the hours of TEN and FOUR, till the 20th of MAY next, Sundays excepted.

The person whose Tender may be accepted will be required to enter into a bond, with two eligible securities, jointly and separately to be bound, under a penalty of 150l. for the due performance of the Contract.

Tenders to be addressed to the Secretary to the Board of Ordnance, Ordnance Office, Pall-mall, London, and to be delivered free, endorsed, "Tender for Works at Chatham."

No Tender can be admitted after the said 22nd day of MAY, 1854.

The Board of Ordnance reserve to themselves the right of rejecting the whole or any of the Tenders.

TO CONTRACTORS

Royal Engineers' Office, Chatham, 4th May, 1854.

NOTICE is hereby given, that TENDERS will be received at the Ordnance Office, Pall mall, London, on or before MONDAY, the 22nd day of MAY, 1854, from persons desirous of contracting with the Honourable Board of Ordnance,

For REFORMING the TERREPLEIN of the CASEMATES at the GENERAL HOSPITAL, FORT PITT, CHATHAM.

Plans and specifications of the work are to be seen, and forms of Tender obtained on application at the Royal Engineers' Office, Chatham, between the hours of TEN and FOUR, till the 20th of MAY, 1854, Sundays excepted.

The person whose Tender may be accepted will be required to enter into a bond, with two eligible securities, jointly and separately to be bound under a penalty of 700l. for the due performance of the contract.

Tenders to be addressed to the Secretary to the Board of Ordnance, Ordnance Office, Pall mall, London, and to be delivered free, endorsed "Tender for Works at Chatham."

No Tender can be admitted after the said 22nd day of MAY, 1854.

The Board of Ordnance reserve to themselves the right of rejecting the whole or any of the Tenders.

ORDNANCE CONTRACTS.—TENDERS required for REPAVING with GRANITE a portion of the OFFICERS' and TROOP STABLES at LEEDS CAVALRY BARRACKS. Notice is hereby given, that the Honourable the Board of Ordnance will receive TENDERS on or before THURSDAY, the 25th of MAY, 1854, from such persons as may be willing to perform the above-mentioned work. Specifications for this work are to be seen, and forms of Tender obtained, with every other information, on application at the Royal Engineer's Office, 16, Parliament-street, York, or at the Barracks, Leeds, any day (Sundays excepted), between TEN and FOUR o'clock, until WEDNESDAY, the 24th of MAY, 1854.

Royal Engineers' Office, 16, Parliament-street,
York, 2nd May, 1854.

TO BUILDERS.

SEALED TENDERS for CONSTRUCTING a SEA-WALL, at St. Nicholas' Island, will be received at the Ordnance Office, Pall mall, London, on or before the 22nd of MAY instant, at noon, addressed to the Secretary to the Board of Ordnance, and endorsed "Tender for constructing a Sea-wall at St. Nicholas' Island, Plymouth," on the left-hand corner of the envelope. Plans and specifications, with terms and conditions, may be seen, and forms for Tenders, and every information obtained at the Royal Engineers' Office, at Devonport, between the hours of NINE and FOUR o'clock on week days from MONDAY, the 15th instant, to SATURDAY, the 20th instant, both days inclusive.

Royal Engineers' Office, Devonport, 10th May, 1854.

CONTRACT No. 7.—PLUMSTEAD, WOOLWICH, and CHARLTON CONSUMERS' PURE WATER COMPANY.—Notice is hereby given, that the Directors of the above Company are desirous to receive TENDERS for the BUILDING and CONSTRUCTING a HIGH-SERVICE RESERVOIR on their Land at Shooter's hill, Kent. Plans and specifications may be seen, on application at the Office of S. C. HODGESHAM Esq. 14, Burlington-chambers, Adelphi, London, between the hours of TEN and FOUR o'clock. Sealed Tenders, in a form to be provided by the Company's Engineer, must be sent in on or before TUESDAY, the 23rd day of MAY, 1854, addressed to the Secretary, at the Works.—By order,

Plumstead, May 6, 1854. JAMES BLACK, Secretary.

TO IRONFOUNDERS.

THE KENSINGTON IMPROVEMENT COMMISSIONERS are willing to CONTRACT for the SUPPLY of 100 LAMP COLUMNS, to be delivered within the parish of Kensington, from time to time as may be directed.—Particulars may be had of Mr. JAMES BROADBRIDGE, the Commissioners' Surveyor. Tenders to be delivered on or before FOUR o'clock p.m. on WEDNESDAY, the 24th inst. at the Commissioners' Office, Vestry-hall, indorsed, "Tenders for Lamp Columns."

REUBEN GREEN, Clerk.

May 11, 1854.

TO GASFITTERS AND OTHERS

THE KENSINGTON IMPROVEMENT COMMISSIONERS are desirous of CONTRACTING for the SUPPLY of about 100 LANTERN-IRONS and 14-inch Lantern Upright Bottoms. Bends and Fittings, together or separate.—Particulars may be had of Mr. JAMES BROADBRIDGE, the Commissioners' Surveyor. Duplicate copies of the drawings and specification may be seen, and forms of Tender (with quantities) may be obtained at my Office and at the Offices of the Engineers, Messrs. LEE and STEVENS N. 7, Duke-street, Westminster, on and after MONDAY, the 8th inst. and Tenders must be sent in to me on or before THURSDAY, the 18th inst.

By order of the Board,
(Signed) GEORGE LOWTHER, Clerk.

Selby, 3rd May, 1854.

TO BUILDERS, IRONFOUNDERS, AND ROAD CONTRACTORS

ST. MARYLEBONE EXTRAMURAL CEMETERY.—The Burial Board for the Parish of St. Marylebone, in the county of Middlesex, will meet on TUESDAY, the 16th day of MAY next, at ELEVEN o'clock in the forenoon, to receive TENDERS for the ERECTION of TWO CHAPELS, lodges, boundary-wall, entrance gates, iron railing, &c. for forming roads, footpaths, draining and planting 23 acres of ground, called the Newmarket Farm, East-end, Finchley.—Further particulars may be known on application at the offices of the Architects, Messrs. BARNETT and BIRCH, 3, Verulam-buildings, Gray's-inn, where plans, &c. can be obtained on and after MONDAY, the 8th day of MAY. The Tenders to be delivered sealed, at the Court-house, Marylebone-lane, before ELEVEN o'clock in the forenoon on the said 16th day of MAY, and the parties tendering, or some person on their behalf, to be in attendance at the time of opening the Tenders. The Burial Board do not bind themselves to accept the lowest or any Tender. By order,

W. E. GREENWELL, Clerk.

TO BUILDERS AND CONTRACTORS.

THE Guardians of the Poor of the Sunderland Union being about to ERECT a NEW UNION WORKHOUSE, capable of accommodating 500 inmates, invite the COMPETITION of Experienced Bricklayers, Masons, Carpenters, Joiners, Plasterers, Plumbers, Glaziers, Slaters, Iron-founders, and Painters, who may be desirous of tendering for the whole or for any part or all of the works. Such persons may see the drawings and specifications at the Board-room, Rez-de-chaussée-buildings, No. 116, High-street West, Sunderland, from the 8th to the 16th of MAY, both inclusive, and may obtain every necessary information on application to JOHN EDWIN OATES, Esq. Architect, York. Sealed Tenders, endorsed "Tender for Workhouse," to be sent in to me before TWO o'clock on the afternoon of the 18th MAY, addressed to JAMES HILLS, Esq. Chairman of the Board of Guardians, Sunderland. No pledge is given to accept the lowest or any Tender.

By order,
(Signed) N. C. REED, Clerk.

Sunderland, 18th April, 1854.

TO BUILDERS AND OTHERS.

PERSONS desirous of CONTRACTING for the ERECTION of STOREHOUSES, ARMOURIES, and QUARTERS for Non-commissioned Officers, of the South Gloucester Militia, at Gloucester, and of the North Gloucester Militia at Cirencester, may inspect the plans and specifications at the Offices of Messrs. FULLJAMES and WALLER, any time between the hours of TEN o'clock a.m. and SIX o'clock p.m. after the 22nd of APRIL. Tenders to be sent in sealed, endorsed "Tenders for Storehouses," addressed to Messrs. FULLJAMES and WALLER, Architects, Gloucester, on or before the 17th MAY next, of whom further particulars may be obtained.

Gloucester, 8th March, 1854.

TO CONTRACTORS FOR PUBLIC WORKS.

THE MINISTER of the ROYAL DANISH NAVY will be ready on the 10th day of JUNE to receive TENDERS for the CONSTRUCTION of a DRY DOCK, 325 feet long, 80 feet of WARPING, THREE BRIDGES, and other Works. Plans, specifications, and quantities of the same will be ready for inspection on the 22nd day of MAY next, at the Ministry of the Royal Danish Navy, at Copenhagen, at the Offices of Mr. ALFRED GILES, the Engineer, 9, Adelphi-terrace, London. The Engineer reserves to himself the right to refuse inspection of the plans to any parties who have not expressed such intention; and the Danish Minister does not bind himself to accept the lowest or any Tender. Security to the amount of 10,000 rd will be required for the due performance of the contract.

QUEEN BILLE.

The Ministry of the Royal Danish Navy, Copenhagen,
15th April, 1854.

NOTICE to BUILDERS.—The Commanding Royal Engineer of the London District hereby gives Notice, that sealed TENDERS, addressed to the Secretary to the Board of Ordnance, will be received at the Office of Ordnance, Pall mall, on or before the 18th of MAY, 1854, for REFORMING the DRAINAGE and SEWERAGE, and ERECTING WATER-CLOSETS, and other ALTERATIONS, at the Old Barracks, Windsor. The specification and plans for the above service, and forms of Tender obtained, at the Royal Engineers' Office, 31, James-street, Pimlico, daily, between the hours of TEN and FOUR o'clock, from the 20th of APRIL to the 17th of MAY, 1854. The Board of Ordnance reserve to themselves the right of rejecting the whole or any of the Tenders.

Royal Engineer's Office, London District, May 2, 1854.

TO BUILDERS.

PERSONS desirous of CONTRACTING for the ERECTION of a detached VILLA at Redhill, near Reigate, may inspect the drawings and specification at the Offices of the Architect on and after MONDAY, May 8. The lowest Tender will not necessarily be accepted.—WILLIAM YOUNG, Architect, 5, Chancery-lane.

[For remainder of Contracts see next page.

CONTRACTS.

NEWMARKET LOCAL BOARD of HEALTH.—[illegible] that they are prepared to receive TENDERS, separately, [illegible] who may be desirous of contracting for the following CONTRACTS:—

CONTRACT No. 1.—For the MANUFACTURE and SUPPLY of [illegible] PIPES and TRAPS.

CONTRACT No. 2.—For the MANUFACTURE and SUPPLY of [illegible] SEWAGE DRAINAGE PIPES and fittings.

CONTRACT No. 3.—For LAYING, JOINTING, and FIXING the said MAIN WATER PIPES, BRIDLE-PIPES, COCKS, HYDRANTS, and APPENDAGES.

CONTRACT No. 4.—For LAYING and JOINTING certain DRAIN OF PIPES in the Uniformum of other works in connection therewith.

CONTRACT No. 5.—For SINKING a WELL and BORING HEADINGS.

CONTRACT No. 6.—For the MANUFACTURE, ERECTION, and COMPLETION of a STEAM ENGINE, BOILERS, PUMP, and APPENDAGES.

CONTRACT No. 7.—For the FORMATION, CONSTRUCTION, and COMPLETION of an ARCHED BRICK RESERVOIR, and [illegible] for the ERECTION and COMPLETION of an ENGINE-HOUSE, BOILER-HOUSE, COTTAGE, and [illegible] PARK FENCE.

The drawings and specifications may be seen and forms of Tender to an quote may be obtained on application at the Office and Tenders must be sent in on or before SATURDAY, the 27th inst.

Inquiries for purposes connected with the Contract may be addressed to Mr. Thomas, Messrs. LEE and STEVENS, No. 7, Duke-street, Westminster.

The Board do not bind themselves to accept the lowest or other Tender.

By order of the Board,
WM. SUTTON, Clerk.

Newmarket, 5th May, 1854.

BOROUGH of BIRMINGHAM.—"The Birmingham Improvement Act, 1851." BIRMINGHAM SEWERS.—Contract No. 25.—To CONTRACTORS for PUBLIC WORKS.—The Public Works Committee of the Council of the said Borough hereby give Notice, that on MONDAY next, the 22nd day of MAY next they will meet at the Committee-room, Council House, Paradise-street, to receive and open sealed TENDERS from persons willing to contract with them for the CONSTRUCTION of the following WORKS, viz.—A MAIN BRICK SEWER, 9 feet in height, 6 feet 3 inches in width, and 1,270 lineal yards in length, to be commenced at the River Rea, near the Lower Dingle, Bordesley, and terminating at the Lower Dingle, Deritend, in the Parish of Aston, with the necessary Manholes, Lamp-holes, Ventilators, and other Works connected therewith.

Plans, Sections, and Drawings of the proposed Works may be seen at the Office of the Borough Engineer and Surveyor, Council House, Paradise-street, on and after the 15th instant, from NINE o'clock in the forenoon until FOUR o'clock in the afternoon of each day (Sundays excepted), and Specifications, Forms of Tender, and Conditions may be obtained at the Office of the Borough Accountant, Council House, Paradise-street, on and after the 15th instant, on payment of the sum of Two Guineas for each Contract.

Each Tender must be delivered at the Office of the Borough Accountant, Council House, Paradise-street, on or before THURSDAY, the 25th day of MAY next, and must be accompanied by a Deposit of Money or approved Security for the due performance of the Contract, and for the payment of the Workmen employed thereon, according to the Conditions of Contract.

The Committee do not bind themselves to accept the lowest or any Tender.

By order of the Committee,
JOHN SHERLOCK, Town Clerk.

Council House, Birmingham, 5th May, 1854.

BOROUGH of BIRMINGHAM.—"The Birmingham Improvement Act, 1851." BIRMINGHAM SEWERS.—Contract No. 26.—To CONTRACTORS for PUBLIC WORKS.—The Public Works Committee of the Council of the said Borough hereby give Notice that on MONDAY, the 22nd day of MAY next they will meet at the Committee-room, Council House, Paradise-street, to receive and open sealed TENDERS from persons willing to contract with them for the CONSTRUCTION of the following WORKS, viz.—A MAIN BRICK SEWER, 9 feet in height, 6 feet 3 inches in width, and 1,270 lineal yards in length, to be commenced at the River Rea, near the Lower Dingle, Bordesley, and terminating at the Lower Dingle, Deritend, in the Parish of Aston, with the necessary Manholes, Lamp-holes, Ventilators, and other Works connected therewith.

Plans, Sections, and Drawings of the proposed Works may be seen at the Office of the Borough Engineer and Surveyor, Council House, Paradise-street, on and after the 15th instant, from NINE o'clock in the forenoon until FOUR o'clock in the afternoon of each day (Sundays excepted), and Specifications, Forms of Tender, and Conditions may be obtained at the Office of the Borough Accountant, Council House, Paradise-street, on and after the 15th instant, on payment of the sum of Two Guineas for each Contract.

Each Tender must be delivered at the Office of the Borough Accountant, Council House, Paradise-street, on or before THURSDAY, the 25th day of MAY next, and must be accompanied by a Deposit of Money or approved Security for the due performance of the Contract, and for the payment of the Workmen employed thereon, according to the Conditions of Contract.

The Committee do not bind themselves to accept the lowest or any Tender.

By order of the Committee,
JOHN SHERLOCK, Town Clerk.

Council House, Birmingham, 5th May, 1854.

CONTRACTS.

BOROUGH of BIRMINGHAM.—"The Birmingham Improvement Act, 1851."—Contract No. 26.—To CONTRACTORS for PUBLIC WORKS.—The Public Works Committee of the Council of the said Borough hereby give Notice, that on MONDAY, the 22nd day of MAY next they will meet at the Committee-room, Council House, Paradise-street, to receive and open sealed TENDERS from persons willing to contract with them for the CONSTRUCTION of the following WORKS, viz.—A MAIN BRICK SEWER, 9 feet in height, 6 feet 3 inches in width, and 1,270 lineal yards in length, to be commenced at the River Rea, near the entrance to the Derby Station on Lawley Street, and to be continued thence under the bed of the River Rea, and Nechells-street, to its junction with Waterlow-lane, thence along Waterlow-lane, under the Birmingham and Warwick Junction Canal, to its junction with Saltley-lane and the Coventry road; thence along Saltley-lane, under the Warwick and Birmingham Canal and the Birmingham and Oxford Junction Railway, to its junction with Camp-hill and Stratford-road; and the said Sewer to have a branch junction with Stoney-lane, as also such other Branch Sewers, 9 feet in height, 6 feet 3 inches in width, as may be required, with proper and necessary Gullies, Ventilators, and other works connected therewith. Plans, drawings, and drawings of the proposed works may be seen at the undermentioned Offices daily, between the hours of TEN and FOUR, on and after MONDAY, the 1st day of MAY next, where printed copies of specifications and general conditions may be obtained on payment of the sum of Two Guineas.

The party whose Tender may be accepted shall enter into a bond, jointly and severally, with two responsible sureties, in a sum equal to one-fourth the amount of his Tender for the due performance of the contract, and for the payment of such wages as may be due to workmen employed thereon.

Each Tender must be delivered at the Office of the Borough Accountant, Council House, Paradise-street, on or before THURSDAY, the 25th day of MAY next, and must be accompanied by a Deposit of Money or approved Security for the due performance of the Contract, and for the payment of the Workmen employed thereon, according to the Conditions of Contract.

The Committee do not bind themselves to accept the lowest or other Tender.

By order of the Committee,
JOHN SHERLOCK, Town Clerk.

Council House, Birmingham, 5th May, 1854.

BOROUGH of BIRMINGHAM.—"The Birmingham Improvement Act, 1851." BIRMINGHAM SEWERS.—Contract No. 27.—To CONTRACTORS for PUBLIC WORKS.—The Public Works Committee of the Council of the said Borough hereby give Notice that on MONDAY, the 22nd day of MAY next they will meet at the Committee-room, Council House, Paradise-street, to receive and open sealed TENDERS from persons willing to contract with them for the CONSTRUCTION of the following WORKS, viz.—A MAIN BRICK SEWER, 9 feet in height, 6 feet 3 inches in width, and 1,890 lineal yards in length, to be commenced at the Hockley Brook, near to the entrance to the Assay Office, in Hockley-street, and to be continued thence along a proposed continuation of Hewes-street from New Town-row to Phillip-street, Hewes-street, Brewery-street, Cecil-street, an intended street [illegible] Hay-street, Loveday-street, Lawley-street, and the end of the existing sewer under Lawley-street, and Lawley-street buildings and Lawley-lane, to the Canal Basin, Paradise-street, and Summer-hill-terrace, with branch sewers to Caroline-street, Great Hampton-street, Hockley-hill, Vittoria-street, Warstone-lane, Warstone-lane Cemetery, Warstone-lane, Paradise-street, Summer-hill-terrace, Summer-hill, Great Hampton-row, Newhall-street, Hill-street, Ashted-row, Ashted, Great Charles-street, Great Charles-street Back, Great Charles

CONTRACTS.

TO BUILDERS AND OTHERS

NOTICE is hereby given, that TENDERS for the ERECTION of DWELLINGS for the Non-Commissioned Officers of the 3rd Regiment of Middlesex Militia, at Turnham green, will be received at the Middlesex Lieutenancy Office, 4, Old Palace-yard, Westminster, on or before TUESDAY, the 26th inst. at TWELVE o'clock. The plans and specifications of the proposed works may be inspected on and after MONDAY next, between the hours of TEN and FIVE, at the Office of the Architect, Mr F. H. FOWNALL, 14, Whitehall-pl., where also copies of the quantities may be obtained. The Lieutenancy reserves to itself the right of rejecting the whole or any of the Tenders.

RICHARD NICHOLSON, Clerk to the Lieutenancy.
4, Old Palace-yard, May 11, 1854.

ROTHERHAM and KIMBERWORTH WATER-WORKS.—Contract No. 2.—The Local Board of Health are prepared to receive TENDERS for the CONSTRUCTION and COMPLETION of TWO ARCHED SERVICE RESERVOIRS, an AQUEDUCT, RETAINING WALLS, and BOUNDARY FENCES. Duplicate copies of the drawings and specification may be seen, and forms of Tender (with quantities), may be obtained at my Office, and at the Offices of the Engineers, Messrs. LEE and STEVENSON, 7, Duke-street, Westminster, and Tenders must be sent in time on or before TUESDAY, the 23rd instant.—By order of the Board.

(Signed) JOHN BARRAS, Clerk.

Rotherham, May 16, 1854.

TO ROAD CONTRACTORS AND OTHERS.

THE Directors of the Lambeth and Provincial Freehold Land Society are prepared to receive TENDERS for the COMPLETION of the REMAINDER of the ROADS on their Hanger-lane Estate Tottenham (about one mile from the station), may be seen, daily at the Offices, 211, High street, Borough. Tenders must be delivered, endorsed "Tender for Roads, Hanger-lane," before SIX o'clock on WEDNESDAY, the 17th inst. The Directors do not bind themselves to accept the lowest or any Tender.—May 11, 1854. W. BANKS, Secretary

ST. GILES-IN-THE-FIELDS and ST. GEORGE, BLOOMSBURY.—TO STONE MERCHANTS, GRAVEL DIGGERS, SCAVENGERS, and CONTRACTORS for CARTAGE.—Notice is hereby given, that the Committee for Paving, Cleansing, and Lighting these parishes, will meet at the Vestry-room of St. Giles-in-the-Fields, on THURSDAY, the 1st day of JUNE next, at TEN o'clock in the forenoon precisely, to receive PROPOSALS from such person or persons as may be willing to CONTRACT for all or any of the following materials, pursuant to orders to be given by the Committee (namely, for supplying the Committee with the best NEW SQUARED ABERDEEN, MOUNT-SORREL, and other Granite, of certain widths and depths, as per ton, for each sort; also best ELAND-EDGE YORKSHIRE, and other Post Paving, as per yard superficial; and also the best BROKEN GUERNSEY or MOUNT-SORREL GRANITE, as per cubic yard. A full particular of the several widths and depths, and thickness of the Granite and York to be supplied, may be had by applying at the Clerk's Office, 21, Hardstreet, Bloomsbury-square; or of Mr. ARCHIBALD WILSON, Surveyor to the Commissioners at the Stone yard, 126, Holborn. Also the best YELLOW or RENED BINDER, for RETHAMES BALLAST, and SAND at per yard cube. The said several lastmentioned articles to be delivered in such quantities, at such times, and in such places within the said parishes, as either of them as the Committee may direct. Also to receive PROPOSALS and CONTRACT for CARTAGE, for the Committee, within the parishes, of GOLD STONE GRAVEL, SLOP, &c. at per yard. The cart used for this purpose must not measure less than 40 cubical feet. Proposals for the above to be for the term of one year, from Midsummer next. Also to receive PROPOSALS from such person or persons as may be willing to CONTRACT for ONE, TWO, or THREE YEARS, from Midsummer next, for removing from time to time as may be required by the Committee all SLOP, SLUSH, MUD, DUST, FILTH, and SOIL, as shall be swept together, and be placed by the men employed by the Committee, in or upon the carriage and footways of the squares, streets, lanes, and other places in the parishes Lincoln's-inn fields and the streets and places built upon land belonging to the Foundling Hospital excepted, and to dispose of all such Slop, Slush, &c. The cart to be used for such purpose must not measure less than 40 cubical feet. And for taking away the DUST and ASHES, &c. from the houses and buildings of the inhabitants of the several squares, streets, and other places respectively; and the proposals for the last-mentioned works are in addition to certain three separate and distinct Tenders, viz. one TENDER for the removal of SLOP, SLUSH, &c. at per load, and another TENDER for the REMOVAL of SLOP, SLUSH, &c. at per annum, and another distinct TENDER for the privilege of taking away the DUST and ASHES. The Secretaries of Companies and persons sending Tender, are required to attend at the Vestry-room, at the time of the meeting. The contractor or contractors not to let or assign his or their contract, work, or works, to be done, or any part or parts thereof respectively, without the special consent of the Committee. Security to the satisfaction of the Committee, will be required for the performance of the several contracts, and the names, places of abode, &c. of the persons to be offered as sureties, to be sent with the proposals sealed, to be endorsed as the case may be. Drafts of the several contracts may be seen at the Clerk's Office. The Committee will not bind themselves to accept the lowest Tender, and will defray the charge for each of the contracts and bonds. Payments to be made quarterly. Printed particulars for the persons proposing for the supply of Stone, Gravel, and Carting, may be had of the Clerk or Surveyor as above.

By order of the Committee,
ROBERT FINNIS, Clerk.

May 11, 1854.

NEWCASTLE and BLYTH MARSH TURNPIKE-ROADS.—TO ROAD CONTRACTORS and OTHERS.—Notice is hereby given, that the Trustees of the Newcastle and Blyth Marsh Turnpike roads are desirous of receiving TENDERS for REPAIRING and MAINTAINING the said ROADS, and the Fences, Ditches, Drains, and Watercourses thereof for the period of three, five, or seven years, to commence on the 24th day of SEPTEMBER next. The roads will be divided into two sections, of the respective lengths of 9¼ miles and 10¾ miles, and parties may tender for repairing one or both of such sections. Specifications and particulars of the works required, and the form of contract, may be seen, on and after the 24th day of MAY instant, at the Office of Mr. ELLIOT, the Surveyor of the Roads, Acomb street, Hanley, where any further information may be obtained. All Tenders to be in writing, indorsed "Tender for Repairing Newcastle and Blyth Marsh Turnpike roads," to contain the names and descriptions of two sufficient sureties for the due performance of the contract, and to be delivered sealed at my Office, in Brook-street, Stoke-upon-Trent, on or before the 24th day of JUNE next. The Trustees do not bind themselves to accept the lowest or any Tender.

WM. KEARY, Clerk to the said Trustees.

Stoke-upon-Trent, 9th May, 1854.

TO BUILDERS.

BUILDERS desirous of submitting TENDERS for the proposed ALTERATIONS and RESEATING of FARNHAM CHURCH, Surrey, may see the plans and specifications proposed for the purpose, at the Bush Hotel, Farnham, any time between the hours of NINE and FIVE Sundays excepted, from MONDAY, the 8th of MAY, till SATURDAY, the 27th of MAY, on which day the Tenders are to be delivered, sealed and endorsed, "Tender for the Works at Farnham Church," at the house of the undersigned, in Farnham. The Committee do not bind themselves to accept the lowest Tender, or any, if not deemed satisfactory.

Committee-room, Bush Hotel, May 6, 1854.

TO ROAD CONTRACTORS AND OTHERS

THE Committee of the City of London and Counties Freehold Land Society are desirous of receiving TENDERS for CONSTRUCTING the ROADS, DRAINS, and other Works on an Estate at Walthamstow. The specification and plans may be seen at the Offices of the Society, 79, Farringdon-street, on and after TUESDAY, the 16th inst. Tenders must be delivered, endorsed "Tenders for Roads, &c." before FIVE o'clock on WEDNESDAY, the 24th inst.

JAMES HIGHAM, Secretary.

HART AND SON,

WHOLESALE IRONMONGERS, MANUFACTURERS, &c.
53, 54, & 55, WYCH-STREET, STRAND.

PITT'S PATENT SELF-ADJUSTING DOOR FURNITURE, IN WOOD, CHINA, GLASS, &c.

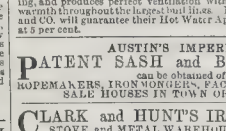
LOCKS, HINGES, BOLTS, HANDLES, &c.

HEATING by HOT WATER.—J. JONES, Iron Merchant, has always a great variety of CONICAL and SADDLE BOILERS in STOCK; also fire and furnace bars, ornamental and plain supply cisterns, double doors and frames, furnace grates, soot doors for the same, hot water pipes, elbows, tees, syphons, throttle valves, stop cocks, flange and socket elbows, &c., also, trough pipes. Drawings and prices of the above, on application to J. JONES, Iron-bridge-wharf, No. 6, Bankside, London, near the Southwark-iron-bridge.

TO ARCHITECTS, TIMBER MERCHANTS, AND BRICK MANUFACTURERS

THE best and quickest drying of the wood, bricks, and houses, is obtained by the BOILESVE'S PATENT CALORIFERE, evaporating in twenty-four hours about 6 gallons of water, without altering the finest forms or injuring the quality of the most precious articles. The Calorifere works by hot air only, without any machinery or power. Small room is required; no repair necessary for many years. A great deal of fuel, large stores, or wharfs saved, and rent thereby considerably reduced by the use of the above valuable stove. It is in operation at Wood-paving Company's Works, Pimlico; at Mr. Mackenzie's, Architect, of Victoria-street, Westminster; Vogan, Son, and Raymond, Dockhead, and several maltsters, millers, and manufacturers in London and country. Apply per post to T. BOILESVE, Engineer for French Flour Mills, Turbines, &c. 55, King William-street, City.

HOT WATER APPARATUS, adapted for Horticultural and every other description of Build ings: improved Boilers, requiring no brickwork; Warm Air Apparatus, &c. Apply to SPILLER and TAYLER, Engineers, Butlers s.



WARMING by HOT WATER.—J. WEEKS and CO. KING'S-ROAD, CHELSEA, HOT WATER APPARATUS MANUFACTORY, whilst respectfully soliciting the attention of architects, builders, &c. to their superior apparatus for warming churches, mansions, halls, offices, and public buildings, by the circulation of hot water in pipes, beg to call particular attention to the scientific statement in the "Builder" of Jan. 14, 1854, of the fully believe out the able address of the Rev. H. J. Bigge, delivered at a meeting of the Architectural Society wherein Mr Bigge shows that in venting by hot water is truly the only effective system applicable to warming churches and other large buildings. It is free from all objections, is economical in its working, and produces perfect ventilation with a uniform comfortable warmth throughout the largest building. Messrs. JOHN WEEKS and CO. will guarantee their Hot Water Apparatus for thirty years at 5 per cent.

AUSTIN'S IMPERIAL

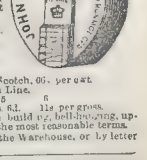
METAL ROLLERS.—A pair of best chilled METAL ROLLERS, 30 inches long, 12 inches diameter, made by Jones, Birmingham, with roll frames, pinions, and pedestal frames, all complete and quite new, never having been used, cost 160l.—will be sold a great bargain, in consequence of a dissolution of partnership. Apply to ALLDRIDGE and CO. 24, Rood-lane, Fenchurch-street.

GAS FITTINGS.—WM. BASSINGHAM and SON, GAS FITTING MANUFACTURERS and GASFITTERS, 3 and 4, White Cross-street, City; established 1816. Designs submitted and estimates given. A good stock of Chandeliers and Fittings

TO BUILDERS, CARPENTERS, UPHOLSTERERS, SMITHS, BELL HANGERS, AND THE TRADE IN GENERAL.

WHOLESALE IRONMONGERY WAREHOUSE, 18, Blandford-street, Manchester-square (running out of Baker-street, Portman-square), where a large stock is always kept on hand for the exclusive supply of the above trades. JOHN YOUNG, Birmingham and Wolverhampton, Agent and Factor.

WIRE STRAND FENCING, as furnished with all its fittings, by R. S. NEWALL and CO. having elicited the unqualified approval of practical men, is confidently recommended as the best fencing for park and farm (not sure, or substitutes for temporary agricultural measures instead of any kind of hurdles), for road-side and all other fencing.



The PATENT WIRE STRAND FENCE possesses an economy, security, and durability, not to be found in combination in any other fence hitherto introduced. The fences, when fitted by R. S. Newall and Co. (after the model of the fences of this material in the Slopes and Home-park, at Windsor), has the inherent property of remaining equally tight and rigid, under any variation of temperature.

N.B. Estimates given at so much per running yard, for fencing, fixed complete. Specimens, sketches, or any other particulars, will be forwarded on application.

OFFICES. Gate-head-on Tyne.
130, Strand, London.
67, Hyde park-street, Glasgow.

3-feet Cottage Ranges, with ovens and back boilers, 35s. each.
3-feet self-acting ditto, ditto, 36s. each.
Air Bricks, 4s. per doz.
Best Town Glue, 56s. Ditto, Scotch, 46s. per cwt.
Best Patent Sash Line.

1	2	3	4	5	6
4s. 6d.	5s.	6s.	7s 6d.	8s 6d.	11s. per gross.

And every material required in the building, upholstery, and brass-foundry trades on the most reasonable terms.

List of Prices had on application at the Warehouse, or by letter prepaid.

THE STATUE FOUNDRY and BRONZE WORKS, Lower Belgrave place, Pimlico. All works of art in the various metals executed at the above foundry.

THOMAS EDINGTON, IRON MERCHANT AND CONTRACTOR, Ins, ort of Railway Bonds & Shares
17, GORDON-STREET, GLASGOW.

TO BELL-HANGERS, GAS-FITTERS, IRONMONGERS, &c. &c.—The Trade supplied on the best terms with Block Tin, Zinc, Tube, and Compo Wire, Gas Pendants, Brackets, and Joints of all descriptions for Gasaliers in Brass and Iron; Tin, Composition, Iron and Brass Tubing, Quarter pads, Rings, and Lacquer. Cast Tube for Bells, Bell Backs, &c. &c.

Superior Gold Brass for Engravers. Castings of Brass and Common Brass, Gun Metal, &c. &c.

RICHARD EVERED'S, Brass and Bell Foundry and Metal Warehouses, Nos. 10, 11, and 12, Charles-street, Long-acre, London.

FLAVEL'S PRIZE KITCHENER.

These Ranges are strongly recommended for their simplicity of construction and their economy and cleanliness in use.

The top forms a Hot-plate, and the open fire removes many of the objections which are felt to close Ranges.

They are made in all sizes, from 3 feet to 18 feet in width, suitable for large or small establishments.

They are admirably adapted for the Cure of Smoky Chimneys.

LONDON AGENCY REMOVED TO WIGMORE-STREET, FROM 92, JERMYN-STREET, PICCADILLY.

BENHAM AND SONS, 19, Wigmore-street, London.

IRONMONGERY, NAILS, STOVES, RANGES, &c. AT WALMSLEY'S,

126, 127, and 128, LONDON-ROAD, SOUTHWARK.

FOR THE SUPPLY OF BUILDERS, CARPENTERS, UPHOLDERS, CABINET-MAKERS, SMITHS, WHEELWRIGHTS, AND OTHERS, AT WHOLESALE PRICES.

Best Sheet Floor-brads, 15s. 6d

Sash Weights. Air Bricks, 3s per doz. Hooping for hand 12s. per cwt. Cast Lath, 11s 6d. per cwt. Sash Pullies, 8s. 6d per gross. Arnott's Ventilators, 4s each Elliptic Stoves, with double backs, 2½d. per inch. Register Stoves from 2l. per inch.

Improved Self-acting Ranges with oven and boiler { 30 32 34 36 inch. / 26s. 30s. 33s. 34s. each.

Bert Self-acting Ranges, with oven and boiler, wrought bars and bright fittings { 26 28 40 inch. / 50s. 55s. 60s. each.

An extensive stock of bright and blank Register Stoves in every variety of design, at remarkably low prices. A large assortment of Rim, Drawback, Mortise, Iron Gate, and every other kind of Locks and Latches. Finger plates, Levers, and Bell-pulls, en suite.

BAR, HOOP, SHEET, AND ROD IRON. RAIN-WATER PIPES AND GUTTERS, ALL SIZES.

The Stock of this Establishment is too extensive to be described in the limits of an advertisement, and the most correct idea that can be given of it is by saying that every trade consuming ironmongery can here select whatever they require at WHOLESALE PRICES.

WALMSLEY'S new Show rooms are now open with a Modern and Choice Stock of General Furnishing Ironmongery unequalled in variety, and all at unprecedented low prices.

MOREWOOD & ROGERS'S PATENT PLUMBIC ZINC,

A SUBSTITUTE FOR SHEET-LEAD FOR

ROOFING, RIDGES, GUTTERS, FLOORING,

AND ALL OTHER PURPOSES TO WHICH SHEET-LEAD IS APPLICABLE.

This Metal consists of distinct layers of Lead and Zinc, perfectly united in the process of Manufacture, one side of each sheet being pure Lead, and the other pure Zinc. It therefore combines the Softness of Zinc with the Durable Qualities of Lead. The Lead side of the sheet being laid outward, effectually protects the Zinc below from those atmospheric influences which so rapidly cause its decay, whilst the Zinc so stiffens and supports the Lead as to make a sheet of Plumbic Zinc equal in strength to one of Lead of several times its thickness and weight.

Plumbic Zinc is therefore found to be more than one-fourth or one-fifth as thick as Sheet-Lead, is consequently much cheaper than that material.

For covering Terraces, Flats, Floors, Stairs, Passages, &c. it is well suited, being like Lead to the tread, whilst the Zinc on the under side of the sheet prevents it from treading out of shape.

The Size of the Sheets is 7 feet by 2 feet 8 inches.

No. 11 Gauge weighs about 16 oz. per foot super.
No. 12 " " " 20 oz. do. do.
No. 13 " " " 24 oz. do. do.
No. 14 " " " 26 oz. do. do.

Estimates given for IRON ROOFS, Corrugated Sheds, Houses, Telegraph-Wire, Submarine Cables, WIRE-ROPE, Fencing, &c. Roofs fixed complete.

SAW-MILL MANUFACTORY, Chelsea,

London.—WORSSAM and CO. invite the attention of all concerned in sawing, planing, and moulding wood to the simplicity and compactness of their machines over those now in use, which are both cumbersome and expensive. Drawings and prices sent on application. Estimates given for complete saw-mills for exportation or otherwise.

FIRE—ROBBERY—VIOLENCE—PILLAGE. MILNER'S HOLDFAST and FIRE-RESISTING SAFES, the strongest safeguards in the world against

EXTENSIVE FIRE IN GLASGOW.

MESSRS. DAVID BOYD AND CO.

Gentlemen, At the serious fire in Union-street yesterday, by which my establishment was destroyed, I owed the preservation of my books to the MILNER'S SAFE I had which they were kept. The contents of a wall safe were totally destroyed at the same time. You will please send me immediately another "Miner" of the same size as the one I had, being thoroughly satisfied of their safety, after the test I have just seen.

I am, Gentlemen, your obedient servant,
(Signed) JOHN DODDS.

27, Union-street, Glasgow, Feb. 23, 1854.

MILNER'S PHŒNIX SAFE WORKS, Liverpool; London Depot, 4, Moorgate street, E.C.

CHUBBS' LOCKS, FIRE-PROOF SAFES, AND CASH BOXES.

CHUBBS' PATENT DETECTOR LOCKS

give perfect security from false keys and picklocks, and also detect any attempt to open them. They are made of all sizes, and for every purpose to which locks are applied, and are strong, secure, simple, and durable

CHUBBS' PATENT LATCH, for front doors, counting house doors, &c. is simple in construction, low in price, and quite secure. The keys are particularly neat and portable.

CHUBBS' PATENT FIRE-PROOF SAFES, BOOKCASES, CHESTS, &c. made entirely of strong wrought-iron, so as effectually to resist the falling of brickwork, timber, &c. in case of fire, and are also perfectly secure from the attacks of the most skilful burglars.

CHUBBS' CASH and DEED BOXES fitted with the Detector Locks.

CHUBB and SON, 57, St. Paul's Churchyard, London.

A PRIZE MEDAL for SUPERIOR LOCKS

was awarded to J. H. BOOBBYER at the Great Exhibition of 1851, who invites the attention of Builders, &c. to his Stock of Ironmongery, Brass Foundery, Nails (wrought and cut), Copper and Zinc. COTTAM & HALLEN, 3, Wimsley-street, Oxford-street, London.

FIRE-PROOF CONSTRUCTION.—

FOX and BARRETT'S PATENT.
This improved system of fire-proof construction has been most extensively adopted, and its application has been extended to nearly EVERY DESCRIPTION OF BUILDING, whether public or private.
The system combines ECONOMY, with great simplicity of construction, perfect security from fire, increased durability, and many other important advantages.
The floors and roofs are formed by a combination of joists of wrought or rolled iron with concrete; so constructed that each floor becomes in effect a beam of artificial stone, with ribs of iron; the structure possessing great strength and rigidity, and forming a fire-proof foundation adapted to receive a finished surface, either of the ordinary flooring-boards, or of cement, asphalte, tiles, slate, or other material.
Some of the largest and most important buildings in the kingdom are now in course of erection upon this principle, which is commended to the notice of all who are interested in building, both as superseding the necessity for cast iron girders and brick arches, and as bringing the great desideratum of fire-proof construction, even for ordinary dwelling-houses and domestic buildings, within the reach of every one.
Further information may be obtained of the Proprietor of the patent,—Mr BARRETT, 12, York-buildings, Adelphi.

FOUNDRY AND IRON WORKS,

63, DRURY-LANE, and CHARLES-STREET, DRURY-LANE.
GLOVER, BROS.,

Also, Ten 8-inch flat bends and Four 8-inch branch pipes. The pipes are new and lying at Gloucester.—For particulars apply to THOMAS GOODMAN, Water Company's Office, Gloucester.
Gloucester, May 9th, 1854.

TO ARCHITECTS, SURVEYORS, BUILDERS, PLUMBERS, &c

WETTERSTED'S PATENT METAL has been proved by long experience, by its lightness, 11lb. to 31lbs. per foot superficial, both the cheapest, and by its durability to be the best and most effectual covering for roofs of every description. Troofs and tetum nails of which, and references to buildings upon which it has been used, with price and every other particulars, may be obtained on application to the sole proprietors and manufacturers, W. W. and R. JOHNSON and SON, White Lead and Colour Works, Commercial-road, Limehouse, London.
*** It is also made 8oz. per foot, for lining damp walls, &c.

MARBLE.—Mr. J. FABBRICOTTI, of Carrara, Italy, Proprietor of Marble Quarries, and the only person in the United Kingdom selling Italian Marble the produce of his own quarries, begs to inform the gentlemen connected with the Marble Trade that he has established, in London, the most extensive Depôt of Statuary, Veined Sicilian, Dove, and Black and Gold Marbles, at CARRARA WHARF, THAMES BANK, PIMLICO, the foot of Vauxhall-bridge.—Office, 8, Crescent-terrace, Millbank. Mr. THOS THOMPSON, Agent.

MARKET-WHARF, REGENT'S-PARK-BASIN, WEST-END DEPOT, for Yorkshire Paving, Portland and Derby stone, Bangor Slates, Slabs, &c. Also Bricks, Lime, Cement, Plaster, Tiles, Laths, and Roman, Portland, and Gooch MARTIN and WOOD invite the attention of Builders, Masons, and others, to their Stock as above, where everything will be supplied at the lowest prices. Headstones, Ledgers, Steps, Landings, &c. cut on the shortest notice. Country orders promptly attended to.

TO BUILDERS, MASONS, AND CONTRACTORS.

OBSERVE!!! the cheapest Depôt in England for MARBLE CHIMNEY-PIECES of superior quality and workmanship is the Westminster Marble Company's Patent Works, Earl-street, Holywell street, Millbank. An inspection of their superior Stock of Statuary, Sienna, Black and Gold, Veined, and other Chimney pieces, Tombs, Monuments, Tablets, &c. is earnestly solicited.

SERPENTINE MARBLE of choice quality ON SALE, in blocks and slabs, at moderate prices.
THOMAS JACKSON, Commercial road, Pimlico.

THE LIZARD SERPENTINE.—The first Cargo of SERPENTINE is arrived from the Signal Staff Quarry, belonging to the Lizard Serpentine Company, and is on Sale at the Wharf, of Mr. READ, Upper Belgrave-place, Pimlico.
Arrangements are made by the Company for the immediate introduction of several varieties of Serpentine of different colours from the Lizard Quarries of Polteseo, the Signal Staff, Treal, Long Alley, and Holestrow, and it is not the present intention of the Company to engage in manufacturing, although possessed of all requisite power for so doing, with great facilities of operation.
Of the peculiar beauty and great variety of the colours, the richness of the drabage, the consolidation of the material, its perfect applicability to all decorative purposes, and the economy with which it may be worked, perfect confidence is now entertained, it is necessary for the Company to say but little,—Serpentine must tell its own tale, and by its own merits can it alone be brought into general use. That the stone obtained from the Lizard Quarries is of the finest description, and that it is as free from faults as coloured marbles; and that it can be more easily worked, experiments and manufactured specimens have amply proved.
Applications to be made to Mr. READ, Marble Works, Upper Belgrave-place, Pimlico; and to the Manager, Mr. HENRY COX, Liard, Helstone, Cornwall.
May 8, 1854.

TO BUILDERS, MASONS, AND OTHERS.

THE largest STOCK in England of MARBLE in Blocks and Slabs, veined, Brecilla, dove, black, black and gold, Sienna, St. Ann's, statuary, serpentine, verd antique, &c. Portland, Herehill, Park spring, and other stone, in blocks, slabs, landings, and headstones. Yorkshire flagging, granite curb, &c. All goods carefully packed and forwarded to any part of England.—THOMAS JACKSON, Marble and Stone Sawing-Mills, Commercial-road, Pimlico, London.

MAGNUS'S ENAMELLED SLATE.—Mr. MAGNUS having, at great expense and hazard, and by dint of unwearied perseverance during a period of FOURTEEN YEARS, succeeded in obtaining for his enamelling of Enamelling Slate to imitate Marbles the PATRONAGE of HER MAJESTY, PRINCE ALBERT, the chief of our nobility, and almost every Architect, Builder, and Decorator of any note, and having been rewarded with the MEDAL of the SOCIETY of ARTS and the PRIZE MEDAL of the GREAT EXHIBITION, feels that his success has given rise to a number of petty imitators, who, though they may not affect him in a pecuniary light, inflict vast injury by their wretched imitations of his productions, which are, in most cases, passed off as "MAGNUS'S ENAMELLED SLATE." He therefore respectfully requests those who are disposed to patronize this establishment, to assure themselves that they are supplied from his manufactory, as unfortunately AT LESS THAN HALF THE COST AND LABOUR NECESSARY TO SECURE PERMANENCY, a counterfeit can be made which will not endure, and destroys the reputation of his Enamelled Slate. This caution is particularly necessary in regard to the fittings of the retiring places at railway stations, and wherever there is much wear.
N.B The Tariff for 1854 is now ready.
Pimlico Slate Works, 39 and 40, Upper Belgrave-place.

VALENTIA SLATE SLABS.—The Valentia Slab Company invite attention to their Slabs now supplied, of very large dimensions and of superior quality. They have been used at the British Museum, National Gallery, Bethlem Hospital, various Lunatic Asylums, the Ordnance Works, Model Prison, Penitentiaries, and other Penitentiaries, Maltings Floors in Bedfordshire and Hertfordshire, Breweries, the Race Stand at Brighton, Portsmouth Barracks, and are kept in stock in large quantities by Messrs FREEMAN, Millbank-street; also by Messrs Sharpe, Tool Factors; and Messrs. Braby's, Belvidere-road, where terms may be obtained.

SLATE CISTERNS.—FOR SALE, several large-size CISTERNS, made from the best Valentia slabs, adapted for manufacturing purposes, or large hotels. Cubic contents: 450, 600, and 1,350 gallons.—For further particulars, apply to Messrs. RITCHIE and SMITH, Slate Merchants, &c. Ravensbourne-wharf, Greenwich.—May 8, 1854.

SLATES, Slabs, Cisterns, Enamelled Chimney-pieces, Plain ditto, Urinals, Baths, Sinks, Lining, Skirting, Roofing, Malting Floors, Patent Ridge and Roll, and Slab-work generally. Export orders supplied without detention, a large stock of slates and manufactured goods being usually kept on hand. Price-lists may be had upon application, either personally, or by post.—Address, JOSEPH BRINDLEY, Slate Merchant, Steam Slate-works, Bermondsey-wall, London.
N.B Wharf opposite the Wapping Entrance of London Docks.

GUERNSEY GRANITE.—C. D. BENNETT, Stone Merchant and Quarry Proprietor, Saint Sampson's, Guernsey, in returning thanks for past favours, begs to inform Contractors and others, that he is always prepared to supply them with first quality Broken Granite on liberal terms, from a single carve to 20,000 tons, or upwards.
N.B—Pitching, Curb, &c. as usual

GRANITE.—The Cheesewring Granite Company, of Liskeard, Cornwall, are now prepared to supply Granite of excellent quality, and the largest sized blocks. Prices may be ascertained on application to N. TREGELLES, 3, Finsbury-court, Old Broad-street, City; or to JAS. J. TRATHAN, Liskeard.

PAVING, in great varieties.—Sinks, sills, steps, &c.; rubbed coping; tooled ditto; rubbed and tooled sills; Hurchill and self-faced slabs; rubbed York paving; pipes, pots, &c. all at low prices. Builders and masons are invited to inspect a list sent free on application to E. and W. STURGE, Bridge-wharf, City-road.—Established 1831.

ABERDEEN and PETERHEAD POLISHED GRANITE. — Chimneypieces, Monuments, Columns, Pedestals, Vases, Monumental Urns, &c executed on the shortest notice, and at the lowest possible prices, on application to JAMES WRIGHT, Manufacturer, 112, John-street, Aberdeen; or A. and F. MANUELLE, Granite Merchants, 12, Trinity-square, Tower-hill, London.

CAEN and AUBIGNY STONE.—F. FOUCARD, Stone Merchant and Quarry Proprietor, Quai des Abattoirs, Caen, and at 6, Red Lion-street, Borough-market. Contracts taken for any quantities. Cargoes shipped to order from Caen to any port.

GATES and GEORGE, late LUARD, BEEDHAM, and Co., Caen Aubigny, and General Stone Merchants Caen Wharf, Rotherhithe, London.—Goods delivered to order, by land or water conveyance, and by ship to any part of the United Kingdom.

BANGOR WHARF, King's-road-bridge, Camden-town. SPRINGFIELD and COOPER, late W. W Rawlins, beg to call the attention of Builders and others to their stock of Bangor slates, laths, tiles, Roman, Portland, and Keene's cement, blue lias, Dorking, and chalk lime, plasterers' hair, Yorkshire plain, pan, and ridge tiles, glazed sewer pipes, trap-pans, and traps, Welsh fire-bricks, gravel and shells for garden paths, ballast, sand, &c. Materials landed, wharfed, and carted.

By Her Majesty's Royal Letters Patent.

THE SILICEOUS STONE COMPANY beg to inform ARCHITECTS and BUILDERS that they enter into CONTRACTS for supplying Dressings and Details for Architectural Work of any description, for which estimates will be given on application. E. MENDHAM, Secretary.

WATERLOW and SONS, MANUFACTURING AND EXPORT STATIONERS,

65 to 68, LONDON WALL, AND 49, PARLIAMENT STREET, LONDON

MILL AGENTS FOR WHATMAN'S DRAWING PAPERS.

On the 31st of May will be published, with six pages of plates, and several woodcuts, and about fifty pages of text, fancy letter press, price bound in cloth, 1s. 6d. or 2s. 6d. bound in cloth,

DEDICATED, BY PERMISSION, TO THE RIGHT HON. VISCOUNT PALMERSTON,

HEALTHY HOMES, and HOW to MAKE THEM: being a Remedy for "London Shadows"

Containing clearly defined Plans, Elevations, and Sectional Working Drawings, in connection with letter press descriptions and specifications necessary to the Builder in the Erection of Healthy Homes for the Industrious Classes of Society, in Towns, or in their Environs,—with correct descriptions, specifications, and full estimates for perfect and durable Ventilation and Drainage. The Book also contains designs of Three Rows of Cottages, and Four Pairs of Semi-detached Family Dwelling Houses, with separate entrances: each containing a Parlour, or Living Room, Two Bedrooms, a Drying Closet, and a Scullery; with Cistern, Sink, and Water Closet, and all the healthful and comfortable arrangements and conveniences requisite for the Industrious Man, his Wife, and Family.

By WM. BARDWELL, Esq. Architect.

London: Published for S. A. GILBERT, by DEAN and SON, 35, Threadneedle street, and may be obtained of all Booksellers.

CRYSTAL PALACE, 1854.

GENERAL PUBLICATIONS,

Preparing for Publication, and will be issued on the Day of Opening, the following

GUIDES and HANDBOOKS, ILLUSTRATIVE OF THE CONTENTS OF THE EXHIBITION.—

1. GENERAL GUIDE BOOK to the PALACE and PARK. With numerous Illustrations. By SAMUEL PHILLIPS.
2. HANDBOOK to the EGYPTIAN COURT. With Illustrations. By OWEN JONES and SAMUEL SHARPE.
3. HANDBOOK to the GREEK COURT. With Illustrations. By OWEN JONES, F.R.I.B.A.
4. HANDBOOK to the ROMAN COURT. With Illustrations. By OWEN JONES, F.R.I.B.A.
5. HANDBOOK to the ALHAMBRA COURT. With Illustrations. By OWEN JONES.
6. HANDBOOK to the NINEVEH COURT. With Illustrations. By A. H. LAYARD, M.P.
7. HANDBOOK to the BYZANTINE COURT. With Illustrations. By M. DIGBY WYATT and J. B. WARING.
8. HANDBOOK to the MEDIÆVAL COURT. With Illustrations. By M. DIGBY WYATT and J. B. WARING.
9. HANDBOOK to the RENAISSANCE COURT. With Illustrations. By M. DIGBY WYATT and J. B. WARING.
10. HANDBOOK to the ITALIAN COURT. With Illustrations. By M. DIGBY WYATT and J. B. WARING.
11. HANDBOOK to the POMPEIAN COURT. With Illustrations. By OWEN JONES.
12. HANDBOOK to the SCHOOLS of MODERN SCULPTURE. By W. BRYDON.
13. HOW to SEE the SCULPTURE in the CRYSTAL PALACE. By ROBERT MUDIE.
14. THE PORTRAIT GALLERY of the CRYSTAL PALACE. By SAMUEL PHILLIPS.
15. HANDBOOK to the ETHNOLOGICAL and ZOOLOGICAL COURTS. With Illustrations. By Professor OWEN and Professor EDWARD FORBES, F.R.S.
16. THE EXTINCT ANIMALS and GEOLOGICAL PLEASURE GROUNDS. With Illustrations. By Professor OWEN.
17. THE CRYSTAL PALACE INDUSTRIAL DIRECTORY.

These Books, written in a popular style, with a strictly instructive and directional character, will be published separately at a very low price, in order to bring them within the reach of all persons.

Advertisements for inserting in any of these publications should be received, from the 1st to the 15th of May, by Messrs. BRADBURY and EVANS, Printers and Publishers to the Crystal Palace Company, at their Office, No. 11, Bouverie-street, Fleet-street, where all necessary information relating to these Works may be obtained.

NEW PATENT LAW (15 & 16 Vict. c. 85).—THE CITIZEN CLARK of INFORMATION, with full particulars as to the new and reduced expense in Fees in obtaining Protection for the United Kingdom and foreign countries, may be had gratis, by applying personally, or by letter, pre paid, to Mr. PRINCE, Patent Office, 51, Lincoln's Inn Fields square, Charing cross, London.

TO THE CABINET AND UPHOLSTERY TRADE.

SMEE and SON'S NEW BOOK of DESIGNS of CABINET FURNITURE, containing more than one hundred Designs, together with a Book of Prices, is now ready, price four guineas. To be obtained only at SMEE and SON'S, Wholesale Cabinetmakers and Upholsterers, 9, Finsbury pavement, London.

Just published, fcp. 8vo. price 1s. 6d.

GEOMETRY as a SCIENCE: being the First Part of Elements of Geometry and Mensuration, with Exercises designed for Schools and Adult Classes.

By the Rev. T. TUND, B.D. formerly Fellow of St. John's College, Cambridge; Editor of Wood's Algebra (8vo. 12s. 6d.), and Author of Companion to Wood's Algebra, post 8vo. 6s.)

Lately published:

PART II. GEOMETRY as an ART.

PART III. GEOMETRY COMBINED with ARITHMETIC (commonly called Mensuration).

PART IV. GEOMETRY COMBINED with ALGEBRA.

London: LONGMAN, BROWN, GREEN, and LONGMANS.

In fcap. 8vo. cloth, 12s. 6d.

MAUNDER'S SCIENTIFIC and LITERARY TREASURY, or Popular Encyclopædia of the Belles Lettres, Arts, and Sciences, and a General Repository of Information, including all Branches of Science, and every subject connected with Literature and Art. A new and thoroughly revised edition, comprising definitions and descriptions of the various terms and inventions that have recently come into general use.

Also, all uniform in size and price 10s. each Treasury,

MAUNDER'S HISTORICAL TREASURY.
MAUNDER'S BIOGRAPHICAL TREASURY.
MAUNDER'S TREASURY OF KNOWLEDGE, and
MAUNDER'S TREASURY OF NATURAL HISTORY.

London: LONGMAN BROWN, GREEN, and LONGMANS.

THE PLURALITY of WORLDS.

ELECTRICITY and the ELECTRIC TELEGRAPH. Together with the CHEMISTRY of the STARS. An Address delivered to the Working Men, Inhabitants of Camberwell.

By GEORGE WILSON, M.D. F.R.S.E.

London: LONGMAN, BROWN, GREEN, and LONGMANS.

Just published, price One Shilling,

THE PHILOSOPHY of BEARDS: Physiological, Artistic, and Historical.

By T. S. GOWING.

In which is Published by J. HADDOCK, London: T. T. LEMARE, 2, Oxford Arms passage, Paternoster-row, and may be had of all Booksellers.

THE FREEMASONS' QUARTERLY MAGAZINE and REVIEW. Enlarged, price 2s. 6d. A Specimen Number will be sent on receipt of six postage-stamps (the cost of postage). No. VII. for April, just published.

GEO. ROUTLEDGE and CO. Farringdon-street; and B. SPENCER, 314, High Holborn.

Just published, 1 vol. 8vo. 658 pp. 12s.

THE DIVINE DRAMA of HISTORY and CIVILIZATION.

By the Rev. JAMES SMITH, M.A.

CHAPMAN and HALL, 193, Piccadilly.

FRENCH in ONE MONTH, ditto German, and Italian, by DE PORQUET'S KEYS, for translating English into the above at sight, 2s. 6d. each; also First French, German, and Italian Reading Books, Parisian Grammar, Pocket Dictionary.

London: SIMPKIN, MARSHALL, and CO.

PURE GAS.—TO GAS COMPANIES, ENGINEERS, MANUFACTURERS, and OTHERS.

PATENT COAL PURIFICATION.—No cheap process has yet been discovered for freeing gas from ammonia, and he remoral of the bisulphuret of carbon the monster nuisance of gas burning has been up to present day remove both these impurities, and which taken from the purifier the bisulphuret of carbon is visible completely blackening the clay. The light of the gas is increased in proportion to its thorough purification. The proprietors of this patent are now ready to grant licenses for its use. Terms and directions for the employment of clay may be obtained from Mr. JOHN WHITTAKER, Agent to the Patentees, Gas Works, Wakefield.

PURE WATER, for manufacturing purposes, may be obtained at very moderate cost by RANSOME'S FILTERING STONE. Estimates given for large or small quantities. Builders and Plumbers supplied with the cases for its use, and four guineas each, yielding 50, 100, 150, and 200 gallons per diem, will be found sufficient for ordinary domestic requirements; are self-acting, and not liable to get out of order. References to parties satisfactorily supplied with quantities up to 30,000 gallons per diem, may be obtained on application at the depôt, 71, Baker-street, Portman-square, London.

NATIONAL PROVIDENT FREEHOLD LAND SOCIETY.

GREAT ARBOR-HILL ESTATE, SLOUGH, Bucks. The Directors of the NATIONAL PROVIDENT FREEHOLD LAND SOCIETY beg to announce that this most desirable FREEHOLD ESTATE is now redeemed and tithe free, close to the SLOUGH STATION, on the Great Western Railway, and within a half hour's ride of the metropolis, commanding from it a high situation most splendid and extensive views of the surrounding country, and Windsor Castle, has been purchased for allotments amongst the members. The estate is most eligibly situated for villa residences of a superior class, with a frontage to the high-road from Slough to Windsor, bounded on the north by the residence, observatory, and grounds of the late Sir John Herschel; on the south by Upton-park, and in close proximity to the parish church. Public meetings will be held at Windsor, on MONDAY, the 22nd, and at the Mechanics' Institution, Slough, on TUESDAY, the 23rd of MAY instant at SEVEN o'clock in the evening, the Right Honourable VISCOUNT CHEWTON, Chairman of the Society, in the chair. A ballot for right of choice on the Great Arbor-hill Estate, and other freehold estates purchased for the members of the Society, will take place at the latter meeting, in which ballot all shares previously taken will participate, but all and any share be drawn the subscription on which shall be in arrear such share will lose all benefit from that drawing. The freehold estate at Staines, Middlesex, is now in course of allotment. Eligible building plots, with frontages of 16 feet by a depth of 215 feet, for 64 feet frontages of 86 feet, 32*l.* A contract for making the roads, &c. has been accepted, and they will be immediately commenced, under the supervision of the Surveyor of the Society. Conveyances, free expenses to the allottees. Shares, prospectuses, rules, plans, and conditions of sale, apply to Mr. WATKINS, Staines. Mr. JOHN CLEAVE, Talbert House, Lisson-grove, North, Secretary. Shares, 2*l.* 10*s.* Monthly payments, 5*s.* per cent. interest all wed upon all deposits, part up shares, and subscription fees in advance.

473, New Oxford-street, London; and 80, Cheapside, corner of Bucklersbury.

TO BE SOLD by Public Tender, in four lots, a valuable FREEHOLD PROPERTY, chiefly situated in the parishes of Orpington and Farnborough, Kent, comprising as follows:—

Lot 1. A desirable FREEHOLD BRICK-BUILT DWELLING-HOUSE, now divided and occupied as two tenements, pleasantly situated at Broomhill, with gardens, detached stock, productive orchards, and plantation-ground, containing altogether about 3½ acres, subject to a fee-farm rent or annual quit rent of 1*l.* 8*s.*

Lot 2. FOUR FREEHOLD BRICK-BUILT COTTAGES, together with a good pair of semi-detached cottages, and a valuable plot of ground adjoining, suitable for the erection of other houses thereon, situate in the High-street or road in the village of Orpington.

Lot 3. A FREEHOLD FIELD or CLOSE of ARABLE LAND, situate on the east side of Orpington-lane, in the parish of Orpington, containing 3*a.* 3*r.* 9*p.* or thereabouts, subject to an apportioned amount of tithes.

Lot 4. A FREEHOLD FIELD or CLOSE of ARABLE LAND, situate on the west side of Orpington-lane, in the parish of Farnborough, containing three acres little more or less, subject to tithes. The whole of the foregoing premises are to lease to the executors of the late Mr. Frederick W. Taylor, to the 29th day of September, 1854, from which day the respective purchasers will be entitled to the possession of the lots sold. Each purchaser will, on the acceptance of his tender, be required to pay a deposit of twenty per cent. and sign an agreement for payment of the remainder of the purchase-money by, on, or before the 10th day of June next. Plans may be had of Mr. HENRY ELKINGTON, Architect and Surveyor, 29 Charing-cross, London; of the Auctioneers; and of the Solicitors. Tenders are to be sent stating the sum and purpose to be given for each lot separately or together, by, on, or before the 29th day of MAY, 1854.

WANTED, MANUFACTURING PREMISES, suitable for an Iron Foundry. Particulars to be sent, addressed to A. B. at Mr. Fielder's, Chemist and Druggist, 7, Bentley place, Kingsland-road.

TO ENGINEERS, MILLWRIGHTS, SMITHS, FOUNDERS, AND OTHERS.

TO BE DISPOSED OF, the LEASE, GOODWILL, and PLANT of an extensive old-established Engineering Business in the neighbourhood of London. The premises are held on lease at a moderate rental, the greater part of which is sublet. The plant consists of fourteen lathes, drilling and punching machines, planers, &c., all driven by steam-power. The smiths' shop has nine forges, furnaces, and all the necessary tools and implements. The foundry has five furnaces for iron and brass casting. A very extensive general and ornamental pattern, as to every requisite for carrying on a large business, in all the above branches. For further particulars, apply to Mr. BARLOW, Builder, &c. 11, Portman-street, Portman-square.

SWISS DRAWING INSTRUMENTS, of equal in quality to the very best London-made instruments, and considerably cheaper. Apply to Mr. S. RAGLAN, 2, Travistock, Holborn (between 1 to 3 p.m.), or to Mr. H. B. BARLOW, Office for Patents, Paper-place, Blackfriars, Middlesex.

ARCHITECTURAL DRAWING, &c.—NOTICE.—The Architects', Builders', Civil Engineers', and Mechanists' Drawing Classes, conducted by THOMAS J. HILL, Architect, assisted by Mathematical and Mechanical Masters, are REMOVED from Helmet-row, Old street to 15, OLD-STREET, where prospectuses may be had on application.

TO DRAUGHTSMEN AND CIVIL ENGINEERS.

H. MORRELL, BLACK LEAD PENCIL MANUFACTURER, No. 149, Fleet-street, London.

These Pencils are prepared in various degrees of hardness and shades.

H H H H for drawing on wood.	F F light and shading.
H H H for architectural use.	F for general use.
H H for engineering.	B black for shading.
H for sketching.	B B ditto ditto.
H B hard and black for drawing.	B B B ditto ditto.
	B B B B ditto ditto.
M medium.	

Sold by all the principal Stationers in town or country.

TO ARCHITECTS.

COMPETITION and other DRAWINGS.—Mr THOMAS S. BOYS, Member of the New Society of Painters in Water Colours, and author of "The Picturesque Architecture of Paris, Ghent, Rouen," &c. and of "London as it is," offers his services as Tinting Sketcher to Architects, for Competition Views, Interiors, &c. From the long experience he has had in such subjects, he is fully aware of the points essentially necessary to be attended to. Drawings and designs lithographed in a superior manner. Address, Mr. BOYS, 32, Albany-street, Regent's-park.

WESTMINSTER IMPROVEMENT BOND of 50*l.* TO BE SOLD for £40, incorporated by Act of Parliament, and payable 1st of May, 1854, bearing interest at the rate of 5*l.* per cent. per annum, payable half-yearly on the 1st of May and 1st of November. Apply to Mr. BROWN, 2, Adam-street, Old Broad-street, City, London.

TO BUILDERS AND OTHERS.

MONEY to a LARGE AMOUNT READY to be ADVANCED immediately upon Freehold, Copyhold, or Leasehold Houses or Land, and Rents. Reversions Policies of Assurance, and Approved Personal Security. Apply in the PURCHASE thereof.—Apply, with particulars, to Mr. WRAY, 31, Harcourt-buildings, Temple.

LOANS GRANTED.

LONDON EXCHANGE ADVANCE FUND, 3, Adelphi terrace, Strand, facing the river.

TRUSTEES.

The Right Hon. Lord Erskine. | Sir Edward Graham, bart.

1*l.* to 1,000*l.* advanced on personal or other security. Bills or Exchange cashed. Five per cent. interest on deposits payable in January and July. Forms forwarded on receipt of twelve postage stamps.

The Builder.

SATURDAY, MAY 13, 1854.

IN justice to the reputation of our professional brethren generally, what we have to say of architecture, in connection with the Exhibition at the Royal Academy, should show what there is not. So far from putting oil into the lamp, or lamps of art—the true purpose of the Academy, as, in other words, we have been told,—the ministration of architecture is every season pouring more cold water on the expiring light. Surely, whatever else is, or ought to be, done elsewhere, the connection of painting and sculpture with the art to which they owe much, and may owe more, in England, should not be interfered with, even by the interruption of one of the slight bonds which the mere walls of the Exhibition-rooms afford. The deduction of general principles of art for special development would, we think, proceed nearer to success, and greater earnestness be observable amongst artists generally, if the proper union of the arts were sufficiently regarded. Moreover, we could point to pictures in oil, of chief importance in the present collection, the merits of which cannot be discussed without taking into consideration questions which have become of great moment in the æsthetics of *architecture;* whilst in the same works are prominent errors, which could not have been committed with the slightest knowledge of architecture and perspective. In the Academy of St. Luke, at Rome, architects and sculptors are, in turn with others, elected to the presidency. Such an appreciation of either of the two branches of art, would seem scarcely possible with the London body.

All this is very saddening, and as regards the body of academicians, is, seriously speaking, very disreputable. Our friends have not succeeded so far, in maintaining an Architectural Exhibition for the profession itself; and, were it otherwise, we should urge the propriety of not throwing away the advantages which a room at the Academy might give, in promulgating a popular taste.

Our readers have seen the architectural drawings hung or rejected on no apparent principle, or those admitted—in one year placed below gaudy oil paintings, in another shouldered up to the ceiling. At length the heading "Architecture" disappeared altogether from the room and the catalogue. We cannot announce that matters are now any better. Oil paintings occupy one side of the room and spaces elsewhere, and architectural drawings, as a necessary consequence, are where it is beyond our power to see them. Of the drawings, as usual, the greater number are designs for no particular place or purpose,—as much *In Nubibus* as No. 1182 (with pretty bits, but an impossible tower), to which Mr. J. W. Goodman has honestly attached the misty title. Of the academician-architects (five we see there are now) not one sends a line. Is this a protest, or is it sheer indifference? We suppose there will be foreigners in England shortly, to see the Exhibition at Sydenham as there were for that of 1851. They will carry away less evidence of the important works in progress, than they would from even our own advertising columns.

The most important drawing exhibited is that by Mr. J. D. Harding (1121), "Crystal Palace, Sydenham, designed by Sir Joseph Paxton," which shows the view of the building from the south-east, with the fountains, and in the foreground the lake and antediluvian animals. The largest fountains are here placed in the large ornamental basins in the lower part of the grounds—that is to say, east of the cascades. The height which they are shown to play must surely exceed even that anticipated, which itself is higher than they are expected to reach by some who ought to know what is possible. The whole, with the landscape, makes a striking composition; though perhaps the several objects will hardly show from one point as here represented, and the railway station appears to be omitted. Sir J. Paxton's name is attached to two drawings (1168 and 1234), showing parts of the gardens, with the fountains. One includes the ornamental structures at the head of the cascades, which, with some perversion of the Queen's English, are called "temples." But since we have been obliged to adopt the advertising name for a building which we take to be neither of crystal, nor a palace, we are getting reconciled to phrases, not drawn like the water of the fountains, from the "purest well," and not "undefiled." Sir J. Paxton also exhibits (1165) "Entrance Court, Mentmore, Bucks, the Seat of Baron M. A. de Rothschild," in which he, or his draughtsman, has adopted the ponderous contortions on the roofs and parapets, of the worst form of the style of the time of James I. Mr. M. D. Wyatt's "View (1162), looking from the Peristyle towards the Atrium and principal entrance of the Pompeian House," &c. at the Crystal Palace, does justice to that clever reproduction in a well-executed drawing. Mr. E. Falkener has three capital "Pompeian Studies" (1173, 1174, and 1175), showing "The Maritime Villa," or House of Diomedes; "The Impluvium," in the House of the Faun; and "The Atrium," in the House of Sallust. With strict attention to what is remaining, or what there is good authority for, great skill is shown in these reproductions of works of ancient domestic architecture. Mr. Falkener would do good service by publishing what from time to time he has shown us. The Compluvium appears to be covered with a *velarium*, or awning, supported by ornamental rods in bronze. Mr. Tite has (1172) "A Composition of the Works of Inigo Jones, Architect, containing his great design for the Palace of Whitehall," and other buildings. It is to be regretted that this drawing cannot be seen as it appears to deserve. Those at the Academy who manage these things, should know that a work even of large size may yet have details requiring close examination. The cool tone of the drawing is, however, unfortunate, and the perspective has the disadvantage seen in an interior view taken from a point on the centre line of the plan. In questions of this sort now, perspective draughtsman might learn from painter. Mr. Tite should have preferred to send particulars of the buildings he has been doing lately; he has, nevertheless, made an important contribution. Professor Donaldson must have the credit of exhibiting—often when others do not. This year he sends (1206) "'An Architect's Dream;' or Sketch of a Design for Opening the Crypt of St. Paul's Cathedral," &c. in which sarcophagi containing the remains of Nelson and Wellington are placed side by side. The opening in the pavement is enclosed by a balustrade in gilt bronze, with candelabra at intervals, and there is a supporting peristyle of Roman-Doric columns. The original idea would be confessedly due to the tomb in the Invalides, by Visconti, were there not other precedents. We have got away from the drawings having reference to the really structural works of the year,—but in truth there is little of the kind. Even in church architecture we have seldom seen so little. Mr. P. C. Hardwick shows us (1134) "New District Church to be erected at Deptford;" it has a spire and pinnacles to the tower, which is nicely treated about the belfry. The Decorated style seems at length to hold exclusive favour. Its characteristics are well expressed, though there is little of real design in churches now being erected. The "Cravenhill Chapel, Hyde-park,—now erecting" (1179), gigantic in the drawing, sinks low in art. There are faults, from which we have been spared of late years,—for example, the ends of the aisles have what appear like imitation flying buttresses, closing the end of the roof, which is in one span. Mr. J. Norton gives us views of churches at Westbury-on-Trim, Gloucestershire (1145), Abertilery, diocese of Llandaff (1149), and others. Mr. E. W. Pugin has a view (1124) styled "St. Mary's and St. Peter's Cathedral Churches,—now erecting." There would seem to be an error in the catalogue. The drawing shows but one somewhat lofty and attenuated building. No. 1192 represents St. George's Church, Doncaster, as now being rebuilt by Mr. G. G. Scott. The new church for Old Brentford, by Mr. R. Brown (1181 and 1210), has a lofty spire, and is further distinguished by a second aisle, or range of chapels beyond the ordinary aisle. No. 1227 is the interior of St. Luke's, Marylebone, by Mr. E. Christian; and No. 1154, is the new Lichgate and Railing at Horsham, Sussex, by Mr. Truefitt. The mediæval style is also adopted by Messrs. Brown and Blacket, in a "Design for a Hydropathic Establishment at Tekley, Wells (1146); by Mr. T. Bury, in the Estbury Almshouses, Lamborne, Berks (1150); and the Clergy Orphan School, at Canterbury (1161), by Mr. P. C. Hardwick. The architect last named, in 1133, "The Abbots—Sumpting, Surrey, now being erected for Capt. Crofts," (picturesque Tudor style, of stone, with red brick buttresses and chimneys, and having a square tower with truncated roof, and corbelled out from the angle of the tower a round turret, with a small spiret capping); and in the "Gardener's Cottage," at Laverstoke House (1180), shows a facile and tasteful pencil. The same architect is also building the Australasian Bank (1164), in Threadneedle-street. Mr. J. T. Christopher exhibits a design for a college in honour of the late Duke of Wellington (1137), with large quadrangle and central portico and domes, the front of the quadrangle being enclosed by low columned ambulatories. To this plan are added other buildings, as wings, joined on by quadrants. The first sight reminds one of Greenwich. Mr. Brodrick has the view of his design for the Leeds Town-hall, which we engraved (1228).

There are not many other important public buildings. 1102 is a "Design for the New Town-hall Buildings, Preston," by N. T. Randall, and 1135 is an "Interior of the Exchange and News-room," as proposed, by Mr. Lamb, for the same buildings (1135), and which, with a simple arrangement of columns and arches dividing the room, and a ceiling glazed in panels, is in good taste. The "Design for the Burslem Town-hall," for which the second premium was awarded to Mr. R. W. Armstrong (1138), has the principal elevation, with an arch, below which columns support sculpture. The same idea is worked upon in the same architect's design (1237), for a public building at Newcastle-upon-Tyne. Messrs. Bidlake and Lovatt show us "The Public Rooms and Corn Exchange, Kidderminster" (1144), in which there are a plain rusticated basement, coupled and clustered pilasters, and other Italian features, of simple but good character. The houses now being built in Ashley-place, Victoria-street (1111), by Mr. H. Ashton, have their best feature in an open staircase, on the principle adopted by Mr. H. Roberts, opening to the street by arcades, on the first and upper stories.

In domestic architecture, the picturesque "nice places to live in," as in our hearing some were called, have a portion of the remaining space. The Italian style, however, has been

retained by Mr. Scoles in the additions to Ince Blundell Hall, Lancashire (1106); also by Mr. J. K. Colling in those to Hooton Hall, Cheshire (1225), which well show what may be done to improve an old house. Messrs. Beensen and Kuckuth, we may here say, have not, we think, succeeded in the decoration of the interior of the Hanoverian ambassador's house; and their "Decoration for a plain Ceiling" (1211) falls into the especial vice of imitating a Gothic rose window. We may mention, them, however, as promising workmen. We ought to have included in some of the above classes, Mr. Edmeston's design for the clock tower for the Market-square, Geelong (1239), in which he carries out the idea of the combination of iron with panels of ornamental porcelain in a way which will, we have no doubt, please friends at the Antipodes. The design deserves credit. Mr. Waring's design for a monument to commemorate the Great Exhibition (1241) has an ornamental iron lantern, suggestive of the principal features of the building in Hyde Park; but the lower part of the composition is more original and suggestive than well-proportioned. Mr. Ferrey has a picturesque design for an educational institution in the north of Ireland—brick—and Romanesque in character (1233).

We see little of what has been doing lately in the erection of cemetery chapels. Messrs. Welnert and Ashdown show theirs for the Lambeth Ground at Tooting (1209), (recently engraved by us), and Mr. Allom his at Hanwell. We shall, we believe, have enumerated nearly all that there is in the way of new work, if we name additions to Mr. Peto's mansion at Somerleyton Hall, by Mr. Thomas, and the village which is being rebuilt hard by; and it must be confessed that there is every argument this year, in favour of all the energy that architects can show in amending what certainly does not place them in the advantageous position which, from their art, they should command with the public. We may add, that there are in this same room, proofs of a beautiful medal of Flaxman, executed by Mr. H. Weigall for the Art-Union of London, and a cameo portrait of an architect, by Mr. H. Hayler, which we mention for the workmanship rather than the likeness, and because we would aid one who is successfully practising this, amongst us, altogether neglected branch of art.

DR. ARNOTT'S NEW SMOKE-CONSUMING AND ECONOMICAL FIRE-PLACE.

SOCIETY OF ARTS.

On Wednesday evening last, the following paper by Dr. Arnott, on a new Smoke-Consuming Fire-place, was read at the Society of Arts:—

The great evils connected with the common coal fires are:—

1. Production of Smoke.
2. Waste of Fuel.
3. Defect of Warming and Ventilation.

1. *Smoke in the Interior of Houses and in the External Atmosphere.*—Examination of the question has ascertained that in London alone, on account of its smoke-loaded atmosphere, the cost of washing the clothes of the inhabitants is greater by a million and a half sterling a year (that is, fifteen times one hundred thousand pounds), than for the same number of families residing in the country; and this seems to be but a small part of the expense when we consider the rapid destruction of all furniture in houses, as of carpets and curtains, of articles of female apparel, of books and paintings, of all internal decorations, and even of the external surface of the stones of which edifices are built. Then personal cleanliness is but imperfectly maintained there by very frequent washing of the hands and face. Flowering shrubs and many trees cannot live in the London atmosphere, so that the charm of a garden, even at considerable distances, has almost ceased with the extension of the buildings and increase of smoke. A growing flower, exposed to the atmosphere, being soon covered with blacks or sooty dust, defiles the hand which plucks or touches it. Sheep from the country, placed for a few days to graze in any of the parks, have soon a dingy fleece, strikingly apparent when others newly arrived are mixed with them. And the atmosphere, so damaging to inanimate things and to vegetable life, is also inimical to the health of man, as proved by numerous facts recorded in the bills of mortality. Many persons, with certain kinds of chest weakness, cannot live here. Many children brought from the country are found soon not to be thriving. The coal-smoke, then, may be called the great nuisance and opprobrium of the English capital.

2. *Waste of Fuel.*—To save a third of the part of the coal burned in London alone, would save more than a million sterling a year; and when coal is very dear, as during last winter, the saving would be much greater. Count Rumford, a writer of great authority in such matters, after making many elaborated experiments, declared that five-sixths of the whole heat produced in an ordinary English fire goes up the chimney with the smoke, to waste. This estimate is borne out by the facts observed in countries where fuel is scarce and dear, as in parts of continental Europe, where it is burned in close stoves, that prevent the waste, and with these a fourth part of what would be consumed in an open fire suffices to maintain the desired temperature. I have myself made experiments here with the like results.

Now it is to be considered that coal is a part of our national wealth, of which, whatever is once used can never, like corn or any other produce of industry, be renewed or replaced. Then the coal mines of Britain may truly be regarded as among the most precious possessions of the favoured race which occupies the Islands, and without which they could never have attained the importance in the world which the extraordinary development of their mental and bodily faculties has now given them. It is enough to say that without coal they would not have had the steam-engine. To consume coal wastefully or unnecessarily, should not be called merely improvidence, but a serious crime committed against future generations.

3. *Defects of Heating and Ventilating in Dwellings.*—Calling a thousand a week the average rate of mortality in London alone, it was found for some weeks of the very cold winds in the middle of last winter, that nearly 700 deaths more occurred owing to the intense cold which then prevailed, and against which the existing arrangements for warming and ventilating were insufficient. Not a little of the premature mortality at all times, and of the spread of epidemics, and of the low condition of health among the people, is doubtless owing to the same cause.

We shall now inquire whether it be not possible in a great measure to avoid the three great evils above described, and at the same time to secure still other advantages.

1. To avoid or to consume smoke—in other words, to produce a smokeless coal fire.

Common coal is known to consist of carbon and bitumen or pitch, of which last the elements again are still chiefly carbon and hydrogen, a substance which, when separate, exists as an air or gas.

When the coal is heated to about 600° Fahrenheit, the bitumen or pitch evaporates as a thick, visible smoke, which, when it cools again, assumes the form of a black dust or flakes, called blacks, or smut, or soot. If that pitch, however, be heated still more, as it is in the red hot iron retorts of a gas-work, or in rising through a certain thickness of ignited coal in an ordinary fire, it is partly resolved into invisible carburetted hydrogen gas, such as we burn in street lamps.

Now, when fresh coal is thrown upon the top of a common fire, part of it is soon heated to 600°, and the bitumen of that evaporates as the visible smoke, which immediately rises. Of such matter the great cloud over London consists. If the pitchy vapour, however, be heated to ignition by the contact of a flame or of ignited coal, it suddenly becomes in great part gas, and burns itself as flame. This is the phenomenon seen in the flickering and burning which takes place on the top of a common fire.

But if fresh coal, instead of being placed on the top of a fire, where it unavoidably must emit visible pitchy vapour or smoke, be introduced beneath the burning, red-hot coal, so that its pitch, in rising as vapour, must pass among the parts of the burning mass, it will be partly resolved into the inflammable coal gas, and will itself burn and inflame whatever else it touches. Persons often amuse themselves by pushing a piece of fresh coal into the centre of the fire in this way, and then observing the blaze of the newly-formed gas. Various attempts have been made to feed fires always in this way, and so to get rid altogether of smoke. The most important of these was about thirty years ago, by an ingenious manufacturer, Mr. Cutler, who, not aware that others had been engaged in the same pursuit, took a patent for his apparatus. A trial at law, however, afterwards decided that he had no patent right. Mr. Cutler placed a box filled with coal immediately under the fire, with its open mouth occupying the place of the removed bottom bars of the grate, and in the box was a moveable bottom, supporting the coal, and by pressing which the coal was lifted gradually into the grate to be consumed. The apparatus for lifting, however, was complicated, and liable to be out of order, which, with other reasons, has caused the stove to be little used. The moveable bottom rested on a cross-bar, which was guided by slits in the side of the coal-box, and which was lifted by chains at each end, drawn up by a windlass, and this windlass was turned by bevel wheels, of which one had to be moved by a winch in the hands of an attendant.

In the new fire-grate now to be described I have sought the greatest possible simplicity of parts joined with complete efficiency. It is represented in the accompanying drawing. The charge of coal for the whole day is placed in a box immediately beneath the grate, as shown in the diagram at the letters *e f g h*, and is borne upwards as wanted by a piston in the box, raised simply by the poker used as a lever, and as readily as the wick of an Argand lamp is raised; and the fire is under command, as to its intensity, almost as completely as the flames of a lamp.

This fire is lighted with singular ease and speed. The wood is laid on the upper surface of the fresh coal filling the coal-box, and a thickness of 3 or 4 inches of cinder or coked coal left from the fire of the preceding day is placed over it. The wood being then lighted, instantly ignites the cinder above, and at the same time the pitchy vapour from the fresh coal below rises through the wood-flame and cinders and becomes heated sufficiently to inflame itself, and so to augment the blaze. When the cinder is once fairly ignited, all the bitumen rising through it afterwards becomes gas, and the fire remains quite smokeless for the remainder of the day. A fire-place supplied with coal from below was used by a distinguished engineer in town for ten years, and the chimney had not to be swept the whole of that time, because there was no soot formed.

In the new grate, because no air is allowed to enter at the bottom of the coal-box, there is no combustion below, but only between the bars of the grate, where the fuel is completely exposed to air, and near the mouth or top of the coal-box. The unsatisfactory result of some other attempts to make such a fire have been owing, in part, to the combustion extending downwards in the coal-box, because of air admitted below, and the consequent melting and coking of the mass of coal so as to make it swell and stick, and impede the rising of the piston.

A remarkable and most valuable quality of this fire is, its little tendency to go out or be extinguished. Even after nearly all the coal in the grate, or surrounded by the fire-bars, has been consumed, the air will dive into the coal-box and keep the fire there gently alight, like a torch burning from the top downwards, until nearly the whole contents of the box are consumed, and thus the fire will remain burning for a whole day or night, without stirring or atten-

dance, and yet at any moment it is ready to burn up actively when the piston is raised.

2. *Waste of Fuel.*—We now come to consider how the *waste of fuel* which occurs in common open fires is to be prevented.

Count Rumford, as the result of his own experiments already referred to, declared that 5-6ths of all the heat produced in a common open fire passed up the chimney with the smoke, and therefore to waste; and he appealed in corroboration to the experience of the continent of Europe, where close stoves are used, which do not thus waste heat up the chimney, and where a much smaller allowance of fuel than is here needed in open fires suffices. In my house I have a striking illustration of the matter in a peculiar enclosed fire, by which for fourteen years I have been able to maintain in a large dining-room a temperature of 60° or more, accompanied with good ventilation, by an expenditure of only 12lbs. of coal for twenty-four hours, or about a fourth of what would be used in an open fire there for fifteen or sixteen hours. The aperture by which the fresh air enters the stove to maintain the combustion sufficient to warm that room, is much less than an inch in diameter. If I compare that with the aperture of a common chimney-pot, which has a diameter of 10 inches, and area or size 150 times greater than my stove; and when I think of the rapidity with which a column of dense smoke filling that pot escapes from it when the fire is burning briskly; and I reflect further that that column consists entirely of the warmest air from the room, blackened by a little pitchy vapour from the fire, there is indication of prodigious waste, and room for reasonably hoping that a saving is possible. The exact nature of the waste in such cases is thus explained:—A single mouthful of tobacco smoke, emitted immediately, diffuses itself so as to form a cloud larger than the smoker's head, and soon would contaminate the whole air of a room, as do also the smoke and smell of wood, paper, or other combustible burned in a room. Now, the true smoke of a common fire is not at first the whole of what is seen issuing from the chimney top, but little driblets or jets which shoot up or issue from the cracks in the upper surface of coal which forms the fire. These jets, however, quickly diffuse themselves, like the tobacco smoke, in the air around them, that is to say, in the large volume which fills the space left over a common fire, and over the hobs, where there are such, at the side of the grate. The whole of the air so contaminated, and which may be in volume 30, 50, or 100 times greater than that of the true smoke, is then all called smoke, and must all be allowed to ascend away from the room. Now, if a cover or hood be placed over the fire, such as represented by the letters *y a b* in the diagram, so as to prevent the diffusion of the true smoke or the entrance of pure air from around to mix with it, except just what is necessary to burn the inflammable gases which rise with the true smoke (whether visible or not), there would be a great economy. This has been done in the new fire-place, with a saving of from one-third to one-half of the fuel required to maintain a desired temperature. In a room the three dimensions of which are 15, 3½, and 12 feet, with two large windows, the coal burned to maintain a temperature of 55° in the coldest winter days, has been 18 lbs. per 9 hours, or less than a pound per hour.

And it is to be remarked, that not nearly the whole possible saving has been effected in the case referred to; for the grate was but imperfectly altered, and the true smoke, little diluted, very hot air as it leaves the ignited coal; and if it were made to pass, coming in contact with a vessel containing water or colder air, it could give up for use a considerable part of its heat. In many cases such saving will be probably effected. Under the present imperfect forms of open fire the whole of the hot smoke passes away as certainly as here, but is then so much diluted with the colder air of the room, that ordinary observers do not perceive, and, consequently, do not regret, the fact.

In many cases the contraction of the space over the fire will be more conveniently made in brickwork than by a metallic hood. Where the hood is used, unless it be made a boiler or water-vessel, it should be lined with tile, to prevent the overheating, which would cause in the room some smell of overheated metal.

The stalk of the hood at *y* must pass closely through a plate, stopping the bottom of the chimney so that no air shall enter the chimney but through the hood; and there is a throttle-valve or damper in the hood-stalk, at *t*, giving perfect control over the current of air that passes through. There is no part of the apparatus more important than this valve or damper, and its handle or index must be very conspicuous, and have degrees of opening marked as clearly as the points on a compass-card. When the valve is quite open, the chimney acts like that of a blast furnace, or like a forge-bellows, to quicken the combustion, but, by partially closing the valve, the current may be diminished, until only the most tranquil action remains. The valve should not be open in general more than just enough to let all the burned air or thin smoke, which is scarcely visible, pass through. When the valve is once adjusted to the usual strength of chimney action, it requires little change afterwards.

In many cases it is desirable to be able to command and modify, by a moveable plate, the size of the front opening of the hood or fire-place, as well as the opening of the chimney throat. By the proper adjustment of the two, the desirable brightness of the front of the fire may be maintained.

The chimney-flue above the upper opening of the hood should have its sides made slanting, so as not to harbour dust or any soot, which, from any careless use of the fire, might be produced.

3. *Defects of Heating and Ventilating.*—The third and last of the great evils of the present open fires is, that there are great irregularities in their heating and ventilating, which bear so powerfully on the public health. The hood and its damper are, perhaps, of more importance in this respect than as saving the fuel.

The hood and its damper, by allowing so small a quantity of air to pass through in comparison with what rises in an open ordinary chimney, lessens in the same degree the cold draught of air towards the fire from doors and windows, and which are common causes to the inmates of winter inflammation and other diseases; and for the same reason the heat, once radiated from the fire towards the walls of the room, not being again quickly absorbed and carried away by the currents of cold air referred to, remains in the room, and soon renders the temperature of the whole more equable and safe.

Still more completely to prevent cold draughts approaching from behind persons sitting around the fire, the fresh air for the room is conveniently admitted, chiefly by a channel which leads directly from the external air under the floor to the hearth, and there allows the air to spread from under the fender. The fender, exposed to the fire near it, becomes hot; the cold, fresh air then rising under it takes the excess of its heat, and so becomes itself tempered before it spreads in the room. Two evils, those of excess of heat and excess of cold, meet to neutralise each other, and to produce a good result.

The importance of ventilation, again, is strikingly exhibited by such occurrences as the following, which was related at the meeting of scientific friends at which I first described the new fire-place, by Mr. Robert Chambers, of Edinburgh, as having happened not long ago in Glasgow. A large old building, which had been formerly a cotton-mill, was fitted up as a barrack dwelling-house for persons of the working classes, and had nearly 500 inmates. Like all foul and crowded human dwellings, fevers and kindred diseases soon became prevalent there. At last a medical man who was interested obtained permission from the proprietors of neighbouring chemical works, in which there was a lofty and very powerful chimney, to make an opening of 1 foot in diameter into the side of the chimney for ventilation of the lodging-house. He then connected with this a main tube from the lodging-house, which had branches running along all the passages or galleries, and from the ceiling of every separate room a small tube communicated with these branches. Soon after, to the surprise as well as to the delight of all concerned, fatal diseases entirely disappeared from the house, and have never returned.

Now the chimney of the new fireplace, although not very tall, has a ventilating power scarcely inferior to that of the Glasgow chemical works. The arrangement of the hood with its valve, as above described, by allowing only unmixed and very hot smoke to enter the chimney, instead of, as in common chimneys, smoke diluted with many times its volume of colder air, increases the draught just as it does the heat of the chimney, and through an opening then made into the chimney from near the top of a room, all the hot, foul air in the room, consisting, perhaps, of the breath of inmates, smell of dinners, burnt air from candles, lamps, &c. and which else accumulates and stagnates at first near the top of the room, is immediately forced into the chimney and away. This is strikingly proved by placing near the ventilating opening a light body, as feathers or sheets of paper suspended to a thread, and seeing with what force that is drawn into the opening. In the diagram or drawing the opening is represented at the letter (*v*), having the common-balanced chimney-valve in it, which, by the wire descending to a screw within reach of the hand, can be left open to any desired degree.

Besides the remedy of the three great evils now treated of, there are many subordinate advantages of the new arrangement of a fire-place, among which the following may be noted:—

1. Chimney-sweeping can scarcely be wanted, for there is no soot.

2. Chimney-flues without soot cannot catch fire, and, if fire were in any way there produced, by shutting the hood-valve it would be certainly extinguished. Thus a large proportion of the conflagrations of buildings and of towns may be avoided.

3. The huge evil (almost universal) of smoky chimneys may cease.

4. The occasional sudden rush of air towards a hot wide chimney when the door is opened, and which carries readily the light muslin dress of a lady towards the grate and inflames it, cannot happen with this grate.

6. The danger of sparks from exploding pieces of coal thrown on the carpet does not exist here, for all the coal is first heated and coked while deep in the coal-box, and covered over. Thus a fire-guard is little wanted.

7. The strong draught of a voracious fire in one room, or in the kitchen of a house, cannot disturb and overcome the action of other chimneys in the house, as is now very common.

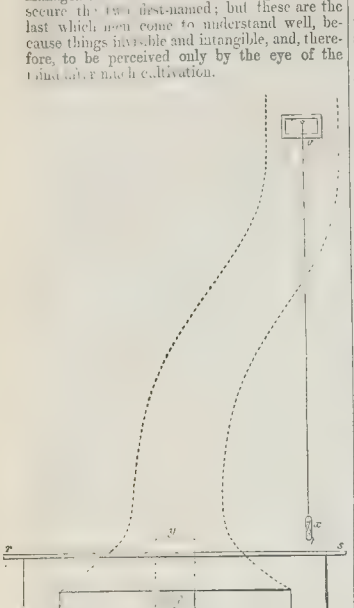
8. The strong draught of any well-constructed fire-place may, by a connecting tube, be made to ventilate any distant rooms, staircases, cellars, closets, &c.

9. The strong and copious draught caused by momentarily opening the hood valve or damper will prevent the diffusion of dust when the fire is stirred or disturbed.

10. The chimney-valve, by its powerful ventilating effect, obviates all objections to the use of gas-lights in houses, thus leaving their beauty, cleanliness, cheapness, and many conveniences unmarred. Explosion from accidental escape of gas in a room or house, of which occurrence there have been a few destructive instances, cannot happen where there is the ventilating chimney valve, for cold coal-gas entering a chimney-flue produces a more powerful draught than hot air does.

10. The improved chimney draught in attic or upper rooms will make these more valuable, and will increase the comfort of low houses and cottages.

11. It would, moreover, make it expedient to carry the flue of a close stove, or bath, or the ventilating tube from lamps in staircases with any acting chimney.



12. This torch fire (it has been so called because it burns from above downwards, like a torch or candle) is remarkably adapted also for the purposes of the kitchen.

13. The change of any existing grate of an old fashion into this is easy and little expensive.

14. Any kind of coal or coke may be used in this grate, even the small culm or coal-dust, which is very cheap.

I might extend this list, but I need not. I may notice here the remarkable fact, that of the only four things which Providence has left to man in various parts of the earth to procure for

Limself, namely, fit air, temperature, aliment, and work alternating with rest,—the skilful management of his domestic fire goes far to secure the two first-named; but these are the last which men come to understand well, because things invisible and intangible, and, therefore, to be perceived only by the eye of the mind after much cultivation.

Explanation of the Diagram.—It represents a common fire-place with mantel, *r*, *s*, or chimney-piece, two jambs, and a common grate with two bars and bottom, to which four parts, the essentials of the new fireplace, are added. The original or old parts are shown by clothed lines, the new parts by solid or full lines, *e f g h* is a box or receptacle of iron to contain the charge of coal for the day, with its open mouth placed where the bottom bars of the grate had been. It may stand on feet on the hearth, or may be fixed to the grate. Besides its fixed bottom, *g h*, it has also a moveable bottom, *s s*, like a piston, on which the coal immediately rests, and is lifted as wanted, and let down as the piston moves; the piston-rod, *u k*, passes through the fixed bottom, and is steadied by a guide-hole in the stirrup or bar, *i j*, below. The piston-rod has notches or openings in it to receive the points of the poker, *p o*, which acting as a lever, having its fulcrum in the foot of the box or otherwise, lifts the piston. A catch or pull, *z*, falls into the notches as the piston rises to prevent its return until desired.

In the centre of the bottom front is a door, which is opened at will to admit a little air if wanted, or for removing small coal or ashes which falls past the piston. Where the grate is set low a small opening is made in the hearth to allow the end of the piston to descend.

a b y is a hood or cover for the fire, like an inverted funnel opened in front, placed over the fire to contract the open space there, and to receive the true smoke of the fire and convey it little diluted into the chimney-flue at *g*.

t t is a valve or damper, placed in the narrow part of the stalk of the hood to give complete control of the current of air passing through. There is an index externally, showing clearly always the position of the valve.

g v marks the direction of the chimney-flue in the wall, having generally to bend to one side to avoid the fireplace of the room immediately above.

v is the ventilating chimney-valve, admitting air from near the top of the room to the flue, balanced nearly on its centre of gravity so that the least pressure from without opens it inwards, but any pressure from without, as of smoke, closes it. There is a wire from the valve, with a screw or loop-peg, for partially or wholly closing it.

l n indicates a channel by which fresh air, directly from the atmosphere, enters the room, to be warmed under the fender or near the fire, and then to spread in the room. It has a controlling-valve.

WHO DESIGNED THE WATER-GATE, YORK-STAIRS?

In a recent number of the *Builder* (No. 586), one of your correspondents, "A. W. H." called attention to the present neglected state of the "beautiful water-gate," at the end of Buckingham-street, Strand, the design of which he, in common with many others, ascribes to our celebrated architect, Inigo Jones, probably from the circumstance of its having been so ascribed by Walpole Dallaway, Colin Campbell, and others. Indeed, in the original edition of the "Vitruvius Britannicus" (published without date, but about 1717), an engraving of the building is given at vol. II. plate 28, with the following inscription:—"This gate was erected by the 1st Duke of Buckingham, when Lord High Admiral of England, ann. 1626, by Inigo Jones."

It is, moreover, noticed in Ralph's "Critical Review of the Publick Buildings, &c. in and about London and Westminster," first published in 1734, "as unquestionably the most perfect piece of building that does honour to the name of Inigo Jones." But I find in a manuscript (a thin folio, formerly in the possession of G. Vertue, now in the library of Sir John Soane's Museum), entitled "Account Book of Workes done by Nicholas Stone, Sen. Master Mason to King James I. and King Charles," the following memorandum in the handwriting of C. Stoakes:—"Some of ye most eminentt workes that my vncle, Mr. Nickolas Stone, Sen. did in England, in Holland, and Scotland."

The ninth article in the list is as follows:—"The Water-Gate att Yorke House, hee *desined and built*, and ye right hand Lion hee did fronting ye Thames. Mr. Kearne, a Jarman, his brother, by marring his sister, did ye Shee Lion."

This seems so clearly and circumstantially to fix the *design*, as well as the execution of the present building on Stone, that it would be interesting to ascertain on what authority it originally came to be ascribed to Jones, and the more so as no engraving of the work appears in "The Designs of Inigo Jones," collected and published by W. Kent, 1727, although Jones's design for "Temple-bar in the Manner of a triumphal Arch" (not executed) does; and if the Water-gate at York House, included in Stoakes' list, be that now in existence, and deserving of the high commendation it has so generally received, when understood to have been the production of the "immortal Inigo," it is but right and proper, though late, to do justice to the merit of the master mason, Stone; should there be no overwhelming evidence to prove that his nephew was mistaken in his statement referred to, and which from the opportunities he possessed of being accurately acquainted with his uncle's affairs, evinced by other details given in the manuscript, is, to say the least, improbable.

Perhaps some of your readers may be in possession of information on the subject, which would be conclusive, and feel sufficient interest in the subject to communicate such as they may have.

G. B.

The Loss on Birmingham Town-hall.—We understand that an honorary committee is about to be formed to aid the architects of Birmingham Town-hall in the recovery of the money lost by the sureties in the erection of the edifice.

ROYAL INSTITUTE OF BRITISH ARCHITECTS.

The annual general meeting of the Institute was held on the 1st of May, when a report from the council on the state of the property and affairs of the Institute, with an account of the funds, was read.

The following is a list of the officers elected for the ensuing year:—

President: Earl de Grey. Vice-Presidents: Messrs. T. H. Wyatt, B. Ferrey, and F. C. Penrose. Honorary Secretaries: Messrs. J. J. Scoles and C. C. Nelson. Ditto for Foreign Correspondence: Mr. T. L. Donaldson. Members of Council: Messrs. H. Ashton, J. Bell, M.P.; J. H. Good, jun.; R. C. Hussey, G. Mair, E. Christian, H. Clutton, J. H. Hakewill, G. O. Leicester, and P. C. Hardwick. Auditors: Messrs. T. H. Lewis, fellow; and W. A. Buckley, associate.

The Institute now consists of 131 fellows, 117 associates, 19 honorary fellows, 16 honorary members, and 79 honorary and corresponding members.

AN ESCAPE.

We are asked to say that a report which has arisen that Mr. Arthur Ashpitel, the architect, known to many of our readers, was lost in the ill-fated *Ercolano*, is untrue.

We are very glad to hear it, and mention the circumstance most willingly. All arrangements, it appears, had been made by Mr. Ashpitel for the passage, but a return of illness forced him to remain at Naples, and thus, what seemed a misfortune, saved his life. Thus it is more often than we think, or ever discover, seeing, as we do, only a small part of the whole at a time. The "bit of luck" often leads to ruin; and what appears to be a sad misfortune, is the saving of us. The recollection of this would be useful to most of us.

THE WELLINGTON CLOCK TOWER, LONDON-BRIDGE.

Workmen are engaged in digging the foundation for the Wellington Clock Tower, at the entrance of the London and Brighton Railway. The tower, the morning papers say, "will be 70 feet in height, and 40 feet at the base, with four illuminated clocks." It is much to be hoped that the original design noticed by us some time ago (a stone structure in cast-iron, so to speak), is not to be carried out. Should it be, it will become a lasting annoyance to all who have been concerned in its erection.

"BUILDINGS ACT AMENDMENT BILL."

Mr. Donald Grant's Bill for sanctioning his Patent Ventilating Apparatus (schedule F of the Buildings Act, notwithstanding), is going, as it did last year, through the House of Lords as a *Public* Bill for amending the Buildings Act without discussion. May I, through your columns, again ask Mr. Grant to explain his system, which I can find no one who has heard of, and say why this should be a public measure.

A District Surveyor.

PROVINCIAL NEWS.

Swinderby.—The ancient church in the village of Swinderby, about 8 miles from Lincoln, is about to undergo extensive alterations and enlargement. The present north aisle is to be taken down, and extended about thirty feet in length, with a new roof. The nave is also to have a new roof, and the whole of the church is to be repewed with open benches. The alterations will cost about 520*l*. Mr. William Huddlestone, builder, of Lincoln, has undertaken the contract for the whole of the work.

Moulsham.—The *Chelmsford Chronicle* states that the committee for carrying out the enlargement of St. John's Church, Moulsham, have had to make another appeal to the public for the balance of 200*l*. By the enlargement, which has been effected by the projection of transepts and a chancel with chancel aisles, free seats have been obtained for nearly 500 additional worshippers. Recently the general appearance of the church has been improved by decoration, one of them by the lady of the rector of the

parish. The cost of the enlargement of the church has been altogether 1,882*l.* 13s. 11d.

Faringdon.—The alterations and improvements now going on and contemplated in the parish church here are now much greater than was at first thought necessary. The heavy and unsightly galleries are completely removed, and the pillars will be restored to their original state. The south porch is now being pulled down, and will be replaced by another entrance, with an organ-loft over, and a gallery for the singers. The pipes for heating are nearly completed, and other branches of work are now going on.

Newhaven.—A wing is to be erected on the south side of the parish church, according to the *Sussex Express*, and the interior is also to undergo extensive alterations. The present windows are to be removed, and others in the Early English style, of Bath stone, are to be substituted. A new floor is to be laid down, and the present pews are to give place to open seats. These alterations and improvements were practically commenced on Thursday in last week, when the foundation-stone of the new wing was laid. The roof of the new wing is to be open with wrought and stained timber. The work is to be carried out on the designs of Messrs. Habershon, by Mr. B. Constable, of Tunbridge, who is engaged in constructing the new church at Hove. The cost of the additions and improvements is calculated at about 1,000*l.* raised by voluntary contributions. The whole work will be completed in five or six months.

Norwich.—A new Baptist chapel has been commenced here. Mr. Gorrett, the minister of the congregation for whom it is intended, has subscribed 1,500*l.* towards the cost of its erection.——A meeting of the Suffolk Archæological Institution was held at Eye on 27th ult. and was numerously attended: president, the Hon. and Rev. Lord Arthur Hervey. The members first met at the Rev. H. Creed's, rector of Mellis. The first visit was to Yaxley Church, when Mr. Creed read an account of the edifice. At the castle, the Rev. Mr. Creed also read an account of that building, and of the church, which was visited. About twenty afterwards dined at the White Lion Hotel, Lord A. Hervey in the chair. At the Assembly-room were exhibited some antiquities.——National schoolrooms have just been completed at Thorpe Hamlet, Norwich, at a cost of 660*l.* The architect was Mr. J. Brown, of Norwich.

Southampton.—A ragged school has been opened in this town. The building cost about 1,200*l.* nearly the whole of which has been subscribed.

Tenbury.—The neighbourhood of Old Wood being a populous district, and distant from any place of worship, it has been determined upon building a new church on the outskirts of the parishes of Tenbury, Middleton-on-the-Hill, Leysters, and Bockleton. The late Miss H. Rushout left 600*l.* towards the building. Another Miss Rushout is a subscriber, it is said, to a large amount, and the land has been purchased and presented by the Rev. Sir F. A. G. Ousley. On Wednesday last, the foundation stone was laid. The site adjoins the public road leading from Tenbury to Leominster. The architect is Mr. Woodger, of Guildford. The ceremony was performed by Miss Rushout.

Chirbury.—About a fortnight since, the Countess of Powis laid the foundation stone of a new church at Marton, in the parish of Chirbury. The site is the gift of Mr. E. Humphreys, of Walcott. The church will consist of nave and chancel, with vestry, and timber porch, and a turret and spire at the west end of nave, and is intended to accommodate 125, including children. The walls will be built of Wotherton stone, with dressings of Grinshill free stone. The architect is Mr. E. Haycock, jun., and the contractor Mr. Henry Thomas. The cost of the church will be 650*l.*

Stapleton.—The Bishop of Gloucester and Bristol has offered to rebuild the parish church, &c., at his own cost, principally for the sake of providing free sittings for the poor.

Cheltenham.—Lord Northwick is about to erect another picture gallery at the south-west end of Thirlestane House. It is to be 40 feet in length, by 24 feet in width, and will be devoted exclusively to paintings by modern masters.

Bristol.—The foundation stone of the new church in the parish of St. Paul will be laid by the mayor on the 24th inst.

Taunton.—The churchwardens and others of Taunton have *nearly* determined to take down the old tower of St. Mary Magdalen, and rebuild it in accordance with the reports of Mr. Giles and Mr. Ferrey. The cost will probably, it is thought, be under 7,000*l.*

Brecon.—It has been agreed upon to build a new church in the parish of St. David's, Brecon, instead of the old one, which fell down some time ago. The site fixed on is in a field belonging to Archdeacon Davies, opposite the present churchyard, and granted for the purpose. Col. Pearce, of Ffrwdgrech, gives all the stone required for the building from a quarry on his estate, and about 150*l.* towards the erection.

East Wells.—Mrs. Jenkyns, widow of the late dean, has signified her intention of building a chapel of ease at East Wells.

Retford.—The erection of chapels for the new cemetery, which are to be distinct buildings connected by a porch, are to be commenced immediately. The plans have been fixed upon, and are those of Mr. Arthur Wilson, a pupil of Mr. Place, of Nottingham, under whom he is at present engaged as clerk of the works now going on at the parish church.

Chatburn.—During a violent thunder storm which passed over Chatburn, near Clitheroe, on Wednesday before last, the electric fluid struck the spire of Christ Church, about midway, and scattered the large stones, of which it was composed, one being thrown a distance of 100 yards, and a great quantity into a field below the spire, and in the churchyard. It is thought that 13 tons of stone in all were thrown down. The clock was struck and much damaged, and the fluid next entered a window in a south-easterly direction, passed between the ceiling and the slates, and finally made its exit at the northern end of the church, forcing a passage through a large stone in the wall, which it divided, although the parts remain in their place. The greater portion of the spire is in imminent danger of falling, and the whole, it is said, must be taken down to a level with the church, if, indeed, it does not fall in the meantime.

Doncaster.—A new church is to be erected in the township of Cadeby, from a design by Mr. Scott, and at the instance of Sir Joseph Copeley. The style is Decorated, and not Early English, as has been stated. It is similar in form to the church at Skelton, near York. According to the ground already marked out, the length will be 64 feet outside the walls, not including the buttresses, and 38 feet wide. The porch is 15 feet 3 inches wide, and projecting 10 feet. It will have a north and south aisle, and a chancel and vestry. It will accommodate about 150 persons. The roof is high pitched, with a turret springing through the roof from the chancel piers. The edifice is to be built of stone from the quarries of Sprotbrough. On Monday in last week the laying of the foundation stone took place.

West Hallam.—The condition of the church here having for some years been such as to call for extensive repairs, it has been resolved to restore it, as far as practicable. Mr. Place, architect, has been instructed to prepare plans, &c. New roofs will be required for both nave and chancel, and the whole of the interior will be reseated, by which means upwards of eighty additional free sittings will be secured. Upwards of 400*l.* have been promised in the parish, the whole population of which is only 623. A further sum of upwards of 200*l.* will be required.

Warkworth Castle.—The ancient Castle of Warkworth is, to some extent, in course of restoration in the style of the original, and under the directions of the Duke of Northumberland. The great baronial hall will be so repaired and furnished as to be fit to hold the manorial courts in.

Tynemouth.—The pier committee, accompanied by Mr. Brooks, engineer to the commissioners, were down at Tynemouth, surveying and setting out the site of the intended north pier. The committee were lately at South Shields, surveying and setting out the site of the intended south pier. It is expected that the foundation-stone of both the north and south piers will be laid in the course of a few weeks. ——The public baths and washhouses of the borough are now far advanced towards completion. The architects are Messrs. Ashpitel and Whichcord; the engineer, Mr. Potter: Messrs. Rutter and Towns, of North Shields, are the builders. The ground area of the structure is 33 feet in width, 108 feet in length, front elevation 25 feet. The south end, which comprises the two principal entrances, an office, and apartments above for residence, is built of polished stone. The front is in a mixed style of architecture.

Carlisle.—The local *Journal* states, in reference to the new cemetery for this city, that the ground, forty acres in extent, has been ordered to be fenced round,—the south and east sides with a wall 7 feet high, the north and west sides with a wall and palisading. Mr. Charles Armstrong's tender for the walling, and Messrs. Clarke's for the iron palisading were accepted, and ordered to be proceeded with immediately. The wall will be a mile in extent. Messrs. Hay's plan for the chapel and grounds was laid before the joint burial board, and a deputation appointed to submit it to the bishop for approval. The line of fence, as set out by Mr. Asquith, for straightening the boundaries, was approved of, as were also Messrs. Hays' other plans for the lodge-gate, the walks, terrace, shrubberies, drainage, &c.; and the sum of 12,000*l.* was ordered to be borrowed for the purpose of carrying the scheme into effect.

Newton Stewart.—The gas-works here were exposed to let, by public roup, on the 28th ult. and, after considerable competition, were knocked down to Mr. Robert Young, ironmonger, at an annual rent of 92*l.* for a lease of five years from Whitsunday first—the price of gas to the consumer not to exceed 10s. per 1,000 cubic feet.

RESULTS OF A TRIAL OF PRINCE ALBERT'S PROPOSAL FOR THE CLARIFICATION OF SEWAGE WATER AND PREPARATION OF SEWAGE MANURE.

The proposal made by the Prince Consort to the Agricultural Society of England, that sewage water might be advantageously and rapidly filtered by ascension through certain media appropriate either to the formation of required composts for solid manure, or by partial defecation only, to the preparation also of purely liquid sewage, fit for watering market-gardens with, as through pipe-hose and perforated nozzles, will be remembered by many of our readers. We are not aware that the Agricultural Society ever tested the practicability of this proposal, and, indeed, it is stated in the *Yorkshire Gazette* that they never did. It appears, however, that individual enterprize has proved his Royal Highness's proposed appropriation of the upward filtering tank of water companies to the preparation of sewage to be a highly practicable and valuable suggestion. This has been done, we understand, in many instances, but we are enabled to state the details of one case in particular, and the first, it is said, in which the new sewage-tank has been brought into use.

At Aylesbury, in Buckinghamshire, the sewage from a large section of the town discharged itself into a brook on the Hartwell-road, so near to a private residence, that the tenant threatened to indict the local Board of Health, unless measures were taken to remove the nuisance. Lady Frankland Russell, of Thirkleby Park, who frequently passed the town on her way to her seat at Chequers, having, in common with others, suffered from the poisonous effluvia, called the attention of the local board to the effect that peat charcoal had in removing the offensive odour from sewage, and, moreover, liberally subscribed towards the construction of the tank and filter. It was completed in August, 1852, and the result cannot be better shown than by quoting a letter written by the chairman of the local Board of Health to the engineer, Mr. T. A. Yarrow, of London, engaged

by her ladyship to carry out her views. The chairman observes:—

"On the 4th of August, 1852, when the peat charcoal was put into the tank, and the sewage immediately turned into it, after passing through, the liquid that ran off was without colour or flavour, perfectly inodorous and drinkable; and several who were interested in the experiment did drink it: I, myself, did: the taste was very like soft spring water. I requested a friend to analyse some of it, and he stated the result to be, that he could not detect any ammonia in it: thus the absence of ammonia would show that the fertilizing properties of the sewage had been absorbed by the charcoal. On the 23rd of September, the water which ran from the tank had the smell and colour of sewage, by which we knew the filter had done its work, in taking up as much as it would of the offensive part, which, of course, is the fertilizing part of the sewage, and the tank was accordingly emptied.

"The quantity of charcoal put in was 1 ton 9¾ cwt. and the quantity taken out was 3 tons 5¾ cwt.—thus absorbing, in five weeks, considerably more than its own weight. The consistence of the manure, when the tank was emptied, was that of very coarse sand or grit, which rendered it capable of being drilled in with seed: it was also quite inodorous.

"The benefit, in a sanitary point of view, is, that whereas the sewage was a nuisance running into a brook and polluting water which at a short distance below was taken to be used for culinary purposes, and for cattle to drink, the smell is gone from the sewage, and the water runs clear and flavourless into the brook."

The filter alluded to in the chairman's letter was constructed on the principle of that recommended by the Prince, with alterations to meet the local requirements. It purified (we are told) a section of the town containing, at a very moderate calculation, 2,000 inhabitants, and the sewage passing through the filter was of a peculiarly fetid description, owing to the deficient water supply. The tank was constructed of brick and timber; was set to work within fourteen days from the time it was commenced; and the entire cost was under 50*l.*

NOTES AND INQUIRIES.

ARCHITECTURAL AND ARTISTICAL.

1. *Jervais the Architect.*—Malone, in his account of the life of Sir J. Reynolds, gives a letter from that artist respecting the west window of the chapel of New College, at Oxford, in which Mr. Jervais is mentioned as the architect employed by the college. What is known of Jervais (I am afraid no good), and what were his principal works?

2. *Gas.*—One of the great evils attending the use of gas indoors is the smoke it causes, and the consequent disfigurement of the ceiling and walls,—what are the best practical means of obviating this very great evil—an evil which the gas companies are particularly interested in remedying, for it operates extensively in excluding gas from good houses. They would do well were they collectively to offer a liberal premium for a perfectly effectual and not unsightly remedy; either by a complete combustion of the sooty substance, or by collecting and carrying it off, or by some other expedient. I am aware that Faraday's plan answers, but it is open to several objections, besides its expensiveness. S.

WORKING MEN'S FUNERALS.

Your correspondent, "W. H. B." ought to have gone a step further, and inquired why there should be any walking funerals at all. The manner in which four weakly leg-bespattered men, half stifled by a pall, shuffle, stagger, and sweat under the load they bear, is painful to witness; and when it is known that the thin pine boards which are bent into the shape of a coffin not only let out the effluvium, but also in many cases fluid on the bearers, the sight becomes positively disgusting. A one-horse carriage funeral, including an impervious coffin and carriage for six persons ought not to cost more than 1*l.* 2*s.* 6*d.* for a distance of four miles, and although I am not an undertaker I would for public decency's sake guarantee a profit, and a large one, to any persons who would be undertakers at such a rate of charge. No funeral ought to cost more than 5*l.* unless more than six persons attended. Anti-Mute.

THE CHURCHES OF LONDON.

We proceed to complete our illustration of the churches of London; we have already given views of fifty-one of them (see pp. 43 and 198, *ante*), and now give "a prospect" of the remaining twenty-one. The whole of these, it must be remembered, are within the City walls. The churches of Westminster would form another very interesting group, and those of the rest of the metropolis, several.

No. 1, in our present view, represents St. Dunstan's in the West, Fleet-street, built by the late Mr. Shaw, between July 1831 and July 1833. The old church escaped the fire of 1666, and, with its projecting dial with two figures of savages the size of life to strike the quarters, was a curious remnant of old London.

No. 2. St. Giles's, Cripplegate, one of the most interesting buildings in London. Here rest the remains of three notable Johns—John Fox, John Speed, and John Milton. Cromwell was married here to Elizabeth Boucher. In the churchyard is a portion of old London Wall.

No. 3. St. Andrew's, by the Wardrobe. This was built by Wren, after the fire, at the cost of 7,060*l.* and has some modern monuments by Bacon and Manning.

No. 4. St. Andrew's, Holborn, which escaped the fire, but becoming ruinous, was taken down in 1686, and rebuilt from the designs of Sir Christopher Wren. The old tower remained in its original state till 1704, when it was repaired and disguised with a facing of stone. Richard Savage was christened here, and in the register of burials appears the name of "Chatterton," the luckless boy-poet of Bristol. The east window is filled with stained glass, by Price, of York, 1718.

No. 5. St. Andrew's Undershaft, speaks of May in the olden time. Here annually was raised one of the City poles, until the riot in 1517, which gained for the day on which it happened the title of "Evil May-day." The church stands in Leadenhall-street, and was built at the beginning of the sixteenth century. It well deserves a visit, when the tomb of John Stow must not be overlooked.

No. 6. St. Botolph's, Bishopsgate. The old church here stood till the beginning of the last century, and the present structure, built from the design of James Gold, was consecrated in 1728.

No. 7. St. Dunstan's in the East, with its curious spire carried on four arched ribs, built by Wren. The body of the church was built from the designs of Mr. Laing, from 1817 to 1821, at the cost, it is stated, of 36,000*l.*!

No. 8. St. Dionis, Backchurch, built by Wren at two different times after the Great Fire. Notice the syringes in the vestry for the extinction of fires at a time before Braidwood was.

No. 9. St. James's, Garlick Hithe. This church was also built by Wren, after the fire. Over the projecting dial is a carved figure of St. James. Within there is a picture of the "Ascension," by Geddes.

No. 10. St. Bartholomew's the Great, in Smithfield, a history in stone too long for us to tell now. The body of the church, founded by Rahere about 1120, is of the Norman style; and with the monuments and vestiges of the priory buildings, will well repay a visit. The oriel in the church was probably added by Bolton, who was prior from 1506 to 1532, and probably built Canonbury House at Islington, one of the possessions of the Priory.

No. 11. St. Mary's le Bow, the finest of Wren's spires. In connection with this church, too, we have a long story. A Roman temple probably stood here originally: part of the Norman building which succeeded forms the crypt of the present structure. In the twelfth century it was the scene of a serious tumult, headed by Longbeard, and in 1284 one Ducket, a goldsmith, was assassinated there. The balcony in front of the tower was for the viewal of City shows. Near the old church there was a shed, built by Edward III. that he and his Queen might behold the jousts. The doorway below the balcony deserves examination.

No. 12. St. Mary's, Woolnoth, the work of Nicholas Hawksmoor. The old church was injured by the fire, repaired under the direction of Wren, and about 1716 taken down. Hawksmoor has shown much originality in his design. Here lies the Rev. John Newton, "once an infidel and a libertine."

No. 13. Allhallows the Great, in Thames-street. This ancient church was burnt in 1666, and the present structure was built under the direction of Wren in 1683. It is remarkable for a carved oak chancel-screen.

No. 14. St. Antholin's, which stands at the east end of Watling-street. It was rebuilt in 1682 by Wren, and is noticeable for its spire and the oval dome which covers the body of the church.

No. 15 indicates St. Stephen's, Walbrook, the interior of which has received more praise than any other of Wren's works. It unquestionably has a great charm, although the details are of an indifferent character. An account of the church, and some particulars of curious documents in the vestry, will be found in a preceding volume.

No. 16. St. Michael's, Cornhill. The old church having been burnt in 1666, Wren rebuilt the body of it in 1672; and fifty years afterwards took down and re-erected the tower. The church is Italian in style, the tower perpendicular Gothic. The latter has a bold, striking outline, but the details will not bear examination.

No. 17. St. Olave's, Hart-street, of which we gave some particulars in a recent number (p. 226, *ante*).

No. 18. St. Stephen's, Coleman-street, of which there is the usual story—it was destroyed by the fire and rebuilt under Wren, in 1676. There is a painting in the vestry-room. Amongst the monuments in the old church was one to Master Anthony Munday,—

"That surv'aid
Abstruse antiquities, and ove them laid
Such vive and beauteous colours with his pen,
That (spite of Time) those old are new agen."

No. 19. St. Vedast's, Foster-lane, which was rebuilt after the fire under the direction of Wren. The spire is graceful and clever.

No. 20. St. Augustine's, Watling-street, built in 1683 by Wren. The steeple was not finished until 1695.

No. 21. St. Sepulchre's, Skinner-street, which retains its ancient tower and beautiful Gothic porch. The body of the church was restored by Wren after the fire: about 1836 a new roof and ceiling were formed.

If we add to these St. Bartholomew, of the Exchange, a building by Wren, which was removed from its original position three or four years ago, and re-erected in Moor-lane, Fore-street, under the direction of Professor Cockerell, we shall then have before us the whole of the churches which stand within the City boundaries.

A GROUP OF LONDON CHURCHES.

GASWORKS.

Why should we not be supplied with gas and coke from the neighbourhood of the pits themselves, instead of carrying on the chemical process in large towns? The only objection that rises in my mind is whether the pressure would be too great for the pipes, when sent to a long distance. But could not this be obviated by stations built in secluded and at present waste places on the road, where the required new pressure might be applied? With regard to the carriage of coke, it is so much lighter than coal that the advantage is obvious.

W. H. B.

*** The desirableness of this arrangement was urged by us long ago; and we are glad to hear that a plan for effecting it is about to be made public by Mr. James Simpson, the engineer.

RESTORING WALLS TO UPRIGHT.

HOWDEN CHURCH.

Works in connection with re-roofing the nave of this fine church are going on. Last week the somewhat difficult and delicate operation of straightening the north wall, which in times long past had swerved about a foot from its parallel, and several inches out of its perpendicular, was successfully accomplished without accident. A correspondent sends us the following particulars of the method by which this has been done:—Ten strong beams, 12 inches square, of timber, were placed at intervals across the nave, above the arches, and through the side walls, secured to a horizontal beam, pressing against the outside of the clerestory south wall. The like arrangements were made on the north side; with this difference, that to the ends of the beams were attached three iron bolts, with strong nuts, so that, by applying the power at this point (the south wall being shored or propped with diagonal braces, well trussed, and stretching from the base of the north piers to the clerestory wall on the south side), the whole arcade, pillars, arches, and clerestory, would be, it was expected, drawn back to their original position; and, in order to facilitate the simultaneous movement of the immense mass, the joints at the base of the pillars were sawn half way through, leaving about one-eighth of an inch of space for the reinstatement of the piers in their perpendicular position. We should state that the old roof had been previously removed, so as to lighten the walls as much as possible. The following figures will show the magnitude of the operation. The wall is 112 feet long, 46 feet high from the church floor to the eaves of the roof, the average thickness being 3 feet 6 inches, and the weight, allowing for the springs of the arches, &c. about 1,000 tons. All the preparations proposed by Messrs. Weightman, Hadfield, and Goldie, the architects, having been completed under the direction of Mr. Robert Sugden, of Howden, the contractor, on Monday last, the screws, ten in number (being easily worked by two men at each screw) were gradually tightened, and in a few hours the work was successfully accomplished.

PRICE BOOKS.

The attempt made by "Z." to improve the present "Price Books," and to amend the system of measuring and valuing artificers' works, deserves, in my opinion, the support of the profession.

I think both his proposed standard quantities much superior to the rod; indeed, I consider it is desirable to do away with the rod *entirely*, as a quantity of artificers' work. I can see no objection to the adoption of the yard cube as a *general* standard quantity for brickwork, agreeably to his suggestion.

Upon the question of joiners' work, I am, in some degree, at issue with him. By the Petersburg standard he means, I suppose, 120 1½ inch *planks;* now in London the usual standard is 120 3-inch 12 feet *deals;* which is, I imagine, by far the better of the two. As the price of each deal is regulated by the price of deals per hundred, *all* the calculations "Z." objects to are not unnecessary; nor can the percentage of profit be dispensed with, for there is no "royal road" to the valuation of artificers' work. The tables for valuing deal in Thorn's "Builders' Guide" leave little to be desired.

In Weale's "Student's Guide," decimal tables of constants are given, which, as far as they extend, will meet all your correspondent's wishes, because they are adapted for all fluctuations in the price of labour, and the master's profit can be included or excluded at pleasure.

I perfectly agree with "Z." as to the desirability of introducing a uniform system of measuring, and the profession could do much towards effecting this.

For inconsistency I apprehend the system of valuing painters' work stands almost pre-eminent. The running articles are, in most "Price Books," valued extravagantly high in comparison with the price of yard-work; but for "flatting" the prices given are *outrageous*. This kind of work costs about the same as common oil, perhaps rather less; and yet in three "Price Books" before me the price for flatting is, in round numbers, *double* the price of common oil.

T. J. P.

PRESERVATION OF STONE.

In your report of a meeting of the Royal Institute of Architects, on the 28th November, when the preservation of stone was a subject of discussion, one of the speakers observed that "they should ascertain if possible the causes of decay in stone," and this induces me to lay before you my view of this question.

I have noticed in and about the metropolis several buildings that have been erected only a short time already exhibiting symptoms of decay in the stone,—the Houses of Parliament, Lincoln's-inn Hall, the new church in Old-street-road, the Congregational Chapel, Kingsland, only completed last year; the Institution of Civil Engineers, &c.; while stone buildings in the country that have been erected a longer time than the above-mentioned show no signs of decay.

After many observations and tests, I have come to the conclusion that alkaline efflorescence is the primary cause of decay, and that in London and large towns where many kinds of manufactures are carried on, the process of efflorescence is more rapid than in the country: this difference is caused I think by the stone absorbing the impure gaseous particles that are thrown into the atmosphere through the chimneys of the manufactures, &c. The process of efflorescence or crystallization of salt may be traced to be the cause of decay in the stone of which the Houses of Parliament are built: this beautiful magnesian limestone from its nature and appearance was (in the absence of the test which it is now undergoing) justly selected for so important a building. The enamel surface of this stone is almost impervious to oil, for on my applying a slight dressing to its natural enamel surface more than a week passed before the oil was absorbed, while upon a portion of the same block where the surface was disintegrated, a similar dressing was absorbed in half an hour. From this test I deduced that the first cause of decay proceeds from the stone, but that decay is greatly accelerated by the absorption of impure gases.

For some time I thought the wearing away of the almost metallic compactness of this stone was caused by the action of expansion and contraction, but after much consideration I now think it proceeds from the cause that I have stated, and I have no doubt that I could prove practically that such is the case.

J. B. Davies.

THE TRADESCANT'S MONUMENT IN LAMBETH CHURCH-YARD.

"Hoc ego versiculos feci, Tulit alter honores."

As everybody who is acquainted with Dr. James Forbes Young, will not be surprised at the quiet, cool, and unostentatious manner in which (in No. 586, p. 222) he has replied to the statement of your correspondent "T." at page 209; and as, moreover, I have taken much interest in the restoration of the monument, I think it but justice to inform you and your numerous readers, that if the idea of its restoration did not wholly originate with him (which I believe it did), at all events, and to my certain knowledge, he has carried it out with the most anxious solicitude, at no small expense of money, time, and trouble to himself.

As to the execution of the work, it may be sufficient to mention the name of Mr. George P. White, of Vauxhall-bridge-road, an inspection of the monument will speak for itself, and although it may not be necessary on this present occasion, to inquire "who piled the bricks, or brought the stones," yet I do consider the friends of the restoration are greatly indebted to Mr. William Freeman, for his donation of a sufficiency of stone, from the Darley Dale Quarries, near Derby, not so much for so kind and liberal a donation as for the reasonable expectation of its permanent durability and beauty, unlike many of the ephemeral productions of the times, here to-day and gone to-morrow.

G. G.

Southwark.

ARCHITECTURAL COMPETITIONS COMMITTEES AND PROFESSIONAL MEN.

What is said by your correspondent "W. Y." does not at all invalidate my complaint of the system of competition as at present conducted. He takes, however, a somewhat different view of the matter from myself, since he opines that architects themselves are quite as much, if even not more, to blame than committees. Yet, if reform is to come at all, it must begin somewhere, and certain it is that the mode in which competitions are generally managed from first to last by the parties who institute them is rife with errors and abuses of so very tangible a kind, that both they and the remedies for them may be clearly enough pointed out.

With regard to malpractices on the part, I am sorry to say, of those who engage in competitions, they arise in a great measure out of the perniciousness of the system as now established. Trusting to the incapacity of those who ask for designs, and who, by the miserable sums which they offer as premiums, show that they have no idea of the mental study as well as manual labour required for what deserves the name of a *design*, many make no scruple of sending in deceptively showy drawings and fallacious estimates. And although "champagne suppers" to committees are an equally gratuitous and uncalled for dash of caricature, or even burlesque, on the part of "W. Y." there no doubt is, whenever the opportunity for it is afforded, a good deal of underhand tampering with influential parties.

According to your correspondent, the majority of the profession have invariably thrown "*uncommonly* cold water" upon any movement towards effecting a reform in competition. Certain it is that the leaders in the profession—those whose names would help the cause of such reform, stand aloof; and though they do so, perhaps, merely because it is no matter of personal interest to themselves, their own position and practice being already sufficiently secure, it looks very much as if they were utterly indifferent to all other interests but their own, and to all grievances which do not affect themselves.

Apropos to competitions, I have heard that a paper on the subject, which excited more than ordinary attention, was read at a late meeting of the Liverpool Architectural Society. I have not, however, seen any report of it, either in the *Builder* or elsewhere. Therefore, whether it contained anything really to the purpose is best known to those who heard it.

An Architect.

P.S.—In to-day's *Builder* I see an advertisement for a design for two chapels, offering three premiums of 5*l.* 3*l.* and 2*l.*: *two pounds* as a premium for designing two chapels! What next? Why, the only next thing that now ought to be done is to bring the people who offer such insults under the name of premiums, to their senses.

GEORGE STEPHENSON'S STATUE AT EUSTON STATION.

Gazing the other day at the marble statue of the late George Stephenson, recently erected in the great hall of the Euston Station, I was forcibly struck with the meagre and disproportionate appearance of the pedestal upon which it is placed. My imagination compared it to the idea of a giant perched on one end of a waste log of squared timber, or Atlas elevated on a soap-chest. The part of the hall floor under it is uneven, and there is a gaping joint of half an inch unpointed up betwixt the bottom bed of the pedestal and the flagging; so that what with the scanty dimensions of the width of the pedestal, its disproportionate height to its width, and the colossal height of the statue it has to support, it gives it a topheavy appearance, so much so, that one might fancy a strong fellow placing his shoulder against it might topple the whole fabric head and heels over.

Surely it would not have been bad taste to have placed this fine piece of sculpture on a massive block of marble or granite, forming a pedestal to it sufficiently large in its proportions to harmonize not only with the figure itself, but with the hall in which it stands.

W. L.

Deptford and Rotherhithe Docks.—The Parliamentary committee on the Wellington Dock Bill have decided that, considering the present state and prospects of the country and trade, it is inexpedient just now to sanction any new works of this description. The expenses both of promoters and opposition are said to be enormous.

WATER METERS.

FIG 1.—ELEVATION.

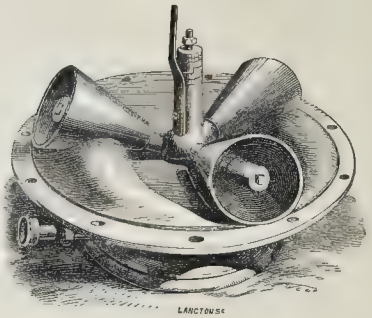


FIG. 2.—BASE OF METER, SHOWING THE ROLLERS AND BAGS.

WATER METERS.

INSTITUTION OF CIVIL ENGINEERS.

ON May 2, Mr. James Simpson, President, in the chair, the paper read was "On Water-Meters," by Mr. David Chadwick (Salford), which commenced by showing the long-experienced want of a good system of ascertaining the quantity of water delivered by water companies to private houses, public establishments, or manufactories, direct from the pipes, without the intervention of cisterns, and under the varying pressures of high and low service, or under the circumstances of intermittent or constant supply.

After alluding to the statement in the Reports of the Juries for the Exhibition of 1851 (Class V.), "that no instrument had hitherto been so far perfected as to satisfy the conditions of a good meter;" the paper gave a list of the patented water meters from 1824 to 1853, and then proceeded to explain succinctly the several systems hitherto employed, under the several classifications of,—

1st. The diaphragm principle.

2nd. The water-wheel, the turbine, the spiral fan, the drum, and their various modifications.

3rd. The piston and cylinder.

In practice, it was said, they were all found to permit small quantities of water to pass continuously through the meter, without registration, in consequence of a certain amount of force being required, to overcome the resistance offered by those parts of the meter in connection with the counting apparatus, before motion could be given to it.

Mr. Siemens's inventions were well spoken of for their ingenuity, but the defect above mentioned equally applied to them.

Captain Ericsson's rotary fluid meter was shown to bear a close resemblance to that of Mr. Taylor, and to be liable to the same objections.

The reciprocating fluid meter, also by Captain Ericsson, was shown to have been used, to some extent, in the United States, and to be more effective in its action.

Messrs. Donkin and Co.'s meter, on the principle of the disc engine, possessed a certain degree of merit, but it had not hitherto been rendered practically efficient.

The instrument introduced by Messrs. Hanson and Chadwick, of Salford (Figs. 1 and 2), the description of which was the point of the paper, consisted, the writer said, of a vessel of metal, into which the fluid entered, by a pipe at the bottom, through a wire gauze, to prevent the admission of silt or other extraneous matter; it then passed into two semicircular bags of vulcanised caoutchouc, firmly fixed on a level bed; one end of each bag opening into the meter; upon these bags rested three conical metal rollers, attached to a centre shaft, which was connected with ordinary registering wheels and dials. The water, on passing into the bags, propelled the rollers round continuously, each revolution registering exactly the contents of the bags. The rollers worked in the water, under the same pressure as in the pipes, which was in fact continued throughout, and at its exit from the meter the water did not exhibit any appreciable loss of pressure.

It was stated, that the vulcanized caoutchouc would not, in a very long period, exhibit any signs of deterioration from working under water, and that there was very little wear and tear of the bags, as the rollers passed over them, without any sensible abrasion.

Notices of Books.

The Dictionary of Architecture, of the Architectural Publication Society. London: 14 A, Great Marlborough-street.

THE second part of the "Dictionary of Architecture" runs from "Albumen" to "Ardglass," and contains interesting articles on Alessio, called Perugino, D. A. Alexander, Altar, Ambo, Antwerp, Arch, Architect, &c. We extract a paragraph or two from the last named:—

"ARCHITECT (It. *architetto*; Sp. *arquitecto*; Fr. *architecte*; Ger. *architekt*). The derivation of this term from the Greek words ἀρχὸς *a chief*, and τέκτων *a workman*, leads to the inference that at the time of the invention of the compound word, the design and construction of an edifice devolved upon one individual, who was considered as the master-builder. It appears extraordinary that mention is not made by the classic authors of any architects in ancient Italy previous to B.C. 200 (Cosstius), although such artists must have existed prior to the introduction of Etruscan art into Rome by the builders of the Cloaca Maxima; but the information, especially as to rewards and punishments, to be derived from the monuments and traditions of ancient art, shows that the modern designer, contractor, clerk of the works, and most skilful artizan, were represented by one and the same individual. Both in Greece and Italy, an architect was an artist-professor of philosophical and practical mathematics and mechanics; and from the earliest times the functions of civil and military engineer, as now understood, were material portions of his duty: such was the case with the Italian artists of the fifteenth and following centuries, who superadded excellence in sculpture and painting; and who certainly made their fortifications, whether Italian or Gothic, wonderfully picturesque. It is scarcely necessary to observe that modern military architecture is designed by the engineer.

In the decline of classic Roman art, architects are sometimes mentioned as designing works of which they were not to superintend the execution; but such cases seem to have been isolated instances, from the testimonies of later authors, in whose time, as previously, the architect or master-builder was checked by a resident board, or by a comptroller of the expense, who was sometimes a person of high rank in the household or in the army (Dinocrates) of the prince; sometimes a senator (C. Plinius *secundus*), or an officer of the municipality or province in which the work was to be executed."

We have so recently urged our readers to give their assistance to this undertaking by joining the society, that we need now only remind them of it. The larger the number of members the more rapidly the work would be carried on to completion. The Annual General Meeting of the subscribers will be held on the 18th inst. to receive the report of the committee.

VARIORUM.

IN reference to the article on capital and labour in our columns of last week, and to the subject of wages in particular, and the question of mutual partnership interest, to a smaller or greater extent, between masters and men, we may here point attention to a "Lecture on Wages," delivered at the new vestry-hall of Lambeth, in February last, by Mr. W. A. Wilkinson, M.P. and recently published, in form of a penny pamphlet, by Hill, of Westminster-road. It is one of a series delivered to the working classes of Lambeth at the instance of Mr. F. Doulton, of Lambeth, to whom the author of the present lecture has inscribed it, and will be found well worthy of perusal, although we do not mean, by saying so, to commit ourselves to all it contains.——The "First Quarterly Report to the Dudley Local Board of Health on the Sanitary State of the Parish," by Mr. J. H. Houghton, M.R.C.S.E. the officer of health, and printed by Allen, of

Dudley, shows that "much still remains to be done—much that may be done before the completion of the permanent works,—much that *must* be done and done soon," to prevent fear of an epidemic outbreak of cholera this summer in Dudley. Mr. Houghton very properly urges that this ought to be done before the end of May, as after that time it is *not* advisable to disturb the soil of towns to any considerable extent without some urgent necessity. Scarlet fever has been unusually virulent at Dudley of late, many patients having actually died of it in less than forty-eight hours after attack! a fatality fast approaching that of cholera itself. This is an ominous and startling fact.——A very well got up as well as cheap "Descriptive Atlas, illustrative of the Seats of War," has been issued by Messrs. Orr and Co. of Paternoster-row. It contains very clear and good coloured maps of Europe, Russia in Europe, Turkey in Europe, Turkey in Asia, and Russia in Asia, besides a lithographed map of the Danube from Kalafat to the Black Sea, the whole exhibiting, together with a full measure of accompanying letter-press, the vast increase of the Russian territories from the accession of Peter the Great to the present time, and all purchasable for half-a-crown.——"Notes on the present Condition of Railway Legislation," by Mr. Thomas Coates (Bigg, Parliament-street), comprises a dissection of Mr. Cardwell's proposed bill and other cognate measures from the "railway interest" point of view. The writer acknowledges that when he reflects on the duties fulfilled by the boards of directors of our great railways, he "shrinks with alarm from the prospect of handing over these noble enterprises to the accidents of some office at Whitehall." As for the public, they may be said to "stand between the Devil and the deep sea." We should not like to see them handed exclusively over either to offices at Whitehall or to railway offices.——A pamphlet "On an Improved Water Meter," by Mr. C. W. Siemens, a member of the Institute of Mechanical Engineers, has been printed by permission of the council of that institute, at Birmingham, by Billing, of Newhall-street, the subject having formed part of the minutes of proceedings of a meeting of the institute. The essential principle of Mr. Siemens's meter appears to be that of the measurement—not of the absolute quantity of water, but—of the forces of its movement through a given or known area of meter or passage pipe, and the velocity is measured by means of a sort of screw propeller only actuated by the stream and actuating the machine for indexing the result. The mechanism is protected from corrosion of pivots, &c. by enclosed oil boxes. A description of another water-meter will be found elsewhere in our present number. —Mr. Fairburn, of Manchester, F.R.S. has had his valuable communication to the British Association in 1853 on the "Strength of Locomotive boilers, and the causes which led to Explosion," printed by Taylor and Francis, of Red Lion-court, Fleet-street. The tract is illustrated by engravings.

Miscellanea.

Northampton Architectural Society.—The spring meeting will be held at Leicester on the 17th and 18th of May, in conjunction with the Lincoln Diocesan Architectural Society; and a local committee has been organised to make arrangements. Earl Howe, Sir Frederick Fowke, the Archdeacon of Leicester, Mr. Heyrick, and others, have expressed their intention of assisting at the meeting, and Sir Charles Anderson, Mr. Bloxam, Rev. J. P. Lowe, and others will read papers or be present. An excursion, which will include Melton and Gadsby churches, is arranged for Thursday, the 18th.

Society of Mechanical Engineers, Birmingham.—A meeting of the Society of Mechanical Engineers, was held last week, at the Institution, in Newhall-street; Mr. A Slate, of Dudley, in the chair. The first paper read was "On Bird's Railway Train Signal," by Mr. E. J. Payne. The second was "On England's Safety Apparatus for Working Mine Shafts," by the Chairman. The third, "On Improved Moulds for Casting Metal," by Mr. Jobson, of Dudley. The fourth, "On an Improved Piston for Steam Engines," by Mr. Ramsbottom, of Manchester; and the fifth, "On an Improved Water Filter," by the Chairman.

The National Gallery at Edinburgh.—This edifice is now externally completed, the builder, Mr. Lind, having fulfilled his contract so far as the outward structure is concerned. The foundation stone of the gallery was laid on the 30th August, 1850, but owing to the roadway to the west of the Mound having to be formed, and to the deep and substantial arched foundations required for the building on account of the loose nature of the soil, it was not till June, 1852, that the basement line of the building was laid. The *North Britain Daily Mail* says,—"Its main design is known to comprehend two splendid ranges of galleries, forming suites of rooms for exhibition, perhaps unequalled even in the metropolis. The building is bisected longitudinally, the western suite of rooms being destined for the National Gallery, and the eastern for the Royal Scottish Academy. Each suite consists of five octagonal saloons, the central hall being 43 feet in diameter, the rooms on either side being 36 feet, and the extreme apartments, forming oblong octagons, 36 feet by 26. There are also two octagonal chambers, 22 feet in diameter, formed within the sides of the great central halls, and which may communicate with either range of galleries. The light is entirely admitted from above—the octagonal windows in the roof being proportionate to the dimensions of each saloon. The large radiating frames of iron are being put up. The fitting up of the galleries of the Royal Scottish Academy is being pushed forward with activity, in order, if possible, to hold the next annual exhibition, which commences in February, 1855, within the new building."

Protection of House-light and Air.—In a recent case in the Vice-Chancellor's Court, in which the Plumbers' Company, and Beale, their lessee, were the plaintiffs, and Corbet, defendant, the Vice-Chancellor granted an injunction craved to restrain defendant from erecting any building whereby the free admission of light and air to plaintiff's house, as the same existed previously to 1st December last, would be hindered or obstructed, to the damage and injury of plaintiff, as expressed by Vice-Chancellor Sir James Wigram in the injunction in "Dawson *v.* Paven" (5 Hare, 415). There seemed to be no conflict in the affidavit as to the probability of damage to some of the plaintiffs' windows. The defendants only urged their right to go on with the building till completed, when, if a nuisance were found to arise, it might be abated by order of the court.

The Birmingham Architectural Association —The members of the Birmingham Architectural Society celebrated their third anniversary on the 6th inst by visiting Lichfield, where they inspected the cathedral, Stowe Church, and other places, interesting from their antiquity or special architectural features The Marquis of Anglesey's funeral materially interfered with the objects of the visit. In the evening the society entertained its late officers, Messrs. D. R. Hill, S. Hemming, and J. R. Botham, at dinner, Mr. Hornblower presiding. The report of the council, read at the annual meeting, was of a cheering character. The society is steadily increasing in numbers, and, notwithstanding an extraordinary outlay has been incurred during the past year in furnishing the room and in purchasing books, the accounts exhibited a balance in favour of the society.

The Lock-picker foiled.—Mr. Hobbs's glory is departed. He can no longer claim the prestige of undeviating success in his calling. Having been challenged by Mr. Edwin Cotterill, of Birmingham, to pick one of his "patent climax detector locks," he is reported to have visited Manchester to make the attempt. The experiment was made on a lock supplied to Mr. Benjamin Fothergill some months ago, and affixed to an iron chest at his office, and Mr. Cotterill undertook to pay fifty guineas to Mr. Hobbs if successful within twenty-four hours. Mr. Hobbs, it is said, after examining the outside of the lock, and making instruments for the purpose, continued engaged at the work, with the exception of short periods for refreshment, and to get some of his instruments repaired, all day and all night. When the time had expired, he had entirely failed. He was afterwards allowed to examine the interior of the lock, and it seems frankly acknowledged that an extension of time would *not* have led to success, because he had worked in the dark as to some of its details.

Alleged Infringement of Copyright of Designs Act.—In the Vice-Chancellor's Court a motion was lately made on behalf of a manufacturing firm named Jeffrey for an injunction to restrain another named Potter from selling any paper-hangings of a certain pattern, which, the plaintiffs alleged, but slightly differed from a French one purchased and published by the plaintiffs. The defendants pleaded a previous issue or publication of the design in France. The Vice-Chancellor said he could not grant an injunction till the plaintiffs' title were first tried at law, the defendants meantime to keep an account of the sales of the disputed pattern.

Boarding-houses for Operatives.—In Mr. Wallis's report of his visit to the United States, at the time of the New York Industrial Exhibition, an account is given of the boarding-houses erected for the workpeople of the Bay State Mills, at Lawrence, Massachusetts, where fancy woollen goods are manufactured. The boarding-houses are thirty-two in number, each containing twenty rooms, and each accommodating thirty-six boarders; and the houses will compare to advantage with respectable dwelling-houses in the cities, and are much better than the average in country villages. The company to which the mills belong erected the houses, and expended 30,000 dollars upon the construction of the sewers alone. Each house has a parlour and two dining-rooms, connected by folding-doors, and sleeping apartments to accommodate two, four, or six persons, according to the size of the room. There is a separate chamber for an invalid. Each house is let at a rent of 150 dollars to a tenant, who furnishes it, and supplies provisions to the inmates; but the tariff of charges is subject to revision by the company. The number of operatives employed in the mills in 1850 was 1,867.

Bristol Archæological Society.—This society held its third meeting on Tuesday in last week, when there were a considerable number of persons present, including some ladies. Two papers were read: one by Mr. T. Garrard, entitled "The Memoirs of John Guy, a Bristol Citizen," and the other by Mr. P. Leversage, "On a Runic Inscription in the Bristol Cathedral."

The Exhibition of the Basingstoke Mechanics' Institution.—The exhibition of works of industry and art in connection with this institution, and which was opened at the Town Hall, Basingstoke, on Monday in last week, under the most favourable auspices, appears to have excited much interest amongst all classes. Beside the Wellington bust sent by His Royal Highness Prince Albert, the directors of the Winchester Museum have contributed a sort of companion bust in marble of Napoleon, by Canova, besides other objects of interest, the Society of Arts a large collection of photographs, educational and other useful apparatus, &c.; and the Governors of the Bank of England their original patent machine for weighing sovereigns. The Town Hall walls are filled with a collection of paintings which a correspondent attributes to various masters. There is also a large collection of bronzes, alabaster vases, statues, statuettes, &c. Guns and mortars have been sent from the Royal Military College, Sandhurst. There are specimens of Venetian, French, Belgian, and English glass, Etruscan vases, carved and gilt cabinets, Persian Mosaic, stained glass, and other decorations, mechanical models, Mechi's model farm, chalk fossils of the district, &c. &c. It was expected that with the advantage of easy railway transit, per the Great Western and South-Western Railway, the town would be visited during the exhibition by hundreds of strangers from different parts of the country, and it is hoped the result may be a a handsome balance to form the nucleus of a building fund for the institution.

London Metal Market.—The following prices are extracted from the *Mercantile Advertiser* of last week:—

	£.	s.	d.		£.	s.	d.
COPPER.							
Old .....per lb.	0	1	0¼				
Best selected.....per ton	129	0	0

Several parcels of copper that have been pressing on the market are now cleared off, and buyers appear more disposed to operate. A quiet tone prevails in manufactured bar iron; but there being a very good demand in Liverpool, the prices are well supported. Rails are much inquired after. Scotch pigs have again advanced, owing to the very heavy shipments and scarcity of warrants.

* In Liverpool, 5s. to 10s. less.

LIVERPOOL TIMBER TRADE.—Last month, according to the circular of Mr. Edward Chaloner, dated 29th April, the arrivals summed up to 7 vessels, 7,592 tons, against 4 vessels, 3,047 tons, in the previous April. The business has been by retail, as is usual at this time of the year, except in regard of a cargo of St. John pine timber, of 17 inches average selling at 2s. 0½d. per foot; birch, 15 inches, at 22d. per foot; deals, as stowage, at 11*l.* per standard; lathwood at 3*l.* per fathom; palings at 2*l.*; and laths 15s. per thousand.

THE FORMATION OF A TUNNEL under the river Ohio at Cincinnati, it appears, has been seriously entertained. The navigation of the river would be seriously impeded by a bridge. It is proposed to construct the tunnel of iron, and a plan is said to have been laid before the town-council of Cincinnati. The inventor proposes to sink it in the bed of the river, in sections, by first dredging a channel deep enough to admit of the top being sunk below or even with the bed of the river, entirely avoiding the use of cofferdams. If it is proposed to lay down a railway through the tunnel, he would put the track on the top of the arch, in place of a footway. He also proposes to make the approaches all of iron, as being cheaper and safer.

ENGLISH WORKMEN IN FRANCE. The following notification has appeared in the *Gazette*:—"Home Office, Whitehall, May 5, 1854. Whereas many English workmen have lately proceeded to France in search of employment, and having failed in obtaining work of any description, have fallen into great poverty and distress, and have suffered much misery and privation: all such persons, intending to go over to France for the same purpose, are hereby cautioned and warned of the inconvenience to which they will be exposed, unless they shall have entered beforehand into some contract or engagement with some person in France, who is able to employ them; or unless they shall, before leaving their own country, have provided themselves with funds sufficient to preserve them from want while abroad, and to enable them to return if they cannot find the employment they have sought for."

ENLARGEMENT OF LONDON DOCKS. Operations have commenced for effecting a considerable enlargement of the London Docks at the Shadwell end. A new entrance is to be made below the present Shadwell lock for the largest ships. Parallel with the existing Shadwell basin, a wide roadway and quay being between it will lead into a large dock, which, extending past New Gravel-lane, will communicate with the present eastern dock.

SHOP-SHUTTING BY HYDRAULIC POWER.—A hydraulic apparatus for raising or lowering shutters, says the *Scotsman*, is at present being erected on the new premises of the Standard Assurance Company, in George-street, Edinburgh. The water is supplied from a cistern placed on the top of the house—a height of about 50 feet—and is conveyed by a 1-inch pipe into a cylinder fitted with a piston, which, by the pressure of the water, raises or lowers the shutters. The machine is worked by turning a small handle.

WORCESTER SOCIETY OF ARTS.—A meeting was held at the Guildhall, Worcester, on Thursday in last week, for the purpose of establishing a Society of Arts for this city. The Mayor was called to the chair, and among those present were—Lord Lyttelton, the Hon. and Rev. Canon Cocks, and other reverend gentlemen, aldermen, &c. Letters of apology were also read from Viscount Southwell, Mr. Peel, and others. A list of rules was adopted, officers appointed, and the society fairly set agoing.

THE FALKIRK WELLINGTON STATUE. The foundation stone of the pedestal of this statue was laid on Tuesday in last week in presence of the provost and some of the chief inhabitants of the town. The statue is by this time probably up. It appears to be one of Forrest's stone cut statues, and to be considered as his greatest effort. The pedestal has a simple inscription on it, stating that the statue has been erected by the eastern district of the county of Stirling.

DUST IN THE CITY.—It is rumoured amongst the brickmakers and others connected with them, that owing to the present war, and the scarcity of money in the City occasioned thereby, ashes and breeze will come down to a very low figure this season, but the following list does not appear to show it. The City this year is divided into six divisions instead of four as heretofore. The letting took place on Tuesday, April 25, at Guildhall, when there were nearly forty tenders offered, and the following six contractors were accepted at the undermentioned prices:—

A division—Henry Dodd and Co.	£1,475
B division—John Gore	1,000
C division—William Sinnott, Jun.	850
D division—James Bugbee	700
E division—Robert Drummond	1,360
F division—James Sinnott	1,200

A. B.

THE MONUMENT TO THE MEMORY OF THE LATE SIR FRANCIS CHANTREY, at his birth-place, Norton, Derbyshire, has been raised. It consists of an obelisk, 21 feet 10 inches in height, in one block, 3 feet square at the base, and 1 foot 6¼ inches square at the top. The base is 3 feet high, and weighs upwards of nine tons. The foundation is a solid square of masonry, twenty-five tons of stone having been used in the construction. The material of the shaft and steps is grey granite, fine axed, from the Cheesewring quarries. The only inscription is the word "Chantrey," in incised square letters.

RAILWAY MATTERS. — The *Morning Chronicle* suggests to publishers the extension of cheap literature for "*third*-class" passengers,—say sixpence worth, or threepence, in place of the more aristocratic shilling volume.—— West-end omnibuses may look out. A Bill is now before Parliament for a line of rail between Westminster-bridge and London-bridge, along the north side of the Thames, but how it is to be managed we are not yet aware. Omnibuses, however, are becoming so much of a nuisance in the streets, that one would be glad to be rid of them on almost any terms. Yet they are useful too: they are teaching the middle-class man the use of his limbs, and how to *save* his sixpences in place of spending them in omnibuses.——A commotion has been excited in Lambeth, by the appropriation of some of the arches of the South-Western, as a receptacle for the dead while waiting funeral trains to Woking, which the company are obliged to supply. The object of the company, we believe, has been to keep their terminus clear of this traffic. A receptacle at Battersea is spoken of.

SPRING-HILL COLLEGE COMPETITION.—A correspondent states that twenty-five sets of drawings were submitted in this competition. From these six were selected, two by the professional adviser of the committee, and four by the committee themselves. The designs of Mr Bateman, of Birmingham, and Mr E. Barry, of London, were the two first; and the committee's nominees were Messrs. Wehnert and Ashdown, Joseph James, Coe and Goodwin, and Raffles Brown, all of London. These gentlemen were invited to renew the contest, in accordance with a revised set of instructions, which they accordingly did, and after examination, the design of Mr. Joseph James was ultimately adopted, upon the condition that the builder's estimates should not exceed the stipulated sum. Tenders are to be invited in immediately.

THE WORKMEN engaged by Mr. Myers, in building the new church of All Saints, Notting-hill, for the Rev. Dr. Walker, were hospitably entertained by the latter gentleman, on Thursday, in the week before last.

WESTMINSTER ABBEY.—Permit me to offer a few suggestions upon the arrangement of seats in Westminster Abbey, which at present are anything but convenient or moderately comfortable to the commoners who have not a pass to the reserved seats or the disposition to bribe the verger with a shilling for the privilege, and yet are fond of worshipping God in the beautiful temple raised to His name by the piety of our ancestors, or, as some say, by the exercise of priestly functions brought to bear upon the closing scene of a former race of John Bull's illustrious ancestors. Be that as it may, what I propose to effect is entirely to prevent the necessity of the bribery and corrupt practices before named:—to prevent the worshippers being detained two mortal hours in a temperature fast verging on the freezing point, too often resulting in severe cold or rheumatism, mayhap in the case of many a delicate female, prematurely hurrying her to the grave, entailing sorrow and affliction on many a heart and many a family circle. My plan would be to continue the present choir to within about 30 yards of the west entrance, where I would move the elaborate screen and organs forming the principal entrance to the choir, continue the canopied stalls and oak seats or pews to the same distance, and close in the east end with a glazed screen; by this means ample and suitable accommodation would be provided for the attendants, and the minister would have the certainty of being heard by his auditory without the painful exertion now required.

H. B.

TENDERS

For completing the erection of sixty dwellings for families for the Metropolitan Association for Improving the Dwellings of the Industrious Classes. Mr. Lee, architect:—

Glenn	£9,884	0	0
Smith and Appleford	9,250	0	0
Biggs and Cullingford	8,785	0	0
Locke and Nesham	8,650	0	0
Myers	8,549	0	0

TO GAS AND WATER COMPANIES, AND OTHERS.

WANTED, by a Practical Man, a SITUATION as FOREMAN or PIPE-LAYERS; well acquainted with the erection of gasworks and laying pipes of all dimensions. Highest references can be given.—Address to G. B. 10, York place, Fulham-road, Hammersmith, near London.

WANTED, by a thorough practical Man, a SITUATION as OUT-DOOR FOREMAN or CLERK of WORKS. He is a good draughtsman, writes a good hand, and can produce unexceptionable testimonials from previous engagement.—Address A. Y. 6, St. John street-road, Islington.

TO BUILDERS, CONTRACTORS, &c.

A YOUNG MAN, aged 22, who has been brought up on railway works, wishes for an ENGAGEMENT; can survey and level, set out and take charge of works, and is competent to perform all the duties of an assistant engineer. Would have no objection to a clerk or timekeeper's situation, if permanent. Salary not so much an object as immediate employment. Apply, per letter, to S. P. 16, Drummond-crescent, Euston-square, London.

TO ARCHITECTS

AN ARCHITECTURAL DRAUGHTSMAN and DESIGNER (Classic and Mediæval) is open to an immediate ENGAGEMENT. First rate references. Town or country.—Address X. Y. Z. Castle and Lamb's Advertising Office, Bull Head-court, New, ate street.

AN ARCHITECTURAL DRAUGHTSMAN is desirous of a RE-ENGAGEMENT in town, accustomed to the getting out of perspective, finished, working, and detail drawings, and the general routine of an office. Salary moderate Address, A. B. No. 8, Elizabeth-street South, Pimlico.

TO MASTER BUILDERS.

A YOUNG MAN, who has served above two years to a Master Bricklayer, now wishes to be ARTICLED for twelve months.—Address C. D. Office of "The Builder."

TO ENGINEERING, ARCHITECTURAL, AND MECHANICAL DRAUGHTSMEN.

A GENTLEMAN requires INSTRUCTION in Engineering, Architectural, and Mechanical Drawing.—Address A. B. 29, Stanhope-street, Park-place, stating terms, and the time for giving lessons, &c.

A PRACTICAL Carpenter and Joiner, competent to prepare plans, elevations, sectional and working drawings, measure and take out quantities, requires a SITUATION as GENERAL or SHOP FOREMAN, or Clerk of Works, or Superintendent on an Estate.—N.B. No objection to a country town.—Address, A. Z. 11, Fore-street, City. Good testimonials.

TO ARCHITECTS, &c.

AN Assistant is desirous of an ENGAGEMENT, in an office or on the works. Address, Y. Z. 23, Northumberland place, Westbourne grove.

A STAIRCASE-HAND of good experience wants a RE ENGAGEMENT. No objection to the country. Address, J. R. Office of "The Builder."

TO ARCHITECTS.

AN ASSISTANT is desirous of a RE-ENGAGEMENT; he is qualified to make fair and working drawings and specifications, and has some knowledge of land surveying.—Address, X. Y. Z. Post office, Elmon on, Middlesex.

TO ARCHITECTS.

A PRACTICAL CLERK of WORKS wishes a RE-ENGAGEMENT. Unexceptional references. Apply to C. J. Office of "The Builder."

AN ARCHITECT'S ASSISTANT, and ARTISTIC DRAUGHTSMAN, is desirous of a RE-ENGAGEMENT, in town or on the Continent. Qualifications and references of the highest description.—Address, W. G. B. Office of "The Builder."

A FIRST-RATE ARCHITECTURAL DRAUGHTSMAN competent at getting up perspectives and colouring working drawings, and taking out quantities, desires an ENGAGEMENT. Can give good references both in London and the provinces.—Address, H. J. 4, Regent square.

A CLERK of WORKS having completed his engagement at some extensive contract works, is desirous of meeting with another SITUATION. Good references.—Address to A. B. 37, Gloucester-street, Queen-square.

AN ASSISTANT and good DRAUGHTSMAN, who understands geometric, perspective, and detail drawing, and can likewise assist and bill, is desirous of an ENGAGEMENT with an Architect who requires a useful assistant.—Address, "ICH DIEN," Office of "The Builder."

TO ENGINEERS AND MANUFACTURING FIRMS.

CLERKSHIP WANTED.—A Gentleman, aged 30, fully qualified to take the entire charge of the Counting-house, wishes for a permanent ENGAGEMENT in town or country. His last situation, which he filled for upwards of eight years, was that of book-keeper and collector to an eminent engineering firm in town. This will be found a desirable opportunity for any parties requiring the services of a trustworthy and confidential man. References of the first class.—Address to F. L. 18, College-place, Camden Town.

TO ARCHITECTS AND BUILDERS.

PLASTERING WANTED by an experienced and steady MAN. Piece-work labour only, or labour and material at a fair price. Town or country. Six years' reference to builders.—Address, W. G. Office of "The Builder."

TO ARCHITECTS.

THE Advertiser, who is experienced in preparing plans, specifications, &c., is open to a RE-ENGAGEMENT either in an office, or to undertake work at home.—High references given.—Address A. R., Universal News Rooms, 263, High Holborn.

TO IRONMONGERS, MASTER SMITHS, AND BUILDERS.

THE Advertiser wishes a SITUATION as FOREMAN or WORKING FOREMAN of Smiths. He is fully competent in all its branches in town or country.—Address A. B., Post-office, 3, Cott-street, Limehouse.

TO ENGINEERS.

THE Friends of a Young Gentleman are desirous of PLACING him with a First-rate ENGINEER in good practice.—Address, A. B. care of A. and W. Hall, Stationers, Cambridge-terrace, Camden-road.

TO ARCHITECTS, SURVEYORS, BUILDERS, AND OTHERS.

THE Advertiser having for many years been in the constant habit of putting up STAIRCASES and HAND-RAILS of every description for the trade, takes the liberty of soliciting your favours in these departments, and may rely on my executing the work in the best manner, and very low prices. Patent veneered handrails.—Address, W. STARR and SON, No. 88, Dean-street, Soho.

TO CARPENTERS AND BUILDERS.

THE Friends of a well-educated Youth, in his fifteenth year, respectably connected, are desirous of placing him as an IN DOOR APPRENTICE to a respectable master, to either or both of the above trades. A moderate premium will be given. Address to A. B. No. 23, Queen's-road, Walworth.

TO ENGINEERS AND MANUFACTURERS.

THE Friends of a highly respectable Youth are desirous of placing him with the proprietor of an ENGINEERING or other MECHANICAL BUSINESS, where he would have an opportunity of learning the practical part of the trade, and be treated as one of the family.—Address, J. R. care of J. F. Howard, Britannia Ironworks, Bedford.

TO BUILDERS, PAINTERS, AND GLAZIERS.

THE Advertiser, a respectable Young Man, wishes to engage himself to either of the above. No objection to the country.—Address, W. M. 23, Charles-street, Blackfriars-road, London.

C. LEFTWICH, VARNISH MANUFACTURER, LEAD, GLASS, and COLOUR WAREHOUSE, 21, Munster-street, Regent's-park. 20*s.* per cent. given for Old Lead. Page to call the attention of the Trade to his stock of plumbers' closet-basins, plug ditto, brass-work, &c. sheet-lead, and patent pipe, plate, patent plate, sheet and crown glass, white-lead, oils, colours, &c. Glass illuminators for floors or pavements, vaults, &c. 20 PER CENT GIVEN for OLD LEAD; GLASS ILLUMINATORS for FLOORS, AREA VAULTS, &c.

Orders per post receive the most prompt attention.—WILLIAM PIGGOTT, 115, Fore-street, City, Manufacturer, by appointment, to her Majesty's Honourable Board of Ordnance.

LIGHTNING CONDUCTORS.—R. S. NEWALL and CO. Patentees of the Copper Rope Lightning Conductor, beg to inform the nobility, clergy, &c. that they supply Lightning Conductors, with the point and all staples complete for fixing, at one smiling the foot.
R. S. NEWALL and CO.'s Patent Copper Rope Conductor is being used by architects, engineers, and scientific men in all parts of the world.
OFFICES.—Gateshead-on-Tyne.
139, Strand, London.
67, Hyde-park-street, Glasgow
27, Dale-street, Manchester.

ELECTRIC COLOURS.—The ELECTRIC POWER LIGHT and COLOUR COMPANY is prepared to supply the trade generally with their Colours, which for quality and lowness of price are unequalled. Address, W. PROSSER, Lay Commercial Manager, Prosmore lane, Wandsworth, Surrey.

HOUSE DECORATIONS.—J. MAC LACHLAN, Painter and Decorative Artist, 35, St. James's-street, and at Clapham-common, informs Architects, Surveyors, and Others, that he is practically acquainted with his trade in all its details, and respectfully requests a trial from those who may wish to have their work nicely executed at a very moderate charge, and punctual time. J. MacL. will be glad to make designs for the decoration of rooms, &c. for public buildings in any part of the kingdom, with estimates.—Tenders for general repairs.

TURNING-LATHE for SALE.—To be Sold, price Twenty-five Guineas, a very superior Lathe, consisting of 4-feet metal bed, fly wheel for slow and fast movements, 3-inch poppet head, change gear, compound slide rest, centre and other chucks, &c. with tools for engine, ivory, and every other description of turning. May be seen on application to Mr ROBERT McKENZIE MESSENGER, Royal Military Asylum, Great Yarmouth. Letters to be addressed LATHE, care of Messrs. Gooch and Son, Booksellers, Great Yarmouth.

TO ENGINEERING SURVEYORS, &c.

A GENTLEMAN having accepted a public appointment is compelled to relinquish an established and increasing private practice, and wishes to dispose of the same immediately, in order that the work on hand (including a town survey for sanitary purposes) may be proceeded with. The terms are very moderate—for which, and other particulars, applications (through a respectable solicitor) addressed to T. PARKER, Esq. Solicitor, Burnley, Lancashire, will meet with immediate attention.

TO BUILDERS, HOUSE DECORATORS, AND UPHOLSTERERS.

THE most extensive assortment of UPHOLSTERERS' CLOTHS, BAIZES, and DRUGGETS, in every shade of colour, width, and quality, at HILL and SONS, 88 and 89, St. Martin's-lane, London.
N.B. Patterns sent if required.

TODD'S PATENT METALLIC PROTOXIDE PAINT.

THE PATENT METALLIC PROTOXIDE PAINT now offered has been found, after the most severe trials, to be peculiarly efficacious in preserving Iron from Oxidation, Wood from Decay, and Masonry and Brickwork from Dampness. Applied to Iron, it unites with it most intimately, forming a complete coating; so that thus protected, it will be found equal to the best galvanized iron. Hence its great value to all Engineers and Iron Founders as an application to iron vessels, iron roofs, steam and water pipes, &c. &c. It adheres firmly to iron, even at a red heat. For stuccoed buildings it will be found to be effectual in preventing the discolourations formed by vegetation, and keeping out all dampness.

For terms, application to be made at the Offices of the Company, 12, Bishopsgate-street Within; or to the following Agents:—
Messrs. PITCHFORD, Island Lead Works, Limehouse, } LONDON. | Messrs. D. and G. BRYMNER ..... GREENOCK.
Messrs. G. and T. WALLIS, 64, Long-acre, ...}

JOHNS'S PATENT PERMANENT STUCCO WASH. STUCCO CEMENT, AND STUCCO PAINT.

JOHNS'S PERMANENT WASH, WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT, is now fully established. It has been adopted EXTERNALLY and INTERNALLY at some of the largest Hospitals and Asylums, and is acknowledged to be the most useful Colouring Material in the trade, for its ADHESIVENESS, NON-ABSORBENCE, UNIFORMITY OF COLOUR, and APPLICABILITY to small or large surfaces. IT MAY BE EXPORTED TO ANY CLIMATE.

JOHNS'S STUCCO CEMENT. This Cement, which has been established many years, is now manufactured on such improved principles, that its acknowledged advantages and its suitableness for INTERNAL as well as EXTERNAL purposes are unquestionable. It NEVER CRACKS, BLISTERS, or VEGETATES; has no Caustic qualities, becomes as hard as stone in a few days, when it may be painted or papered; may be cleaned with a brush and water, and will STAND THE TEST OF ANY CLIMATE.

JOHNS'S STUCCO PAINT.—The merits of this Paint are so justly appreciated by the trade, for its ready affinity to Stucco, Brick, or other rough surfaces, its durability, and other advantages (two coats being equal to three of lead paint), that it is of the first importance to the public generally, AND WELL WORTH THE ATTENTION OF SHIPPERS AND EMIGRANTS.

Each Material in Casks of 1 to 5 cwt.
MANUFACTURERS,
PHILIP HARE and CO. 22, STEEL-YARD, UPPER THAMES-STREET.

HUBBUCK'S PATENT WHITE ZINC PAINT. The PERMANENT WHITE of the Ancients, previously confined by its cost to the use of the artist, is now, by Hubbuck's Patent, reduced to the price of White Lead.

The principal characteristics of HUBBUCK'S ZINC PAINT are—Economy, Health, Beauty, and Durability.

Builders and Contractors find Hubbuck's Paint the only one adapted to all their purposes; possessing the great desideratum of economy, combined with its high excellence as a paint, it ranks alone. Contractors effect a saving of 25 per cent. by using HUBBUCK'S ZINC PAINT.

HUBBUCK and SON feel it necessary a caution should be circulated against imitations of their Paint. These manufactures, containing frequently pernicious ingredients, are baneful to health and worthless in use, whilst the inexperience of these imitators in the production of pigments is evidenced, not alone by the coarse grainy appearance, but also by the deficiency of that body in their produce, which is known to the painter to be all-essential. That an imposition be not practised, therefore, a case that the cask is marked with the name of the original manufacturer, thus—

HUBBUCK—LONDON—PATENT.

If not so marked, the reason may be inferred.

Every information in the circular to be had of THOMAS HUBBUCK and SON, Paint and Varnish Manufacturers, Upper East Smithfield (opposite the London Docks), London.

THE VIEILLE MONTAGNE ZINC MINING COMPANY'S PURE PATENT WHITE ZINC PAINT is unequalled for permanency of colour, hardness, and brilliancy of surface; it is unaffected by sulphureous or any other vapours or emanations. Being completely innocuous and free from the pernicious effects of lead, it may be employed in all apartments whilst in use without any inconvenience to the inmates.

The greatest caution is recommended to avoid any spurious compounds that might be sold at cheap rates as Pure Oxide of Zinc. If any adulteration has taken place in the oxide, either in consequence of impurity in the material primarily made use of to produce it, an imperfect mode of production, or by mixing with the oxide certain substances calculated to give it increased weight, it then produces a very inferior instead of a very superior paint, and the economy realized by the purchasers of such oxides becomes a very expensive result to the owner of the premises painted with them.

The VIEILLE MONTAGNE'S ZINC OXIDES, dry or ground in oil, are sold with the VM mark—in Kegs, by Messrs. RIDLEY, DELL, SPENCE, and CO.; when ground and dry by Messrs. T. B. MORLEY and CO.; and by the Company's Grinding Agents, in London, Messrs. CHARLES CLAUS, and CO. wholesale agents, 62, King William-street, City; JACK and BRABY, wholesale and retail agents, 3, Tottenham-court, New-road, and 89, Upper Thames-street, City. In Manchester and Liverpool, by Messrs. LAWFORD and CO. of 49, Norfolk-street, Liverpool, who are also acknowledged Painters to the Company for Zinc Paints, and under whose various superintendence, dwelling-houses, &c. in Leith, by Messrs. R. ANDERSON and CO. Timber-bush. Dry OXIDES and PAINTS, in kegs of 14 21, and 28 lbs. and upwards, to be had of the Company's Agents in Berwick-upon-Tweed, Newcastle, Glasgow, Bristol, Plymouth, Portsmouth, Norwich, Ipswich, Poole, and the Isles of Jersey, Guernsey, Man, and Wight; also in Dublin, Cork, and Belfast.

The Company also employ an acknowledged painter in London, who will undertake any description of painting with Zinc Paint by contract.

For further particulars, apply to the Company's General Agent in London, Mr SCHMOLL, 12, Manchester-buildings, Westminster.

THE VIEILLE MONTAGNE ZINC MINING COMPANY beg to inform the public that they have appointed Messrs. T. and S. KNIGHT, of Great Suffolk-street, Southwark, as their painters, who will be ready to execute any description of painting and decorating with the Pure Patent White Zinc Paint.

WHITE OXIDE of ZINC and ZINC PAINT, (Lengst n Scott's Patent)
CROWLEY, WHITE, and CROWLEY, Sole Manufacturers, now supply this innoxious substitute for White Lead to shippers and the trade, either in powder or paint, of genuine purity, wholesale under brand, of invariable fine texture, direct from the Works, Grand Surrey Docks, Rotherhithe.

Zinc Paint is below the price of white lead, possesses equal body, and perfectly unchangeable in colour.

Price list and prospectus of its superior properties for interior, exterior, and marine purposes, forwarded in answer to letters addressed to Messrs CROWLEY, WHITE, and CROWLEY, 10, Lombard-street, London.

PORTLAND CEMENT.—ASPDIN'S PATENT.

Messrs ASPDIN, ORD, and CO have much pleasure in informing consumers of this valuable Cement, that they have, by means of a recent discovery (patented by Mr. ASPDIN) much improved the quality of this Cement without any increase in price.

Engineers and architects are recommended to specify "Aspdin's Patent," as there are numerous imitations sold as Portland Cement, resembling it only in colour.

ASPDIN, ORD, and CO beg to call attention to their SECOND QUALITY, which is equal, if not superior, to most of the Cements sold as Portland, and is considerably cheaper.

A report of experiments made to prove the extraordinary strength of their Patent Portland Cement, may be had at their Office, New Wharf, Westminster-bridge, and their Works, Gateshead-on-Tyne; or from their Agent, Mr. HENRY ROBINSON, 31, King-street, Liverpool.

PORTLAND CEMENT.—JAMES WESTON having enlarged that portion of his CEMENT WORKS on Mill-wall, Poplar, for Manufacturing the above CEMENT, begs to inform the Trade in general that they can be supplied with any quantity they may require, either at his Works, St. Andrew's Wharf, Earl-street, Blackfriars, or Mill-wall Wharf, Scotland-yard, Westminster. Manufacturer of Roman, Lias, and Mastic Cements, English and French Plaster, &c.

KEENE'S and PARIAN CEMENTS and FRENCH PLASTER for internal uses. These well known hard stuccoes are quickly, and free for painted upon within a few days.—Made and sold by JOHN BAZLEY WHITE and BROTHERS, Millbank-street, Westminster.

6, South Wharf, Paddington.
PORTLAND CEMENT.—CHARLES RICHARDSON has the greatest confidence in introducing to the trade the above superior CEMENT, being of uniform colour and quality (a desideratum never before attained in Portland Cements). It possesses extraordinary cementitious qualities, resists the action of frost and heat, and is more durable than any other Cement, does not vegetate, turn green, or crack; combined with which its eminent hydraulic properties admit it at once as the first cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. Manufactured by R. GREAVES, Esq. at his Works, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

PARIAN CEMENT, for internal use, to be painted in a few hours, and papered within a couple of days. CHARLES FRANCIS and SONS, Manufacturers of Roman, Parian (under patent), and all other Cements in use for building purposes, Nine Elms, London.

BLUE LIAS LIME.—NELSON and CO. beg most respectfully to call the attention of Engineers, Architects, Contractors, Builders, and others connected with the building trade, to the superior quality of their BLUE LIAS LIME, the natural hydraulic properties of which, and the great estimation in which this kind of lime is held for buildings in wet and damp situations, such as wharfs, docks, &c. and for concrete foundations, is a sufficient recommendation for the adoption of it in all works of the above description. It is also peculiarly adapted for stucco. Orders received by—London Agents, MAY, H. BROTHERS, 18, South Wharf, Paddington, and at the Works, Stockton-fields, near Southam, Warwickshire.

GREAVES'S BLUE LIAS LIME.—The superior manner in which the above is ground renders it cheaper for concrete or stucco than any other lime or cement. The shell lime for mortar is burnt on an improved principle, leaving scarcely any core. The satisfaction constantly expressed by Engineers, Architects, and Contractors, of the above, is its best recommendation.

Gibbs, Canning, and Co's Blue Vitrified Bricks, Pipes, Junctions, Bends, and Fire Goods.

ROMAN, PORTLAND, PARIAN, ANSTON, and LIAS Cements of the best quality.

HOOPS, PAVIORS' STOCKS, and other Bricks.
CHARLES RICHARDSON, 6, South Wharf, Paddington.

ATKINSON'S CEMENT, so long known and esteemed in London, for plastering purposes, is a quick-setting Cement, that requires no coloring.—Sole exclusively by JOHN BAZLEY WHITE and BROTHERS, Millbank-street, Westminster; and Seel-street, Liverpool.

ARTIFICIAL HYDRAULIC or PORTLAND CEMENT combines the valuable qualities of the natural Cements with the addit onal advantage that it greatly excels them in its cementitious properties; that it is not affected by frost, and does not vegetate in damp situations. Account of COMPARATIVE EXPERIMENTS on the strength of this and other Cements (read at the Institute of Civil Engineers), to be obtained from the makers, JOHN BAZLEY WHITE and BROTHERS, Millbank-street, Westminster, who prepare one quality only of Portland Cement.

GEO. & THOS. EARLE, CEMENT MANUFACTURERS, HULL.—Light and Dark, equal to any made. Manufacturers also, and dealers in Plaster, Paris White, Mastic, Hair, Lias Lime, Baths, Slates, and Slate Slabs, Fire-bricks, Grindstones, Cement Chimney-tops, ditto Vases, Rigging, &c. Paints, Stucco, &c. Marble Merchants and Importers of Pozzolano.

PORTLAND CEMENT WORKS, NORTHFLEET, KENT.—Messrs ROBINS and CO with much pleasure announce to their friends and the Public, that they have completed the enlargement of their works, in order to meet the great increasing demand for their Cement; and are now prepared to supply any quantity of the very best PORTLAND CEMENT, manufactured by them for all the purposes Cement is applicable. Orders received at Great Scotland-yard, and at the Works.

ITALIAN POZZOLANA.—A few hundred TONS of this article, of best quality, on SALE. Apply to G. and T. EARLE, Hull.

BRITON LIFE ASSOCIATION, 36A, Moorgate-street.
Assurers in this Office may receive the amount assured during Life, without increased Premium.

Loans can all times be obtained and repaid by small instalments.

Investment Policies secure a payment of the amount assured in 12, 15, or 7 years, or at death if it should previously occur, on which advances can be obtained.

Persons about to subscribe to Building Societies, will find the Building Policies issued at this Office combine the Assurance of Life with all the advantages derived from a Building Society.

Medical Gentlemen remunerated in all cases for their reports.

Annuities granted. All descriptions of Life Assurance transacted.

Policies indisputable. Office hours from 10 a.m. to 4 p.m.
EDWARD PARSONS, Secretary.

ALBERT LIFE ASSURANCE COMPANY, established 1838. Eastern Branch, 7, Finsbury-square. LOANS granted, in connection with Life Assurance, on freehold, leasehold, and personal security.
W. S. YARDY, Manager.

HAND-IN-HAND FIRE and LIFE INSURANCE SOCIETY, 1, New Bridge-street, Blackfriars, London. Instituted in 1696. Extended to Life Insurance, 1836. Immediate, Deferred, and Survivorship Annuities granted.

The Hon. William Ashley.	John Gurney Hoare, esq.
The Hon. Sir Edward Cust.	E. Fuller Maitland, esq.
Arthur Eden, esq.	William Scott, esq.
John Lettsom Elliot, esq.	John Sperling, esq.
James Esdaile, esq.	Henry Wilson, esq.
Harvie M. Farquhar, esq.	W. Tisdale Winter, esq.

LIFE DEPARTMENT.—Insurances effected before the 24th June next, will participate in profits one year earlier than if effected after that date.

In the years 1829, 1830, 1831, 1832, 1833, and 1834, the Premiums on all policies entitled to participate WERE ABATED 33 per Cent.—that is to say, a PREMIUM of 100l. WAS REDUCED to 67l. 10s. No charge for stamps.

FIRE DEPARTMENT. Insurances are effected on every description of property, at the usual rates.—By order,
RICHARD RAY, Secretary.

IMPERIAL LIFE INSURANCE COMPANY, 1, OLD BROAD-STREET, LONDON. Instituted in 1820.

SAMUEL HIBBERT, Esq. Chairman.
WILLIAM ROBINSON, Esq. Deputy-Chairman.

The SCALE of PREMIUMS adopted by this Office will be found of a very moderate character, but at the same time quite adequate to the risks incurred.

FOUR-FIFTHS, or 80 per cent. of the profits, are assumed to belong every fifth year, and may be applied to increase the sum insured to an immediate payment in cash, or to the reduction of the amount of certain of future premiums.

ONE-THIRD of the premiums on assurances of 50l. and upwards, for the whole term of life, may remain as a debt upon the policy, to be paid off at convenience, or the Directors will lend sums of 50l. and upwards, on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

SECURITY. Those who effect insurances with this Company are protected by its subscribed capital of 750,000l. of which nearly half a million is invested, from the risks incurred by members of Mutual Societies.

The satisfactory financial condition of the Company, exclusive of the unsubscribed and invested capital, will be seen by the following statement:—

On the 31st October, 1834, the sums assured, including bonus added, amounted to	£3,800,000
The premium paid to it more than	600,000
And the annual income from the same source, to	130,000

Insurances, without participation in profits, may be effected at reduced rates. SAMUEL INGALL, Actuary.

ROYAL ACADEMY of ARTS, Trafalgar-square.—The Exhibition of the Royal Academy is NOW OPEN. Admission (from Eight o'clock till dusk), One Shilling. Catalogue, One Shilling.

These views have long been in preparation, and will be exhibited with all the powers of the first establishment.—Admission, 1s.; Reserved Seats, 2s. Daily at Three and Eight o'clock.

ORNAMENTAL GROUND WORK, &c. undertaken by contract or otherwise. Please to apply by letter to W. SHORT, 87, High street, Portland-town, London.

JOHN WARNER and SONS, Patentees of IMPROVEMENTS in the MANUFACTURE of LARGE BELLS.

J. W. & SONS having of late years devoted much time and study to the long neglected art of Bell Casting, have recently invented and patented a new process connected therewith, by which they are enabled to manufacture Bells of any size, note, or weight, simply or in peals, of superior tone, truer in form, and at less cost than has hereto fore been accomplished.

Bells for Churches, Chapels, Colleges, Schools, Turret Clocks, &c. cast for any size, note, or weight, simply or in peals.

TUNED BY MACHINERY.

Stocked and wheeled Bells for hanging. Old Bells recast or taken in exchange.

MUSICAL HAND-BELLS tuned to the Chromatic Scale, with improved Levers, and hegged on a new system, which gives a superior tone and facility for ringing.

TO ARCHITECTS, BUILDERS, CONTRACTORS, &c.

HARTLEY'S PATENT ROUGH PLATE GLASS

1-8th thick, or 2 lbs. to the foot; 3-16ths, or 3 lbs.; and 1-4th, or 4 lbs. to the foot, for

RIDGE AND FURROW ROOFS, GREENHOUSES, RAILWAY STATIONS, ENGINE SHEDS, MILLS, MARKET HALLS, AND PUBLIC BUILDINGS GENERALLY.

It being universally admitted that Glass in Roofs of a permanent character should not be less than one-eighth of an inch thick, weighing two pounds to the foot, Messrs. JAMES HARTLEY and CO. have directed their attention to the manufacture of a description of

ROUGH PLATE GLASS, THAT COMBINES SIZE AND STRENGTH WITH ECONOMY OF COST.

The PATENT ROUGH PLATE is manufactured in sizes, expressly for Ridge and Furrow Roofs, giving a span of from 8 to 12 feet, at a price not exceeding weight for weight that of common Crown Glass. Not being transparent, blinds are unnecessary, and when used in Greenhouses no scorching occurs; its NON-TRANSPARENCY and strength render it eminently suitable for the Glazing of Conservatories and Roofs of all kinds; also Factories, Workshops, &c. for which purposes it is supplied in squares of all sizes, from 8 by 6 inches and upwards.

For further information apply to Messrs. JAMES HARTLEY and CO. Wear Glass Works, Sunderland.

N.B.—The Patent Rough Plate is supplied at a much lower cost than the common Rough Plate.—May 1, 1851.

GLASS.—HARTLEY AND CO.'S GLASS TARIFF NEWSPAPER

Will be forwarded Gratis, on application, "post-paid," to

Messrs. JAMES HARTLEY and CO. Wear Glass-works, Sunderland; or Purfleet Wharf, Earl-street, Blackfriars, London.

BOWDEN'S BRILLIANT CUT ORNAMENTAL WINDOW GLASS.

OFFICE, 60, ALDERMANBURY, LONDON; WORKS, NELSON-STREET, BRISTOL.

MARK BOWDEN AND COMPANY.

THOMAS MILLINGTON

Begs to inform ARCHITECTS, BUILDERS, and the Trade, that he supplies the following articles of the best quality and at the same time upon the lowest terms:—

ENGLISH AND FOREIGN SHEET GLASS, PLATE, PATENT PLATE, PATENT ROUGH AND FLUTED PLATE, MILLED SHEET LEAD,

PATENT PIPE, LEAD, IRON, AND BRASS PUMPS, AND WATER-CLOSETS,

Genuine White Lead, Colours, Varnish, Brushes, and every article in the Trade.

FOR PRICE SEE ADVERTISEMENT FIRST SATURDAY IN EVERY MONTH, OR UPON APPLICATION AT THE WAREHOUSE.

87, BISHOPSGATE-STREET WITHOUT, LONDON.

JAMES RHODES,

No. 6, MACCLESFIELD-STREET NORTH, CITY-ROAD, LONDON.

MANUFACTURER OF SASHES AND FRAMES, DOORS, &c. AND EVERY DESCRIPTION OF HOUSE JOINERY.

Glazed goods securely packed for the country. Prices on application at the Counting-house, as above.

CHEAP, LIGHT, AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT, has been extensively used and pronounced efficient, and particularly applicable for warm climates.

1st. It is a non-conductor.—2nd. It is portable, being packed in rolls, and not liable to damage in carriage.—3rd. It effects a saving half the timber usually required.—4th. It can be easily applied by any unpractised person.—5th. From its lightness, weighing only about 42 lbs. to the square of 100 feet, the cost of carriage is small.—6th. Under slate, metal, or tiles, it is a most effective non-conductor.

CROGGON'S ODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths. Price ONE PENNY per Square Foot.

CROGGON and CO.'S PATENT FELTED SHEATHING, for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, saving 25 per cent. of Fuel, and deadening Sound.

Samples, testimonials, and full instructions, on application to CROGGON and CO. 2, DOWGATE-HILL, LONDON.

ASPHALTE PAVEMENT.—HENRY L. WRIGHT is prepared to lay down his Asphalte Pavement, which is particularly adapted for railway platforms, footpaths, garden-paths, court-yards, and school-yards 2½ in. to 3 in. thick, from 1s. 6d. to 2s. per square yard.—Address, 32, Bucklersbury, City.

ASPHALTE.—GERVASE FOOTTIT, Trinidad Asphalte Works, Rotherhithe; established 1834, every description of Flooring laid with the above naval material in the best manner. Asphalte for Railway Arches, 35s. per ton. Importer of Trinidad Asphalte.

Shipping Depôt, Devon Haytor Wharf, Rotherhithe.

G. H. CLARK, Agent.

PAVING, 2s. 9d. per SQUARE YARD.—Basements, Foot-walks, Malt-houses, Corn Stores, Floors of Warehouses, and every description of Pavement laid down at about low price, and the work guaranteed.—Apply to JOHN ELKINGTON, DOMONCRAUX'S BITUMEN PAVEMENT OFFICE, MONUMENT CHAMBERS, 14, FISH-STREET-HILL.—N.B. Country Agents, and Railway Engineers and Contractors, supplied with the best Bitumen for covering Bridges and arches.

MOORE'S PATENT MOVABLE GLASS VENTILATOR, for Windows, Partitions, Factories, Workshops, Warehouses, Greenhouses, Cottages, Stables, Granaries, and other Buildings, Railway and Private Carriages, &c. For Farms, Dairies, Outbuildings, &c. the Ventilator can be made to form a complete window, iron frames and rough plate glass, &c. Ventilators made to any size, and to meet forms of sashes; also for sky or fan lights, and other purposes. A considerable saving and additional safety by having fixed window sashes.

MOORE'S PATENT "LEVER VENTILATOR," forming a regular current of air, is calculated to effect all that is required for improving animal and vegetable health. The window sash remitted at the opening left for that purpose. To shopkeepers they are particularly recommended, as from their capabilities of removing the foul air caused by the gas in the shop and windows, they effectually preserve the stock in good condition, and prevent explosion of gas.

Church and House Clock-makers to the Hon. Board of Ordnance, the Russian Government, and the Emperor of China.

Manufactory, Sekford-works, St. James's-walk, Clerkenwell, London.

J. and W. H. JACKSON beg to call the attention of Builders and the Trade to the LOW PRICES their PATENT PLATE GLASS, BRITISH PLATE, silvered and for glazing, of unrivalled quality and strength; ROUGH PLATE, CROWN, SHEET, COLOURED, and ORNAMENTAL GLASS, in every variety, of the best manufacture, at the lowest terms. Designs and estimates furnished for ornamental windows, either for house or church decoration.—All applications for estimates and lists of prices to be made at their warehouse, 3, OXFORD-STREET.

WOOD 3rds 16 oz. FOREIGN GLASS, in cases of 200 feet each, average size, 40 by 30, at 42s. per case; 4th ditto, 34s. Also 16 oz. ground do. do. 43 per foot; Crown and 21 oz. Sheet squares, in 100 feet boxes, varying from 14 by 10 upwards, 3d. per foot; 4-inch rough Plate Tiles, 12s. per dozen. Also, Crown and Sheet Glass in crates. British and Patent Plate, Rolled and Stained Glass, Glass Slates, &c. Sheet Lead, Pipe, White Lead, Oils, Turpentine, Colours, &c. G. FARMILOE and SON, 118, St. John-street, West Smithfield, London.

SOHO CROWN, SHEET, ORNAMENTAL, PATENT PLATE, AND PLATE-GLASS WAREHOUSE, 26, SOHO SQUARE.

MALFRED GOSLETT begs to inform Builders, &c. that he is prepared to Tender for the supply of EVERY DESCRIPTION of Glass, now manufactured at WHOLESALE PRICES.

PATENT PLATE, HARTLEY'S ROUGH PLATE, CROWN, and SHEET GLASS can be supplied in any quantity by JOSEPH POULSON, Lead and Glass Merchant, 164, Fetter-lane, Fleet-street, having at all times a very large stock of extra size patent plate and sheet. Discount to the trade twenty five per cent. Sheet lead and pipe wholesale and retail. About 100 boxes of small glass, from 6 inches by 3 inches up to 9 inches by 7 inches to be sold very cheap; any person taking the whole one penny per foot.

BUILDERS, SURVEYORS, CONTRACTORS, &c. are respectfully informed, an extensive assortment of ROUGH GLASS for ROOFING and FLOORS, of various substances, is CONSTANTLY ON SALE, at the lowest prices, at the PLATE, SHEET, and CROWN GLASS WAREHOUSE, No. 7, ALBION-PLACE, BLACKFRIARS-BRIDGE. Estimates will be furnished by applying to Mr. JAMES HAWKINGS.

N.B. A book on Measurement, second edition, just published, price Five shillings, will be forwarded by post on receipt of Five Shillings and Sixpence in postage stamps.

HENRY PASK (late Johnson and Pask), BAKER-STREET, Clerkenwell, Sash, Shop Front, and Door Maker to the Trade, begs to inform his customers and the public generally that he intends carrying on the business as usual, and solicits a continuance of their favours, which shall meet with his prompt attention.

N.B. By inclosing a postage stamp a full list of prices may be had by return of post.

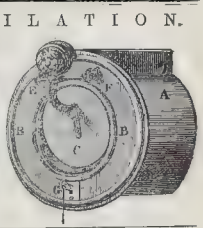
REVOLVING SAFETY WOOD and IRON SHUTTERS.—SNOXELL, Patentee, 96, Regent-street, and at his Steam-works, 155, Old-street. These shutters have fully borne out their superiority over other revolving shutters for security, durability, and simplicity. References can be given to noblemen whose mansions are fitted herewith, and numerous large establishments, where some are fixed measuring upwards of 400 square feet in one shutter, and which are opened and closed in a few moments with the greatest possible ease, without the use of machinery. The Patentee manufactures Brass Sash Bars, Stall Board Plates, &c.

LEONARD SUGDEN, Manufacturer of Doors, Sashes, and Frames, and Joiner to the Trade, 59, Grange-road, Bermondsey, respectfully invites Builders and the Trade in general to an inspection of his Stock of Goods, from which they can always be supplied with every kind of Joiners' work, which for superiority of workmanship, material, and low prices, cannot be equalled by any house in London.—P.S. A full list of prices on application.

FIRST-CLASS WINDOW BLINDS.—No Extra Charges for Fixing within ten miles.—Country orders carriage free.—HADLEY and CO. confidently invite attention to their scale of charges. Their system is to supply only the best articles, for which their prices will be found unprecedented:—Inside Venetian blinds, per square foot, 7d.; outside Venetian blinds, in cases, 1s. 4d.; outside blue striped cloth blinds, in cases, 1s. 6d.; best holland spring roller blinds, 7d.; best holland roller blinds, mounted with brass ends, 5d.; gauze wire blinds in mahogany or wainscot French polished frames, 1s. 6d. Estimates promptly furnished.—HADLEY and CO. Window Blind Manufacturers, 152, Sloane-street, and 6, Charles-street, Chelsea.

WINDOW BLINDS.—TYLOR & PACE, Window Blind Manufacturers, 104, New Bond street, and 3, Queen-street, Cheapside, London, submit the following PRICES of WINDOW BLINDS, which they can recommend as being made in the best manner: Venetian blinds, per square foot, 9d.; best holland blinds, on rollers, 6d.; best ditto, on spring rollers, 8d.; gauze wire blinds, in mahogany frames, 2s.; perforated zinc blinds, in ditto, 1s. 10d.; outside blinds of striped cloth, 2s. Transparent blinds in great variety. Engravings, with prices and discounts to builders and the trade, forwarded on application, post free.

WINDOW-BLINDS FOR THE TRADE ONLY.—The only Blind-maker in London working exclusively for the Trade is WILLIAMS, 1, Rutland-street, Brompton, Manufacturer of every description of inside and outside BLINDS, conservatory blinds, outside shop-blinds, hot-house blinds and awning blinds, executed on the most approved principles, lower than any other house. The trade supplied with springs. A list of prices forwarded post free, on application to any house in the trade. Orders by post from all parts of the country punctually attended to, and executed with despatch.



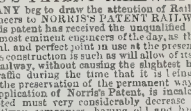
An Out-door Apprentice Wanted.

VENTILATION.

D. and E. BAILEY beg to call the attention of Architects and others to their improved

CIRCULAR ARNOTT VENTILATORS,

which are more sightly than the square ones in general use, much less liable to get out of order, and the flaps, being hung from the top, do not admit any smoke caused by down draught.



Price, bronzed, from 6s. 6d.

D. and E. BAILEY, 272, Holborn.

SUCCESSFUL VENTILATION.—WATSON'S PATENT SELF-ACTING DOUBLE-CURRENT VENTILATORS have been successfully applied to Churches, Chapels, Public Halls, Stables, and almost every kind of Building, as well as to withdraw Steam, Smoke, Dust, and Heat. Testimonials and other information forwarded on receipt of a postage stamp. The Ventilators delivered carriage free in London and Bristol. Instructions sent for fixing.—Apply at the Manufactory to CHARLES WATSON, King Cross-lane, Halifax, Yorkshire, who is the patentee and sole maker.

VENTILATION.—PURE AIR.

Sheringham's Ventilator for the admission of pure air through an

EXTERNAL WALL.

With single pulley, from 6s. each; with leading pulley, from 6s. 6d. These Ventilators are so arranged that the requisite quantity of air may be admitted for the due ventilation of an apartment without the slightest draught being felt by the occupants; and as they are placed in the external wall, their action is not impeded when the house is closed for the evening, at which time a constant supply of fresh air is most required.—HAYWARD, BROTHERS, sole Manufacturers, 196, Blackfriars-road, and 117, Union-street, Borough; and of all respectable ironmongers, builders, &c.

NORRIS'S PATENT RAILWAY CHAIR COMPANY beg to draw the attention of Railway Companies and Engineers to NORRIS'S PATENT RAILWAY JOINT CHAIRS.—This patent has received the unqualified approbation of some of the most eminent engineers of the day, as the most effective, economical, and perfect joint in use at the present time. The simplicity of its construction is such as will allow of its application to any line of railway, without causing the slightest hindrance to the ordinary traffic during the time that it is being laid down. The saving in the preservation of the permanent way and rolling stock, by the application of Norris's Patent, is incalculable; and wherever adopted must very considerably decrease working expenses. To railway companies, having old and bad roads, the principle is peculiarly advantageous, as its application will not only restore the road to a perfectly safe and serviceable state for many years, but, at the same time, bring into efficient use all the old and broken chairs. To the railway world in general, it is of the greatest value, as it admits of the easiest locomotion, and is most simple and economical in principle. Every information will be given, and models forwarded for inspection, on application to the Manager, at the Offices of the Company, Wolverhampton.

THE PERMANENT WAY COMPANY call the attention of Railway Directors and Engineers to their PATENT RAILS, SLEEPERS, FISH JOINTS, and other important improvements, now in use on upwards of 9,000 miles of railway.

Extract from the half-yearly report of the Directors of the Midland Railway, February 14, 1854:—

"An important feature in the contract for the maintenance of the Permanent Way, is that the contractors are bound to reduce their charges 50*l.* per mile per annum, whenever the Fish Joint, or certain other improvements, are hereafter introduced."

Every information may be obtained on application to Mr. CHARLES MAY, C.E. the Manager; or Mr. WILLIAM BOWDEN, the Secretary, 29, Great George-street, Westminster.

TO WATER COMPANIES AND PLUMBERS.

HIGH-PRESSURE COCKS & CLOSETS.

The Health of Towns Commissioners having recommended the adoption of the high-pressure principle in all towns, WARNER'S HIGH-PRESSURE COCK is recommended as a Cock free from leakage, and applicable for all purposes and situations. Patent Closets and Basins with supply-valve for attaching direct to main pipes without a cistern, cocks, or wire.

LEAD, IRON, and TIN PIPE.

JOHN WARNER and SONS, Manufacturers, 8, Crescent, Jewin-street, London.

TO BUILDERS AND PLUMBERS.

The attention of the Trade is called to

JOHN WARNER & SONS'

PATENT VIBRATING STANDARD PUMP,

which is recommended for the simplicity of its construction, and the ease with which it works

By the introduction of the vibrating standard, the cumbrous carriage and expensive slings and guides are unnecessary, rendering the price considerably less than pumps made on the old plan.

Beer and Water Engines for raising fluids from a depth not exceeding 28 feet; also, Garden Engines constructed on the same principle.

JOHN WARNER & SONS,

8, Crescent, Jewin-street, London,

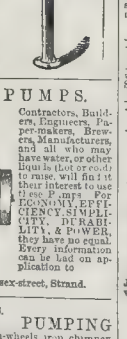
Manufacturers and Patentees.

FOWLER'S IMPROVED

WROUGHT PUMPS for CONTRACTORS, BRICKMAKERS, EXCAVATORS, and OTHERS.

The attention of this house for more than fifty years past having been almost exclusively paid to the manufacture of every description of pump-work for every variety of purpose, attention is respectfully requested to their very superior Wrought Pumps, with plain or sliding telescopic action, galvanized and ungalvanized. A large stock of all sizes is kept ready to finish off to order, according to length required, at the shortest notice.

This description of Pump-work varying in almost every case, it is impossible to quote a general price, but the fullest particulars will be given on application.



A large stock of Wrought Pumps, from 3-inch single to double 15-inch barrel, is also kept on hire prepared for hand or steam power, on reasonable terms, at

BENJAMIN FOWLER'S

ENGINE-PUMP MANUFACTORY,

Whitefriars-street, Fleet-street, London.

M. A. RICHARDS and SON, PUMP MANUFACTURERS and ENGINEERS

Pumps in Wrought and Cast Iron and Brass, to suit by machinery, and fitted in the best possible manner, as table for excavators, roads, brickmakers, farms, gardens, stables, liquid manure, ships, barges, well-sinking, &c adapted for any depth. Hydraulic Pumps for deep wells.

PUMPS ON HIRE.

Pumps of any size, single or double barrel, up to double 12 in diameter, kept ready for use at reduced prices.

N.B. The above can be worked either by hand, horse, or engine power.

Iron Pails 38s per doz. painted.
Ditto .... 48s per doz. galvanized.

Upper Ground street, Blackfriars Bridge, Surrey Side.

CENTRIFUGAL PUMPS.

Contractors, Builders, Engineers, Paper-makers, Brewers, Manufacturers, and all who may have water, or other liquids that or could to raise, will find it their interest to use these Pumps. For ECONOMY, EFFICIENCY, SIMPLICITY, DURABILITY, & POWER, they have no equal. Every information can be had on application to

GWYNNE and CO. Essex Wharf, Essex-street, Strand.

TO CONTRACTORS.

PATENT PORTABLE PUMPING ENGINES,

mounted on strong wagon-wheels, iron chimney horse shafts complete, strong, simple, for immediate use. Several are ready for delivery, from six-horse power to twenty-five-horse power and upwards, adapted to contractors' work generally. May be hired at a rental, or purchased, and can be seen at work at Messrs MEDWIN and HALL'S, Engineers and Portable Engine Makers, 99, Blackfriars-road. These engines have been successfully employed for years.

JAMES MICHIE, Engineer, Battersea-park,

Nine Elms, Manufacturer of all kinds of STEAM ENGINES (portable and stationary), Pumps, Sawing Machines, Cranes, Crabs, &c.

N.B. Several High-pressure Engines for sale.

FOR SALE, a SIX-HORSE ENGINE,

nearly new, tubular boiler; can be adapted either as a portable or fixed engine. In thorough repair, and quite capable of doing work of 6 horse power, if required. Also, a double circular saw bench, on wheels with one 4-feet 6 inches, and a 4-feet saw, of the very best construction, and easily removed from place to place. Price of engine, 150l on wheels; 130l without wheels. Price of saw-bench, 80l. For further particulars apply to FOWLER and FRY, Temple-gate, Bristol, where the engine and saw-bench can be seen.

TO BE SOLD by PRIVATE CONTRACT,

an Old-established PAPERHANGING MANUFACTORY in the north of England which has been in constant work for the last sixty years. The manufactory, which is freehold, is a square brick building, three stories high, covered with slate and tile, and built and fitted up for the trade. There are fifteen printing-tables with presses complete in work; a grounding and satining shop; one light-coloured surface printing machine, one grounding-machine, with rolling up machine attached; a desiccating drying apparatus, applied so that the work is finished and dried off as quickly as printed; colour-mills, embossing machine, and brushing machine, all driven by steam power upon the premises; lathe, and every convenience for turning up rollers for machine work. The stock of colours, paper, grounds, and printed goods are of the best description necessary and suitable for carrying on the business, which is in full work, to order, and may be extended to a large amount. The stock of blocks is large, and is a collection of well selected and saleable patterns. A good and useful set of patterns has been sent to the trade this spring, which are doing well and promise a large amount of orders. The value of the concern is estimated at about 10,000l, and particulars may be known on application to Messrs. SHIELD and HARWOOD, Solicitors, No. 14, Clement's-lane, Lombard-street, London.

PAPER-HANGINGS.—The CHEAPEST

HOUSE in London for every description of PAPER-HANGINGS is CROSSS'S WHOLESALE WAREHOUSE, 29, GREAT PORTLAND-STREET, Oxford-street, where you can select from the LARGEST and MOST EXTENSIVE Assortment in the Kingdom, THIRTY PER CENT. CHEAPER than any other house in the trade. Builders, Decorators, Dealers, and large consumers will do well to visit this establishment.

PAPER-HANGINGS.—JEFFREY,

ALLEN and CO. Paper Stainers, beg to call the attention of the trade to their patterns of Paper hangings for the present season which comprise every description of style and quality, from the most elaborate decoration to the cheapest article that can be produced, and which they are prepared to offer at very low prices. J. A. and CO. also respectfully inform the trade that they have OPENED a WAREHOUSE at No. 500, OXFORD-STREET, where all goods can be obtained on the same terms as at the Factory.

GUTTA PERCHA PAPER FOR DAMP WALLS. J. A and CO. are the sole vendors of this well-known remedy for Damp Walls.

115, Whitechapel, near the Obelisk and 500, Oxford-street.

PAPER-HANGINGS.—R. HORNE,

PAPER-HANGING MANUFACTURER, 41, Gracechurch street, City, invites builders and the trade to inspect his extensive stock of NEW DESIGNS in PAPER-HANGINGS, which, by the aid of powerful machinery, he is enabled to offer at the following prices, in stock quantities, for cash only, viz;

Stout lining paper	5d.
Superior ditto	6d. and 7d.
Bed-room papers, in great variety	8d. to 8d.
An excellent oak paper	8d.
Sitting-room ditto, on blended grounds	7d. to 9d.
Hand-made marbles	9d. to 1s. 6d.
Good satin papers	1s. 6d. to 2s. 0s.
Flock papers	2s. 0d. to 2s. 6d.
Hand-made gamillos	3s. 6d. to 5s. 0d.

39 Pieces.

Every novelty in French and English panelled decoration always on hand; also excellent imitation of fancy woods.

N.B. Patterns sent into the country, by post, showing the style and quality of the above, on receipt of two stamps, and the goods despatched with promptitude on receipt of a remittance to the amount of the order given.

PAPERHANGINGS.—TRUMBLE and

COOKE, 7 Oxford-street, London (Manufactory, Leeds), respectfully inform the Trade and Builders generally that they have now an immense STOCK of PAPERHANGINGS manufactured from their new patterns for the present season, consisting of Flock, Gilt, Satins, Oaks, Granites, Marble, and Mosaic Goods which they can supply on terms highly advantageous to the purchaser.

PEAKE'S TERRO-METALLIC TILES,

PIPES, &c.—Notice is hereby most respectfully given, that the LONDON DEPOT for this WARE is REMOVED to No. 21 WHARF, Pimlico-side-street, Queen's-road, Bays. Secondly, that the trade term, "TERRO-METALLIC," is the exclusive right of the Proprietor, and, thirdly, that the "ERRORS OF THE TIMES," page 581, of the Great Exhibition, rank the Manufactories known so long as "The Tilerics," Tunstall, Staffordshire, as the first of the kind in the world.

MAW'S ENCAUSTIC TILE PAVEMENTS.

MAW and CO. send free, per post, their NEW BOOK OF DESIGNS,

with prices, adapting this most durable, economical, and decorative production of mediæval art to entrance halls, passages, conservatories, verandahs, and every description of modern and ancient building.

BENTHALL WORKS, near Broseley, Shropshire.

200,000 PLACE BRICKS FOR SAL

in any quantity not less than 25,000. An approved bill at two months will be taken.—Apply to Z. 16, Assembly row, Mile-end road.

WHITE, SUFFOLK, and RED FACIN

BRICKS, Kent, Grey Stocks, Malm Fronts, Shippers, &c. Apply to Mr. W. ALLAWAY, 4, Catherine court, Tower-hill.

BRICKS.—Malm Cutters, Yellow and P

Seconds, Paviors, and Pickings, of good and sound quality constantly on sale at H. DODD'S Brick fields, which are only a quarter of an hour's walk from the City. H. D. earnestly requests purchasers to favour him with a visit, in order to inspect his stock and to judge for themselves.

Malm Place, half-washed Stocks, and Place Bricks, also on sale. These bricks are sound, well burnt, and unusually free from defects; a very large proportion of the stock being suitable for external facing.

Apply to HENRY DODD and CO. at the Countinz-house, Hoxton Brickfields, Grange-walk, near the Rosemary Branch, Hoxton.

N.B. Light-coloured Pit Sand of approved quality constantly on sale upon reasonable terms. This Sand, from its not containing any saline matter, is acknowledged to be preferable to river sand.

FIRE-BRICKS, FIRE-LUMPS, a

TILES, FIRE CLAY, &c.—In addition to their usual stock of ALLOA FIRE-BRICKS, TRAQUAIR and MORGAN are now getting hand a most extensive assortment of FIRE LUMPS and TILES of the same unequalled quality, to which they most respectfully invite the attention of Engineers, Furnace Builders, and consumers generally.

N.B. TRAQUAIR and MORGAN, 9, Bankside, Southwark, close to Southwark-bridge.

TO BUILDERS AND OTHERS

BRICKS for SALE. — 200,000 SOUN

STOCKS, at 20s. per thousand. Inquire on the Premises, the Tweedale Tile Kilns, back of the old White Horse, Brixton-hill.

BRICKFIELDS, LEWISHAM.

R. PARKS begs to inform builders, and all parties wanting Bricks, that he has commenced burning at NEW OAKS, which for first-rate, both in colour and quality, is 50 per cent. better than is to be bought of the old Stock in hand. Tiles and Drain Pipes manufactured of all descriptions. Easy distance to Sydenham and Bromley

ASHES and BREEZE for SALE, in large

small quantities, by the undersigned contractors.—POOLE and HUDSON, High street, Bow, Middlesex.

TO BRICKMAKERS.

Man, Finchley-common, held at a moderate royalty for five years; a quantity of washed earth and the plant to be taken at a valuation.—For further particulars apply to Mr. RICHARD, Auctioneer, Tottenham.

GUTTA PERCHA TUBING.—Many

inquires having been made as to the durability of this tubing, the Gutta Percha Company have pleasure in drawing attention to the following letter from Mr C. Hacker, surveyor to the Duke of Bedford —"Office of Works, Woburn-park, Jan. 10, 1854.—In answer to your inquiries respecting the gutta percha tubing for pump suctions, I find that the water has not affected it in the least, although it will eat lead through in two years; we have adopted it largely, both on account of being cheaper than lead, and much easier fixed, and a more perfect job. Yours, &c. C. Hacker." N.B. The Company's Illustrated Circulars containing instructions to plumbers for joining gutta percha tubing, &c. will be forwarded on the receipt of three penny stamps. The Gutta Percha Company, Patentees, 18, Wharf-road, City-road, London

GARDEN MOULD.—WANTED, to

get rid of, about 400 LOADS of capital fine BLACK MOULD. Parties desirous of having the same, or any portion, may send proposals to Mr. DUDLEY, 1, Garnault place, Clerkenwell (near the locality).

Syphon Pan, with or without STEPHEN GREEN'S Patent Air-tight Valve.

Registered Flushing Basin.—them ostfective Syphon-trap yet offered to the public.

STEPHEN GREEN'S IMPERIAL POTTERIES, LAMBETH.

IMPORTANT TESTIMONIALS

TO THE EFFICIENT WORKING OF

STEPHEN GREEN'S

PATENT SYPHON FLUSHING BASI

AND

SELF-ACTING CLOSET CONNECTIO

Oxford, November, 18

GENTLEMEN,—Sixteen of your Closets having been put into operation at Christ Church College, I have great pleasure in giving you my testimony as to their efficiency and simplicity.

HENRY J. UNDERWOOD, Architect.
R. J. HOGGAN, Engineer.

Royal Arsenal, Woolwich, June 24, 185

GENTLEMEN,—I have much pleasure in giving my testimony in favour of your Patent Syphon Flushing Basin, with Self-acting Closet Connections. There are several fixed here, which have been in use for upwards of twelve months, and have given perfect satisfaction.

I am, Gentlemen,
Your obedient Servant,
WILLIAM CARTWRIGHT.

This effective article has not any Crank or Wire to get out of order, and is complete and ready for use, and may be seen in operation at STEPHEN GREEN'S Manufactory, Lambeth.

CRYSTAL PALACE—JENNINGS'S CLOSETS.

GEORGE JENNINGS has great pleasure in informing his Patrons that he has received instructions to provide and fix the whole of the LAVATORIES and URINALS required for the Exhibition Building.

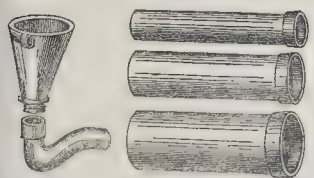
The ROYAL APARTMENTS are also to be fitted with JENNINGS'S IMPERISHABLE WATER-CLOSETS, as also various OTHER IMPORTANT DEPARTMENTS of the Building.

The arrangement of the Urinals will be found to be entirely new in every respect; eight being fixed in a diameter of 5 feet, similar places raised in the centre of public crossings in the same style, would be at once useful and ornamental

As all new things require publicity, and something to recommend them, GEORGE JENNINGS respectfully invites Architect's attention to the following in relation to his IMPERISHABLE WATER-CLOSETS, Charles Lee, Esq., Architect, of Golden-square, had two of these Closets fixed at his offices and private residence. The result is, that he has specified sixty to be used in the Model Lodging-houses, Broad-street, Golden-square, as also sixty of JENNINGS'S BALL COCKS. Cases like this might be multiplied, but one will suffice.

GEORGE JENNINGS has just obtained Patents for Measuring Water to Water-closets, and preventing Waste of Water; also another Patent for Improvements in Drain-pipes, and in Connexion and Junctions for the same. Full particulars will shortly appear.

A Book containing particulars of all JENNINGS'S SANITARY IMPROVEMENTS can be had on application, or by post if two stamps are sent to



GEORGE JENNINGS,

ENGINEER AND PLUMBERS' BRASSFOUNDER, 29, GREAT CHARLOTTE-STREET, BLACKFRIARS-ROAD, LONDON.

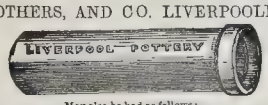
JAMES STIFF, MANUFACTURER of GLAZED STONE-WARE DRAIN PIPES, BENDS, JUNCTIONS, TRAPS, &c. 39, HIGH-STREET, LAMBETH, LONDON. Established 1751.

Water-Closet Pans, with Syphon Traps, 7s. 6d. each.

STRAIGHT TUBES, in Socket Joints, in Two Feet Lengths.

The great advantages attending the use of these articles are now so generally understood, as to render any enumeration of them almost superfluous. Their cheapness, efficiency, and durability, are universally admitted; while the rapidly increasing demand for them proves their estimated superiority over every other kind hitherto before the public for similar purposes.

Inspection is invited to an assorted Stock of Drain Tubes, of every form and size, adapted to the various situations for which they may be required; as also to the WATER-CLOSET PANS OF IMPROVED CONSTRUCTION, and interior glaze, far surpassing any other manufactured of Brown Stone Ware.



N B These are made without the discharge-hole being turned down-wards.

May be had also at Messrs. GLADDISH'S LIME WHARFS, Pedlar's-acre, Westminster-bridge; City-road Wharf, City Basin; Brick-head, Bermondsey; Danver's Wharf, foot of Battersea-bridge, Chelsea; Pratt Wharf, King's-road, Camden New Town. T. TURNER 2, South Wharf, Praed-street, Paddington; and at COLWILL, Brothers, 32, Brydges-street Covent Garden.

Drawings and List of Prices will be forwarded free on application.

JOHN DOULTON, BROTHERS, AND CO. LIVERPOOLPOTTERY, ST. HELEN'S

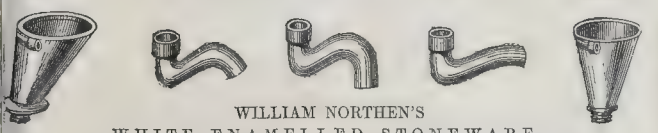
DOULTON AND WATTS'S

REGISTERED CLOSET PANS IN

ENAMELLED STONE WARE,

LAMBETH POTTERY, LONDON.



These Closet Pans are manufactured in a new kind of stone-ware, HIGHLY GLAZED, vitreous, of a white colour, are much improved in form, and are used and recommended by the engineers connected with the General Board of Health.

The Traps are smaller at the inlet, gradually enlarging towards the outlet, as a security against the introduction of improper substances into the drain.

They may also be had turned down.

PRICE 7s. 6d. each,

The same as for ordinary stone-ware, and may be had fitted with copper fans of the best construction at 1s. 3d. each extra.

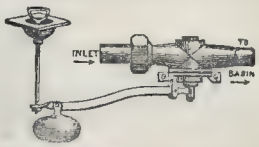
WILLIAM NORTHEN'S

WHITE ENAMELLED STONEWARE,

UNION POTTERY, 14, VAUXHALL-WALK, LAMBETH, LONDON.

W. N. solicits an inspection of his IMPROVED WHITE ENAMELLED STONEWARE CLOSET PANS, using an entire new description of stoneware, perfectly vitrified and highly glazed, far surpassing anything of the kind yet offered to the public.

SAME PRICE AS BROWN STONEWARE—7s. 6d. Pan and Trap. WITH BLUE INSIDE, ENAMEL, 1s. extra.



TO LOCAL BOARDS OF HEALTH, WATER COMPANIES, &c.

A DESIDERATUM in SLUICE-VALVES.

FREEMAN ROE'S Patent Sluice-valve, can be repaired without being removed from the main. All sizes, from 2 inch to 9 inch. Patent Hydrants, self-closing Cocks, fire and other Pumps, Hot-water Apparatus, Baths, &c. Surveys made, and estimates given by FREEMAN ROE, Hydraulic, Sanitary, and Gas Engineer, 70, Strand, and Upper Marsh, Lambeth.

ARTESIAN WELLS, Boring for Water, Sinking Shafts, &c.—The Nobility, Gentry, Water Companies, Towns, Breweries, and Manufacturers of every description may be supplied with any quantity, by HAYLE GREENLEY, Civil Engineer and Patentee of Boring Tools, 10, Cumming-street, Pentonville. Pumps and machinery for raising water from deep wells boring tools, and wrought pipes, for exportation. Men and tools supplied to bore for railroads, minerals, &c.

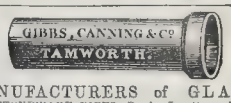
LAMBERT'S SELF-CLOSING LAVATORY AND CLOSET-VALVE

Is adapted for high or low pressure, and for any kind of BASIN. Many hundreds are in use under continuous pressure of 100 to 200 feet; they are found to be exceedingly durable, and are cheaper than common cocks. Manufactured solely by the Patentees,

THOS LAMBERT and SON,

Brass Founders and Engineers,

Corner of Short-street, New Cut, Lambeth.



GREAT SIMPLIFICATION and Economy in FIXING CLOSETS.

By the use of Underhay's Patent Regulators, the separate cistern, service-box, valve, cranks, and wires are dispensed with, making a closet as simple to fix as a bib-cock, and yet ensuring a perfect flush of water.

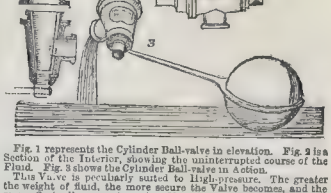
The Manufacturers, CHARLES BOTTEN and SON, solicit a call from all parties interested, they having Pan, Valve, Self-acting, and Jennings's Closets fitted with this apparatus, and fixed for inspection, or will forward drawings of the same.

CHARLES BOTTEN and SON, Brass Founders, Engineers, Gas Meter and Fitting Manufacturers, Crawford passage, Clerkenwell.

MANUFACTURERS of GLAZED STONEWARE PIPES, Bends, Junctions, &c.; also FIRE BRICKS, Vitrified Blue Bricks as used by her Majesty's Commissioners of Sewers, White Fire Clay, Facing BRICKS, &c., &c. Agents,—CHARLES RICHARDSON, No. 6, South Wharf, Paddington, London.

TO WATER COMPANIES AND PLUMBERS

DEVEY and DALE'S CYLINDER BALL-VALVE and BALL, Registered Oct. 28, 1853. No. 2,596.



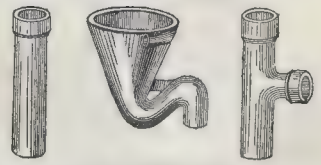


Fig. 1 represents the Cylinder Ball-valve in elevation. Fig. 2 is a Section of the Interior, showing the uninterrupted course of the Fluid. Fig. 3 shows the Cylinder Ball-valve in Action.

This Valve is peculiarly suited to High-pressure. The greater the weight of fluid, the more secure the Valve becomes, and the more effectually prevents waste.—Manufactured solely by DEVEY and DALE, 8 and 9, Shoe-lane, and may be had of respectable Plumbers.

MILL WALL POTTERY (near Scott Russell's).—Messrs. WILLCOX and CO. invite the attention of Contractors, Builders, and Wholesale Dealers to their extensive assortment of articles in WHITE FAIENCE WARE for sanitary purposes. The only manufactory of the kind in the neighbourhood of London.—Particulars forwarded on application.

VICTORIA POTTERY, LEIGH, NEAR SOUTHEND, ESSEX.

DAVID MOUNTAGUE,

MANUFACTURER of superior GLAZED STONE WARE PIPES (in accordance with the rules established by the Commissioners of Sewers), Bends, Traps, Closet-pans, Jars, Bottles, and every article in Stone Ware on advantageous terms. Also MANUFACTURER of superior Roman Cement and Plaster of Paris at Orchard House, Blackwall. Orders executed from the above places, from Fe cowharf, 91, Banksde, Blackfriars, and from Harlow-bridge wharf, Stratford, Essex.

TERRA COTTA.—Vases, Figures, Capitals, Coats of Arms, Friezes, Consoles, Chimney Shafts, Flower Trays, &c. &c. manufactured by J. M. BLASHFIELD, Mill Wall, Isle of Dogs near the West India Docks, and sold at No. 1, Praed-street, Edgware-road, Paddington.

SALES BY AUCTION.

TOTTENHAM.—Powerful short-legged cart-horses, new liquid manure and road water carts, builder's cart, timber whim, corn and coal carts, planks, scale, hoops, gates, box and navigators' barrows, oak trees, and effects, by

MR. RICHARDS, on the PREMISES, near the Seven Sisters Tottenham, and in High Cross-lane, on WEDNESDAY, MAY 31, at ELEVEN, by order of the Proprietor, retiring from business.—The STOCK comprises Nine excellent new liquid manure and road Watercarts made of English oak; Eight other ditto; one ditto, with Tonner Whim, Builder's Cart on springs, Lobe Spring cart, new cart wheels, 17 feet long wide oak planks, feather edge boards, useful materials, scaffolding, mechanics, tool sacks, harness, five tons useful wrought and cast iron, quantity of lead, bricks, manure, and 16 dozen Vine hoops, preceding and morning of sale. Orders by cards at the Flower pot, Broadway, Bishopsgate-street; on the Premises; and of the Auctioneer, Tottenham

GORDON HOUSE, ENFIELD.—Valuable Materials of the Mansion (recently occupied by Earl Cawdor), also the Conservatory, Greenhouse, &c.—Mr. J. C. STOCK is instructed by the Executors to SELL by AUCTION, on the Premises, on TUESDAY, MAY 30, and following day, at TEN o'clock precisely, in lots, by direction of the trustee of Mr Skelton and others desirable and improveable FREEHOLD and COPYHOLD PROPERTIES, situate at Upper Mitcham, Surrey, near Tooting, Streatham, and only three miles from Croydon, containing about 6 acres, consisting of a superior detached well-built and substantial family residence, with stabling and other requisite outbuildings, and a capital detached cottage residence, with large garden, situate on the north-east side of Abbas New road, Clapham New park, in the county of Surrey, let on lease to Joseph Wilson, Esq., at 137l. 10s. per annum, and held for about seventeen years, at a ground rent. To be viewed by permission of the tenants. Printed particulars may be had at the Master's Office; of Messrs. Church and Hurrell, Solicitors, 4, Great-James-square; of Messrs. Rose and Rennoldson, Solicitors, 1, Charterhouse square; at the Mart; and of Messrs. Winstanley, 10, Paternoster-row.

SOUTH COAST RAILWAY.—100 Acres adjoining a first-class station.—Valuable Freehold Estate, very eligible for Building Sites. TO BE SUBMITTED for PUBLIC COMPETITION, in the month of JUNE next, unless previously disposed of by private contract, a most desirable FREEHOLD ESTATE, comprising about 100 acres, adjoining the Junction Station on the Polegate of the new railway uniting to Brighton, Lewes, and London, to Hastings, to Eastbourne, and to Hailsham, and surrounded by excellent roads. Rarely does a property present such capabilities as the present of being conveyed in such many desirable and such excellent building sites, commanding such extensive views of the sea coast of the Weald of Sussex, the South Downs, Pevensey Bay, and being in the centre of the South Down Foxhunt, within ten minutes by rail of the rapidly-increasing watering-places of Eastbourne and Hailsham, thirty minutes of Hastings, St. Leonard's, and Lewes. The property is divided by the railway, the station which adjoins its northern extent, and is altogether most conveniently situated for the supply of the new town of Eastbourne alone, a handsome income might be realised; but the eligibility of the site for building is such that the property will again become valuable for such purposes. Further particulars may be obtained, and a plan of the estate seen by applying to Messrs. Ellman and Whitbread, Solicitors, Battle, Sussex.

BUILDING LAND TO LET, at very low ground-rents for ninety-nine years, close to Regent's-park, and on the foot of Primrose-hill, a few minutes' walk from the Regent's-gate. For the present eight detached houses, for which there is a great demand in that locality, and would readily let or sell. There are some frontages suitable for shops, and others for private houses; also some with great depth behind, where work hops or public establishments might be erected. For plans and particulars apply to F. EDWARDS, 5, Harrington-square

FREEHOLD BUILDING LAND at TWICKENHAM—8 acres, situate near the Church and Railway Station, with 1,000 feet frontage to Kingston New-road, and with private access to the river Thames at Cross Deep. The land is thoroughly drained by a capacious sewer newly constructed, and will be LET or SOLD in pieces to suit the requirements of buyers.—Apply, for plan of the ground and further particulars, to JAMES CLARK, 24, Billiter-street, London. N.B. About three acres of the ground consist of a productive well-stocked walled garden, with a large range of substantial forcing-houses

GROUND TO LET, for Building, in the parish of SHOREDITCH, at the rear of Messrs Bellingham's Distillery, Queen's-yard, Dalston, in Plots, which will be parcelled out by Mr WATKINS, on the instructions of the Estate; and in the parish of ISLINGTON, at Grosvenor-gardens, near the Cock, Upper Holloway, in Plots, which will be parcelled out by Mr GREEN, at the Countinghouse, on the Estate.—Apply for particulars, as above, or to D. HUGHES, Solicitor, 13, Gresham-street, Gu Hall

BUILDING LAND TO BE LET, at ACTON, HOMERTON, WIMBLEDON, CHERTSEY, close to the Station, SUDBURY (near Harrow, at CROYDON (within a mile of the Station), and at NORWOOD (within three minutes' walk of the Station), NEAR NORTH WOOLWICH. These Hill admirably situate for building purposes. For particulars, apply to Mr. W. F. LOW, Solicitor, 67, Wimpole-street, Cavendish-square. Leases direct from the Freeholder. Money advanced if required.

NORWOOD.—BUILDING LAND TO BE LET, within three minutes' walk of the Norwood Station in Wingrove, a leafier part of Norwood Road, South Bank, with a full view of the Crystal Palace and Grounds, and only one mile distant, overlooking many villas in the most magnificent views in the county of Surrey, on which building has commenced, and houses nearly completed for occupation, close to a church. The roads are soon to be made and paved by the owner of the South Lambeth Company, from Thames Ditton, laid on to the houses erected. Builders and gentlemen desirous of a first-rate site will find this spot worthy their notice, and eligible to the Palace, may be had if required.—For further particulars and plans of the Estate, apply to Mr. W. F. LOW, Solicitor, 67, Wimpole-street, Cavendish-square. Upwards of forty villas are at the Norwood Station during the day. Leases direct from the freeholder.

CRYSTAL PALACE.—SHOPS.—FOUR PLOTS of Freehold Land suitable for first-class SHOPS, the property of the Company, and eligible to the Palace, may be had on BUILDING LEASE, with option to purchase.

For particulars apply to Messrs. BANKS and BARRY, Architects and Surveyors, 27, Sackville-street, Piccadilly.

SALES BY AUCTION.

7,500 Pieces of Paperhangings and Vein Marble Chimney-Pieces ready for fixing.

MR. BRAY, Jun. will SELL, at his ROOMS, 259, High Holborn, on WEDNESDAY, MAY 30, at TWELVE, upwards of 7,500 PIECES of PAPERHANGINGS, including elegant flocks and gold drawing rooms, rich satins and lilacs, Elizabethan, damasks, parti-urs, hand marbles, oaks, and granites; Marble vein and Granite slabs

MAIZE HILL, GREENWICH.—Capital Building Materials of a large Mansion adjoining Vanbrugh Castle

PULLEN and SON are favoured with instructions to SELL by AUCTION, on the PREMISES, on TUESDAY, MAY 29, and following day, at TWELVE, the whole of the excellent BUILDING MATERIALS of the spacious MANSION known as the Red House, adjoining Vanbrugh Castle, Maze-hill, for convenience comprising about 10,000 capital bricks; fifteen tons of first-rate slate cutters, rafters, and three tons of wood and timber roofing, 100 squares of boarded and timber floors; sash and shutters, Spanish mahogany, and other doors, elegant chimney-pieces, and interior fittings of a superior description; plain and pan tiles and slates, coachhouse rates, rackmangers, and stable fittings, York and clinker paving, 300 feet iron railing, and gates, at an entrance, cast and cop per, curtains of large glazed conservatory, marble figures and jet slate stoves, lamps, coppers, and the entire fixtures through out the mansion.—May be viewed on Saturday and Monday previous, and catalogues had of PULLEN and SON, Surveyors, Crippleg ate.

In the REGENT'S-PARK and CLAPHAM NEW-PARK.—Valuable House Property, let at rents amounting to nearly 1,000l per annum.

MESSRS. WINSTANLEY will SELL by AUCTION, at the MART, on THURSDAY, MAY 18, in Six Lots, pursuant to an order of the High Court of Chancery, with the approbation of the Master, in a cause "Phillipson and Another, plaintiff, and Turner and Others, Defendants," and between the same plaintiff and Joseph Turner, and others, defendants, FOUR excellent FAMILY RESIDENCES, in Yorkterrace, Regent's-park, held for about sixty-seven years, by separate leases, at improved ground rents, viz. No. 11, let at 120l per annum, No 24, in the occupation of Mrs. Ka., at a peppercorn rent, whose term expires at Midsummer next; No. 25, let to Miss Greg, at 20l per annum; No. 37, let to Mr. Serjeant Merewether, at 120l per annum, also a building for eleven rooms, and three coach houses, with private yard, &c in mews F, of which possession can be had; and a capital detached residence, with large garden, situate on the north-east side of Abbas New road, Clapham New park, in the county of Surrey, let on lease to Joseph Wilson, Esq. at 137l. 10s. per annum, and held for about seventy years, at a ground rent. To be viewed by permission of the tenants. Printed particulars may be had at the Master's Office; of Messrs. Church and Hurrell, Solicitors, 4, Great-James-square; of Messrs. Rose and Rennoldson, Solicitors, 1, Charterhouse square; at the Mart; and of Messrs. Winstanley, 10, Paternoster-row.

Freehold Building Land at Bishop Stortford, Herts, close to the Railway Station.

MESSRS. H. BROWN and T. A. ROBERTS will SELL by AUCTION, at the MART, opposite the Bank of England, on WEDNESDAY, MAY 24, at TWELVE, in Seventeen Lots, SEVENTEEN PLOTS of BUILDING LAND, opposite the Railway Inn, and close to the Railway Station. The land is high, and commands very extensive views of the town and environs; the roads are good, and the lots will possess frontages varying from 16 feet, and a depth of about 180 feet. Bishop Stortford is a very rising market-town, is within an hour's ride of London, and houses of a respectable character are much in request. May be viewed at present particulars with plans had at the Railway, the George, and the Boar's Head Inns, Bishop Stortford; and in London of Mr. J. H. Smith, Solicitor, 28, Bing-street, Cheapside; at the Mart; and of Messrs. H. Brown and T. A. Roberts, 22, Throgmorton-street

Fresh 11 Building Land near Staines-bridge

MESSRS. H. BROWN and T. A. ROBERTS will SELL by AUCTION, at the MART, opposite the Bank of England, on WEDNESDAY, MAY 24th, at TWELVE, in two lots, TWELVE PLOTS of FREEHOLD BUILDING LAND, situate on the rural but genteel part of Staines-to Thorpe and Egham, near Lady Hinchbrooke's residence; a beautiful neighbourhood, about half a mile from Staines-bridge, and about a mile from the Staines Railway Station, on the London, Richmond, and Windsor line. Each lot will contain a frontage of about 50 feet by a depth of about 180 feet.—May be viewed and printed particulars had at the Railway Hotel and the Angel and Crown, Staines; of Mr. Bannister, Solicitor, 38, Bing-street, Cheapside; at the Mart; and of Messrs. H. Brown and T. A. Roberts, 22, Throgmorton-street

Unreserved Sale of Eight substantially built Carcases.

MR. BEADELL will SELL by AUCTION, at the MART, on TUESDAY, MAY 9, at TWELVE in eight lots with all the slightest reserve the CARCASES of EIGHT HOUSES in Sudbrook-terrace, Holloway, right and left of an intersecting road from Camden-road Villas to the end of Jones Courts, esq. Solicitor, Haberdashers'-hall, Gresham-street; and of Mr Beadell, 2, Gresham-street, London

WISTON, NEAR BAWTRY.—Important Sale for Timber Dealers, Manufacturers, and Others, of an unprecedented nature

G. SMITH, Auctioneer, of Lincoln, has the honour to announce to the Dealers of Timber in general, that he is been honoured by instructions to offer by AUCTION, on MONDAY, MAY 22nd, 1854, commencing with lot 1, at TWELVE o'clock to a minute, of about 190 of the largest Sweet-grown, RED WILLOW TREES ever offered, varying from 2 to 5 feet in each, which have been cut on the bank of the river Idle, but never worked, and lie in a very favourable position for the road side, which is very convenient for removal by water, land, or railway carriage to all parts of the kingdom. The usual credit given, or discount for ready money.—For particulars see catalogues, to be had of the Auctioneer; and of Mr. Dean, at Drake Holes Inn, near Retford Station

STREATHAM, SURREY.—A pair of excellent Villa Residences in capital repair

MESSRS. RICE BROTHERS, are instructed to SELL by AUCTION, at the MART, on TUESDAY, 23rd MAY, at TWELVE, two capital and substantially built FAMILY RESIDENCES, semi-detached, and standing on a large plot of ground in a very delightful situation, known as the "Avenue," Streatham, adjoining the high road, both in a very forward state, requiring only a small outlay to complete. When finished will contain twelve rooms (upwards of 2,000 feet each. Held on lease for a long term, at a low ground-rent.—May be viewed, and particulars had at the Horse and Groom and White Lion Inns, Streatham; at the Auction Mart; and at the Offices of Messrs. Rice Brothers, Surveyors and Auctioneers, 263, High-street, Southwark.

NOTTING-HILL, near the gate.—The excellent Materials of Elm Lodge, also Oak Palisading and Stabling, in basket-arch, and Three Houses and Shops

MR. LEREW will SELL by AUCTION, by order of Messrs. Radford, on the PREMISES, on MONDAY, MAY 22, at ELEVEN for TWELVE, without reserve, the stone portico, Portland cornice, stone coping, string courses, lower paving, stained glass, sashes and frames, oak shutters, doors, architraves, sash, shutter, parting beadings, sash-cord, rosewood and other grates, Arnold's stove, coppers, Venetian blinds, cast and sheet iron, square of copper with spring, gas-fittings, gates, wrought iron, three shop-fronts, 700 yards of stable pitching, brick and slate, some slates and paving, iron work, barrow, old firewood, and other useful items. May be viewed the Saturday prior and morning of sale, and catalogues had, Auction Offices, Cardington street, Hampstead-road.

TO BE LET, a large SITE for BUILDING, on the direct road from the Crystal Palace to the West-end; five miles from the Bridges, and within the neighbourhood covered with houses of the best character. For particulars apply to Messrs. PANSON and SON, Laurence Pountney-lane

TO BUILDERS.

SEVERAL PLOTS of FREEHOLD GROUND, suitable for the erection of small houses, TO BE LET on building leases, for terms of 100 years, at moderate ground rent. Money will (if required) be advanced upon the houses as they proceed.—Apply to Mr ETHERINGTON, at the Asylum Tavern, Asylum-road, Old Kent-road

KILBURN.—ELIGIBLE BUILDING LAND.—TO BE LET, for Ninety nine years, or the FREEHOLD for SALE, a FRONTAGE of 90 feet by 80 feet in depth, for the above term, to be called Park-terrace, adjoining the Carlton-road. Also, a Frontage of 54 feet by 76 feet in depth for three houses, in the part to be called Pembroke-road, also adjoining the Carlton-road. The roads and sewers are made, and the gas and water laid down. Apply to JAMES BOUTELL, 8, Cleve court, Piccadilly.

FREEHOLD BUILDING GROUND TO BE LET or SOLD, TEN ACRES; excellent roads, twenty-five miles from town, two and a half from the Horley, and three from the Three Bridges Stations (Brighton line). A loop line is expected to East Grinstead, with a station near the land, when its value will be doubled; near two churches; and buildings some good private residences contiguous. Views delightful; situation healthful; small good. Brick earth is supposed to be on the property, as bricks are burnt near. Terms very moderate.—Plans, &c. at the Offices of JOHN BURGES WATSON, Esq. Architect, 9, Nottingham-place, New-road, Regent's-park.

CRYSTAL PALACE.—BUILDING LAND. The well-known DULWICH WOOD, the chief ornament of this beautiful locality, has been let on building lease, and most attractive plots for building Mansions or Villas may now be had for a few years, after which the land-tax redeemed. Leases may be had direct from Dulwich College

As it is the object of the leaseholder and of the college to preserve the greater part of the wood only a limited number of houses will be built; and the residents will have access to the woods themselves, which will be preserved for their use only. A good supply of water from the Lambeth Company's mains may be had.

Apply to Messrs. BANKS and BARRY, Architects and Surveyors to the Sydenham hill Estate, 27, Sackville street, Piccadilly

HIGHBURY NEW PARK.—FREEHOLD BUILDING GROUND TO BE LET, in this desirable locality, comprising Eighteen Plots, for gentlemen desirous of selecting a site for the erection of villa residences, this affords an excellent opportunity. Bricks may be had, delivered on the site of the intended buildings, at 45s. per thousand. For particulars apply to Mr C. HAMBRIDGE, Architect, 74, Coleman-street City

ISLINGTON.—TO BE LET, for a term of three years, a SIX-ROOMED HOUSE and SHOP, in thoroughly repair; with private entrance, situate in a main road. Omnibuses to the City and West-end. Rent 32l. Apply at the Offices of Mr. G. J. RHODES, Surveyor, Lincoln's-inn-fields, 5, Chancery-la

FREEHOLD LAND to be LET or SOLD, at Finchley, an extensive frontage of 90 feet, depth about 250 feet. Another, 50 feet frontage, and about 140 feet deep.—Address to A. Z. 7, Marchmont-street, Brunswick-square

ABOUT Two or more Acres of well-drained FREEHOLD BUILDING LAND in the neighbourhood of London for the erection of a public charity. Persons having such property to sell can forward particulars of locality, size, frontage, &c. to Messrs. Sadler and Phillips, 9, Newgate-street, City, London.

FREEHOLD BUILDING GROUND TO BE LET on long Leases, direct from the freeholder, in one of the most improving localities in the immediate vicinity of the metropolis. It is admirably adapted for the erection of second and third-rate buildings, as villa residences, semi-detached or continuous, and will be let in plots or otherwise, as required. Advances will be made to a responsible person, progressive with the works, which may be effected upon the land for such purposes. Roads are already formed. Ground rents moderate. Every information may be obtained, and plans of the property seen at the Offices of HERBERT PRICKETT, Surveyor, Chancery-lane, and 15, Paddington-green.

BROCKLEY-HILL PARK ESTATE, close to the Forest-hill Station, on the Brighton Railway.—TO BE LET, on Building Lease, for ninety-nine years, FOUR most eligible PLOTS of GROUND, at 10l ground rent each plot, 350l. per plot will be advanced on mortgage of the property to the value of 500l. to be erected to the satisfaction of the Surveyor. Apply at the Offices of GEORGE MORGAN, Esq. 5, Chancery-lane.

BRIGHTON.—A most eligible SITE for TWELVE HOUSES, part of a bold crescent, TO BE LET on building lease, at moderate ground-rents. Two thirds of the amount will be advanced on mortgage.—Apply at the Offices of GEORGE MORGAN, Esq. 5, Chancery-lane

BUILDING LAND TO BE SOLD, or LET, on low building leases, in plots, at Ealing, Enfield, Wood-green, near Hornsey, Putney, Brockley hill, park, near Forest-hill, Ware-road, Hertford, Roan Hall-park, Brighton, and Carlton-road, Kilburn. Plans will be made to respond to parties.—Apply at the Offices of GEORGE MORGAN, Esq. 5, Chancery-lane.

GROUND RENTS, Rotherhithe, Surrey, in one sum of 125l 10s. per annum; or separate sums of not less than 5l to pay 5l per cent well secured upon twenty one houses and shops, at 25l per annum. To be inspected and treated for with the Freeholder for ninety-nine years, at 2l 15s. on the whole property.—For further particulars inquire of Mr. FREDERICK WEST, Solicitor, 3, Charlotte-row, Mansion-house, London.

IMPORTANT FREEHOLD BUILDING LAND, on the borders of SURREY and SUSSEX, in a most healthy and desirable situation, in an excellent neighbourhood, near to the entrance to the intended station at Worth, on the East Grinstead Railway, four from the Three Bridges, five from Horley, and nine from the Redhill stations on the Brighton line. The land, in all about sixty acres in situate near to Crawley Down at Worth, four miles from the excellent market-town of East Grinstead, and is most readily adapted for building, being unopposed for the high and healthy situation as well as for its manifest local views, a site for which on this road is excellent water. A capital timber yard on the estate, with a large supply of well-made bricks, also sand, gravel, stone, and peat earth. The land will be sold in lots of from twelve to fifteen acres in each, except a small portion which is to be disposed of in five-acre or two-feet, with a depth of 150 feet.—To view, apply to Mr. CHANDLER, Turner's-hill, Worth; and for particulars and terms, to Mr. G. FULLER, 34, Great George-street, Westminster.

EXTENSIVE and WELL-LIGHTED MANUFACTURING PREMISES, No. 80, Long-acre with immediate possession, having entrances from Wellington and Charles-streets, TO BE LET, the whole or a part.—Apply to Mr PARSONS, 82, Long-acre

London: Printed by Charles Wyman, of 13, Hunter-street Brunswick-square, in the Parish of St. George, Bloomsbury Printer, at the Printing office of COX (Brothers) and WYMAN, 74 & 75, Great Queen-street, Lincoln's-inn-fields, in the parish of St. Giles-in-the-Fields; and published by the said Charles Wyman, at the office of "The Builder," 1, York-street, in the Parish of Saint Paul, Covent Garden, all in the County of Middlesex.—Saturday, May 13, 1854.

Offices, 19, Southampton street, Bloomsbury-square,
May 19, 1854.

TO the Worshipful the MAGISTRATES for the County of Middlesex.
MY LORDS AND GENTLEMEN.—As a Candidate for the office of District Surveyor, now vacant by the resignation of Mr Samuel Angell, I beg most respectfully to refer you to my testimonials and certificates, lodged with the Clerk of the Peace, and to solicit your support on the day of election, JUNE 1st.—I have the honour to be, my Lords and Gentlemen, your obedient servant,
JAMES THOMSON.

COMPETITIONS.

TO ARCHITECTS, SURVEYORS AND OTHERS.

PLANS, DESIGNS, and DRAWINGS are required for BUILDING TWO CEMETERY CHAPELS adjoining each other and LODGE for the Holbeach Burial Ground. The expense of the Chapels is not to exceed £—, and the Lodge £—.

Plans to comprise Elevations and Ground plans, accompanied by approximating estimate of the expense.

1. Is offered for the plan considered to be the best, unless the Architect shall also contract for the works); 3l. for the second best, and 2l. for the third best.

N.B. The above amounts are offered by way of premium, and the Architect whose plans are accepted will be employed to superintend the execution of the Works at the usual commission of 5l. per cent.

The plans to be sent to the Clerk sealed and indorsed, on or before the 31st day of MAY next.

By order of the Burial Board,
EDWARD GEORGE AYLIFF, Clerk.
Holbeach, 16th May, 1854.

COMPETITIONS.

TO ARCHITECTS, BUILDERS, &c

NEW CORN EXCHANGE AT HULL.—Notice is hereby given, that the Property Committee are prepared to receive DESIGNS, PLANS, and ESTIMATES for a NEW CORN EXCHANGE intended to be erected upon the site of the property in High-street, formerly used as the Custom-house, and will give a premium of 20l. to the person whose Designs, Plans, and Estimate (or one from three to four thousand pounds) shall be approved of and let for the second best. Further particulars and information as to stamp requisites may be learned by inquiring of Mr. D. TAYLOR, Corporation's Surveyor, Town-hall, Hull. The Plans, &c. to be sent in, under seal (without the author's name, but with a motto), before noon on the 8th day of JUNE next, and addressed to the Town Clerk, Town-hall, Hull, marked "Corn Exchange." A sealed letter, containing the author's name and address, must accompany each Plan which will be opened after the award has been made. The Plans receiving the premiums will belong to the Corporation. By order,
THO. THOMPSON, Town Clerk.

CONTRACTS.

ORDNANCE CONTRACTS.—TENDERS required for REPAVING with GRANITE a portion of the OFFICERS' and TROOP STABLES at LEEDS CAVALRY BARRACKS.—Notice is hereby given, that the Honourable the Board of Ordnance will receive TENDERS on or before THURSDAY, the 25th of MAY, 1854, from such persons as may be willing to perform the above-mentioned work. Specifications for this work are to be seen, and Forms of Tender obtained, with every other information, on application at the Royal Engineers' Office, 16, Parliament-street, York; or at the Barracks, Leeds, any day (Sundays excepted), between TEN and FOUR o'clock, until WEDNESDAY, the 24th of MAY, 1854.
Royal Engineers' Office, 16, Parliament-street,
York, 2nd May, 1854.

Royal Engineers' Office, Portsmouth, 7th May, 1854.

ORDNANCE.—NOTICE to BUILDERS and CONTRACTORS.—Sealed TENDERS, addressed to the Secretary to the Board of Ordnance, Pall-mall, London, will be received until noon of TUESDAY, the 30th instant, from parties willing to CONTRACT for the performance of the WORKS required in

RAISING PARAPETS of OFFICERS' QUARTERS and SOLDIERS' BARRACKS, and Fitting up the latter with Musket-proof Shutters and Doors,
At BLOCKHOUSE FORT, GOSPORT, in the county of Hants.

Plans and specifications for the same may be seen, and forms of Tender obtained at the Office as above, on and after MONDAY, 22nd inst.

Attendance will be given at the above-mentioned Fort, from TEN to ELEVEN o'clock in the forenoon of WEDNESDAY, 24th instant, to point out the work and render all further information. The Tenders to be indorsed "Tender for Improvements, Blockhouse Fort."

NOTICE to BUILDERS.—ORDNANCE CONTRACT.—The Commanding Royal Engineer of the Woolwich District, hereby gives notice, that the Honourable Board of Ordnance are about to enter into a SPECIAL CONTRACT for BUILDING ADDITIONS TO THE CADETS' BARRACKS in the ROYAL ARSENAL, and that such persons as may wish to Tender for the same may inspect the plans, and obtain a copy of the specification and form of Tender for the work, by applying to Mr. CARTWRIGHT, Clerk of Works, at the Royal Engineer Office, Royal Arsenal, Woolwich, on or before the 26th of MAY, 1854, between the hours of TEN and FOUR.

Tenders, upon the printed form prepared to be delivered at the office of Ordnance, Pall-mall, London, on the 30th of MAY, 1854, addressed to the Secretary to the Honourable Board of Ordnance, and marked "Tender for Work at Woolwich."

The Board of Ordnance reserve to themselves the right of rejecting the whole or any of the Tenders.

Woolwich, May 12, 1854.

LANCASTER LOCAL BOARD of HEALTH.—WATER WORKS.—To BRASSFOUNDERS, PLUMBERS, FITTERS, and OTHERS.—The Local Board hereby give Notice, that they are prepared to receive TENDERS from parties who may be willing to undertake either of the following CONTRACTS:—

CONTRACT D.—For the SUPPLY of GALVANIZED IRON, LEAD, and other PIPING, STOPCOCKS, BIB-COCKS, and other FITTINGS, for House service Water Supply.

CONTRACT E.—For EXCAVATING the GROUND, and FIXING PIPES, COCKS, and other FITTINGS, for the said House Service.

Specifications and Bill of Quantities of Tender, schedules, &c. (price five shillings), may be obtained, together with any further information required, on application at the Town Clerk's Office, Lancaster; or at the Offices of ROBERT RAWLINSON, C.E. 31, Parliament-street, Westminster.

Sealed Tenders to be delivered at the Town Clerk's Office, on or before WEDNESDAY, the 24th instant, addressed to the Local Board of Health, Lancaster, endorsed "Tender for Contract D or E" (as the case may be). WILLIAM DUNN, Town Clerk.
Lancaster, 8th May, 1854.

BOARD of HIGHWAYS, of the PARISH of LLWYNHAY, SEISS.—To ROAD-MAKERS, CONTRACTORS, and others.—Persons desirous of TENDERING for the MAINTENANCE and RECONSTRUCTION of about Two Miles of ROAD and FOOTPATHS, and for Supplying Materials, for Eight Years from the 25th day of March next, are desired to see the Specification and the Plan of the Road, at the Crown Palace, under the direction of the Surveyor, on and after the 1st day of June next, and to deliver their Tenders, addressed to the Board of Highways, at the Lewisham Union, on or before WEDNESDAY the 31st day of MAY, at TEN o'clock precisely, endorsed "Tenders for Road at Sydenham." The Board of Highways do not pledge themselves to accept the lowest or any Tender.

CONTRACTS.

TO BUILDERS, IRONFOUNDERS, &c

THE BURIAL BOARD of the PARISH of ST. MARY ABBOTT, KENSINGTON, will meet at the Vestry-hall, on SATURDAY, the 3rd JUNE, at TEN in the forenoon, to receive TENDERS for the LODGE and ENCLOSURE to their CEMETERY at Hanwell. The plans may be seen on or after WEDNESDAY the 24th inst. at the Office of the Architect, Mr. T. ALLOM, 26, St. Martin's-lane, Trafalgar-square.

TO BUILDERS

PERSONS desirous of TENDERING for the REBUILDING of ST. THOMAS'S CHURCH, Newport, Isle of Wight, are informed that the drawings and specifications may be seen at the office of Mr. JAMES ELDRIDGE, Solicitor, Newport, and that all necessary information may be obtained at the offices of the Architect, Mr. BANKES, 31, Whitehall-place, London. Tenders for the whole or different portions of the work to be sent to Mr. ELDRIDGE'S Office on or before 15th JUNE next. The committee do not bind themselves to accept the lowest Tender.

The Board do not undertake to accept the lowest or any Tender.—Sealed Tenders addressed to "The Chairman of the Derby Burial Board" must be delivered at the Office of the Clerk of the Board, Mr. Joseph Jackson, Solicitor, 14, Full-street, Derby, not later than TWELVE o'clock at noon, on THURSDAY, the 1st day of JUNE next.
May 16th, 1854. JOHN WALKER, Clerk to the Board.

TO CONTRACTORS

WAVERTREE LOCAL BOARD of HEALTH.—The Wavertree Local Board of Health are prepared to receive TENDERS for the CONSTRUCTION of SEWERS within the district of the Local Board of Health of Wavertree, according to the plans and specification prepared for that purpose. The Tenders to be sent in addressed to The Chairman of the Wavertree Local Board of Health, Public-offices, Wavertree, near Liverpool, according to the form, with a schedule of prices attached, to be given on or before the 24th day of MAY instant. The plans and specifications may be inspected at the Office of Mr. ISAAC ATHERTON, Prince's-buildings, North John-street, Liverpool, from TUESDAY the 16th MAY instant, to WEDNESDAY, the 24th of MAY inst. at which place forms of Tenders may be obtained on application. The Board do not pledge themselves to accept the lowest or any Tender.
ISAAC ATHERTON, Law clerk.
Prince's-buildings, North, John-street, Liverpool, May 9, 1854.

CONTRACT for SLOP-WORK.—PARISH of SAINT MARY, NEWINGTON, SURREY.—The Board for Repair of the Highways, Newington, Surrey, will MEET at the Vestry-room of the said Church, on TUESDAY, the 23rd of MAY instant, at half-past SIX o'clock in the evening precisely, to receive TENDERS from persons willing to perform the whole of the SLOP CONTRACT for the Union House of the said Parish from the 24th instant to DAY DAY next. Forms of Tender and further particulars may be had by applying to
HENRY CRIPPS, Clerk to the Board,
1, Churchyard, Newington Butts.

WOOLWICH LOCAL BOARD OF HEALTH.—CONTRACT for PRIVATE IMPROVEMENTS' WORKS.—The Board hereby give Notice, that they are prepared to receive TENDERS from parties who may be willing to CONTRACT for the SUPPLY of all the HOUSE SERVICES, both of Drinking and Watering, and for Excavating and Fixing the same. The specification may be seen, and all the other documents and Forms of Tender obtained on and after the 22nd day of MAY inst. between the hours of TEN and TWO o'clock daily; and copies of the said documents, accompanied by Forms of Tenders, may be had, on application, at, or at the Office of Messrs. BAMFIELD and LISTER, Excise-office, Red Barrack, Woolwich, on and after that day. Tenders must be sent in on or before the 1st day of JUNE next, duly sealed and endorsed, or they cannot be entertained unless duly made upon the printed form. By order of the Board,
JOSEPH SARGENT, Clerk.
Office of the Woolwich Local Board of Health,
William-street, 17th May, 1854.

FREE METHODIST CHAPEL, LOUTH.
To BUILDERS and CONTRACTORS.—Persons willing to offer TENDERS for the execution of the Works required in the ERECTION of a new FREE METHODIST CHAPEL, Louth, in the county of Lincoln, may see the drawings and specifications at the office of the Architect, Mr. P. BELLAMY, Upgate, Louth, or the Rev. Mr. Barnsley, Louth, and Mr. Hardy, Linwood, Louth, on and after THURSDAY, the 25th day of MAY, between the hours of TEN a.m. and FIVE p.m. Sealed Tenders to be delivered at the above Office, on or before the 1st day of JUNE, not later than SIX p.m. endorsed "Tender for Free Methodist Chapel, Louth." The trustees do not pledge themselves to accept the lowest or any other Tender, unless satisfactory, and none need apply except the parties can give sufficient security for the due performance of the same.
PEARSON BELLAMY, Architect.
Offices, Lincoln and Louth, May 15th, 1854.
The architect has also for immediate erection

TO BUILDERS.

TENDERS wanted for the Erection of a VILLA, near the Esher Station, South-Western Railway. Plans and specifications can be seen after the 23rd inst. at 15, Kennington-lane Terrace, and at the "Marquis of Granby" Inn, near the Esher Station. Sealed Tenders, addressed to Mr WILLIAMS, 15, Kennington-lane Terrace, Lower Kennington-lane, Surrey, to be delivered on or before TWELVE o'clock on THURSDAY, 25th inst. The Architect does not bind himself to accept the lowest or any Tender.

[For remainder of Contracts see next page.

CONTRACTS.

ST. GILES-IN-THE-FIELDS and ST. GEORGE, BLOOMSBURY.—T. STONE MERCHANTS, GRAVEL, BROOMS, SCAVENGERS, and CONTRACTORS for CARTAGE.—Notice is hereby given, that the Committee for Paving, Cleansing, and Lighting the parishes, will meet at the Vestry-room of St. Giles-in-the-Fields, on THURSDAY, the 3rd day of JUNE next, at SEVEN o'clock in the forenoon precisely, to receive PROPOSALS for such person or persons as they will enter into to CONTRACT for all or any of the following materials pure and unadulterated, and to be delivered in such quantities and at such times, and in such places within the said parishes, or either of them, as the Committee may direct. Also to receive PROPOSALS and CONTRACT for CARTAGE, for the Committee, within the parishes, GOLDSTONE GRAVEL, SLOP, &c. as per load. The carmen for this purpose must not measure less than a cubical foot. Proposals for all or any of the following articles to be sent in on or before the 20th day of June next, for the term of one year, from Midsummer next. Also to receive PROPOSALS from such other person as may be willing to CONTRACT for ONE, TWO, or THREE YEARS, from Midsummer next, for removing for a limited time to be named by the Committee, all SLOP, SLUSH, MUD, DUST, FILTH, and SOIL, as shall be swept together and be placed by the men employed by the Committee, in or upon the carts, vans, and boats of the squares, streets, lanes, and other places in the parishes. Lime-ballast to be delivered and placed in all parts of the parishes, to the Poland Hospital exceepted, and to dispose of all such Slop, Slush, &c. The cart to be used for such purpose must not measure less than 40 cubical feet. Proposals are also to be sent in for the removal from the houses and buildings of the inhabitants of the several squares, streets, and other places respectively; and the proposals for the purposes aforesaid are to be delivered in addition to certain three separate and distinct Tenders, viz one TENDER for the removal of SLOP, SLUSH, &c. at per load, and another TENDER for the REMOVAL of SLOP, SLUSH, &c. at per annum; and another distinct TENDER for the privilege of taking away the DUST and ASHES. The Secretary of Companies and persons sending Tenders are requested to attend at the Vestry-room, at the time of the meeting. The contractor or contractors not to let or assign his or their contract, work, or works, to be done, or any part or parts thereof respectively, without the previous consent of the Committee. Security to the satisfaction of the Committee, will be required for the performance of the several contracts and the names, place of abode, &c. of the persons to be offered as sureties, to be sent with the proposals sealed to be endorsed as the case may be, "Slops and Several Contracts" may be seen at the Clerk's Office. The Committee will not bind themselves to accept the lowest Tender and will deffray the charge for each of the contracts and agreements to be made quarterly. Printed particulars of the parishes for the purposes of the supply of Stone, Gravel, and Cartage, may be had of the Clerk or Surveyor as above.

By order of the Committee,
May 11, 1854. ROBERT FINNIS, Clerk

TO CONTRACTORS FOR PUBLIC WORKS.

THE MINISTER of the ROYAL DANISH NAVY will be ready on the 14th day of JUNE to receive TENDERS for the CONSTRUCTION of a DRY DOCK, 365 feet long, 80 feet of WHARFIN 3, THREE BRIDGES and other Works. Plans, Sections, and Estimates of the same will be ready for inspection on the 22nd day of MAY next, at the Ministry of the Royal Danish Navy, at Copenhagen, and at the Offices of Mr. ALFRED DUTTON, the Engineer, 9, Adelphi Terrace, London. The Engineer reserves to himself the right to refuse inspection of his plans to any parties who have not executed similar works, and the Danish Ministry reserves to itself the right to accept the lowest or any Tender. Security to the amount of £30 will be required for the due performance of the contract.

STEEN BILLE.
The Ministry of the Royal Danish Navy, Copenhagen,
15th April, 1854.

The Local Board do not pledge themselves to accept the lowest Tender. ANDREW MEGGY,
Clerk to the Chelmsford Local Board.
Chelmsford, May 1, 1854.

SAINT MARTIN-IN-THE-FIELDS.—To BUILDERS and OTHERS. The Guardians of the Poor of the Parish of St. Martin-in-the-Fields hereby invite TENDERS for the execution of certain DEFICIENCIES in the WORKHOUSE. Specifications of the works, as prepared by H. E. KENDALL, Esq. Architect, of Suffolk-street, Pall-mall, can be obtained at the Receiver and Steward's Office, 41, Castle-street, Leicester-square, any day up to SATURDAY, the 20th inst. inclusive, between the hours of Ten and Four o'clock. Sealed Tenders to be sent to me, upon the form prescribed addressed "To the Guardians of the Poor of the Parish of St. Martin-in-the-Fields," and superscribed "Tender for Repairs," on or before 12 for TWELVE o'clock on MONDAY, the 22nd inst. The party whose Tender may be accepted will be required, at his own expense, to enter into a contract, to be prepared by the Clerk, with sufficient sureties, for the due performance of the works. The guardians do not bind themselves to accept the lowest or any other Tender. By order,
May 10, 1854. ROBERTSON GRIFFITHS, Clerk to the Board.

TO BUILDERS, CONTRACTORS, &c. desirous of TENDERING for the CARCASING of TEN HOUSES at Holloway, may inspect the plans and specifications at the Office of Mr. GEORGE, Builder, 31, Arlington-street, Camden-town, 32, Nicholas-lane, Lombard-street. Set of beautiful plans of land to let on the estate.

GENERAL HOSPITAL, NOTTINGHAM. TO CULLERS. Persons desirous of CONTRACTING for the WORKS required to be done in the ENLARGEMENT of the above building, and in the ERECTION of the CHAPEL in connection therewith may see the plans and specifications at the Offices of Mr. T. C. HINE, from THURSDAY, 20th inst. to MONDAY, JUNE 5th, 1854. Tenders to be delivered at the Hospital, on or before TUESDAY, JUNE 6th, 1854. The lowest Tender not necessarily accepted.
Nottingham, May 11, 1854.

CONTRACTS.

TO BUILDERS AND OTHERS.

MILITIA QUARTERS, NEWARK-UPON-TRENT.—Persons desirous of CONTRACTING with the Lieutenancy of the County of Nottingham for the ERECTION of a STONE HOUSE, ARMOURY, GUARD HOUSE, MAGAZINE, and DWELLINGS for the non commissioned officers of the "Royal Sherwood Foresters," or "Nottinghamshire Militia," about to be built at Newark-upon-Trent, may inspect the drawings and specifications, obtain copies of the quantities, and all other information, on and after the 10th day of this month, at the Office of Mr. CHARLES BAILA, Newark, on and after the 15th day of MAY. Tenders to be sent in sealed, and endorsed "Tenders for Militia Quarters," addressed to Mr. T. F. A. BURNABY, Clerk to the Lieutenancy, Newark-upon-Trent, on or before the 10th day of JUNE. The successful Tenderer will be required to enter into a bond with two approved sureties for the due performance of his contract. The Lieutenancy, however, reserves the right of rejecting any or all of the Tenders offered.
Newark, 8th April, 1854.

CONTRACT for FENCING.—The Governors of St. Thomas's Hospital are prepared to receive TENDERS for about 1,850 YARDS of POST and RAIL FENCING, to be erected at Barkers' Plains and specifications can be seen at Mr. HENRY CURREY's Office, No. 4, Lancaster-place, Strand, any day between the hours of TEN and FOUR o'clock. The Tenders are to be delivered at the Counting house of St. Thomas's Hospital, in the Borough, on or before TUESDAY, the 23rd instant, at ELEVEN o'clock sealed and endorsed, "Tender for Fencing," and addressed to Mr. HENRY CURREY. The Governors do not bind themselves to accept the lowest or any Tender. HENRY CURREY, Architect.
4, Lancaster-place, Strand. May 9, 1854.

Sewers Office, Guildhall, May 9, 1854.

THE COMMISSIONERS of SEWERS of the City of London hereby give Notice, that they will meet in the Council-house of the said city on TUESDAY, MAY 30th, 1854, at TWELVE o'clock at noon, for the purpose of receiving SEWERS within the said City as may be required during the term of Three Years, commencing at Midsummer-day next. A specification of works and conditions may be seen at this Office. The Commissioners will require the party contracting to give security to the amount of £1000 for the due performance of the contract. No Tender will be received after TWELVE o'clock on the day of treaty. The Commissioners do not pledge themselves to accept the lowest Tender, nor any unless approved thereof.
JOSEPH DAW, Chief Clerk.

ROTHERHAM and KIMBERWORTH WATER WORKS Company.—The Local Board of Health are prepared to receive TENDERS for the CONSTRUCTION and COMPLETION of TWO ARCHED SERVICE RESERVOIRS, an ARCHED RETAINING TANK, and BOUNDARY FENCES. Printed copies of the drawings and specifications may be seen, and forms of Tender with quantities, may be obtained at the Office, on and after the 15th inst., of Messrs. LEE and STEVENSON, 7, Duke-street, Westminster, and Tenders must be sent in to me on or before TUESDAY, the 23rd instant.—By order of the Board,
(Signed) JOHN BARRAS, Clerk.
Rotherham, May 8, 1854.

TO BUILDERS.

THE DIRECTORS of the ILKLEY WELLS HYDROPATHIC COMPANY are desirous of receiving TENDERS for the ERECTION of their NEW BUILDING at ILKLEY, consisting of Masons', Plasterers', Carpenters' and Joiners', Plumbers' and Glaziers', Slaters', Painters', and Brass-founders' Works. The plans and specifications have been put by Mr. D. CAMPBELL, Surveyor, of London. Copies of the same can be obtained on and after the 10th instant, by parties intending to send in Tenders. The plans may also be seen there, and at the Architect's Office, New Town Hall, Leeds, on and after the 10th instant from NINE to SIX o'clock, until the 19th instant, on or before which day Tenders, sealed and addressed to the Directors, are to be delivered to the Architect. The person whose Tender is accepted will be required to enter into a bond with two responsible persons for the due performance of the contract, and to furnish a schedule of prices. The Directors do not bind themselves to accept the lowest or any of the Tenders.
CUTHBERT BRODRICK, Architect.
Leeds, May 1, 1854.

CONTRACT No. 7.—PLUMSTEAD, WOOLWICH and CHARLTON CONSUMERS PURE WATER COMPANY.—Notice is hereby given, that the Directors of the said Company are desirous to receive TENDERS for the BUILDING and CONSTRUCTING a HIGH-SERVICE RESERVOIR on their Land at Shooter's-hill, Kent. Plans and specifications may be seen, on application at the Office of S. C. HOMERSHAM, Esq. 19, Buckingham-street, Adelphi, London, between the hours of TEN and FOUR o'clock. Sealed Tenders, in a form to be provided by the Company's Engineer, must be sent in on or before TUESDAY, the 23rd day of MAY, 1854, addressed to the Secretary, at the Works. By order,
Plumstead, May 6, 1854. JAMES BLACK, Secretary.

TO BUILDERS.

THE NOTTINGHAM GAS-LIGHT and COKE COMPANY are prepared to receive TENDERS for the ERECTION of a large RETORT-HOUSE and other WORKS, two GASHOLDER TANKS, and a DWELLING HOUSE, with Committee Room and Offices, all drawings and specifications may be seen at the Gas-office, Nottingham, on and after FRIDAY, the 19th day of MAY instant, and forms of Tender and Schedules of Quantities may be then and there obtained on payment of 1l. for the same. Tenders are to be delivered to WILLIAM HURST, Clerk to the Company, at his Office in Nottingham, at or before ELEVEN o'clock in the forenoon of FRIDAY, the 26th day of MAY instant. The lowest or other Tender will not necessarily be accepted.—By order of the Committee,
T. HAWKSLEY, Engineer to the Company,
30, Great George-street, Westminster
Gas-office, Nottingham, 12th May, 1854.

PARISH of ST. JOHN, at HACKNEY.—Contract for Granite Curbing, York Paving, &c.—Notice is hereby given, that the Board for Repair of Highways in this Parish, will, at their meeting to be held at the Parish House, on THURSDAY, the 25th day of MAY, 1854, and not before that evening, CONTRACT for the SUPPLY of CARLINE NOSE, ABERDEEN, DEVON, GUERNSEY, or other GRANITE CURBING, CIRCULAR CURBING, RELAYING OLD CURBING, YORK PAVING. Also for taking up, squaring, and relaying Old York Paving, new 4-inch Aberdeen Granite Paving, new Half-Sovereign Aberdeen Granite Paving, and relaying Old Pebble Paving. The Tenders, addressed to the Clerk, must be sealed and marked "Tender for Curbing," and "Tender for Paving," as the case may be, and state in the Tender the number of lineal yards delivered to the Clerk the day before the meeting. The Contractor, or their representatives, must attend at the aforesaid place of meeting. The Board will take no account of Tenders unless on one of the printed forms, and in all respects in conformity therewith, which may be had of the Clerk or Assistant Surveyor. A bond, in a penalty of Five Hundred Pounds, with approved securities, to be entered into by the contractor for the performance of his contract, and further names and places of abode to be given with the Tender, together with samples of the different sorts of stone. Further particulars, if required, may be had of Mr. WOODWARD, the Assistant Surveyor, of No. 1, Dalston-rise, Hackney; and at the Parish House, in Church-street, Hackney.
CHAS. HORTON PULLEY, Clerk.
Upper Homerton, May 11th, 1854

TO ROAD CONTRACTORS and Others.—The Committee of the City of London and Counties Freehold Land Society are desirous of receiving TENDERS for CONSTRUCTING the ROADS, new Sewers, and other works, on an estate at Wood-green, the plans, specification and plans may be seen at the office of the Society, 27, Farringdon-street. Tenders must be delivered addressed "Tenders for Roads, &c." before five o'clock, on WEDNESDAY, the 24th instant.
JAMES HIGHAM, Secretary.

TO ARCHITECTS AND BUILDERS.

CHUBB'S WROUGHT-IRON and FIRE-PROOF DOORS and FRAMES, for strong Rooms. A large stock of the above of all sizes, made in the best manner, and of the most approved patterns, fitted with CHUBBS PATENT DETECTOR LOCKS, throwing from two to twenty bolts, constantly on sale, at very moderate prices. FIRE PROOF SAFES of every size and pattern; Iron Safes and Lateches for all purposes.—C. CHUBB and SON, sole Manufacturers, 57, St. Paul's Churchyard, London.

FIRE-PROOF! FRAUD-PROOF! THIEF-PROOF.—GEORGE PRICE late Noake and Co.), Cleveland Works, Wolverhampton, Manufacturer of improved strong wrought-iron Fire, Fraud, and Thief-proof Book-safes, Plate chests, Deed and Cash Boxes, Iron Doors and Frames, &c. fitted with Chubb's or any other patent lock, and for security, style finish, and cheapness, cannot be excelled. Delivered free, in London, Liverpool, or Bristol. Patterns and prices sent by return of post to any part of the kingdom. Established 1840.

FIRE—ROBBERY—VIOLENCE—PILLAGE.—MILNER'S HOLDFAST and FIRE RESISTING SAFES, the strongest safeguards in the world against.

EXTENSIVE FIRE IN GLASGOW.
MESSRS. DAVID BOYD AND CO.

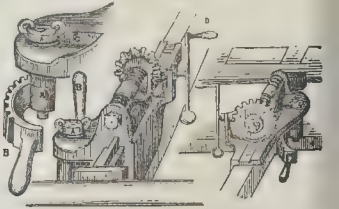
Gentlemen,—At the Counting-house Yesterday, by which my counting-house was destroyed, I owed the preservation of my books to the MILNER'S SAFE, in which they were kept. The contents of a wall safe were totally destroyed at the same time. You will please send me immediately another "Milner" of the same size as the one I had, being thoroughly satisfied of their safety, after the test I have had.

I am, Gentlemen, your obedient servant,
(Signed) JOHN DODDS.
27, Union-street, Glasgow, Feb. 28, 1854.

MILNER'S PHŒNIX SAFE WORKS, Liverpool;
London Depôt, 47a, Moorgate-street, City

A PRIZE MEDAL for SUPERIOR LOCKS was awarded to J. H. BOOBBYER at the Great Exhibition of 1851, who invites the attention of Builders, &c. to his Stock of Iron; Brass Founders', Nails wrought and cut), Copper and Zinc; Patent Locks of all descriptions; Chico, Glass, and Wood Furnitures of all kinds, with Patent Shifting Spindles; Dr. Arnott's Ventilator, &c.; and the new registered Venetian Ventilator, so much admired, &c. &c. &c.

J. H. BOOBBYER late STURCH and BOOBBYER), established nearly 30 years, keeps the supply of Goods from the best Manufactories, at the lowest prices.
14, Stanhope street, Clare-market, London.



STREET DOOR LATCHES, WITH TWO SMALL NEAT KEYS, WARRANTED SAFE FROM PICKLOCKS, FIFTEEN SHILLINGS EACH.

PARNELL'S PATENT DEFIANCE and NATIONAL LOCKS, WHICH CANNOT BE PICKED.—These Locks are recommended to the public for their simplicity, durability, and perfect security; also Parnell's Patent Noiseless Box-staples and Striking Plates, Fire proof safes, Deed and Cash-boxes, Copying and Lever Presses.—Descriptions and lists of prices may be had at the Depôt, 52, Strand gratis.

PATENT CAST IRON SINKS, with TRAP complete, of the following sizes:—2 feet, 5s. 6d. each; 2 feet 6 inches, 7s. 6d. each; 3 feet, 8s. 6d. Also, about Ten Tons of Half-round Gutters, now in stock, may be sold considerably below the usual price.—AT JONES'S, No. 6, Bankside, Southwark

PATENT CRAMP FOR FLOORS, DOORS, AND SASHES.

W. BISSELL, PATENTEE, WOLVERHAMPTON, Manufacturer of Rein and Mortise Locks and Builder's Ironmongery.

AA. A set screw and pin moving in slab C, to regulate for any thickness of joist, from 2 to 4 inches.

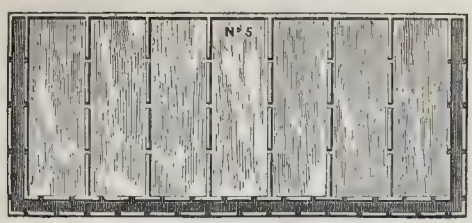
B. An eccentric notched lever, to be turned and pressed against the joist.

Lay the cramp upon the joist close up to the board, move the set screw in the slab up to the side of the joist, then fix the set screw firm. Turn the notched lever B against the joist, then, by turning the handle D, the lever will gradually fix itself and hold the cramp firm; the greater the strain, the more tightly, by its eccentric action, will the lever bind. The Patentee, in asking the attention of Builders and others, assures them that his cramp possesses great advantages. It is one of the most useful cramps in the kind, and as well suited for doors and sashes as for floors. From its superior mechanical principles, it has greater power, and will be found to be more quickly and safely used than any yet brought out, and at the same time it is light and portable.

CAST-IRON PIPES, IRON-WORK FOR OVENS, &c.

RAIN PIPES, &c.—F. A. TIDDEMAN and CO. St. Ann's Wharf, Earl-street, City, near Blackfriars-bridge, keep a large stock of Rain Pipes, Heads, Shoes, Elbows, &c. half-round and O G Gutters, Socket Pipes for Water or Gas, Flange Pipes, Hot Water Pipes and Connections, Sash Weights, and other castings; Iron-work for Bakers' Ovens of every description, fitted complete, to be had in sets or in parts.—Prices equal to all competition. Contracts taken to any extent. Goods landed. A powerful crane.

GEORGE and SAMUEL CUTLER, WENLOCK IRON WORKS, 8, Wharf, Wenlock-road, City-road, London.—Contracts for Cast-iron Tanks, Gasholders, Purifiers, and all descriptions of Gas-Apparatus (Gas works erected complete). And manufacturers of Corrugated and all kinds of Iron Roofing for Railway Stations, Sheds, Warehouses, &c. &c. executed on the most reasonable terms. Ship Tanks, Steam and Range Boilers, and every description of Smiths' Work of the best materials and workmanship. Also Improved Slide Valves, Cross Bars, and Screws, and Bolts, and Nuts, of all sizes, kept in stock.



THOS. B. LAWRENCE and CO. Zinc Dressers and Manufacturers, 10, York-place, Lambeth, having removed to their new premises, are selling SHEET ZINC at 32s. per cwt.; Perforated Zinc, at 4d. per foot; Rain-pipes, 3in. 4d. per foot; Gutters, 4in. 4d. per foot, and in proportion. Chimney-shafts, Cowls, &c. equally cheap. Plumbic Zinc, 42s. Zinc Paint and Galvanized Iron Plates. A prize medal was awarded them at the Great Exhibition of 1851.

These filters, at one, two, three, and four guineas each, yielding 50, 100, 150, and 200 gallons per diem, will be found sufficient for ordinary domestic requirements; are self-acting, and not liable to get out of order. Reference to parties extensively supplied with quantities up to 30,000 gallons per diem, may be obtained on application at the depôt, 71, Baker-street, Portman square, London.

C. LEFTWICH, VARNISH MANUFACTURER, LEAD, GLASS, and COLOUR WAREHOUSE, 21, Malvern street, Regent's-park. Six per cent. given for Old Lead. C. L. begs to call the attention of the Trade, Builders, &c to his stock of plumbers' coal flasks, plug ditto, tray work, &c, sheet lead, and patent pipe, plate, patent plate, sheet and crown glass, white lead, colours, &c. Glass illuminators for floors or pave ments, vaults, &c. 2½ PER CENT GIVEN for OLD LEAD; GLASS ILLUMINATORS for FLOORS, AREA VAULTS, &c.

TO THE SHAREHOLDERS OF THE ELECTRIC POWER, LIGHT, and COLOUR COMPANY

Offices, 31, Pall-mall, London.

The Directors of the Electric Power, Light, and Colour Company, have much pleasure in laying before their shareholders the following statement of the progress of the Company; and in doing so, for the sake of brevity, many of those details must necessarily be omitted, which may be conveniently entered into at subsequent meetings.

The Company, as established on the 8th June, 1853, consisted of a few individuals forming a private partnership, and was carried out upon the rules and regulations comprehended under the Cost-Book system; which, from the custom of all payments being made for cash, and all accounts and expenditures being audited monthly, was thought in all advisable to be adopted, in order to limit, *pro tanto*, the liabilities of the parties interested. In consequence of the success of the Company's operations, and the extension of objects contemplated in the original scheme, many additional shareholders joined this first partnership; but as by the Joint Stock Companies' Registration Act, not less than twenty-five persons are not permitted to become associated for the purpose of carrying out any commercial enterprise, it was decided at a general meeting, holden on the 26th October, 1855, that the Company should thenceforth be carried on as a Joint Stock Company, embracing at the same time, in its internal management, the advantages which are obtained by following out the principles of the Cost-Book system

To effect this with certainty, legal advice was taken and adopted; and the Company is now completely registered under the Joint Stock Companies' Registration Act, with a capital of [illegible] in 5,000 shares of £20 each, to be paid in full.

The following digest of some of the clauses introduced into the Deed of Registration will elucidate the position of the shareholders in respect to their power and control over the expenses of the enterprise. The books and accounts of the Company will be made up and submitted to the Board of Directors at their monthly meetings; and, after examination by the auditors, they will be laid before the shareholders at the half-yearly general meetings and on all other occasions when it shall be considered advisable

If at any time more than two-thirds of the capital shall appear upon the books to be lost, the Company shall stand dissolved, and the residue be divided, *pro rata*, among the shareholders.

All purchases shall be made for cash, and, as far as possible, no debts against the Company remain undischarged for a period exceeding one month.

The affairs of the Company will be carried on as hitherto, under the management of a Board or Committee of Directors, to be annually selected from the shareholders; all members of such directorship being eligible for re-election.

The present directory consists of the following gentlemen:—

DIRECTORS.

Sir Claude E. Scott, Bart. Sir John W. Lubbock, Bart.

J. Whittaker Bush, esq. Fairwood, Westbury, Wilts.
William Bridges, esq. 59, Pall-mall
Captain T. G. Forbes, R.N. Stoke-by-Nayland, Suffolk.
Samuel Hadden, esq. Guildford, Surrey
William Prosser, esq. 8, Park-place, Regent's-park.
John Purves, 4, Howarth place, Edinburgh
Sir C. E. Scott, bart. 29, Brutton-street, Berkeley-square.
Charles Trotter, esq. Regent-terrace, Edinburgh.
Dr. Watson, 11, Adam-street, Adelphi.

BANKERS.

Messrs. Coutts & Co. Sir J. W. Lubbock, bart. and Co.

AUDITORS

A. Hadley, esq. J. T. Cookney, esq.
CHEMICAL MANAGER—Dr. J. J. W. Wells, M. Ph. D.
SCIENTIFIC MANAGER—Dr. Maddox.
COMMERCIAL MANAGER—W. Prosser, esq.
SOLICITORS—Messrs. Lawrence and Cowdy.
SECRETARY—J. W. Warre Tyndale, esq.

In evidence that the expectations of the projectors were justly founded, it is only needful to quote the following copy of a minute made at a meeting of the Directors on the 14th January:—

"That a dividend of 2½ per cent. from profits arising from the sale of colours made during the two months prior to the 31st of January, 1854, being at the rate of 15 per cent. per annum—be this day declared."

This dividend was paid on the 8th March. The following minute was made at a meeting of the Directors on the 18th April—

"That the dividends in future shall be paid quarterly; and that the fund now available from the sale of colour, from January 1st to March 31st, being equal to 5 per cent. for the three months, or at the rate of 20 per cent. per annum, be applied to a dividend in June."

3 per cent. will be set aside from the net profits after the shareholders have received 20 per cent. so as to form a reserve fund, to be invested in public securities for the benefit of the shareholders, one half of which will be divided, with all interest, every three years.

Since the commencement of the present year the manufacture of colours has gone on most prosperously; and their value is now so well appreciated in the market, that the Company is at present executing considerable orders at highly remunerative prices. Pending the erection of the works at Frogmore Creek, Wandsworth, numerous improvements have been introduced in the production of the Electric Light under the Patents in the possession of this Company; and it has been arranged to illuminate forthwith the Great Northern Railway Station. This will doubtless lead to the employment of the Light in many other situations, for which it cannot but prove to be highly valuable; and it will be a new source of profit; for the lately-declared dividend arose solely from the manufacture of the colours obtained by the use of the batteries necessary to the patents (exclusive of the application of the electricity to illumination.

The manufacture of the innocuous Bleaching Fluid by the Batteries has been commenced with the utmost success, and the Company will be in a position to supply any quantity in the course of the ensuing Spring. The increasing demand for the products, and for the applications of the patents, renders a personal view of the Works at Wandsworth needful: to carry out which object, it has been decided to issue the remainder of the shares. Applications for them may be made to the Secretary, at the Offices of the Company, 31, Pall mall, where every information will be given, and where samples of the colours may be seen; and to Messrs. Bishop and Greenfield, 1, Throgmorton-street; Messrs. Robertson and Paton, Liverpool; Messrs. Sudlow, Brothers, Exchange-court, Liverpool; Mr. John Barlow, Manchester; Messrs. John Robertson and Co. 47, George-street, Edinburgh; Mr. W. Bell, North St. David-street, Edinburgh; Mr. S. M. Penny, St. Vincent-street, Glasgow.

It cannot be otherwise than a matter of much gratulation to the shareholders to survey the past successful achievement of the objects for which the Company has been formed; and when it is considered that the solution of so great a practical problem as the procuring and supplying cheap Electricity, the greatest perhaps of the great desiderata of the day, is attained, the successful establishment of this Company, becomes a matter, it may be said, of national importance.—By order of the Board,

J. WHITTAKER BUSH, Chairman.
J. W. WARRE TYNDALE, Secretary.

To the Secretary of the Electric Power, Light, and Colour Company.

SIR,—I request that you will apply to the Directors of "The Electric Power, Light, and Colour Company," to allot me Shares of 20*l.* each, which I hereby agree to accept, and to pay for, in full, when required.

Name.....
Address.....

ELECTRIC COLOURS.—The ELECTRIC POWER LIGHT and COLOUR COMPANY is prepared to supply the trade generally with their Colours, which for quality and lowness of price are unequalled. STONE MERCHANT.
Prices and samples furnished. Delivered to any part.
Address VICTORIA STONE WHARF, ISLE OF DOGS.

IMPROVED CONSTRUCTION OF CHIMNEYS, by building in a Contractor and Register at the commencement of the Flue, covering in the Flue at the top, and inserting mouth-pieces for the horizontal or vertical escape of the smoke, to be applied alternately, thus preventing the Flues from heating on each other, and avoiding unsightly cowls, &c.

The CHIMNEY CONTRACTOR and REGISTER is made of iron. The Register acts horizontally, and when the Chimney is not in use admits of being perfectly closed. It is of easy action, cannot get out of order, and is cleanly, as there is no space for a deposit of soot. A Chimney-bar is required where the opening exceeds 3 feet 3 inches in width. Stoves of the most simple construction will be found best for use, and may be either set or built.

The MOUTH-PIECES for the escape of smoke, which stand out before the external surface, are so formed as to divert the wind and prevent down draught. The covering in at the top keeps the flue dry and preserves the stores from injury.
To be had of the Manufacturers Messrs. PARRY & SON, Atlas Foundry, 105, Golden-lane, St. Luke's.

SMOKE CONSUMED or PREVENTED.— Of all the numerous patents obtained for this purpose, none can be made effective to burn or prevent smoke to every description of boiler, copper, pan, oven, or fire used for manufacturing purposes To obtain this object, the SMOKE CONSUMING COMPANY have made arrangements with the patentees of seven different Patented Plans (specified below), from which will be selected those best adapted to the various descriptions of fire-places The application of Chanter's Reciprocating Moveable Fire Bars are a limited to be a great advantage to all Smoke-Consuming Apparatus, by allowing a greater supply of air to pass through the bars, giving increased power, preventing clinkers and saving fuel. Applicable to all furnaces. Smoke Patents referred to above are:—James Robertson's Two Patents; Chanter and Co's. Two Patents; John Mammatt's Patent; Collins's Patent; Bristow and Attwood's, Otis Flour-mills, Upper Thames-street. For particulars and references to see them in operation, apply to the SMOKE CONSUMING COMPANY, 20, Little Tower-street; or 2 Arnold-terrace, Bow-road, London.

THE UNIVERSAL SMOKE-CONSUMING COMPANY.—(WITTY'S PATENT, 1853.)
OFFICES—4, Furnival's Inn, Holborn, London.
This invention consumes within the furnace all the smoke generated from coal, is at once chemical and mechanical, simple in its working, inexpensive in cost, and may be applied to any furnace in a few hours. Saving in fuel upwards of 30 per cent. Particulars, with charges for licensing and setting up the invention, to be had on applica at the Company's offices, where models of the invention may be seen and references given, which will satisfy the efficiency of the invention

SAMUEL KING, Esq. Sec.
To SAMUEL KING, Esq. Secretary to the "Universal Smoke-Consuming Company."
SIR,—I have applied Mr Witty's invention, at this place, to two steam (waggon) boiler furnaces of 35-horse power, the two furnaces running into one chimney shaft, and find the smoke wholly consumed with both furnaces. The invention is very simple and incapable, I think, of soon getting out of repair The saving in fuel, as near as I can calculate, is 30 per cent.—Yours obediently,
JOHN ENSOR,
Engineer at Messrs. Sadler, Ross, and Co.'s Mustard Mills, Great Guildford street, Southwark, 18th May, 1854.

SUCCESSFUL VENTILATION.—WATSON'S PATENT SELF-ACTING DOUBLE-CURRENT VENTILATORS have been successfully applied to Churches, Chapels, Public Halls, Stables, and almost every kind of Building, as well as to withdraw Steam, Smoke, Dust, and Heat Testimonials and other information forwarded on receipt of a postage stamp. The Ventilators delivered carriage free in London and Bristol. Instructions sent for fixing.—Apply at the Manufactory to CHARLES WATSON, King Cross-lane, Halifax, Yorkshire, who is the patentee and sole maker.

OPENING of the CRYSTAL PALACE.—The OPENING of the CRYSTAL PALACE is definitely fixed to take place on SATURDAY, the 10th of JUNE, on which occasion her MAJESTY has graciously signified her intention of honouring the inauguration with her presence.

"	"	1¼	"	30s. 6d.	" 24s. 6d. "

All other kinds of wood goods at equally reasonable prices, for Cash.—N.B. The extensive saw-mills now erecting on the wharf, are expected to be ready for work by the 1st of May

A GOOD CHANCE.—TO BE DISPOSED OF, a first-rate CABINET MAKER'S, UPHOLSTERER'S, and PAPERHANGER'S BUSINESS Apply to Mr. J. K. JENNINGS, 11, Elden street, Finsbury, London.

STAINING DEAL TO IMITATE ALL KINDS of WOODS. It requires NO SIZING, and will stand the exposure to the weather. Price 6s. per gall. at Varnishes for W. NAYLOR'S Stains may be had at the Factory, 44, and 56, James street, Oxford-street; also Manufacturer of Improved Knotting and Decorative Varnishes.

FREEHOLD GROUND.—Wanted, for a Villa, a PLOT of FREEHOLD LAND in the neighbourhood of the Bow-road, or adjacent to a railway in the suburbs of London —Address Messrs. MORRIS and SON, Architects, Poplar.

PREMISES WANTED, between 'Change and the Blackwall Railway, with Ground-floor of not less than 2,000 to 3,000 square feet. Two or three Floors will be required.—Address, with particulars, post-paid, to Mr. ELGER STEPHENSON, 64, Lime-street, City.

FREEHOLD BUILDING LAND TO BE SOLD, on Surbiton-hill, Kingston Station, South Western Railway, within half a mile of the station, in Plots, varying from Five to Thirteen Acres, adapted for first-class villas. Price from 200l. to 300l. an Acre, according to situation. Apply to Mr. PURKELL, House agent, near the Church, Surbiton-hill, Kingston, Surrey.

TO WHARFINGERS, BUILDERS, ENGINEERS, MANUFACTURERS RAILWAY CARRIERS, &c.
TO BE SOLD, FREEHOLD and part LEASEHOLD, BRUNSWICK WHARF and DRAW DOCK, Blackwall, long established in the Brick, Tile, Slate, and Lime Trade, &c. Excellent residence, offices, stabling, and warehouses in substantial repair. Area near 1½ acre adjoining the South Western Railway, with 155 feet frontage to the River Thames, and 150 feet next the high road leading to Wandsworth. —Apply on the Premises or to Mr. T. M. NELSON, Architect, Regent Chambers, No. 85, Regent Circus, Piccadilly.

FREEHOLD BUILDING LAND.—TO BE SOLD, 3,000 feet of frontage to good roads, by an average depth of 260 feet, nearly 20 acres, delightfully situated a few minutes' walk from a railway station, a few miles from Lewisham, well suited to a Freehold Land Society, or an extensive building undertaking. Price 3,300l.—Apply to Messrs. BROWN and ROBERTS, 22 Tavistock-street.

TO CAPITALISTS.
TO BE SOLD, or LET on LEASE, some VALUABLE MERCANTILE and BUILDING SITES, in the Borough of King's Lynn, in the county of Norfolk, adjoining the Harbour Branch of the East Anglian Railway Company, and the navigable river Nar The above property offers unusual facilities for mercantile purposes, there being a tramway already laid down from the main line; and the water of the Nar, although a tidal river, is, after the bar, a pure, soft, and limpid stream, which renders it specially adapted for the use of the steam engine, and for the manufacture of flax, cotton, woollens, silk ribbons, &c.; it is also equally well suited for a flour, oil, or paper mill, as there is common navigation both by sea or rail to the metropolis, and all the populous districts of England.—For particulars apply to Messrs. GOODWIN and CO. Solicitors, or to Mr. SHEPHERD, Nar Buildings, Lynn.

TO STONEMASONS, BUILDERS, AND OTHERS.
TO BE DISPOSED OF, the LEASE and GOODWILL of an OLD-ESTABLISHED BUSINESS, situated in a leading thoroughfare; the premises are roomy and commanding, with large Workshops, Stable, &c. Stock, Fixtures, Gas-fittings, &c. with a neat and commodious Dwelling-house at rear, containing seven rooms, at the low rent of 45l. per year, which may be cleared by letting a portion. This will be sold a bargain. May be satisfactorily referred given for leaving.—Further apply application to BOURNE, BROTHERS, Auctioneers, 18, Chancery Lane Fleet-street.

TO CHARITIES, SCHOOLS, INSTITUTES, COLLEGES, or their accredited Agents, &c. with which in the advertisers are desirous of treating for the DISPOSAL of a most beautiful LANDED ESTATE, possessing facilities unusually propitious for the founding or adopting an asylum, &c. whose benevolent purposes are the primary object; it being proverbial as one of the most highly favoured localities in the kingdom, where disease is a stranger, and where cholera has never made its home From 20 to 150 acres will be parted with upon liberal terms, and all carrying out either of the above benevolent purposes. Situate in about 2½ miles from Farnham, which is midway between the 1st and the new military camp —For preliminary particulars, apply to J. C. No. 61, Basinghall street, City.

TO BUILDERS.
A GOOD opportunity for any party wishing to enter into a Business in the above line. May have immediate possession of an old established concern on very moderate and advantageous terms, the proprietor being about to retire into the country.—Application for particulars to be made to J. THORLEY, Upholsterer and Agent, No. 37, Cochrane-terrace, St. John's-wood.

THE PERMANENT WAY COMPANY call the attention of Railway Directors and Engineers to their PATENT RAILS, SLEEPERS, FISH JOINTS, and other important improvements, now in use on upwards of 2,000 miles of railway

Extract from the half-yearly report of the Directors of the Midland Railway, February 14, 1854:—

"An important feature in the consi ract for the maintenance of the Permanent Way is that the contractors are bound to reduce their charges 7d per mile per annum, whenever the Fish Joint, or certain other improvements, are here after introduced."

Every information may be obtained on application to Mr. CHARLES MAY, C.E. the Manager; or Mr. WILLIAM ROWDEN, the Secretary, 25, Great George-street, Westminster.

FRESCO DECORATIONS & STUCCOES of CHURCHES and PALACES in ITALY,

DURING THE FIFTEENTH AND SIXTEENTH CENTURIES.

By LEWIS GRUNER.

A large and splendid volume, imperial folio, half-bound Morocco, comprising a SERIES of FIFTY-SIX very LARGE and ELABORATE ENGRAVINGS, after the original Paintings of RAPHAEL, GIULIO ROMANO, GIOVANNI DA UDINE, BALDASSARE PERUZZI, SEBASTIAN DEL PIOMBO, CORREGGIO, AMBROGIO DA FOSSANO, BRAMANTINO, BERNARDINO LUINI; those of Raphael's Loggie of the Vatican and the Palazzo Farnesina ELABORATELY FINISHED in COLOURS, with coloured key-plates to show the colouring of the rest.

Accompanied by a 4to VOLUME of DESCRIPTION, including ESSAY by J. HITTORFF on the ARABESQUES of the ANCIENTS as COMPARED with those of RAPHAEL and his SCHOOL.

*** This fine work is not only interesting to the connoisseur, as exhibiting a succession of beautiful frescoes by the greatest masters of the art but furnishes in all its details the designs of the greatest value to the painter, the architect, the decorative artist, and the manufacturer. Each marvel of imagination and beauty of style characterises every plate.

The *Quarterly Review* in an elaborate article on this work says:- "The practical remarks and numerous notes illustrative of the combination and harmony of the colouring, as well as a fund of recondite information, scattered over the massing of colours, and furniture for ascertaining and what principles of pencilled agreeable contrasts, harmony, variety, solidity, lightness, sobriety, gaiety, or any other qualities. Several of the plates offer on a scale large enough for details on a larger scale, obviously applicable to all branches of upholstery and even jewellery. These, we trust, our practical artists will avail themselves of,—not as so many new leaves of a pattern-book but to school the eye and refresh the invention."

The various Views are accompanied by Plans, Sections, and Details, with the Ornaments and Parts at large.

*** Of this very splendid and important work the accomplished author, Mr. Gruner, printed only 150 copies, of which have been sent abroad, the remaining copies have become the sole property of G. Willis, who has determined to offer them for sale at the very low price of 7l. 7s. each.

ALSO A CHEAP LIST OF FINE ARCHITECTURAL BOOKS JUST PUBLISHED, GRATIS, AND POST-FREE.

G. WILLIS, GREAT PIAZZA, COVENT-GARDEN.

CRYSTAL PALACE, 1854.
GENERAL PUBLICATIONS.
Preparing for Publication, and will be issued on the Day of Opening, the following

GUIDES and HANDBOOKS, ILLUSTRATIVE of the CONTENTS of the EXHIBITION.

1. GENERAL GUIDE BOOK to the PALACE and PARK. With numerous Illustrations. By SAMUEL PHILLIPS.

2. HANDBOOK to the EGYPTIAN COURT. With Illustrations. By OWEN JONES and SAMUEL SHARPE.

3. HANDBOOK to the GREEK COURT. With Illustrations. By GEORGE SCHARF, Jun.

4. HANDBOOK to the ROMAN COURT. With Illustrations. By GEORGE SCHARF, Jun.

5. HANDBOOK to the ALHAMBRA COURT. With Illustrations. By OWEN JONES.

6. HANDBOOK to the NINEVEH COURT. With Illustrations. By A. H. LAYARD, M.P.

7. HANDBOOK to the BYZANTINE COURT. With Illustrations. By M. DIGBY WYATT and J. B. WARING.

8. HANDBOOK to the MEDIÆVAL COURT. With Illustrations. By M. DIGBY WYATT and J. B. WARING.

9. HANDBOOK to the RENAISSANCE COURT. With Illustrations. By M. DIGBY WYATT and J. B. WARING.

10. HANDBOOK to the ITALIAN COURT. With Illustrations. By M. DIGBY WYATT and J. B. WARING.

11. HANDBOOK to the POMPEIAN COURT With Illustrations. By GEORGE SCHARF, Jun.

12. HANDBOOK to the SCHOOLS of MODERN SCULPTURE. By Mrs. JAMESON.

13. HOW to SEE the SCULPTURE in the CRYSTAL PALACE. By RAPHAELE MONTI.

14. THE PORTRAIT GALLERY of the CRYSTAL PALACE. Described by SAMUEL PHILLIPS.

15. HANDBOOK to the ETHNOLOGICAL and ZOOLOGICAL DEPARTMENTS. With Illustrations. By Professor EDWARD FORBES and Dr. LANKESTER.

16. THE EXTINCT ANIMALS and GEOLOGICAL ILLUSTRATIONS DESCRIBED. With Plan and Drawings. By Professor OWEN.

17. THE CRYSTAL PALACE INDUSTRIAL DIRECTORY.

These Books, written in a popular style, with a strictly instructive and educational aim, are to be published separately at a very low price, in order to bring them within the reach of all visitors.

Advertisements for one or all of these publications will be received, from this date, by Messrs. BRADBURY and EVANS, Printers and Publishers to the Crystal Palace Company, at their Office, No. 11, Bouverie-street, Fleet-street, where all necessary information relating to these Works may be obtained.

Just out,

ELEMENTS of LINEAR DRAWING and PRACTICAL GEOMETRY, illustrated by upwards of Eighty Engravings, and Thirty Models.

To be had of THE LONDON PARQUETRY, Royal Panopticon (Porch) Leicester Square; and wholesale at No. 8, Whitefriars-street, Fleet-street.

Also on the 1st of June,

THEORY of SHADOWS, GEOMETRICAL PRACTICE, MOSAIC PASTIMES, STEREOMETRY.

THE FREEMASONS' QUARTERLY MAGAZINE. New Series. Enlarged, price 2s. 6d. A Specimen Number will be sent on receipt of six postage-stamps (the cost of postage). No. V. for April, just published.
GEO. ROUTLEDGE and CO. Farringdon-street; and R. SPENCER, 314, High Holborn.

In four Svo volumes, each cloth 12s. roan, or 12s. 6d. calf

MAUNDER'S SCIENTIFIC and LITERARY TREASURY, or Popular Encyclopædia of the Belles Lettres as developed in the Sciences, Humanities, and Arts, and copious in information including all Branches of Science and every subject connected with Literature and Art. A new and thoroughly revised edition, comprising additions and descriptions of the various terms and inventions that have recently come into general use.

Also all uniform in size, and price 10s. each Treasury,
MAUNDER'S HISTORICAL TREASURY.
MAUNDER'S BIOGRAPHICAL TREASURY.
MAUNDER'S TREASURY OF KNOWLEDGE, and
MAUNDER'S TREASURY OF NATURAL HISTORY
London: LONGMAN, BROWN, GREEN, and LONGMANS.

GEOLOGICAL SURVEY AND MUSEUM OF PRACTICAL GEOLOGY

In course of publication,

THE GEOLOGICAL MAPS and HORIZONTAL and VERTICAL SECTIONS of the Geological Survey of the United Kingdom, coloured under the superintendence of Sir H. T. DE LA BECHE, C.B. F.R.S. Director-General of the Survey.

*** The Geological Horizontal Sections, Nos. 31, 32, and 33 price, coloured, 2s. each, are now ready.

Other publications, with the trade prices:—

1. RECORDS of the SCHOOL of MINES and of SCIENCE applied to the ARTS.
Vol. I. Part I. Inaugural and Introductory Lectures. Royal 8vo. Price One Shilling.
Vol. I. Part II.: On the Geology of the South Staffordshire Coal Field. Price 1s. 6d.
Vol. I. Part III.: On the Mines of Wicklow and Wexford; with Maps and Woodcuts. Price One Shilling.
Vol. I. Part IV.: Statistics of the Produce of Copper, Tin, Lead and Silver, from the Mines of the United Kingdom, with the Exports and Imports of these Metals from 1848 to 1852 inclusive. By ROBERT HUNT, Keeper of Mining Records. Price Sixpence.

2. MEMOIRS of the GEOLOGICAL SURVEY of GREAT BRITAIN, and of the MUSEUM of ECONOMIC GEOLOGY in LONDON. Vols I. and II. in royal 8vo. Vol I. with Woodcuts and Nine large Plates (seven coloured), 15s. cloth: Vol. II. in Two Half-Vols. with Sixty-three Plates, three coloured, and numerous Woodcuts, 28s. cloth, or 14s. each Part.

3. BRITISH ORGANIC REMAINS, Figures and Descriptions illustrative of; forming a portion of the Memoirs of the Geological Survey. Decades I. to IV. with Ten Plates each; Decade VI. with Eleven Plates; and Decade VII. with Ten Plates. Royal 8vo. price 8s.; and in royal 4to. 2s. 6d. each.
*** Other Decades are in the press.

4. Capt. PORTLOCK'S REPORT on the GEOLOGY of the COUNTY of LONDONDERRY, and of Parts of TYRONE and FERMANAGH. 8vo. price 18s.

5. Sir HENRY DE LA BECHE'S REPORT on the GEOLOGY of CORNWALL, DEVON, and WEST SOMERSET. 8vo. price 10s.

6. Prof. PHILLIPS'S FIGURES and DESCRIPTIONS of the PALÆOZOIC FOSSILS of CORNWALL, DEVON, and WEST SOMERSET. 8vo. price 6s.

London: Published for her Majesty's Stationery Office, by Messrs. LONGMAN, BROWN, GREEN, and LONGMANS.

Just published, fcp. 8vo. price 6s. 6d.

GEOMETRY as a SCIENCE: being the First Part of Elements of Geometry and Mensuration, with Easy Exercises, designed for Schools and Adult Classes.
By the Rev. T. LUND, B.D. formerly Fellow of St. John's College, Cambridge; Editor of Wood's Algebra (8vo. 12s. 6d.), and Author of Companion to Wood's Algebra (post 8vo. 6s.).

In the press:—

PART II. GEOMETRY as an ART.
PART III. GEOMETRY COMBINED with ARITHMETIC commonly called Mensuration.
PART IV. GEOMETRY COMBINED with ALGEBRA.
London: LONGMAN, BROWN, GREEN, and LONGMANS.

Just published, in post 8vo. price 7s. 6d. cloth,

THE ART of CLEANING, DYEING and FINISHING, on the most approved English and French Methods; being a perfect Compendium of all that is essential to be known in Dyeing Silks, Woollens, Cottons, Feathers, Bonnets, &c. To which are added, Instructions for Cleaning and Scouring Carpets, Hearth-rugs, Ancient Tapestry, Bed and Window Curtains, &c.

By THOMAS LOVE,
Thirty-five years a Working Dyer and Scourer.
London: LONGMAN, BROWN, GREEN, and LONGMANS.

On the 27th of May will be published, with six pages of plates, and several woodcuts, and about fifty pages of explanatory letter-press, price 1s. 6d. boards, or 2s. 6d. bound in cloth,

DEDICATED, BY PERMISSION, TO THE RIGHT HON. VISCOUNT PALMERSTON

HEALTHY HOMES, and HOW to MAKE THEM; being a Remedy for "London Shadows."
Comprising clearly defined Plans, Elevations, and Sections, Working Drawings, in connection with letter press descriptions and specifications necessary to the Builder in the Erection of the Health Homes for the Industrious Classes of Society, in Town or in their Environs,—with correct descriptions, specifications and directions for perfect and durable Ventilation and Drainage. The Buildings are so arranged that One Roof covers Four separate and distinct fire-proof Family Dwelling Houses, with separate entrances; each containing a Parlour, or Living Room, Two Bedrooms, a Dripping Closet, and a Scullery; with Cistern, Sink, and Water-closet, and all the healthful and comfortable arrangements and conveniences requisite for the Industrious Man, his Wife and Family.

By WM. BARDWELL, Esq. Architect.
London: Published for S. A. GILBERT, by DEAN and SON, 35, Threadneedle-street, and may be obtained of all Booksellers.

FRENCH in ONE MONTH, ditto German and Italian, by DE PORQUET'S TRESORS, for translating English into the above at sight, 3s. 6d. each; also First French, German, and Italian Reading Books, Parisian Grammar, Pocket Dictionary.

London: SIMPKIN, MARSHALL, and CO.

TO THE PATRONS AND MANAGERS OF ALL INSTITUTIONS FOR THE PROMOTION OF LITERATURE, SCIENCE, AND ART

Published in imperial 4to. price 1s. each Number,

THE ANTIQUITIES of ATHENS, accurately measured and delineated.

By JAMES STUART and NICHOLAS REVETT.

This celebrated work, to which the architecture of Great Britain is so largely indebted, and which has been confined to the library of the opulent; but the serial mode of publication places it within the reach of every student, to which must be added, a most extraordinary economy of expense, as the price of the whole series of engravings will not amount to a fourth part of the cost price of the work as originally published in four volumes, imperial folio.

The original slabs of a large portion of the sculpture introduced into this edition are now in the British Museum; but they there appear in a state of dilapidation so lamentable, as to make this work doubly valuable to the artist and the scholar. All these drawings were scrupulously adhered to while the subjects were in situ, previously to their removal, they appear in this work in a far more complete state than the sculptures themselves, as exhibited in the Elgin Saloon, and in the Crystal Palace, Sydenham. Many subjects have been destroyed since these drawings were made, all of which have been miserably dilapidated, so that the artistic value of these views, statues, bassi-relievi, architectural details, &c. is largely increased, being the only authorities which can be consulted. The work contains upwards of a thousand examples of the human figure, from the bassi-relievi of Phidias &c.

The plates printed from in this re-issue, are the original ones executed under the inspection of the artists.

Also now publishing, in imperial 4to. price 1s. the re-issue of

DESGODETZ'S ROME, in its ancient Grandeur.

PIPER, STEPHENSON, and SPENCE, 33, Paternoster-row.

ARCHITECTURAL PUBLICATION SOCIETY.—Instituted 1848. Copies of the works for the first year, 1848-9 are required for new subscribers. The DICTIONARY OF ARCHITECTURE commenced for the year 1850-51, is supplied to members on payment of the annual subscription of one guinea.

Treasurer, THOMAS L. DONALDSON, Bolton Gardens, Russell-Square.

Honorary Secretary, WYATT PAPWORTH, Esq. 14, Great Marlborough-street, from whom a list of the works issued can be obtained.

TO MERCHANTS AND OTHERS EXPORTING FURNITURE

SMEE and SON'S Book of Designs of Cabinet Furniture, is now ready. It contains upwards of 600 engravings of articles, of which they have a stock at their Wholesale Warerooms, No. 6, Finsbury-pavement, London.

MESSRS. WHITWORTH AND WALLIS'S REPORT.
Price One Shilling, in boards,

INDUSTRY of the UNITED STATES; compiled from the Official Report of Messrs. Whitworth and Wallis her Majesty's Commissioners to the American Exhibition.

"Contains more information and from which more practical knowledge can be obtained, than any book we could name; it is interesting alike to the merchant, the manufacturer and artizan."

"There are many things in Mr. Whitworth's report which have started manufacturers and men of science in this country. He has shown that in arts there is no knowledge so increasing and knowledge which threatens not only to rival, but to exceed anything existing in this country."—*Mr. Bright's Speech in the House of Commons.*

London: GEORGE ROUTLEDGE and CO. Farringdon-street, and 18, Beekman-street, New York.

LIGHTNING CONDUCTORS.—R. S. NEWALL and CO. Patentees of the Copper Rope Lightning Conductor, beg to inform the nobility, clergy, &c. that they supply Lightning Conductors, with the point and all staples complete for fixing, at one shilling the foot.

R. S. NEWALL and CO.'s Patent Copper Rope Conductor is being used by architects, engineers, and scientific men in all parts of the world.

OFFICES.—Gateshead-on-Tyne.
139, Strand, London.
67, Hyde-park-street, Glasgow
27, Dale-street, Manchester

PURE GAS.—TO GAS COMPANIES, ENGINEERS, MANUFACTURERS, and OTHERS.
PATENT CLAY PURIFICATION.—No cheap process has yet been discovered for freeing gas from ammonia, and the removal of the bisulphuret of carbon (the monster nuisance of gas-burning) has been given up in despair. Clay removes more than this impurities, and when taken from the purifiers the bi-sulphuret of carbon is visible, completely blackening the clay. The light of the gas is increased in proportion to its thorough purification. The proprietors of this patent are now ready to grant licenses for its use. Terms, and directions for the employment of clay, may be obtained from Mr. JOHN WHITTAKER, Agent to the Patentees, Gas Works, Wakefield.

The Builder.

SATURDAY, MAY 20, 1854.

THE antiquities of the remarkable people who crowded 1,200 miles of the narrow valley of the Nile, have received less attention from architects than their importance demanded, and has obtained from others. Yet, no clear apprehension of the conditions of the history of architecture—such as every one should possess, for the formation of correct taste—no such valuable possession can be present without previous attentive study of Egyptian art. Reflections of a state of civilization in a remote period, the tangible evidences of "the wisdom of the Egyptians," are vivid in their portraiture, as they are vast in extent. In the reign of the first Pharaoh of the Bible—Osirtasen I., about B.C. 1740—the Egyptians were acquainted with mechanical contrivances and chemical processes, which are amongst the most valuable in modern industry. Some of the chief forms of later styles of architecture, and ornamental details now in general use, are to be found in the monuments, the household fittings, or the personal ornaments of the people of Egypt.

Little indeed can be understood of the character of Egyptian architecture, or of the lessons which may be gleaned in its true home, by examining the experimental essays made in England. The Egyptian style has been treated too much as we have treated other styles,—just as, in fact, no *one* should be used. To merely transport the forms of one school to a new soil, or to attempt a combination such as that of the Greek portico with stories of factory windows, will ever be fruitless labour, or one of the evidences of ill-formed taste.

Egyptian architecture has its appropriate home in the sultry and rainless climate of Egypt. Let us properly regard the luxury of shade in such an atmosphere, at the edge of the desert; and those who have not seen what the encroaching sand has left of ponderous columns and gigantic *propylæa*, may realise the fact of the impressions which are brought away by all others from the land of Egypt. The best substitute for actual inspection that we have met with, is afforded by the fine French work by Maxime du Camp,—one which, we may say, suggests that we in England have still much to do with the aid of photography. Such illustrations, however, fail to give the polychromatic decoration—an important feature in Egyptian architecture.

Colour in mural decorations, and other elements in the works of art, were intensely symbolic; whilst in Grecian architecture, though the colours appear to have been the same, the æsthetic object is generally considered to have been paramount. The questions suggested by these facts would extend into a wide field, yet one to which we may perhaps have to return, when we speak of the Greek Courts. We will now merely say that the cause of failure in the effect of Grecian Doric architecture in this country, would be attributed by some, to the absence of what these authorities hold to have been an important element in the Greek orders, and one especially required in the treatment of the unsculptured surfaces which characterise the echinus and other mouldings of the Doric. We will not now enter upon that part of the vexed question of polychromy, nor touch that which the Crystal Palace authorities and their advisers have opened out by the colouring of the Elgin frieze. We only say, that where colour was confessedly on all sides, an object of attention, it is useful to have means of judging of its effect on a somewhat greater scale than that of a few book illustrations; and this has now to some extent been done in the Egyptian Courts at Sydenham.

Still, little can be learned from the few diminutive columns, and the hieroglyphics, paintings, and sculpture,—little compared with the wealth of the story that the arts of Egypt have to tell. Amongst the forms of column and entablature which are exhibited, we find that which may have been the first step to the Doric order, and to which attention was originally directed, by a sketch by Sir Charles Barry, but we miss the pictures of Egyptian life and manners, which the same rock-hewn tombs of Beni-hassan retain. An adequate presentment of ancient Egypt must be derived from works such as those of Rossellini, and Sir J. Gardner Wilkinson, or gleaned from the treasures of the museums of London and Turin. Owen Jones and Bonomi, in a space of 120 feet by 96 feet, could hardly have shown us more. Some notion of the effect of a *vista* of columns is given by models of the smaller columns at Karnak, and great care has been taken with the hieroglyphics; but, generally, we fail to realise what Egyptian architecture was.

The error would be in considering the Sydenham courts as embodiments of whole styles, whilst they are merely, and, we believe, are not put forth as more than, consistent places of location for works of art. In the Greek Court, the Ionic order is as much absent as though a certain writer had been omnipotent there. We have no fault to find with these short-comings; they were unavoidable; we only wish to aid what may yet become a powerful engine of popular education in art, by preventing popular misconceptions.

A full impression of the character of Egyptian architecture is not to be given without an attentive study of the plans of the temples. Of the chief intention of the architects, namely, that of presenting fine effects of perspective, and an imposing mass to the procession advancing along the *dromos*, or way, little idea is given. The court of a temple, the vista before mentioned, ranged transversely with what should be the procession path, and in the north transept, the avenue of sphinxes leading up to the colossal figures, are some scattered members which the visitor must combine for himself, and acquire therefrom the real character of an Egyptian building. The propylæum, with its pyramidal masses, its obelisks, and colossal figures, is unrepresented, though perhaps the most striking feature in a temple.

The main feature next the nave, is the façade of an inner court, like that at Denderah, but with papyrus and lotus, or palm-branch capitals, bearing an entablature of the usual character. The principal entrance is approached through a short avenue, with couchant lions, four on each side. The winged globes occupy their usual positions over all entrances and central spaces: the dwarf enclosure wall, surmounted with a cornice of asps, is embellished with paintings of the stems and flowers of the lotus and papyrus, and with subjects—generally representing offerings by the monarch to Osiris. The capitals, and ornaments, and *intaglios* are richly painted in red, blue, yellow, and green. Within the court, the principal elevation has eight gigantic figures, wearing the double crown of the sovereigns of Upper and Lower Egypt, and, like all the rest of the architecture and sculpture, highly coloured. Figures so applied would elsewhere be called Persians, or Telamones; but in Egyptian architecture the figure was never applied for the support of an entablature, but was placed in advance of the piers. Within the court are copies of the paintings of the victories of Sesostris, or Rameses the Great. The casts of sculpture from our own museum, from Turin, and elsewhere, at our last visit were not arranged. The Rosetta inscription has of course a place; but here, wants the sharpness of the original stone. Had Dr. Young examined nothing better than the cast, we might have had to wait longer for the meaning of hieroglyphics. We next came to the columns of massive proportions from Karnak, with bulbous shafts, having water-plants painted around the base, and lotus-bud capitals. The shafts are reeded and banded at intervals, and have large plain spaces, enriched with paintings and cartouches. Having passed through these columns, we see, directly opposite, a model of the front of the rock-cut temple at Abou-Simbel, with the four large seated figures, and the numerous smaller sculptures. Two of these figures are those which are placed of the full size, at the end of the north transept. Near the model of the temple is a colonnade, with columns of different designs. There are here nine different variations of the papyrus, lotus flower, or palm-branch order of capitals.

We could not help asking ourselves in examining the beautiful conventionalized adaptations of natural objects, which even the severe forms of Egyptian architecture permit, these questions:—Have we not lamentably disregarded the resources which our gardens, or the sedgy nooks of our own rivers afford? Is there any reason why in this single instance of the capitals of columns, we should put checks upon invention, such as the Greeks did not attempt with all their perception of minute differences, or love of general forms? and have we not here proof of what might long ago have been derived from the study of Egyptian architecture? Is there, indeed, any objection—provided harmony and proportion be attended to as they might be—to the union of a capital of Egyptian origin with the shaft and base and entablature of a classical "order?" It is an error to suppose the ancients avoided such changes,—the Corinthian capital, which it is nearly certain was derived from the Egyptian form, is itself one instance of the reverse. The name "order" has too long induced a popular error as to the real facts, in all the classical styles. But the Egyptians carried the love of variety to a greater extent than we have here shown. Except in certain cases, the columns on the same side of a temple were varied in their capitals. Opposite capitals in a court, or those in corresponding positions elsewhere, were, however, the same—this being supposed to indicate the union of Osiris and Isis. The story of the death of Osiris, murdered by his brother Typhon, and the collecting of pieces of the body by Isis, is an interesting fable. The men of Egypt swore "by him who sleeps at Philæ," whom they dared not name, and the island of his supposed sepulchre became the site of numerous temples. Isis was no less honoured and feared. Her statues bore this inscription:—"*I am all that has been, that shall be, and none among mortals has hitherto taken off my veil.*" At length temples were erected to her sole honour; and in these, uniformity in the capitals is the rule, as at Denderah.

Proceeding with our description:—North of the model of the rock-cut temple of Abou-Simbel, and forming the separation from the Greek division, are two columns and entablature of the late style of the Ptolemies. They have the Isis head, supporting the small shrine, together forming the Denderah capital, under these being placed what might be called a second capital, formed of leaves, with considerable projection. This arrangement is one of those called by Sir J. Gardner Wilkinson, "Composite." If, as he says, the ordinary Isis capital, though chiefly of late date, was used as early as the eighteenth dynasty, it might appear to offer one suggestion towards the origin of the Ionic capital. At the angles of the small shrine, in fact, there are volutes, though reversed from the direction which would seem to be that of "the horns of the altar."

The volutes of the Persepolitan capital, on the contrary, fall outwards; but the connection between Egypt and Persia being matter of history, the germ of the idea of the Ionic capital, like so many of the positive forms of Grecian architecture, would seem to have been in Egypt. In the Persepolitan capital, the conjoined volutes have only to be brought to the horizontal position, to form the true Ionic of Asia Minor.

The Egyptian Courts were originally intended to come second in the series, and a great deal has been said in the newspapers about the interference with the order of chronology. On this, however, as we said the other week, opinions vary. The space originally devoted to the Assyrian Court, next the central transept, or part of it, we have scarcely mentioned. Of that part, one portion is arranged to represent the fluted columned architecture of the tombs of Beni-hassan, with the front of the rock, and the excavated interior, whilst another part is enclosed and divided by columns of the reeded character, with lotus-bud capitals, such as there are also at Beni-hassan, but which are much lighter in proportions than those of Karnak. Here also, the walls and columns are covered with hieroglyphics. The rock-cut front (which, no doubt, is accurately represented) differs greatly in many respects, from the view given in Gwilt's edition of "Chambers's Architecture." The mutules project slightly in comparison, and in place of the thin abacus, we have, above the shaft, the block formed by the interruption of the architrave in the intercolumns, as usual in the Egyptian style. Of other capital there is none—but there is a low plinth as base; of course, not found in the Grecian Doric. Of the entrances from the transept,—one has a porch formed by two columns and an entablature, and another has colossal standing figures. These last are good examples of the character of treatment which obtained in sculpture—the legs scarcely marked from the shapeless block, yet withal, the figure possessing a commanding aspect, and sublimity of expression, not always observed in works displaying the anatomy of limbs. Within the same doorway are seated figures, entirely coloured.

Passing to the north transept, the two colossal seated figures there are the full size of the originals, or about 70 feet in height. The avenue of sphinxes leading from the garden entrance has ten on each side, each sphinx being about 20 feet long and 10 feet in height. Similar sphinxes are placed on granite pedestals, two on each side of the flights of steps leading up from the terrace outside. Three kinds of sphinxes are found in Egyptian architecture,—the Andro-Sphinx, or man-headed; the Krio-Sphinx, or ram-headed; and the Hieraco-Sphinx, or hawk-headed. The form adopted at Sydenham is of the first kind, and is taken from the example preserved in Paris.

There is much in all this elaborate work which, as we said, may tell what could hardly be learned from books. But the whole resources of the Crystal Palace Company could not present the immensity of ancient Thebes, combining in its area structures at wide distances, once thought to be parts of distinct towns. They could not show us the oldest, and yet to this day the most interesting, but the least understood of Egyptian monuments. They could show us nothing of the domestic architecture, though not less interesting than that of temples and palaces. Were ancient manners and habits to be set forth as part of the ethnological series, what would contribute matter so ample and so interesting as the wall-paintings of Egypt? That most beautiful expression of simplicity in invention, the obelisk, is still unrepresented by Cleopatra's Needle. And imagination, aided by the "Epicurean" of Moore, must depict for us the 3,000 chambers of the labyrinth.

An error has, it seems to us, been made in the use of the feature called a screen of columns. The roof was no less required in Egypt than in rainy climates, and in any case we cannot judge of the appearance of buildings without it. This is not merely where the roof is a sloping one; the terrace roof was not only a dormitory at night and a place of exercise when the sun permitted, but was essential to the coolness of the interior and to the fine effect of shade. We would also say, that as the inferences, delineations in the wall-paintings, and positive remains, go to prove the knowledge, if not the general use, of the arch, we would have had the fact set forth somewhere, if only to rebut the repetition of exploded dogmas. Mr. Fergusson has, we see, introduced it in the court under his charge.

It is not difficult to understand how the Egyptian style may have sprung up, and we think the result of an inquiry into this subject should lead us to avoid the error into which writers have sometimes fallen, in ascribing to some one type or another, origin which should be looked for in a combination of influences. How seldom in our own day can we reach the kernel of original thought: how seldom can we trace back to the single stream, and the gushing forth from the native rock. The Greeks, indeed, had a story to relate of every invention. Calling themselves *autochthones*, earth-born of their country, they did not pursue the inquiry into, or they concealed, the origin in the land of Egypt of some of the chief forms which they used. We, however, who have historic evidence of the colonizing of Greece, that the learning of the "wise men" was drawn from the banks of the Nile, that constant communications took place between the two countries, and that many Greeks resided in Egypt, and that some even intermarried with the sovereigns—we should need little more to upset the Grecian fables, even did we not observe certain resemblances in the two styles, and had not many late researches brought to light the positive forms of some of the chief Greek ornaments.

The Egyptian column as we find it, was not moulded from the type of the slender post of a hut (though that character of form was seen, the height of several stories, in the domestic habitations), it was not taken from the Nile plants solely, nor from the forms of excavated habitations. The Egyptian architect observed all, reformed and adapted the materials, and became the *author* of the work.

Since the rock-cut monuments of Egypt are amongst the most curious of the antiquities, it is interesting to show that an order of columns might be the natural result from the pieces left for the support of the mass above. Such examples remain. By taking off the angles of one of these, we get an octagonal pier, and by again taking off the angles, we have sixteen sides, — the number of the flutings of some of the earliest Grecian Doric columns. The theory is, that the surfaces thus formed, became the places for painted representations of the leaves and flowers of the water-plants. These forms were afterwards sculptured, and then, still adapting from nature, the sides of the column took the shape of reeds, the whole pillar, its base, and capital, having the form of the stem, root, and bud of the lotus. The painted ornament round the bases of the columns at Sydenham, will be seen to be exactly like the roots of the water-plants as shown in the British Museum, in some wall pictures, in which all the natural forms, except the human figure, are clearly and skilfully represented.

It would require very little adaptation and combination to produce the Grecian Doric from the polygonal and lotus-bud capitals. The bud supports an abacus, and if we drop this by cutting off part of the bud, we have the abacus and echinus of the Doric. The annulets, also, have their prototype in the binding cords which were imitated in the Egyptian capital. Some, however, have likened the form of capital to a bundle of reeds tied together at the top, and weighted down. That the Greek temple owed much of the form which it ultimately took, to the hut, is possible, without necessarily invalidating this reasoning; and indeed Pausanias records that the oldest temples which he found in Greece were of wood. What we try to show is, that in both countries the architectural forms were derived from several sources. In the tombs at Beni-hassan, the mutules were no doubt suggested by wooden rafters. The ends of poles are imitated in the Lycian tombs. In the same way, notwithstanding the difficulty of the case, as to the ends of the building, and as to the angular triglyph, it seems to us more likely that the Doric triglyphs were suggested by the ends of beams, than by the ornaments on the entablature of Egyptian buildings.

It is to be observed, that the lotus-bud and the polygonal columns of Beni-hassan are of the same date—that is, be it also recollected, in the early and ante-Grecian age of Osirtasen I.

We have spoken of the polygonal column, the lotus-bud capital, and the Isis capital, as making the distinctive features of what are sometimes called orders. We have, however, named other modifications. One form is, that of the lotus-*flower* rather than of the closed bud,—the "bell" of the capital having the same section as the cymatium moulding in later styles. What may be called the palm-branch capitals have the section in form of the over-hanging branch of the palm-tree. Both these varieties were decorated with flowers and leaves. The Isis capital has been mentioned, and one of the kinds called Composite. Occasional use was made also of a pilaster surmounted by a cow's head.

If there are points of resemblance in the main architectural forms of Egypt and Greece, there is even greater resemblance in the details. The zig-zag, of constant occurrence on Greek vases, was with the Egyptians the symbol of water. The original of the Greek fret is found on ceilings in the tombs at Thebes, and was a symbol of deep significance. The wave scroll which beautifully terminates the Choragic monument of Lysicrates, is also found in Egypt; and on the side of a palanquin figured in Sir J. Gardner Wilkinson's work, lotuses of the mystic number seven, growing from the symbol of water—the sign of Aquarius,—take the form of the Greek honeysuckle.

Both brick and stone were used, and stucco was common, and was applied sometimes even to granite. Many rare woods were employed in cabinet work; and when these were beyond the means of persons, painted imitations were not objectionable in the eyes of the Egyptians. We find that with them, glue was used more than 3,000 years ago, and many other materials and many processes of modern times. Glass was blown and used in the time of Osirtasen, long before the date of the discovery, according to Pliny. Nay, one very recent invention seems to have been anticipated, in the introduction of a film of gold between two surfaces of glass. Linen and cotton fabrics, and embroidery, pottery, armour, and furniture were manufactured of great excellence as to durability, and with no slight consideration for beauty of design. The process now adopted in the printing of calicoes seems to have been known. In naval architecture, the accounts show that the ships — built of wood — would compare in dimensions, and surpass in magnificence of decoration, some of the most important of our recent works.

In the representation of the human figure alone, was the evident skill in drawing held in restraint. In the execution of a painting, the wall was divided into squares, and each member of the composition was filled in, in a given way, —the profile and front view being mixed together in the same figure in the peculiar manner, known to our readers, but hardly within our powers of description. Yet so well do the figures tell their story — so much better even than modern drawings with foreshortening and true perspective—that it is said the untutored inhabitants of modern Egypt will recognise what is represented in the tombs, though they cannot understand a modern picture. The principal figure was often of colossal dimensions,—as in the wall paintings of the victories of Sesostris, and in the temple at Abou-Simbel.

It still remains to conjecture how the *intaglios* of cartouches and hieroglyphics were executed. To judge of the sharpness of their work, we must look in the British Museum rather than to the plaster imitations at Sydenham. Possibly, as it has been suggested, these *intaglios* were engraved by means of a drill and emery power. Such a tool worked by a bow, and with a moveable head corresponding with that of the modern centre-bit, was known. But the material of their tools seems involved in difficulty. Iron has been supposed to have been discovered in Greece about B.C. 1406. Was it known in Egypt previously? The question has become more puzzling since Sir J. Gardner

Wilkinson found in the quarries a chisel, not of iron, but of bronze, or rather almost wholly composed of copper. The head had become crushed by repeated blows of the mallet; yet when the chisel was found the point was perfect, though now easily turned.

Had we space, we might say much of the private life of the Egyptians, their respect shown to women, singular amongst ancient and Eastern nations; their love of flowers and music, of their religion and mythology. To the man of science, to the architect, to the archæologist and the metaphysician, a study of this wonderful people is fraught with instruction and interest. How much is there in the fact, that geometry—the science by which we traverse the waters and stretch a measure across ethereal space—was eliminated by them. What would be the state into which our civilization would fall, had we to be deprived of that which has been handed down to us from the Egyptians? As that river which flows for some thousand miles without a tributary stream, and which periodically dispenses fertility to the soil, is apart from rivers; so the people who dwelt on its banks, giants before history was written, yet never progressive since, have still a singularity of existence in the world's history, which all the pictured records they have left have not enabled us to explain. Symbolic as their arts were in everything, it is not alone the immensity of the great pyramid, which makes an Egyptian monument aptly set forth as "the watch-tower of Time, from whose summit, when about to expire, he will take his last look."

THE ENTITY OF THE IONIC ORDER, AND VITALITY OF ALL THE ORDERS.

Among the most remarkable achievements of the genius of form in the ages that are past is the Ionic order; I refer more particularly to its characteristic feature, the voluted capital. By whom it was invented, if individual inventor it had, or by what fortunate circumstance it was first hinted to the architect, it boots us little to inquire: though there is sufficient of the scroll form in nature to lead us to attribute it to her direct suggestion, it is perhaps more reasonable to consider the volute of the Ionians as the joint and gradual offspring of geometrical skill and art-genius—as a creation of science refined and applied by art. The volute, afterwards so finely developed by the Greeks, not only in the Ionic capital, but as the main charm of the Corinthian, was in requisition at a very early period of art, into which it seems to have grown imperceptibly from the human mind like a plant out of the earth. It was in some way used in Nineveh, in Egypt, in India; and, in its classic adaptations, was clung to and retained by the Arabians and other Oriental nations, as well as by every people of modern Europe down to this day; and thus furnished evidence of an instinctive affection for it—of the existence of a chord in the human heart to which such forms appeal. Its noblest development, however, and perfection of application, it received on the banks of the Ilissus, and in the triple temple of the Acropolis, where it assumes a form on which a hundred generations of men have gazed with pleasing wonder, and one wherein all whose hearts could thrill to beauty have recognised a natural grace and genuine artistic feeling. I refer to these examples, because they may be looked upon as the beau ideal of the order, by which, as the nearest approximation to perfection of form, its æsthetic value should be judged, and not by any degenerate example of subsequent times; for, strange to say, no form has in succeeding specimens of it more degenerated than the voluted capital of the second Greek order. In nothing did the Roman and Renaissance architects show their inferiority of taste to the Greeks than in the nonappreciation of these forms, shown by their mean treatment and diminution of the volute, and the singular omission of the festoon-shaped hem in their Ionic works: between their insipid and lifeless volute (a small curl at each end of a straight fillet, so small sometimes as to seem a mere accident) and the flowing and graceful curves of the Erectheum, the distance in artistic rank—in evidence of taste and imaginative power—is indeed infinite.

Those who suspect anything meretricious in the conception of the Ionic capital should be reminded that it was the chief, and sometimes the sole, ornament of the fairest gems of Attic taste; the temples in which it was employed being amongst the most beautiful in composition and design of that remarkable people, whose profound æsthetic science has engaged the research of ages, and works which have been extolled for their surpassing loveliness by the uniform voices of succeeding times. The Ionic was chosen for the great Temple of Diana, at Ephesus, and the sumptuous tomb of Mausolus, and other celebrated monuments of Asia Minor, were of the same order.

It was a favourite of Palladio, Inigo Jones, and others, acknowledged the greatest amongst modern masters; and by them and their successors down to the present day it has been extensively used, as it would probably have been yet more but for the supposed necessity for Corinthian richness and luxuriance, or rather, display of costliness on important works, to which too many eminent men have succumbed.

The Ionic is unable to vie with the luxuriance of nature, like the Corinthian; and it is inferior in expression of columnar purpose, *i.e.* capability of support, to the Doric; but it has artistic qualities that amply redeem these shortcomings: it is the most harmonious link between shaft and architrave that could be conceived—the circular line of shaft differently applied, and a most homogeneous termination to a cylindrical form.

There is something naturally pleasing in a curve of ever-varying motion, wherever seen or however relatively situated, whether in the capital, the console, or the modillion; but in the capitals that grace the Erectheum we have an assemblage of curves that, from whatever point viewed, is altogether unique, and which for harmony has perhaps never been equalled. The delightful combination of unity and variety in the geometrical or logarithmic spiral of its volutes, diversity of curvature and increment regulated by unity of law, joined to the motion and play of curves generally, constitute a total of linear and formal grace that no unprejudiced eye can behold without at least a pleasing interest.

Like its eldest sister, the Ionic disdains "the foreign aid of ornament;" in other words, it is independent of all imitations of natural organization, whether of leaf or flower, and trusts to the beauty that is born of pure form; and as a harmony of form only, its capital is more purely a creation, and therefore a greater triumph of art-power than that of the Corinthian itself.

Than this feature, indeed there is perhaps nothing more interesting to the cultivated eye in the whole range of architecture. There is motion and flow of lines,—but motion so gentle and flow so peaceful, or ordered and regulated by such beautiful and serene law, as to combine the graces of action with the softness of repose.

Qualities, these, by the way, which render it a happy metaphor in the architectural poem it illustrates, and gives it a high value as a material exponent or type of certain moral perfections. While the Corinthian belongs to the passions and the senses, the Ionic may be said to express their silence, and shadow forth the tranquillity of Contemplation and Philosophy; and this suggests its suitableness as a feature of colleges and educational establishments, as well as in public libraries. It was the sepulchral order of the Ionians; and as Le Clerc observes, is suitable for all places dedicated to peace and tranquillity; an opinion evidently coincident with that of the ancients, who significantly employed it in the Temple of Concord, as they did also in shrines consecrated to females; and among the Egyptians it is remarkable that traces of it are particularly observable in those temples dedicated to Isis. But the Ionic expresses another important quality, viz. purity; it is the very soul of chasteness, and is to the Corinthian (adapting Sir Henry Wotton's simile), as the sedate matron to the courtezan.

Some have supposed the Ionic capital to be a representation of elasticity, and as such have charged it with being obscure and inconsistent in constructive meaning; but I do not believe its inventors would have made so great a mistake as the attempt to express in stone a quality which it is adverse to the nature of stone to exhibit. I believe it was not intended to have any constructive meaning—that the volutes were merely a beautiful accessory, and that the abacus which was always distinctly marked and had a natural and obvious use, was the real capital of utility. The Greeks probably wished the Ionic to be a relief from the strong energetic expression of the Doric, and aimed in its design at abstract beauty of form,—a meekly aspiring nobleness and purity.

It is true that the want of facial uniformity in the Ionic capital subjects its application to some limitation; it being compulsory on the architect either to avoid using it in situations, as in prostyle porticoes, where a returning face is required, or to make the capital of the angular column an artistic monstrosity by turning one of its volutes diagonally and bringing two voluted faces into conjunction. But the condition of using the Ionic order only in situations requiring no returning face, may be very cheerfully submitted to, as, fortunately, such situations are tolerably frequent; for besides mono-prostyle porticoes, it is applicable to cyrto-style, or semicular porticoes; to cyclostylar compositions, or circular peristyles generally; and to porticoes in antis, or recessed loggias, which latter suggest the expediency of introducing square pilasters, with anta-caps, in lieu of columns, to the angles of prostyle porticoes exceeding one inter-column in projection from the building.

The difficulty in question is solved in interiors by the possibility of always in such situations resorting with strict propriety to the antæ accompaniment. To interiors the Ionic order is particularly adapted; and there it was frequently used by the ancients in Doric structures. Moreover, it must be granted that the European Greeks acted with their usual wisdom in restricting as they did the employment of the Ionic order to their smaller edifices, a gemlike brilliancy and elegance of line being its most striking attribute.

And this recession of the Ionic column between antæ, in recessed loggias or propylean entrances, while it supersedes the necessity for generating the mutilated form that disfigures the temple of Fortuna Virilis, gives new beauties to the order, beauties it could not otherwise receive: to such treatment it seems peculiarly adapted; the dissimilarity between its front and side faces pointing to that situation as its fitting and legitimate home, wherein it receives a heightened effect by the contrast with the anta-caps, the rectilinear plainness of which communicates to the volutes a more brilliant and gem-like glow than they could otherwise exhibit. In fact, the beauty of the Ionic capital is but half revealed till thus brought into harmonious contrast with the anta-caps, which should therefore be employed to all pilasters placed in connection with Ionic columns, whose effect they enhance, while they secure to the composition generally the fullest variety of intonation.

The one-horned capital, though not without its advocates among judicious writers, is, it cannot be denied, an artistic abortion that must ever be painful to the eye of taste; but there is no necessity for its existence in the world of art, nor even, in order to avoid it, for the injurious modification of a design or abandonment of any necessary arrangement or felicitous idea in respect of plan, the Ionic not being the sole order of architecture.

I have all along, in treating of the Ionic order, regarded its capital as consisting of the two voluted and parallel faces with baluster returns, which make up the celebrated Greek examples. I do so, not that I consider this form as alone defensible: I regard the Scamozian and other four-faced Ionics as valuable inventions, possessing a species of beauty; but these being more closely allied to the Corinthian and to the class called Composite than to the Erectheum and Ilissus Ionic, in which the dissimilarity of front and side is the chief and distinguishing characteristic, I consider the advocate of Ionicism has little or nothing to do with them.

I think it important that this distinction should be made; for though the uniform capitals are beautiful as varieties, especially the concave-

sided example of the inner order of the temple of Apollo at Bassæ, which has a classic chasteness and simplicity that the others so much lack, and useful in meeting the angular difficulty before referred to, yet in them you cannot have that full development of the volute, nor that general simplicity and placid grandeur,—that unaffected dignity and grace which gives the surpassing beauty and expressional value to the Athenian examples. Besides, it is to this facial diversity, as the trait most divergent from the other orders, it is mainly indebted for its place as a distinct order.

My first object in this essay is the vindication of the right of the Ionic to rank among the orders of architecture: I have pleaded only its beauty; but he who lifts any corner of the veil of mistrust from its beauty proportionally forwards this aim, since

"Beauty is its own excuse for being."

I say to rank among the orders; but it really matters not whether we regard Ionicism as inhering on a distinct order, style, or system, or as merely forming a variety of an order or system. That what we call the Ionic order is beautiful architecture, or a beautiful element of architecture, is all we need in reality to prove. Perhaps, strictly speaking, there is but one real order,* and the rest are variations in proportions of height to diameter, in which graceful ornaments in the shape of volutes or foliage, or both, are added to the forms of necessity. If so, the Grecian Doric, whose general form is that dictated by utility, the form with which an engineer would prop a warehouse or support a railway bridge, is the column or order in its nude essential grandeur, or, if conceived of as dressed, in its working dress; and the other two are its more elegant æsthetic offspring, the Corinthian capital being only an elongation and foliation of the Doric echinus,—the Ionic its conversion into the convolutions of the volute; while the abacus, the Doric form of which is too essential to all columns to admit of much modification, is preserved in both. Perhaps the Ionians had no idea of inventing a new order, or supposed they had done more than reproduced the old one in a gayer dress.

But supposing this to be the true theory, and that what we call orders are to be regarded only as variations,—not genera, but species, they are not the less valuable, and we can suffer none to be extinguished that are really beautiful, though increase among the varieties of the orders may be had beyond three or five or any number or degree now dreamt of. Premiums have been offered for a new order, as if that were the great desideratum; but a man may open a fresh vein in British architecture, and strike a new chord in the human heart by the combined beauty and originality of his conceptions, without inventing what is generally understood by a new order. Besides producing new and original general designs and compositions, he may be constantly delighting the world with new varieties of capitals and other features of his ordinance; his mind, like the vital principle in nature, may be constantly and everywhere breaking out into new forms, and need not run into old channels. But so far as capital is concerned, many distinct varieties have been already produced: the Gothic and Byzantine builders invented a host of them, many of which are very beautiful. This inventiveness of the Gothic builders, and which we must regret had not to a greater extent characterized the Renaissance architects, we may, in recovering lost ground for the art in the first place, avail ourselves of, by taking possession of their inventions; for I believe that much of the variety, and beauty, and life we admire in the Lombardic and Byzantine capitals, and that attached to those of the Gothic, might have been retained in classic architecture. I have frequently been charmed with the classic chasteness of many of these capitals, the immense variety of which show the vitality and plasticity of the architecture of the ancients, and what it might and would have been, had the same singleness of aim, enthusiasm, and natural freedom of mind been applied to it. Few of them are essentially or exclusively Gothic; in many the classic chasteness of character is scarcely touched; and so little is the departure from antique purity of form, that they might be adopted at once into the Greek and Roman families; and if, instead of labouring at the production of a new order on the one hand, or reducing what we have to stereotyped formulæ on the other, our architects had been employed in seeking hints for varieties from existing works in other styles—in ungothicizing Gothic, and bringing back Romanesque to its original simplicity, much better would have been the result. The very worst of these may at least touch the imprisoned springs of inventive power, and furnish the imagination of the designer, who should scorn no source for motives of thought, with materials for new images. But the architect who is a true magician of the beautiful, would take a still wider range in search of inspiration: he would evoke new orders from among the "dark red colonnades of the Nile," and even avail himself of the fanciful vigour of Indians and other Orientals, however wayward in feeling, or humble in artistic skill, till every ancient and modern style contributed something of grace or of energy to the visions of beauty he would eternize in stone. In Egyptian remains, which present infinite variety of capitals, many of them elegant in design and rich in decoration, is a grand suggestive source, in which sleep the germs of many beautiful classic varieties. It has often forcibly struck me how slight the modification that would render some Egyptian capitals into beautiful classic ones, worthy and fit associates of the chastest Greek or Roman examples: there are some foliaged capitals so beautiful in their composition, that by only changing the character of the leaves, would harmonize with those of the Lysicrates monument itself; and with respect to many another, simplify it—slightly rectify its proportions—suppress some overgrown member, and what classic beauty would stand revealed?—beauty that but for the stern symbolism of their overlaying superstitions, its designers never could have missed as they did. If in this spirit the Greco-Romano architecture had been practised,—if in its pursuit we had yielded to our instincts, which have been resisted in architecture more than in any other human pursuit, we should have had no complaints of architecture being behind the age—a laggard in the march of intellect. By the dictum of Wren, which has not been taken with sufficient qualification and reserve, that the pursuit of architecture is now rather the study of classic antiquity than the exercise of fancy, classic antiquity has been somewhat slandered: the three orders are not to be considered as patterns, mere stereotyped formulæ, or ready-made members to be incorporated in our designs, as the Constantinal builders used the executed columns and other fragments in their erections. Their use is to inspire: the best of them are but so many methods from which we may learn much by analogy; from which, by imitating different of their qualities according to the idea to be expressed, new designs may be engendered. There is no model for each order. I view the orders not as forms of definite shape, but as spirits of design, which by transmigration, as it were, into a thousand different bodies, hereafter to be organised by art, become incentives of thought and emotion to the latest times.

We talk of established forms, but many forms we have regarded as such are not established, nor were ever intended to be established. They are simply designs—illustrations of art—and we are to look upon them only as individual impressions, interpretations, and utterings of the truths of nature. So that the practice of literally copying the Parthenon Doric or Jupiter Stator Corinthian even into compositions otherwise original is not a necessity caused by any limitation in the architecture itself, but is simply an exhibition of dulness or idleness on the part of the architect, for which the practice of the ancients furnishes no precedent; for all their buildings are dissimilar, no two being alike either in proportions or details. The immense variety of capitals and other members found among their edifices, ruins, and preserved fragments, shows that they did not consider any preceding examples in the light o patterns, but that, by throwing themselves o their own mental resources, they were enable to make new designs for every building the erected; designs in the full sense of the wor new, in which no lifeless parts had place, bu where all, to the smallest detail, glowed wit the pure light of thought.

If this was once done, it can be done now and we may follow the ancients as they followe each other, and breathe into the elements the have left us a second life of truth and beauty.

Even those forms, as modillions and mutule which may be looked upon as metaphors stand ing ready-made in the language of classic ar we have no need literally to appropriate to ou purpose, for they admit of some variation i form and proportion; and though the thought of others, they may, if we feel their truth, com forth from our hands as new coined. A maste hand, moreover, can give a freshness to ol forms by its mode of treatment and application and find scope for refinement of thought an for tenderness and delicacy of feeling, and whil these are exercised who can say what germs o life and beauty, now supposed dead in ancien art, may not again unfold their charms to th day?*

S. H.

* Mr Ruskin tells us that all capitals might be divided into concave and convex, and thus ranged into two orders. It is true that their constituent curves could be so divided; but if from the collect details of the world we were to separate the convex, would not other than concave ones remain—a kind more beautiful than either, viz. the ogee? This figure many of the Egyptian capitals are in actual or general contour.—S. H.

COMPETITION FOR BRIGHTON WORK HOUSE AND INDUSTRIAL SCHOOLS.

As an instance of the manner in which com petitions are managed on the part of the judge we beg to enclose you the correspondenc which has passed between the Clerk of th Brighton Board of Guardians and ourselves.

The instructions to competitors strictly limite the sum to be expended on the workhouse t 14,000*l.* and that on the schools to 5,000 The lowest tenders, even after the alteration authorised by the board, amount respectively t 25,000*l.* for the workhouse, and 13,287*l.* fo the schools.

Up to this date (May 15th), we have not hear from Mr. Somers Clarke, and as Mr. Becher last letter was dated 1st May, we have no cour left but to make the matter known. If all suc transactions were exposed, it might tend to pu a stop to the system, but we leave comment t your readers. Lawford and Heneker.

The correspondence is to the following effect:— On March 7th, Mr. Becher, the clerk to the gua dians, informed Messrs. L. & H. that the amount second premium, 20*l.* awarded to them, had be paid into Messrs. Jones Lloyd and Co.'s bank.

To this the architects replied, that "Before accep ing it, we feel it our duty to acquaint you that i formation has reached us from a quarter on which w cannot but place considerable reliance, that in th awarding of your first premiums for both workhou and schools, you have selected designs which we not in accordance with your printed instruction inasmuch as they exceeded in cost the amoun specified as the limits to which you could go, and th so palpably, that even before issuing advertisemen for tenders for the works, and thereby testing th accuracy of the architect's estimates, you have auth rised the alteration of these selected designs, therel giving a preference over the designs of those who h complied with your instructions. You will natural see, gentlemen, that if this statement be true, strikes at once at the root of that honourable pri ciple which ought to be the mainspring of action these transactions. It is upon the faith of the hono of the judges that architects are induced to compet and the departure from one of the main principles the 'instructions,' that principle which brings in play the skill of the architect to provide the greate amount of accommodation at the smallest cost, is serious an evil, that if generally known and act upon, it will destroy all competition and prevent a honourable man from devoting his time and talen when he may be assured that time and talent w alike be thrown away;" and they said they waited hear that there was no foundation for such a repor

Mr. Becher answered, that the board of guardia had "selected what in their opinion were consider the best designs for the contemplated workhouse a industrial schools, and awarded the premiums accor ingly."

The architects, of course, said this was no rep and again (17th March) asked for an answer to th question. Obtaining no answer, on the 5th Ap they wrote again, and then on the 20th. On t 21st Mr. Becher acknowledged these letters, a

* To be continued.

said, "The only reply I can give to them is to refer you to my first communication."

On the 29th Messrs. L. and H. wrote, "We are under the necessity of declining to accept the second premium, awarded to us for our design for the Industrial Schools, as we feel that the acceptance of a premium, under such conditions, would be to sanction a course of proceeding contrary alike to honour and integrity, and detrimental to the true interests of the profession to which we have the honour to belong;" and in conclusion they stated their intention to publish the correspondence.

On the 1st May Mr. Becher wrote to say, that the letters had been referred to Mr. Somers Clarke, solicitor to the board of guardians, who would explain the matters referred to, as soon as he was relieved from a domestic sorrow: and here the matter rests.

We have not the instructions and stipulations before us, but it seems a flagrant case of injustice, calling for a strict inquiry.

TUCKER AND REEVES'S CLOSED KEY-HOLE LOCK.

WE have been trying a course of house-breaking; that is, not exactly house-breaking, but lock-picking, the first step towards it, and have completely astonished ourselves with the results. As Hamlet says, it is "as easy as lying," for a man with a tender conscience we should say, easier. No matter whose the lock, with the instruction of a rival inventor you may, to use the words of the same philosophical mad prince, their

> "Quietus make
> With a bare *bodkin*."

Out of this "splitting" upon one another, on the part of lock-makers, it is to be hoped that a thoroughly secure fastening will ultimately come: simply destroying confidence in what we have, without furnishing an efficient substitute, is not the proper office of a friend or a picklock. Now, whether or not the lock named at the head of these remarks, invented by Mr. Tucker, is thoroughly secure against all insidious Hobbses we will not pretend to say, but certainly it does seem to us that one of the reasons why ordinary "combination locks" can be picked does not exist in this case, because the key-hole (by a peculiar arrangement) is completely closed or covered over during the whole time the bolt is being drawn back, and while the wards and the opposing piece are in contact with or passing each other. The action of the wards or slides is from front to back, as in a Bramah lock, but, unlike locks of that description, the slides, instead of being centrically in the revolving slide-box or drum, are contained in an eccentric chamber in it; the only access to them being through a grated or gridiron key-hole, which is attached to and revolves with the drum. In some other locks, again, the opposing plate is so formed that the slides are always in contact with it; but in the present lock, that plate is so constructed and disposed that the slides cannot be brought into contact with it, until the drum which contains them is turned so far round as to carry the grated key-hole completely behind the front plate of the lock, when communication with the combination slides is a mechanical impossibility.

When we take to locking up (what a sad thing it is that it should be necessary), we shall certainly try Mr. Tucker.

VACANT LAND NEAR ST. PAUL'S.

A DEPUTATION from the committee appointed at the Institute of British Architects, attended the Improvement Committee of the Corporation on Monday, by appointment on this very important subject, when Mr. T. H. Hall (the Chairman of the Improvement Committee) said the question was an entirely open one, and that the City had not taken any steps either to let or build upon the land.

Mr. Tite, on the part of the deputation, explained the part the architects had taken. He said they had had considerable public agitation of the question, and deemed it their first duty to submit the matter to the Improvement Committee; that Sir Christopher Wren's idea of having the cathedral surrounded by a large open area had been defeated; but that circumstances had now occurred which rendered that possible which was formerly believed to be impossible; that the leaving this space open would give air and increased accommodation, so much required in a public point of view; and that it would furnish the most splendid view of one of the finest works of architecture in the world. He urged the adoption of this suggestion as a most graceful conclusion to important and well-executed public duties, in which the committee, it appeared, were likely soon to be superseded.

Mr. Hardwick read a letter from Lord John Russell, expressing his lordship's entire concurrence in the objects of the deputation. He advocated the improvement, and showed that Dance and Mylne had in vain laboured in the same cause, that the south-east view of the cathedral was the most important, because of the exquisite light and shadow, and the present opportunity, if once lost, could never be regained.

Mr. Sidney Smirke spoke of the artistic value of the opening, and Mr. Masterman, Sir James Duke, Professor Donaldson, Mr. Penrose, and others followed.

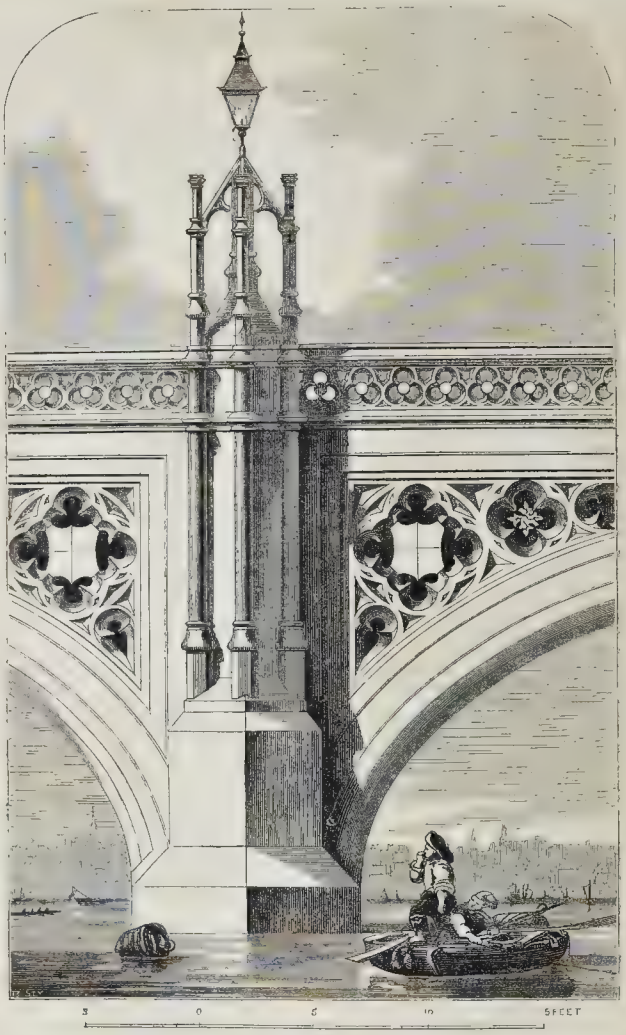
The Chairman stated that the Improvement Committee were most anxious to listen to all the arguments that had been urged, but that, as trustees, they must proceed cautiously; that they had already sanctioned a branch street to Blackfriars, and the plan for raising Holborn-hill; and, with these great schemes before them, the loss of 60,000*l.* was an important item; that twopenny and threepenny rates for improvements were talked of, but that 60,000*l.* would require the whole of a shilling rate on a very large district to replace; that the committee felt the artistic question very strongly, and that they had resolved to have all the hoards removed, in order to give the committee and the public the best opportunity of judging of the probable effect of giving up the whole or a part only of the area in question.

Intimation has since been received "that New Cannon-street will be opened into St. Paul's Churchyard on Monday next, at one o'clock precisely, when the hoarding round the vacant ground between the new street and the Churchyard will be removed."

HEALTHY SCHOOL BUILDINGS AND EFFICIENT FITTINGS.

THE Educational Exhibition of the Society of Arts, which is intended to be opened at the end of next month, at St. Martin's Hall, deserves every attention. Conceived in a liberal and no sectarian spirit, it has already received encouragement and assurances of support from all classes—as a list of the numerous committee for promoting the Exhibition amply testifies. It is proposed to bring together all the various appliances used for imparting instruction and facilitating the acquisition of the different branches of learning, in elementary and technical or trade schools. Thus there will be books of all kinds; maps and atlases; prints and diagrams; apparatus for the teaching of the practical sciences; collections of objects for imparting a knowledge of natural history in its many departments; appliances for facilitating the teaching of choral singing and instrumental music; drawing materials, mathematical instruments, and specimens of apparatus of even the simplest and most humble kind, down even to pens, slate-pencils and inkstands, as these, it is believed, form a large item in the expenditure of the poorer class of schools, and may yet be as much capable of improvement as any other articles employed therein.

Our chief reason, however, for alluding to this exhibition is, that not only is it desired to represent the actual means of instruction, but it is also wished to obtain information relative to school buildings, their fittings, and furniture. Thus plans, models, drawings, photographs, and descriptions of complete sets or portions of buildings, with their appurtenances, for educational purposes, however designated, are asked for, and particularly the modes of lighting, warming, ventilating, and draining such buildings. Among what are considered desiderata, are the following:—Moveable partitions, materials for and means of suspending curtains, means of suspending diagrams, lining for walls, flooring for play-grounds, means for preventing echo, improved and inexpensive stoves, &c. The Committee of Council on Education in their "Memorandum respecting the organisation of schools in paralleled groups of benches and desks," state that the best form for a school-room is an oblong, with groups of desks arranged along one of the walls, so as to form separate classes; each group being divided from the adjacent group or groups by an alley, in which a light curtain can be drawn forward or back; and no group containing more than three rows of benches and desks. The best width for a school-room, intended to accommodate any number of children between 48 and 144, is considered to be from 16 feet to 18 feet. This allows sufficient depth for the three rows of desks and benches along *one* wall, and space for the teachers to stand before the class. When a greater number of children has to be accommodated, the L shape is recommended in preference to increasing the width so as to get groups of desks and benches along *each* wall. The Committee of Council do not recommend that the benches and desks should be immovably fixed to the floor in any schools; but think they should be so constructed as to be easily removed, though not readily shaken or pushed out of place. The desks should be either quite flat or *very slightly* inclined, without any raised ledge in front. A large gallery for the simultaneous instruction of two or more classes should also be provided, if possible in a separate room.



We understand that the counsel and assistance of the Royal Institute of British Architects and of the Institution of Civil Engineers have been sought in this department of the proposed exhibition, and it is not too much to expect that from the individuals composing those bodies, if not from the corporate bodies themselves, that most important matter, a healthy school, with all the necessary appliances for promoting the physical comfort and development of our youth, may be obtained with the utmost economy.

BOWDEN'S ORNAMENTAL GLASS.

WE have seen some specimens of what the manufacturer calls "Bowden's Brilliant cut ornamental Glass," which promises to be a useful auxiliary in house decoration. The colour on the surface of the glass is ground away in patterns, and the effect is very sparkling and brilliant. At present it seems to be confined to borders and corners, but the process can doubtless be applied to whole squares. The glass is specially intended for staircase-windows, hall-doors, &c., and has, as we before said, a very pretty effect. The works are in Bristol.

"BERLIN" IN LEICESTER-SQUARE.

MR. BURFORD'S View of Berlin, a city which has more modern architectural works, and fewer old ones, than most places of similar extent, is taken from the top of the cathedral, and shows in the foreground around,—the Royal Palace, with the *Unter den Linden*, terminated by the Brandenburg Gate, the Lust Garten, the Arsenal, and the Museum, in the new town, and the Gymnasium, the *Hôtel de Saxe*, the Military Academy, &c. in the old town, with the river Spree, sullen and thick, which separates the two. The Museum (by Schinkel), with its long Ionic colonnade and fresco decorations beneath, is effectively painted, but the columns look out of upright: the perspective of the Arsenal, too, is unpleasant; and the spire of St. Nicholas's Church, seen from one part of the gallery, is tumbling down. It is, nevertheless, a charming picture, and should be visited by all our readers. The Spree is painted,—as if the artist delighted in such things,—*conamore*: and the Royal Palace, an immense building, the shadow of the cathedral on the Lust Garten, and the old Exchange, close by Frederick's Bridge, are other points which will attract the eye of the observant visitor. The new museum, designed by August Stüler, does not come into the picture. It is close to the old museum, and connected with it by a covered bridge over a street. The prevalence of the Ionic order in Berlin is a peculiarity; the new Theatre, the Opera House, the Museum, and a host of smaller buildings display it.

THE PROPOSED WESTMINSTER-BRIDGE: PIER OF CENTRE ARCH.

THE PROPOSED WESTMINSTER BRIDGE.

We are glad to be able to satisfy public curiosity by publishing a view of the proposed iron bridge at Westminster, about to be constructed under the direction of Mr. Thomas Page, engineer. We give also a representation of one of the piers of the centre arch, on a larger scale, so that the details may be more clearly seen. The general view shows the bridge at low-water; the enlarged view at high-water. The bridge is Gothic in design, to accord with the Houses of Parliament, and consists of seven openings. The first arch on each side is 95 feet in span, with a rise of 16 feet from Trinity datum; the second, 105 feet, with rise of 17 feet 6 inches; the third, 115 feet 3 inches, with rise of 19 feet; and the fourth, or centre arch, is 121 feet in span, with a rise of 20 feet. The low-water line is 18 feet below Trinity datum. On the Surrey side there are also two small land-arches. Including these, the whole length of the bridge may be called 914 feet. The width of the bridge will be 85 feet, including the parapet on each side.

In the construction of the foundations the engineer proposes to avoid the use of caissons. Screw piles will be driven at intervals of 5 feet from centre to centre, to form the outer line of each pier; iron sheathing will be introduced between these to make an inclosure, and the loose ground is then to be dredged out from within it. Timber piles are then to be driven in over the area so enclosed at intervals of 3 feet one way and 4 feet the other from centre to centre, and concrete will be filled in between them. On the top will be placed two layers of 6-inch landings and granite slabs, and on these will be built the pier, rising 2 feet above Trinity datum, to receive the iron superstructure. The headway in centre opening, 20 feet, will be about 5 feet less than in centre opening of the present bridge, and the roadway, nearly level, will be 10 feet lower. The new bridge will occupy some of the site of the old bridge, and as it is proposed to use the latter during the construction of the new bridge, part of the width of the latter will be put up first, and this will be made fit for temporary use before the old construction is taken away and the remainder of the new work put up.

Our readers will remember that the tenders varied from 305,000*l.* to 201,000*l.* for which sum the bridge is to be built by Messrs. Mare. The contract for the supply of all the granite required has been taken by the Cheesewring Company.

We content ourselves with describing the structure, and placing correct information before our readers. It is necessary, however, we should say, much surprise is expressed that arches of larger span have not been adopted.

Finch-lane, City.—A correspondent insists that "the presence of the district surveyor is immediately needed in the neighbourhood of Finch-lane, Cornhill, the locality being in a most dangerous state." We have no doubt it is properly looked after.

THE PROPOSED WESTMINSTER BRIDGE.—Mr. Thomas Page, Engineer.

THE CUTLER STOVE.

In the paper read by Dr. Arnott before the Society of Arts, as reported in your pages, it was stated "that the apparatus for lifting the coal in stoves of Mr. Cutler's invention was complicated, and liable to get out of order;" but it will on the slightest examination be found to be the very contrary, being simple, strong, and powerful. It was also stated "that Mr. Cutler was not aware that others were also engaged in the same pursuit, and took out a patent," &c. But the fact was otherwise, and it was not until some time *after* the publication of my patent, when it had attracted much of the public attention, that a great variety of expedients, as appears to be the case at present, were tried to effect the same purpose, but without success, and this ultimately drove my opponents to the expedient of subscribing largely to obtain a writ of *scire facias*, in the hope of discovering some legal flaw in the specification; and in this they certainly succeeded, although with difficulty.

For the cause of truth, I trust that you will favour me with this insertion in your next publication.

John Cutler.

PROVINCIAL NEWS.

Boston.—The parochial authorities are very properly cautioned by the *Lincolnshire Chronicle* against longer allowing the tower of the church here to be without a lightning conductor, especially as a considerable quantity of metal, in form of ties and bars, has, it is remarked, been introduced into the tower since the erection of the groined roof. We hope there will be no occasion in course of coming thunder-storms to reflect on the authorities for neglect of this precaution.

Stamford.—The Burial Board have received and decided upon tenders for the erection of the chapels, lodge, hearse-house, &c. according to the plans and specifications furnished by Mr. Ed. Browning, architect. The following tenders were received:—Mr. Moses Peal, 1,080*l.*; Messrs. Richardson and Son and Mr. Robert Tinkler, 953*l.*; Mr. Hy. Bradshaw, 1,039*l.*; Mr. Jeffs and Messrs. Gilbert and Son, 1,080*l.* Only one tender was received for the erection of the boundary-wall,—from Mr. Peal, at 3s. 6d. per square yard, and 8d. per yard for the coping. Mr. Peal, however, subsequently withdrew this tender.—For the chapels, &c. the tender of Messrs. Richardson and Tinkler was accepted. —Mr. C. Richardson said the works would be commenced first week in June, and completed by 1st December next. The erection of the boundary-wall was left for consideration at a future meeting. The appropriation of only one-fourth of the ground for Dissenters was objected to.

Ridgmount.—The foundation-stone of a new church at Ridgmount, Bedfordshire, was laid on 25th ult. by the Duchess of Bedford.

Woodstock (Oxen).—Industrial schools are in course of erection here, consisting of boys', girls', and infants' schools, and class-rooms. The buildings are of stone, axed face, and plain dressings,—the stone given by the Duke of Marlborough. The roofs to be open framed, and stained in front at the end of infants' school, and over centre entrance-porch a bell turret. The plans were furnished by Mr. Teulon; the contract was taken by Mr. H. Quarterman, of Oxford, builder.

Dudley.—We are glad to observe that strenuous measures are now being taken to bring this town to something like a healthy state. Not less than fifty tons of refuse nightly, it seems, are being removed, ere the hot weather approach; and much need there is for such measures, for we observe from a report just made to the Board of Health by its health officer, that while the average age of the inhabitants of healthy districts is forty years, and even of those of London and Bristol, thirty; the average age of the Dudley people for the last five spring quarters is only sixteen! This is really dreadful. Here is a slow insidious plague, already cutting off the inhabitants by wholesale. What are we to expect should cholera still further aggravate and intensify such a state of things as this? The want of water among the poor of the town is a crying evil which ought to be forthwith looked to: surely some ready way of remedying this vital defect may be thought of and acted on.

Gornal Wood.—On Monday in last week the ceremony of laying the corner-stone of a new chapel for the Methodist New Connection, was performed by Miss Roberts, of Cooper's Bank. The old chapel, erected only thirty years since, was sadly torn to pieces by the mines, so as to become at last dangerous to assemble therein. The new chapel is to accommodate 550, chiefly in pews, having three galleries, and a large *platform* over the communion, in a segmental-shaped apsis, flanked by two arched recesses. The architect is Mr. Wigginton, of Dudley, and the builders are Messrs. Hinton and Meredith, of Pensnett.

Gloucester.—The proposed Working Man's Institute is to be carried out on a creditable scale, and will secure great advantages to the labouring classes of this city. The site has been fixed upon, and considerable support insured. A plan of the building was lately produced before the committee, and which it is proposed to erect on a portion of the Gloucester and Berkeley Canal Company's property opposite the Infirmary, having a frontage of 32 feet in Southgate-street, and running back to the Docks, the whole forming an area of 124 by 32 feet. The building will comprise a dwelling-house complete, fronting Southgate-street, containing on the ground floor, a large kitchen and room for preparing and serving coffee, &c.; and up-stairs, a sitting-room, closet, and two bed-rooms, and other conveniences for the person in charge of the building; a coffee-room, 25 by 20 feet, fitted up complete, a reading-room, 16 by 25 feet; a library and lecture room, 60 by 30 feet, for public purposes. Access is to be had upon the payment of one penny; other charges in proportion. The house will be kept open from five in the morning till ten at night, with tea, coffee, and refreshments kept ready. One half-penny a visit will be charged to the reading room and library. Persons taking refreshments to be admitted free. Works from the library will be obtainable at one half-penny per volume, for fourteen days.

Llanishen.—The church near Trelleck, on the old road from Chepstow to Monmouth, and eight miles from the former, has been entirely rebuilt on a different site in the same churchyard, at a cost of 650*l.*, from the designs and under the superintendence of Messrs. Prichard and Seddon, the diocesan architects. It was consecrated by the Lord Bishop of Llandaff on the 9th instant, and consists of a nave 42 feet by 18 feet in the clear, with bell turret over the western end, 55 feet high from the ground, a south porch to the nave and chancel, with vestry attached on the northern side. It accommodates about 150 persons. The walls are of rubble masonry, with the whole of the external and internal quoins and other dressings of free-stone, partly Combe Down and partly native. The roofs, which are covered with Brosely tiles, are of Memel timber, having principals with curved braces springing from stone corbels. The open seating, pulpit, and desk are of Memel, stained and varnished. The church is in the early geometrical Gothic style.

Eaton Hall.—The Marquis of Westminster's well-known mansion, Eaton Hall, which has for several years been undergoing alterations and improvements, will be re-opened, for the inspection of visitors, on 5th June next. It may be seen this summer, according to the *Chester Chronicle*, in June, July, and August, on Mondays, Tuesdays, and Wednesdays, between ten and four, by separate tickets, for house or gardens, to be procured in Chester at the Royal and Albion Hotels, or of Messrs. Prichard, Roberts, and Co., booksellers, Bridge-street Row; at Pulford, from the master of the school; and at Aldford, from the landlord of the Talbot Inn. Foreigners and travellers will be admitted also on Thursdays in the same months. Parties who desire to visit the gardens *only*, will be admitted with their tickets by the lodge at Eccleston village.

Birmingham.—The contractors for the restoration of the tower of the old church of St. Martin, Messrs. Branson and Gwyther, lately began to remove the brickwork casing of the tower. The casing of brick, added about 1692, is still mostly in good condition, but the rents here and there visible showed that the precautionary steps now taken ought to have been adopted many years ago. The sandstone was quite friable, and crumbled between the fingers. The four dials have been taken down. They are thick iron plates, eight feet in diameter, exclusive of the minute circle, which is also of iron, and very massive. In the face of the tower fronting the Nelson Monument, are traces of a square dial. A good deal even yet remains to be done in the subscription line, according to the local *Journal*.

Bilston.—The foundation stone of the chapels of the proposed new cemetery for the township of Bilston, was laid publicly on Tuesday in last week. The site is about a quarter of a mile on the road to Wolverhampton. It comprises about nine acres to be enclosed by a boundary wall 8 feet high. The ground will be about equally divided for members of the Church of England and Dissenters. The chapels will be connected by a passage-way common to both, that in connection with the Church of England being on the east and west, while the Dissenters' will be on the north and south. The interiors will be of equal extent, and fitted up similarly. The building will be in the Early English style, details simple—tresses dividing the sides into four bays, the interior being lit by coupled trefoil-headed windows. The tower dividing the two chapels will rise to a height of 70 feet. The architects are Messrs. Bidlake and Lovatt, of Wolverhampton. The contractors, Messrs. Burkitt and Nelson, likewise of Wolverhampton, have engaged to have the chapels, and other buildings finished by 5th October.

Helpringham.—On Friday in last week, the church here was struck by lightning. One of the pinnacles fell, almost entirely demolishing the roof. Several of the stones—some weighing upwards of 1 cwt.—were projected across the road to a distance of 100 feet. At about the same time a fire-ball struck the church in another place, on the south-east, and passed through and out of the building without doing any damage. The visible damage is estimated at about 400*l.* but the whole spire is much injured; it is considerably out of the perpendicular, and will probably, it is thought, have to be taken down.

Nottingham.—The interior of the Theatre Royal here is to be remodelled on plans prepared by Mr. R. Clarke, architect.

Stockport.—The contractors for making the main sewer from the Union Workhouse along Oliver-street, the lower part of Greek-street, and Wellington-road to Spring-bank, have been unable to complete the work for the sum fixed, 478*l.* The cutting is a deep one throughout. As the workmen neared the Infirmary they had to encounter springs and loose clay, which so undermined and baffled their operations, as to incur great expense to prevent them being buried alive. The sums specified by the various parties who tendered for this deep and extensive piece of main sewering varied from 1,100*l.* to 478*l.*

Doncaster.—Tenders were opened on Saturday week for the erection of Cadeby Church, the first stone of which was laid lately by the founder, Sir Joseph Copley. Considerable difference, we hear, existed in the estimates. The choice fell upon Mr. Lee, builder, East Retford. The work is to be proceeded with immediately. The stone is to be taken from the quarries at Sprotbrough.

Bramham.—The old church here, which has for some time been undergoing repairs and enlargement, is likely to be reopened at Whitsuntide. The works are progressing fast. The architects are Messrs. Perkin and Backhouse, of Leeds, and the contractors Mr. John Holmes, builder, Bramham, and Mr. Wilks, glazier, Bramham.

Carlisle.—The sewerage of this City, under the estimates recently accepted by the corporation, will cost somewhere about 23,000*l.* A recommendation brought before the corporation from the Health Committee for the appointment of a resident surveyor, has led to a discussion which shows a considerable difference of opinion on the subject. On the one hand, the recommendation was advocated as economical; on the other, it was condemned as involving un-

necessary outlay, by creating a new office, with duties which had already been undertaken by the present corporation surveyor. Mr Rawlinson seemed to have at first contemplated that Mr. Hogg, the corporation surveyor, would act under his directions. The state of that gentleman's health, however, appears to have induced him to recommend the special, and we presume temporary, appointment of Mr. M'Kie, at a salary of 250*l.* a year, to superintend the sewerage works; and the local *Journal*, which thinks this a very proper appointment, states that Mr. Hogg's time is already fully engaged with other public works, even independently of the question of the state of his health.

Glasgow.—A new crane is about to be erected in this city to lift 70 tons, and which will cost 8,000*l.*

PROCEEDINGS UNDER THE METROPOLITAN BUILDINGS' ACT.

PARTY WALLS.

J. Drew *et anit of* Baker, D.S. In making certain alterations, consisting principally of new shop-fronts to two houses, Nos. 8 and 9, Hampstead-road, both in the same occupation, the builder proceeded to cut away a portion of the party-wall between the fronts, to substitute one substantial timber story-post (in lieu of the wall and story-post on each side), to carry the ends of two brestsummers, the timber of which communicated, and to erect the new shop fronts, the woodwork of which ran through from one house continuously to the other, without any incombustible separation, as required by Schedule E. These proceedings were objected to at the earliest stage by the District Surveyor, and not being amended, they became in due course the subject of inquiry before the official referees. Mr. Baker contended that, notwithstanding the occupation of both houses by one person, the wall between them, having been originally "built in order to be used as a separation of two buildings," still continued and was a "party-wall" according to the definition in Section 2, and that consequently such wall could not be removed, nor could the brestsummers or the woodwork of the shop-fronts be carried through and over the centre line of such party-wall.

On the part of the builder, it was stated that the two buildings now in fact formed but one house, and that the uniting of wooden shop-fronts under such circumstances was not an uncommon occurrence in some districts; at the same time, it was admitted that the other party-walls and the external walls were not of the thickness required for the increased rate of building, on the supposition that the whole formed one house.

The case was heard before the three official referees, who were unanimously of opinion that the integrity of the party-wall must be preserved; and an award has since been issued to that effect, and adding that the cutting away of a portion of the said wall next the street is not an opening within the meaning of the Act; that the ends of the brestsummers and the timber story-post are also contrary to the Act, and likewise the wooden entablature and wooden centre pilaster, both being within 4½ inches of the centre line of such party-wall.

The costs, 2*l.* 5s. 2d. and 1*l.* 1s. to the district surveyor, to be paid by the builder. In justice to the latter, it is but fair to add that (according to our informant), he has simply acted agreeably to the instructions of the surveyor employed to carry out the works.

SLIDING CAISSONS.

At the Institution of Civil Engineers, on the 9th inst. the paper read was "A Description of the Sliding Caisson at her Majesty's Dockyard, Keyham, Devon," by Mr. W. Fairbairn.

The substitution of caissons for the ordinary lock-gates, and their employment for closing the wide entrances of docks, was first suggested, in this country, by General Sir Samuel Bentham; since his time they appear to have been somewhat extensively used, although the objections of occupying a considerable time, in having the water pumped out of them, and it being necessary to float them entirely away from the opening before a vessel could pass, rendered them applicable only for special localities. The great width of opening required for the passage of ships of war induced a rather general use of such caissons in the royal dockyards; and at the new dockyard at Keyham, where it was considered desirable to have the best accommodation for the newest class of large ships, the great breadth of the mouth and the depth of the basin induced the trial of a new form and arrangement of caisson, which should be of such capacity and dimensions as to resist the pressure of the water, effectually close the entrance, and still be so easy of manipulation as to admit vessels of war passing into the dock at any state of the tide.

The Keyham Docks were described as extending along the eastern shore of the Hamoaze, immediately below Morris Town; their construction was commenced in 1844, and they consist principally of two capacious basins, with several entrances, or locks, from the sea; one of these it was thought desirable to construct in such a manner as to have the power of using it, when necessary, for a dry dock; its dimensions were 260 feet long, 80 feet wide, and 43 feet deep; the inner end, next the dock, was closed by a caisson of the ordinary form, and at the outer end, next the channel, the new caisson was tried. It was designed by Mr. W Scamp (of the Admiralty), and was constructed by Mr. Fairbairn.

The form of the caisson was that of a rectangular vessel, 82 feet 6 inches long at the top, 68 feet 6 inches long at the bottom, 42 feet high, and 13 feet 6 inches wide; it was built of wrought-iron plates, varying in thickness from ⅜ths inch at the bottom, to ⅝ths inch at the top, well supported throughout by an inside framework of angle-iron, and gusset-pieces, and by two decks of iron and one of timber for the interior arrangements, but which at the same time imparted great strength to the structure.

The plates were connected by "butt-joints," with covering plates, attached by double and quadruple rows of rivets, and the bottom and ends were clothed with oak timber which bedded upon the cill, and against the jambs, when the caisson was in its place. The internal arrangements of the caisson were such, that when it was required to withdraw it from across the opening of the lock, by merely opening a valve, a sufficient quantity of water escaped from the upper chambers, to allow the body to rise a few inches from the bottom cill, when, instead of, as in the ordinary system, turning it round and floating it away, it was drawn back, by chains, transversely into a channel, or opening in the masonry, at right angles with the lock, leaving an opening of the clear span, and after the passage of the ship, it was drawn across again, and by opening another valve, as much water entered as settled it securely on its bed, or cill. This operation was stated to have occupied only eighteen minutes for the passage of a line-of-battle ship; ten minutes for opening and eight minutes for closing. The total weight of the caisson was shown to be 290 tons: it contained 33 tons of iron ballast, and had an internal capacity for 323 tons of water.

"JERVAIS, THE ARCHITECT."

Your correspondent, "S." (p. 254), writes:—"Malone, in his 'Account of the Life of Sir Joshua Reynolds,' gives a letter from that artist respecting the west window of the Chapel of New College, at Oxford, in which Mr. Jervais is mentioned as the architect employed by the college," adding, "What is known of Jervais (I am afraid no good), and what are his principal works?"

Has not "S." discovered what is vulgarly termed a mare's nest? In the "Account of the Life and Writings of Sir Joshua Reynolds," by Malone, prefixed to "The Works of Sir Joshua Reynolds," in 3 vols. 8vo. 1798, at p. lix. vol. 1, an extract from the letter of Sir Joshua to a Fellow of New College, referred to by "S." is given as follows:—"Leicester Fields, Dec. 27, 1777.—I am extremely glad to hear the society have determined to place all our works together in the west window, to make one complete whole, instead of being distributed in different parts of the chapel. In my conversation with Mr. Jervais about it, he thought it might be possible to change the stonework of the window, so as to make a principal predominant space in the centre, without which it will be difficult to produce a great effect. As Mr. Jervais is now at Oxford, I need add no more. I have already expressed to him how much I wished this alteration might be practicable."

The "New Oxford Guide, by a Gentleman of Oxford, 12mo. seventh edition, corrected and enlarged, 1785," after describing at length the subjects in painted glass in the west window of the ante-chapel at New College, adds, p. 49:—"This piece was begun about seven years ago. Finished cartoons were furnished by Sir Joshua Reynolds, and executed in glass by Mr. Jervais."

The "New Pocket Companion for Oxford," 12mo. 1795, after a similar description of the windows, continues (p. 51), "For this work, which was begun about the year 1776, finished cartoons were furnished by Sir Joshua Reynolds. These were copied by Mr. Jervais, to whose skill the world is indebted for a new style in glass-painting, which in beauty and truth of representation exceeds all that have hitherto been seen as much as the common productions excel the first rude attempts at the art."

This statement has been repeated in subsequent editions of the "Companion," &c. The work is likewise referred to by Dallaway, in "Anecdotes of the Arts in England," 8vo. London, 1800 (pp. 449-451), with high commendation, but the name is printed Jarvis.

As in the letter referred to by "S." and from which an extract is given above, it is not stated that Jervais was the architect employed by the College, and as the name does not appear in any list of architects commonly met with, is it not most probable that Jervais, dubbed by "S." "the architect employed by the College," and of whom he fears "no good is to be heard," will prove to be Jervais, the eminent painter on glass, whose good works are so generally known and appreciated, and whose decease is recorded in the *Gentleman's Magazine* for September, 1799, in the following words?—

"August 29.—At his house, in Windsor, where he had retired from his profession for some years, Mr. Thomas Jervais, an eminent artist. How highly he adorned the art he professed, his works in New College Chapel, Oxford, and St. George's, Windsor, will best prove." G. B.

LUNATIC ASYLUM FOR WESTMORELAND AND CUMBERLAND.

A committee of Justices of Peace for Westmoreland and Cumberland was recently appointed under 8 and 9 Vict. cap. 126, for providing an asylum for lunatics within these counties. Col. McLean was chairman of the committee, and, according to a leader in the *Carlisle Journal*, on him will rest the chief responsibility of their acts. The Lunacy Committee offered a premium of 200*l.* for a plan suitable for their purpose. Thirty or forty competitors sent in their drawings. The committee, as appears from the *Kendal Mercury*, did not call in any competent person to guide them in their choice, but from these plans picked out the three cheapest,—without any regard to the essentials of a good institution,—and from the three cheap plans selected the cheapest, the winner of the premium being Mr. Thomas Worthington, of Manchester, "whose connection as brother with the engineer of the railway company of which Col. McLean is a director, may or may not justify the suspicion that personal influence regulated the choice." An extravagant price, it is added, has been paid for a site most inconveniently situated in a bleak and clayey as well as out-of-the-way district, where, moreover, no water can be got, although 160*l.* have been vainly expended in boring, which has been abandoned, and arrangements made for sending a mile of main piping from the Carlisle Waterworks, to which 50*l.* a year are to be paid for water which ought to have been got upon the spot selected for such a purpose. Several county magistrates, and many others, have signed a memorial to the Home Secretary setting forth these grievances. A correspondent of our own complains, as others have done, of the treatment he received as a competitor in this business, his drawings having been sent back within a week of being sent in, and without the slightest information or acknowledgment in explanation of the why or wherefore.

TO DESTROY VERMIN IN HOUSES.

The right mode of destroying all vermin harbouring in the wainscots or furniture has not been yet given, so as the warm season approaches, when these ephemerides swarm and multiply, the following simple remedy is suggested to prevent a late querist from being flea'd alive, viz.—

Take up your carpets, down your curtains. In a pailful of water (cold), mix well 1 lb. of chloride of lime (having first diluted it into a thin paste in a bowl of water, for facility of mixture), with a mop wet and saturate well the floor, skirtings, and any other woodwork that will not suffer injury, then shut the doors and windows close.

If there should be a suspicion of other tenants in the bedstead, take that down too.

In three or four hours all will have disappeared or perished; but to assure perfect immunity from the plague, it might be well to repeat the lustration a second time, *i.e.* the day or two after.

A house infested with b.'s was completely expurgated on the second process as above, at the cost of only 8d. together with the loss of a mop, burnt by the fluid. The solace gained can be easier imagined than described by Frail Cuticle.

Notices of Books.

Drawing for Schools, containing Expositions of the Method of Teaching Drawing; Explanation of the Practice of Model Drawing, &c. By THOS. TATE. London: Longman, Brown, and Co. 1854.

MR. TATE is not contented with simplifying mathematics, but must lend his aid to make drawing in schools more general; and all who attempt this sensibly have our best wishes. He has here given an explanation of the practice of model drawing after the method of Dupuis; the principles and practice of outline and perspective drawing, together with a number of illustrations and drawing exercises. It is a useful work.

The Drawing-book for little Boys and Girls. By the same Author. Longman and Co.

THIS consists of the drawing exercises given in the last-named work, about 130 geometrical forms and familiar objects, on stiff paper, to be used as loose copies.

The Philosophy of Beards. A Lecture Physiological, Artistic, and Historical. By T. S. GOWING. Ipswich: Haddock. London: Lemare, Paternoster-row.

As we noticed Mr. Gowing's lecture at some length when it was first delivered, we have now merely to say that it is published with some very curious additions and quaint illustrations, including Jupiter, as we know the noble god, Jupiter shaved, and Jupiter collared. Mr. Gowing has ransacked ancient and modern history for facts; has brought learning and acuteness to bear upon the subject; and has produced an essay which will amuse and interest the most determined shaver, as much as those who feel disposed to avail themselves of the protection which nature desires to give them. We can conscientiously recommend it as a literary production, irrespective of its object.

It was on sanitary grounds alone that we set the movement afoot, for the retention of the beard and moustache, and we observe with satisfaction the result amongst those classes to whom the advice was specially directed; as to others we will, with Mr. Gowing, freely allow any one to continue the practice of shaving, who will be content with the same plea as a certain Duke de Brissac, who was often overheard uttering the following soliloquy while adjusting his razor to the proper angle:—"Timoleon de Cosse, God hath made thee a gentleman, and the king hath made thee a duke; it is right and fit, however, that thou shouldst have something to do, therefore thou shalt shave thyself!"

Miscellanea.

THE LOUTH CEMETERY COMPETITION.—We must point attention to another of those oft-recurring iniquities, which committees, boards, and such like associations of men of honour and honesty, do not hesitate to perpetrate as a body, though, as individuals, we do believe that each separate member would indignantly spurn all attempts of private or party influence to induce him so to act as he does not hesitate to do in board or committee. The Louth Burial Board appear to have selected two sets of plans for chapels, and vestries, lodge, &c. for the new cemetery to be formed at Louth, between which to decide in accordance with the relative cost, as shown by the estimates given in. The decision was accordingly come to, and published as one based on the fact that one of these two sets of plans, while the more "elegant" of the two, and otherwise "first-rate," would cost 60*l.* less than the other, which was more simple in its pretensions. So soon, however, as the estimates were published, it appeared that the selected designs were actually estimated by the architects who lodged them to cost a sum which exceeded that of the competitive designs by no less than 110*l.* on 1,080*l.* constituting, together with the 60*l.* said to have been exceeded in the rejected designs, an actual difference of 170*l.* in favour of, instead of against, the latter. The authors of the rejected plans, Messrs. Maughan and Fowler, of Louth, urgently protest against so reckless a mode of damaging them in their business by false representations; and it is not easy to see what vestige of excuse the Burial Board can show for such conduct, granting, of course, the truth of the statement, which we extract from communications in the local papers.

A "MISTAKE" IN THE "TALE" OF BRICKS.—In the Birmingham County Court last week, a case, reported in the local *Journal*, was tried, in which the sum of 9*l.* 9s. for 7,025 bricks, alleged to be short delivered, was sought to be recovered by the plaintiff, who had paid defendant for 40,000, at 26s. a thousand, and 36,000, at 27s. but had found rubble, broken bricks, and void spaces in the place of 7,025 bricks a-wanting. The judge gave the plaintiff a verdict for the whole amount claimed, with costs.

AMERICAN PATENTS.—The following are extracted from a list, in the *Journal of the Franklin Institute of Pennsylvania*, of patents issued in February, 1854:—For an improved Machine for Cutting Laths: Chas. F. Packard, Greenwich, Conn. Claim.—Cutting laths from a log or block by means of the knife or cutter, having a vertical reciprocating motion, and the knives or cutters having a horizontal reciprocating motion, the cutters being arranged and operating substantially as described. For an improvement in applying Colours to Stone: Hiram Tucker, Cambridgeport, assignor to himself and Joseph Storey, Boston, Massachusetts; patented in England, September 24, 1852. Claim.—My invention having special reference to the application of colours to a surface by means of a liquid or water bath, what I claim in the process of marbling, whereby an oil colour (or pigment mixed with a drying oil), when applied to, or spread on the surface of a bath of water, or other suitable liquid, shall have imparted to it the property above mentioned,—is an improvement consisting in employing in such process the gum kauri (or a like substance), combined, as specified, with the drying oil, the same enabling a person, by means of a bath, to apply to a surface of stone, or other material, oil colours, so as to present the natural effects or appearance of any polished stone it may be desired to imitate. For an improvement in Derricks; John B. Holmes, Boston, Massachusetts. Claim.—1st. The combined arrangement of the collar upon the mast, the revolving platform supported upon it, and clamped below it, and the tension rods from said platform to the revolving mast-head cap, in the manner and for the purposes described. 2nd. Pivoting the heel of the derrick boom upon the revolving platform in the locality, substantially such as described; that is, upon that portion of the platform which is beyond the centre of the platform when measuring from the point of suspension of the weight. For an Improvement in Corrugating Metal Plates; Richard Montgomery, City of New York. Claim.—The method described, of forming corrugated metal beams by passing a plate of metal of the proper size through a series of grooves between rolls, and through a series of crimping dies, substantially as set forth.

PLEA FOR ARCHITECTS' ASSISTANTS.—I trust the plea for a weekly half-holiday for all classes will not be lost sight of, and that the request your previous correspondents have preferred may be speedily complied with. Architects' assistants must, if they are of any worth, be men of thought and mental activity: hence any means afforded them of cultivating their intellects by an enlarged acquaintance with the works of nature or the great masters of art, must redound to the benefit of the employer as well as to that of the employed. Our museums, the national library, the galleries of art, and the public gardens here and at Kew, are accessible only to those favoured by having daylight at their command; and should the assistant have conscientious objections to spend the day of rest in country excursions, he is shut out from all opportunity of visiting the architectural relics of past ages, or of holding communion with nature, other than he can obtain by a hurried run through the city or parks after the sun has set, and when his mind is wearied with the toils of a long day. I hope, therefore, as a means of begetting additional kindly sympathies between the architect and his assistant, this boon, so mutually beneficial, will be gracefully and speedily accorded. It would assist the cause if those architects who may first give the half-day would allow their names to appear in your columns, as an incentive and example to their brethren.—A T-SQUARE.

TRAFALGAR-SQUARE.—Will you do me the honour to draw public attention to the neglected state of this square, once "the finest site in Europe?" The column *still* unfinished! the pedestal on the west side of the square *still* unoccupied! the basins leaky! the paving intended to be ornamental much dilapidated! the fountains, instead of being turned on to their proper height, have become small by degrees and beautifully less! and the dolphins, like many of our M.P.'s, deign not, except in one or two instances, to *spout* at all!—a *coup d'œil* is thus presented that must offend every eye of refinement and taste. Whilst addressing you on this subject, I would suggest a design for improving the façade of the National Gallery, by adding steps to the portico; and as that would interfere with the present roadway, a curve in the opposite terrace and road would, I think, give a good effect to the whole.—W. C. S.

ST. MARGARET'S, RICHMOND.—The Conservative Land Society have issued their plan of allotment of St. Margaret's estate on the 7th of June next. The estate, which is about seventy-five acres in extent, is for the present portioned out into 272 building lots for villas; the lots varying in price from 52*l.* 4s. 6d. up to 475*l.* each. It is hoped care will be taken to preserve the natural and artificial beauties of the site. We observe that a considerable portion of the park is to be preserved as a pleasure-ground, with an ornamental sheet of water. A plot of ground has been reserved at the corner of the avenue for the erection of a church. From the plan it would seem to be contemplated to preserve the mansion erected by the Earl of Kilmorey.

STAINED GLASS.—Messrs. Gibbs have just completed the east window (a triplet) in stained glass, for St. Ann's Church, Brookfield, Highgate Rise. The window is given by the donor of the church, Miss Ann Barnett, of Highgate Rise; the style of the glass is geometrical. Bells also have been put up here, the gift of Miss Burdett Coutts. —— Messrs. Wilmshurst and Oliphant have just fixed a memorial stained-glass window, in the south aisle of Sydenham Church, to the memory of the late Captain Price, who was killed in action, at Burmah, in February, 1853, and to the memory of his mother, Charlotte Savory Price. The window is of the perpendicular style, and of four compartments, containing, under canopies, a subject in each opening, viz. the Nativity, Crucifixion, Resurrection, and Ascension.

GAS IN BRAZIL.—A correspondent of the *Daily News*, at Rio de Janeiro, says, that gas works were opened there on 25th March, being the anniversary of the independence of Brazil. The enthusiasm and delight of the people, he says, were beyond description, and "there was not a single drawback to the success of the first illumination of the city; no smoke, no smell or escape, no necessity for 'botching up' before things would answer." The whole population, he adds, are now in a fever to obtain gas in their dwellings.

CAMBRIDGE ARCHITECTURAL SOCIETY.—The first meeting for Easter Term was held on May 10, when various members were elected, and objects of interest presented, after which the Rev. J. Gibson, M.A. Fellow of Jesus College, laid on the table drawings of a wooden porch lately discovered and restored at Willingall, Essex. The drawings were presented by Mr. J. Clarke, the architect, accompanied by an account of the restoration under his superintendence. Mr. Gilson proposed that Mr. Clarke should be elected an honorary member. Mr. G. A. Lowndes, B.A. in seconding the proposition, gave an account of the Churches at Willingall. The secretary announced an intimation of the joint meeting of the Northampton and Lincoln Architectural Societies, to be held at Leicester, on May 17 and 18. Mr. Lowndes expressed a hope that the society would subscribe towards the memorial to be erected in Ely Cathedral, to their late president. Mr. L. M. Rate, B.A. suggested that they should also subscribe for filling the eastern triplet of St. Andrew's with stained glass, to the memory of the late Dr. Mill. The Rev. J. Gibson, M.A. spoke as to the restoration of St. Andrew's; he announced that the second contract, which included the repair of the walls of the church, was almost finished; but that the funds at present in hand would not allow of the committee entering into another for the roof. Mr. G. A. Lowndes, B.A. as secretary to the Archæological Institute for Cambridge, announced the plan of operations proposed for its visit to Cambridge, in July.

ARTISTS' BENEVOLENT FUND.—The anniversary dinner of this excellent institution at the Freemasons' Tavern on the 13th, was presided over by the Earl of Yarborough, who announced in the course of the evening that his collection of pictures was open to public inspection. The proceedings wanted vigour, but the result, a subscription of 332*l.* was very satisfactory. Various toasts, including the Royal Academy, the British Institution, and other societies for the promotion of the arts, the chairman, &c. were proposed and responded to by Mr. Hart, R.A.; Mr. R. H. Solly, F.R.S.; Mr. Godwin, F.R.S.; Mr. Weekes, A.R.A.; and other gentlemen.

LIVERPOOL ARCHITECTURAL SOCIETY.—At the annual meeting closing the present session, held last week, the two annual prizes of the society given to student members were awarded, first, to Mr. Christ. Ellison, and, second, to Mr. James Hastings. The report of the retiring council having been read, the officers for the ensuing year were appointed, Mr. Hay being president, and Messrs. Frank Howard and S. Huggins, vice-presidents. The president, Mr. Verelst, delivered his retiring address, in which he reviewed the progress of art during the past year, which he thought peculiarly gratifying, especially in France, where men of science and art were highly esteemed, and promoted to national honours. He regretted that there was not more of the same sort of feeling in England.

"BUILDINGS ACT AMENDMENT BILL."—In your journal of the 13th inst. a district surveyor (I assume very recently appointed) alludes to me by name. If he will refer to the office of Metropolitan Buildings, in the Adelphi, with which all district surveyors are of course officially connected, the referees, or registrar, can afford him all the information he requires, and permit him to inspect documents from the 17th of March, 1845, to the 2nd of August, 1851, on the subject. One of these, in February, 1849, ought to be in this district surveyor's own office, or that of his predecessor, being a circular for the guidance of all district surveyors as to one branch of my system. This system, he states, he never heard of, which is very possible, although odd, for the documents include evidence before the House of Lords, in 1846 and 1848, as to my patent rights being illegally interfered with by assumed powers, not warranted by the Metropolitan Buildings Act,—a fact admitted by the registrar on the last of the above dates.—DONALD GRANT.

SOCIETY OF ANTIQUARIES, NEWCASTLE-UPON-TYNE.—The May meeting was held on 3rd inst. in the Castle, when various donations were presented, and Mr. W. H. D. Longstaffe read a paper on "The Ensigns of Swinburne and Wodrington," some account of which may be found in the *Gateshead Observer* of last week, and also of the discussion which ensued.

CAMBRIDGE ANTIQUARIAN SOCIETY.—At the meeting of this society, on May 8, the Master of Gonville and Caius College in the chair, it was announced that the society had become possessed of the antiquarian collections of the late Mr. I. Deck. A paper was read, entitled "A Notice of Two Catalogues of a Monastic Library," by the Master of Jesus College. Mr. J. E. B. Mayor, of St. John's College, read some unpublished letters of M. Prior and of R. Askham, extracted from a collection of manuscripts given by Mr. Baker, of St. John's College.

ELECTRO-TELEGRAPHIC PROGRESS: CABLE FOR MEDITERRANEAN TELEGRAPH.—The first portion of the great Mediterranean cable, the largest ever made, and, in point of circumference, also, the largest at present existing, is just completed and ready for shipment. The screw steamer *Persian*, destined to carry it, will receive her singular cargo the moment she arrives from Alexandria, and the subterranean works on the island of Corsica, &c. will be connected to the cable on its being laid down. The cable is about 110 miles in length, and weighs somewhere about 800 tons. It contains six copper wires or conductors for the fluid to traverse, protected by a gutta percha covering, secured in a hempen rope, and finally surrounded with twelve iron wires, of No. 1 gauge. The projector and originator, Mr. J. W. Brett, profiting by experience, has allowed twenty miles for "slack" and "way," and for depths of the ocean. The moment it is laid, London will be in immediate communication with Cagliari through the cable, and about 400 miles of subterranean wire. Extensions to Malta, Turkey, &c. would give us news from the seat of war in an incredibly short space of time.

WARNING TO WORKMEN.—A painter named Hogg was apprehended at Dundee last week, and brought before the magistrates on a charge of deserting his service without giving previous notice. After examining the defender, the justices ordered that he should return and work fourteen days, the term of warning required. His employer declined receiving him back to his employment, and the justices found him liable in mitigated expenses.

NEW RAILWAY BRIDGE AT ROCHESTER.—The East Kent Railway Company, it appears, have entered into a contract with Messrs. Fox and Henderson, for the construction of a new bridge over the Medway in Rochester. It will be commenced as soon as the plans have received the approval of the Admiralty.

GAS PRODUCTS.—In reply to S.'s query as to the means of obviating the evils of gas products given off in combustion, I know of none so effectual as the use of "Moody's Registered Consumer," which not only prevents all smoke, but collects all the sulphuric acid given off whilst burning, at the same time condensing most of the water generated.—R. S.

"A NOISE IN THE HOUSE."—I see that no answer is given to your correspondent of May 6, headed "Noise in the House." If not too late and you approve, I would say first, it seems very evident that the atmospheric air is the *primum mobile* of the annoying effects, the elevated site of his houses, of course purer state of the air, more susceptible of indicating the effects, caused by anything in form of construction or materials used. I have a few queries to start. Has your correspondent used hollow bricks, formed a hollow wall or air shaft, or adopted any novel scheme of ventilation? If these queries are negatived, has he boarded over the internal surface of any basement walls? A very similar case is described in the *Builder* some time last year, the expansion and contraction of the boarding, caused by the air, giving that undulating or vibrating sound.—T. G.

BATH SCHOOL OF ART.—This school was opened on Monday week. The first class commenced was that for artizans and mechanics, of whom more than forty have entered as students. The school-room already contains casts, models of vases, drawings, architectural plans, &c. A ladies' class has been opened, an evening class for the females of the families of mechanics, and a class for gentlemen's children.

BUILDING FOR EXHIBITIONS AT CHELTENHAM.—A building of the ferro-vitreous order of construction has been erected at Cheltenham for its Horticultural and Art Exhibitions. This building is 40 feet in length and is nearly finished. The first exhibition to be held in it will commence on 1st June next and continue till the 21st of same month, ending with floral fêtes on a large scale. Throughout the whole exhibition there will be bands of music in attendance.

THE IRON TRADE.—Notwithstanding the formal decision of the great body of ironmasters at the recent quarterly meetings not to attempt any rise in prices, we observe that endeavours are already being made to force them up 20s. a ton, or at least to induce an upward tendency preparatory to a declaration of some such rise next quarter-day. We were not far wrong, we fear, in anticipating that this new scheme would be tried on in the intervals between the quarterly meetings, as a spur to those whom dire experience must have made slow to move of themselves any more in so perilous a course.

ANTHRACITE FOR STEAM PURPOSES.—The *Great Britain*, by adopting anthracite coal, it is said, will save in the outward passage to Australia, about 30 per cent. in quantity consumed, weight for weight; also more than 250 tons in stowage; and she will require no detention for renewed supply,—a further saving of at least five days in this one passage; equal in all to a saving of 1-12th.

HYDRAULIC POWER IN ST. KATHARINE'S DOCKS.—We have often said that the time would come when much more would be done with hydraulic power than heretofore, and that it would yet come into general use as an aid to commercial operations even on a small scale. Our anticipations are on the way to fulfilment. Workmen are now engaged in laying down pipes along the whole range of quays in St. Katharine's docks, for the purpose of applying this power to the numerous cranes in the warehouses, &c. A new engine-house has been erected on the east side of the entrance bridge in Lower East Smithfield.

STREET NUISANCES: THE REFLECTORS.—We are glad to hear that the City Commissioners of Sewers have determined to enforce the standing orders on the subject of reflectors, namely, "That all reflectors be placed at an altitude of at least eight feet, measured from the pavement to the base of the reflector, and to project not more than 18 inches, and that they remain only during the pleasure of this court; and that no inscription, or sign of any description, will be permitted on any portion of such reflectors." We wish they would at same time "enforce the standing orders"—if there be any, against that still greater, because much more general street nuisance, the sunblinds *before* shop windows, but scarcely *above* them.

LIVERPOOL TIMBER MARKET.—There has been a steady demand for timber during the past week, particularly Quebec pine, elm, and oak. Of the two latter articles the whole stock is now reduced to less than 20,000 feet. Of pine the stock is estimated as moderate, the consumption of the last three months having risen to nearly 800,000 feet; while of that of Dantzic, about one-half held on 1st February has been cleared off. From the United States parcels of pitch pine continued to arrive, all readily sold from the quay at 2s. 1½d. to 2s. 7½d. The demand for this article had been greater than for many years past, and that too in the face of advancing prices. Of Deals one cargo had arrived from St. John, N.B. The consumption of this article during the last three months had been on a large scale, and the deliveries exceeded 15,000 standard.

THAMES TUNNEL.—17,881 passengers passed through in the week ending 13th May, and paid 74*l.* 10s.

COST OF THE PRESTON STRIKE.—This unfortunate strike has terminated. It is said that the total expenditure of all the operatives' committees during the thirty-seven weeks of the struggle amounts to 100,000*l.* and the sacrifice of wages will probably be three or four times that sum. In addition to this, there is the manufacturers' loss of profits and dormant capital? When shall we be wise?

TO CORRESPONDENTS.

"Conveyance of water in drain pipes." It would be unsafe to use drain pipes in the position described: the pressure would be great. With stoneware pipes, each pipe tested and carefully laid, a successful result might be obtained, but there would be risk even then.

NATIONAL PROVIDENT FREEHOLD LAND SOCIETY.—GREAT ARBOR-HILL ESTATE, SLOUGH, Bucks.—The Directors beg to announce that this most desirable FREEHOLD ESTATE, close to the Slough Station, commanding most extensive views of the surrounding country and Windsor Castle, has been purchased for allotments amongst the members. The estate is most eligibly situated for villa residences of a superior class, with a frontage to the high-road from Slough to Windsor, and adjoining the grounds of the late Sir John Herschell, Upton-park. Public meetings will be held at Windsor, on MONDAY, the 22nd, and at the Mechanics' Institution, Slough, on TUESDAY, the 23rd of MAY instant, at SEVEN o'clock in the evening, the Right Hon. Viscount CHEWTON, Chairman of the Society, in the chair. A ballot for rights of choice on the Great Arbor-hill Estate, Slough, and other freehold estates, will take place at the latter meeting, in which ballot all shares previously taken will participate, but shall not any share be drawn the subscription on which shall be in arrear, such share will lose all benefit from that drawing. The freehold estate at Starnes, Middlesex, is now in course of allotment. Eligible building plots, with frontages of 40 feet by a depth of 145 feet, for 50*l.*; frontages of 30 feet, 35*l.* A contract for making the roads, &c. has been accepted, and they will be immediately commenced. Conveyances, free of expense, to the allottees. For shares, prospectuses, rules, plans, and conditions of sale, apply to Mr. WATKINS, Staines; Mr. JOHN CLEAVE, Tangier House, Eton; or to JOHN POPE COX, Secretary. Shares, 50*l.* Monthly payments, 5*s.* 3*d.* per cent. Interest allowed upon all deposits, paid-up shares, and subscriptions six months in advance.

473, New Oxford-street, London; and 80, Cheapside, corner of Bucklersbury.

ASSISTANT SURVEYOR.—The HORNSEY HIGHWAY BOARD wish to engage the services of an ASSISTANT SURVEYOR, competent to the work of making and repairing roads, of taking levels, and planning and laying down works of general drainage. Residence within or immediately adjoining the parish will be required; and it will be the duty of the assistant surveyor to attend all Board meetings, and superintend all ordinary as well as extraordinary works and reparations. The salary will be 100 per annum. Applications and testimonials must be sent in on or before SATURDAY, the 27th of MAY, addressed to the Office of the Board, 17, High street, Highgate, Middlesex. By Order,

TOULMIN SMITH, Chairman of the Board.
A. C. TATHAM, Clerk.

May 17th, 1854.

TO PARENTS AND GUARDIANS.

A LAND-AGENT and SURVEYOR, in an increasing and flourishing town, is willing to take a well-educated and intelligent Youth as a PUPIL. The present is an excellent opportunity, as the advertiser is now engaged on a survey of the town and an extensive surrounding district.—Terms and other particulars may be known on application to W. W. Post-office, Burton-upon-Trent.

CIVIL ENGINEERING.—PUPIL WANTED.—The Borough Surveyor of a large town in the Midland Counties, where extensive sewerage works are now being carried out, has a vacancy for a pupil, who would have an opportunity of obtaining a thorough knowledge of civil engineering, including town drainage, the formation, laying, &c. of streets and roads, general surveying, plain architecture, &c. &c.—Address, S. L. E. Office of "The Builder."

TO ROAD SURVEYORS AND OTHERS.

"WALSALL IMPROVEMENT MARKET ACT, 1848."—WANTED, by the Commissioners under the above Act, a TOWN SURVEYOR, who will be required to devote the whole of his time to the duties of the office. The salary will be 100 a year, with house and office rent-free, and gas in the office and sitting-room, also free. Applications and testimonials to be sent to the Commissioners' Clerk's Office, by or before FOUR o'clock, on MONDAY, the 5th day of JUNE next. Notice will afterwards be given to such applicants as the Commissioners may desire to have a personal interview with. Any candidate canvassing the Commissioners will be disqualified.

SAMUEL WILKINSON, Jun. Commissioners' Clerk.
Walsall, May 17, 1854.

TO BUILDERS' CLERKS.

WANTED, in the country, a PERSON in the above capacity.—Apply, post paid, to D. S. Office of "The Builder," stating age, terms, &c. A person acquainted with drawings would be preferred.

TO BUILDERS' CLERKS.

WANTED, a JUNIOR CLERK, who is acquainted with the general routine of a Builder's Office.—Apply by letter to Mr. WILLIAMS, Stationer, 34, Poland-street, Oxford-street, stating age, where previously employed, and the salary required.

TO BUILDERS' CLERKS.

WANTED, by a Builder at the West-end, a PERSON who has been accustomed to the routine of the Office: he must be able to abstract time and materials with accuracy, write a good hand, and be very quick at figures. Address, stating particulars, A A care of Messrs Gibbons, Oxford-street.

TO FOREMEN OF BRICKLAYERS.

WANTED, a thoroughly experienced active MAN, who has previously filled the above situation, and has had the superintendence of a large number of men.—Address, stating particulars, age, and wages required, B. A. B. Office of "The Builder."

WANTED, a PERSON who has been used to a Builder's Office, and understands the management of house property and building details.—Address, Mr. CARES, Baker, Upper Berkeley-street, Portman-square.

WANTED, as SUPERINTENDENT of a SAW-MILL, a person acquainted with the London trade, and who thoroughly understands timber measurement, &c. None need apply who have not been already engaged in a similar capacity.—Apply by letter, stating reference and last employment, to H. W. No. 4, Tokenhouse-yard, City.

WANTED, immediately, a CLERK of WORKS, to superintend the erection of some works in Wales; one who has experience in Ecclesiastical Building will be preferred. Copies of testimonials only to be enclosed. Address, J. J. Office of "The Builder."

TO BUILDERS AND OTHERS.

WANTED, by a thorough practical Man, a SITUATION as OUT-DOOR FOREMAN or CLERK of WORKS. Is a good draughtsman, writes a good hand, and can produce unexceptionable testimonials from previous engagements.—Address A. Y. 69, St. John-street-road, Islington.

WANTS a SITUATION as CLERK of WORKS or GENERAL FOREMAN, a Man of great practical experience in all branches of the building line. Can prepare working drawings, &c. and have a first-rate reference as to integrity and ability.—Address, A. M. 3, Thornhill-bridge-place, Caledonian-road.

TO BUILDERS, CARPENTERS, AND CABINET-MAKERS.

WANTED, by a Young Man, of experience in the above branches, a JOBBING SITUATION, in town or country; can fix the best of cabinet-work, understands house fixings and general repairs, writes a good hand, and is quick at accounts.—Address, J. Q. H. 16, Orford-street, Marlborough-road, Chelsea.

TO TIMBER MERCHANTS.

WANTED, by a Young Man of business habits, a RE-ENGAGEMENT as FOREMAN in a GENERAL TIMBER-YARD; has been for six years engaged in that capacity, and is well conversant with the duties of the same. Character unexceptional, and can be well recommended by his late employers.—Address, G. W. 5, New Windsor-street, Uxbridge, Middlesex.

WANTED, to PLACE a respectable Youth, 16 years of age, as IN-DOOR APPRENTICE to the GAS-FITTING, MANUFACTURING, and FITTING, in a respectable establishment. A reasonable premium will be given.—Address, Mr. WEST, 2, Prior-street, Greenwich.

TO BUILDERS AND PLUMBERS.

WANTED, by a respectable Young Man, a SITUATION as PLUMBER, and is willing to make himself useful in Painting or Glazing if required. No objection to town or country.—Address, post-paid, to T. B. 48, East-street, Marylebone, London.

WANTED, by an Experienced Practical Man, a RE-ENGAGEMENT as FOREMAN or WORKING FOREMAN. He is thoroughly competent in all the branches of town and country works. Unexceptionable reference.—Address to J. P. L. 1, Castle-street, Long-acre.

TO IRONMONGERS, BUILDERS, &c.

WANTED, by an experienced Workman, a SITUATION; he is a first-rate bell-hanger, range and smoke jack maker, and can do general jobbing at the fire, lock-smith, &c.—Address, R. S. T. Nos 6 and 7, White Horse-chambers, Fetter-lane, London. N.B. Country preferred.

TO MASTER PLUMBERS.

WANTED, by a respectable Young Man, a SITUATION as PLUMBER'S LABOURER.—Address, W. D. No. 10, Devonshire-place, Westminster-broadway.

TO ARCHITECTS, BUILDERS, &c.

TWO young German Gentlemen wish for a SITUATION as DRAUGHTSMEN, in an Architect's or Builder's Office; they can be well recommended, and are willing to stay on trial for eight or ten days.—Address, O. P. S. care of Mr. Marcus, Bookseller, 8, Oxford-street.

TO MASTER SMITHS, BUILDERS, AND OTHERS.

THE Advertiser wishes a SITUATION as SUPERINTENDING FOREMAN of SMITHS. Can be highly recommended, having filled a similar situation for several years.—Address, E. T. Post-office, Penton-street, Pentonville.

TO ENGINEERS, MACHINISTS, &c.

THE Advertiser wishes for a SITUATION as WORKING FOREMAN of SMITHS, or Smith to a large fire; has great experience and thorough knowledge of the trade. Town or country.—Address, W. B. No. 83, York-street, Westminster.

TO BUILDERS.

THE PARENT of a respectable YOUTH, aged Sixteen, who has been eighteen months in a builder's shop in London, wishes to place him with a respectable tradesman in the country, where he can learn the above business thoroughly, and where he may be comfortable and taken care of.—Address, with particulars, X. Y. Z. Mr. Cox's, 103, Chancery-lane, London.

TO BUILDERS, RAILWAY COMPANIES, &c.

AS FOREMAN-PAINTER, &c.—The Advertiser thoroughly understands the above business in its various branches, and has had considerable experience for the last seven years in the above capacity, in conducting public buildings, mansions, &c. References unquestionable.—Direct, M. S. Office of "The Builder."

TO ARCHITECTS.

A PRACTICAL SURVEYOR in Measuring and Valuing Works, taking off quantities, &c. would be glad to enter into an arrangement with architects for the same.—Address, A. B. C. No. 17, Penlington-place, Hercules-buildings, Lambeth.

A MIDDLE-AGED MAN wishes to meet with a SITUATION in a Builder's Office; has been long used to the general business of one, can take out quantities, and is quick at accounts.—Address, G. D. 39, Hatfield-street, Blackfriars.

A GENTLEMAN, establishing a Mannfacture in the East coast of England, wishes to ENGAGE a Young Man of about 25 years of age, who speaks English and French, or English and German, to act as INTERPRETER. A person a little acquainted with building would be preferred. Very liberal terms will be offered.—Address, by letter only, stating good references, to Messrs. GOODCHAUX and CO. 4, Charlotte-row, Mansion house.

TO PLUMBERS OR BUILDERS.

A YOUNG MAN, aged 21, who has been six years at the plumbing, wishes to obtain a PERMANENT SITUATION, in town or country. Respectable references can be given.—Address, H. S. 43, Gilbert-street, Oxford-street, London.

TO MASTER PLUMBERS AND BUILDERS.

A YOUNG MAN who has served his time to Painting, Glazing, and Plumbing, wishes to place himself as IMPROVER in plumbing, at moderate wages.—Address, W. S. No. 1, New-street, Webber-street, Lambeth.

A PRACTICAL MAN, competent to superintend the erection of buildings, prepare plans, elevations, and detail drawings, measure, and take out quantities, and writes a good hand, is open to a RE-ENGAGEMENT, either to take charge of works, assist in Office, or any other capacity where the above qualifications would be of service. Good testimonials.—Address, T. M 45, Wimbourn-street, New North-road, Hoxton.

TO ARCHITECTS.

AN ASSISTANT is desirous of meeting with a RE-ENGAGEMENT. He is a good draughtsman, and has also sufficient knowledge of construction. Salary moderate. Unexceptionable references can be given.—Address, free, to 14, Coldbath square, Clerkenwell.

A NEAT and expeditious DRAUGHTSMAN is desirous of a RE-ENGAGEMENT in town; understands perspective, the getting out of working, detail, and finished drawings, &c. Salary moderate.—Address, A. B. No. 9, Elizabeth-street, South Pimlico.

AN ACTIVE, PRACTICAL MAN, competent to make working drawings, measure, &c having completed an engagement, is open to an ENGAGEMENT as CLERK of WORKS, or superintendent on an estate, or assistant to an architect, surveyor, or engineer.—Address, DELTA, 13A, East-road, Hoxton.

TO ARCHITECTS, &c.

A DESIGNER, DRAUGHTSMAN, and good ARTISTIC COLORIST OFFERS his SERVICES in the preparation of perspective views, the tinting of backgrounds, and the introduction of landscape; also in general drawing and lithography.—Terms very moderate.—Specimens of ability can be seen by addressing A. Z. 29, Denbigh-place Belgravia.

TO ARCHITECTS AND BUILDERS.

A RESPECTABLE MAN is in want of a SITUATION. Can prepare working and other drawings; has a knowledge of land-surveying, and can have twelve years' recommendation from his last employer.—Address to A. C. at Mr. Acre's, 8, Upper St. Martin's-lane, Long-acre.

TO BUILDERS.

AS MANAGER, the Advertiser is open to a SITUATION.—Address to Y. Z. 23, Northumberland-place, Westbourne-grove.

TO ARCHITECTS, BUILDERS, AND CONTRACTORS.

AN Assistant is open to an ENGAGEMENT with either of the above. He is a good draughtsman and designer, can take out quantities, and superintend the works. A moderate salary only is required.—Address E. W. Office of "The Builder."

NORRIS'S PATENT RAILWAY CHAIR COMPANY beg to draw the attention of Railway Companies and Engineers to NORRIS'S PATENT RAILWAY JOINT CHAIRS. This patent has received the unqualified approbation of some of the most eminent engineers of the day, as the most effective, economical and perfect joint in use at the present time. The simplicity of its construction is such as will allow of its application to any line of railway, without causing the slightest hindrance to the ordinary traffic during the time that it is being laid down. The saving in the preservation of the permanent way and rolling stock, by the application of Norris's Patent, is incalculable; and wherever adopted must very considerably decrease working expenses. To railway companies, having old and bad roads, the principle is peculiarly advantageous, as its application will not only restore the road to a perfectly safe and serviceable state for many years, but, at the same time, bring into efficient use all the old and broken chairs. To the railway world in general, it is of the greatest value, as it admits of the easiest locomotion, and is most simple and economical in principle. Every information will be given, and models forwarded for inspection, on application to the Manager, at the Offices of the Company, Wolverhampton.

NEWSVENDERS' BENEVOLENT and PROVIDENT INSTITUTION, established 1839, and enrolled pursuant to Act 10 Geo. IV. cap. 56, for granting temporary relief and permanent assistance to masters and servants engaged as vendors of newspapers.—The FIFTEENTH ANNUAL GENERAL MEETING of this Institution will be held at ANDERTON'S HOTEL, Fleet-street, on MONDAY, May 22nd, 1854, to receive the Committee's report—decide on an application for a Pension—elect officers for the ensuing year, and do confirm the election of CHARLES DICKENS, Esq. as president (who has kindly promised his willingness to accept the office) in the room of the late James Harmer, Esq. The Chair will be taken at half past SIX for SEVEN o'clock precisely.

EDWARD W. COLE, Secretary,
News Exchange, Fleet-street; and 41, Deverell-street, New Kent Road.

ARCHITECTURE, CIVIL ENGINEERING, and SURVEYING.—Messrs. HYDE, SMITH, and LEWIS, Architects, Civil Engineers, Surveyors, &c. beg to inform their friends and the public that they have refitted up their large and capacious Offices with every requisite, including Models and Instruments of every description. The COURSES are all remodelled and enlarged, embracing all the latest improvements. Gentlemen who cannot attend at the Offices can be attended at their residences, in any part of the country, by Mr. SMITH or Mr. LEWIS. Prospectuses and full particulars may be had by applying at the Offices, 24, Guildford-street, Russell square.

N.B. An Evening Class is also opened for Architecture and Civil Engineering Drawing. Terms, One Guinea per Quarter.

HOUSE DECORATIONS.—J. MAC LACHLAN, Painter and Decorative Artist, 35, St. James's-street, and at Clapham common, informs Architects, Surveyors, and Others, that he is practically acquainted with his trade in all its details, and respectfully requests a trial from those who may wish to have their work nicely executed at a very moderate charge, and punctual to time. Plain, will be glad to make designs for the decoration of rooms, or public buildings, in any part of the Kingdom, with estimates.—Tenders for general repairs.

LITHOGRAPHY.—Plans of Estates, Maps, Bills of Quantities, Isometrical Views, and every description of Lithography executed in the best style of the art. Engineering and Mechanical Drawings correctly detailed by experienced hands. Artists and amateurs supplied with every requisite for Lithography. Crayon Drawing and Oil and Water-colour Painting; Presses, Stones, Chalks, &c. Specimens of every class of work for inspection. Estimates given. Instructions afforded.

CHARLES MOODY, 387, High Holborn.

QUANTITIES taken out, Works measured, and Estimates made, Land surveyed and Levels taken, on liberal terms.—Address Z. 3, Portland-place, New Kent-road.

TO ARCHITECTS, CIVIL ENGINEERS, CONTRACTORS, AND BUILDERS.

A SURVEYOR, of considerable practical experience, is ready to take out quantities, and prepare estimates, or measure off work, and make out the bills for any Architect, Civil Engineer, Contractor, or Builder, who may require such aid.—Letters to be addressed to A. B. care of Mr. Weale, Architectural Publisher, 59, High Holborn.

HENRY BANCE, Builder and Mason, High-street, Croydon, begs to return his sincere thanks for the patronage bestowed on his late father, and to inform the Nobility, Gentry, and others that he intends carrying on the Business as before, and trusts, by strict attention, to merit a continuance of the support so liberally hitherto rendered. Plans and Estimates given. Dilapidations surveyed.

TO BUILDERS, HOUSE DECORATORS, AND UPHOLSTERERS.

THE most extensive assortment of UPHOLSTERERS' CLOTHS, BAIZES, and DRUGGETS, in every shade of colour, width, and quality, at HILL and SON'S, 33 and 36, St. Martin's-lane, London.

N.B. Patterns sent if required.

FOR WATERING GARDENS, DISTRIBUTING LIQUID MANURE, &c.—JAMES LYNE HANCOCK'S VULCANIZED INDIA-RUBBER TUBING is now manufactured especially for the above purposes, and is of greater flexibility than any other description of hose or tubing. It is also manufactured to resist great pressure, suitable for attaching to the mains of water works or to tanks or water-butts, of high elevations. WATERING HOSE fitted up with brass joints, branches, stop-cocks, roses, and jets complete. Vulcanized India-rubber suction-pipes for pumps, any length or size, to order; HOSE for brewers' use, fire-engines, &c. VULCANIZED INDIA-RUBBER WASHERS for STEAM and WATER JOINTS, and VULCANIZED RUBBER in SHEETS of ANY SIZE and THICKNESS. Solid vulcanized India-rubber tubing and cord for the joints of glass-doors, sashes, frames, &c.—Prices and every information may be had on application at the Manufactory, Goswell-mews, Goswell-road, London.

TO BE SOLD by PRIVATE CONTRACT, an Old-established PAPERHANGING MANUFACTORY in the north of England, which has been in constant work for the last sixty years. The manufactory, which is freehold, is a square brick building, three stories high, covered with slate and tile, and built and fitted up for the trade. There are fifteen printing-tables with presses complete in work; a grounding and satining shop; one light-coloured surface printing-machine; one grounding-machine, with rolling up machine attached; a desiccating drying apparatus, applied so that the work is finished and dried off as quickly as printed; colour-mills, embossing machine, and brushing machine, all driven by steam powers upon the premises; lathe, and every convenience for turning up rollers for machine work. The stock of colours, paper, grounds, and printed goods are of the best description necessary and suitable for carrying on the business, which is in full work, to order, and may be extended to a large amount. The stock of blocks is large, and is a collection of well-selected and saleable patterns. A good-and useful set of patterns has been sent to the trade this spring, which are doing well and promise a large amount of orders. The value of the concern is estimated at about 10,000, and particulars may be known on application to Messrs. SHIELD and HARWOOD, Solicitors, No. 10, Clements-lane, Lombard-street, London.

PAPER-HANGINGS.—The CHEAPEST HOUSE in London for every description of PAPER-HANGINGS is CROSS'S WHOLESALE WAREHOUSE, 23, GREAT PORTLAND-STREET, Oxford-street, where you can select from the LARGEST and MOST EXTENSIVE Assortment in the Kingdom, THIRTY PER CENT. CHEAPER than any other house in the trade. Builders, Decorators, Dealers, and large consumers will do well to visit this establishment.

PAPER-HANGINGS.—JEFFREY, ALLEN and CO. Paper Stainers, beg to call the attention of the trade to their patterns of Paper-hangings for the present season, which comprise every description of style and quality, from the most elaborate decoration to the cheapest paper that can be produced, and which they are prepared to offer at very low prices. J. A. and CO. also respectfully inform the trade that they have OPENED a WAREHOUSE at No. 500, OXFORD-STREET, where all goods can be obtained on the same terms as at the Factory.

GUTTA PERCHA PAPER FOR DAMP WALLS. J. A. and CO. are the sole vendors of this well-known remedy for Damp Walls.

115, Whitechapel, near the Obelisk, and 500, Oxford-street.

PAPER-HANGINGS.—TRUMBLE and COOKE, 3, Orford-street, London (Manufactory, Leeds), respectfully inform the Trade and Builders generally that they have now an immense STOCK of PAPER-HANGINGS manufactured from their new patterns (for the present season), consisting of Flock, Gold, Satins, Oaks, Granites, Marble, and Machine Goods, which they can supply on terms highly advantageous to the purchaser.

TO ARCHITECTS, BUILDERS, CONTRACTORS, &c.

HARTLEY'S PATENT ROUGH PLATE GLASS

1-8th thick, or 2 lbs. to the foot; 3-16ths, or 3 lbs.; and 1-4th, or 4 lbs. to the foot, for

RIDGE AND FURROW ROOFS, GREENHOUSES, RAILWAY STATIONS, ENGINE SHEDS, MILLS, MARKET HALLS, AND PUBLIC BUILDINGS GENERALLY.

It being universally admitted that Glass in Roofs of a permanent character should not be less than one-eighth of an inch thick, weighing two pounds to the foot, Messrs. JAMES HARTLEY and CO. have directed their attention to the manufacture of a description of

ROUGH PLATE GLASS, THAT COMBINES SIZE AND STRENGTH WITH ECONOMY OF COST.

The PATENT ROUGH PLATE is manufactured in sizes expressly for Ridge and Furrow Roofs, giving a span of from 8 to 12 feet, at a price not exceeding weight for weight that of common Crown Glass. Not being transparent, blinds are unnecessary, and when used in Greenhouses no scorching occurs; its NON-TRANSPARENCY and strength render it eminently suitable for the Glazing of Conservatories and Roofs of all kinds; also Factories, Workshops, &c. for which purposes it is supplied in squares of all sizes, from 8 by 6 inches and upwards.

For further information apply to Messrs. JAMES HARTLEY and CO. Wear Glass Works, Sunderland.
N.B.—The Patent Rough Plate is supplied at a much lower cost than the common Rough Plate.—May 1, 1851.

GLASS.—HARTLEY AND CO.'S GLASS TARIFF NEWSPAPER

Will be forwarded Gratis, on application, "post-paid," to

Messrs. JAMES HARTLEY and CO. Wear Glass-works, Sunderland; or Purfleet Wharf, Earl-street, Blackfriars, London.

BOWDEN'S BRILLIANT CUT ORNAMENTAL WINDOW-GLASS.

MANUFACTURERS—MARK BOWDEN AND COMPANY.

OFFICE, 60, ALDERMANBURY, LONDON; WORKS, NELSON-STREET, BRISTOL.

MAY BE OBTAINED THROUGH ALL GLASS MERCHANTS IN THE KINGDOM.

THOMAS MILLINGTON

Begs to inform ARCHITECTS, BUILDERS, and the Trade, that he supplies the following articles of the best quality and at the same time upon the lowest terms —

ENGLISH AND FOREIGN SHEET GLASS, PLATE, PATENT PLATE, PATENT ROUGH AND FLUTED PLATE, MILLED SHEET LEAD,

PATENT PIPE, LEAD, IRON, AND BRASS PUMPS, AND WATER-CLOSETS,

Genuine White Lead, Colours, Varnish, Brushes, and every article in the Trade.

FOR PRICE SEE ADVERTISEMENT FIRST SATURDAY IN EVERY MONTH, OR UPON APPLICATION AT THE WAREHOUSE,

87, BISHOPSGATE-STREET WITHOUT, LONDON.

SEYSSEL ASPHALTE COMPANY,

STANGATE, NEAR WESTMINSTER-BRIDGE, LONDON.

ESTABLISHED 1838

CLARIDGE'S PATENT.—Frequent complaints having been made by ARCHITECTS and others of the failure of certain works supposed to have been done by this Company (but which in fact were executed with spurious materials), a list of works executed with the

GENUINE SEYSSEL ASPHALTE

is kept at the Office, that it may be at any time ascertained whether any work in which a failure has taken place was executed by this Company. J. FARRELL, Secretary.

N.B. THE EXCLUSIVE SUPPLY OF ASPHALTE from the Mines of Pyrimont Seyssel being conceded to this Company, the Directors particularly recommend Architects, Builders, and others (for the purpose of securing the use of the genuine article) to insert in their specifications

"PYRIMONT SEYSSEL ASPHALTE, CLARIDGE'S PATENT,"

and not merely "Asphalte," or "Bitumen," as in many cases where these terms have been used, gas-tar, and other worthless and offensive compositions have been introduced.

1853.

GENUINE SEYSSEL ASPHALTE.

ORSI AND ARMANI.

ORSI AND ARMANI.

THEIR PATENT METALLIC LAVA IS FIFTEEN PER CENT. CHEAPER

THAN THE GENUINE SEYSSEL ASPHALTE OF MESSRS. O. AND A.

OR THIRTY PER CENT. LOWER THAN ANY OTHER MATERIAL CALLED BITUMEN OR ASPHALTE.

Offices, No. 6, Guildhall Chambers, Basinghall-street, City.

MOORE'S PATENT MOVABLE GLASS VENTILATOR, for Windows, Partitions, Factories, Workshops, Warehouses, Greenhouses, Cottages, Stables, Granaries, and other Buildings, Railway and Private Carriages, &c. For Farms, Dairies, Outbuildings, &c. the Ventilator can be made to form a complete window, iron frames and rough plate glass, &c. Ventilators made to any size, and to most forms of sashes; also for shop fan lights, and other purposes. A considerable saving and additional safety by having fixed window sashes.

MOORE'S PATENT "LEVER VENTILATOR" forms a regular current of air, is calculated to effect all that is required for supporting animal and vegetable health. The vitiated air is emitted at the opening left for that purpose. To shopkeepers they are particularly recommended, as from their expeditiveness of removing the foul air caused by the gas in the shop and windows they effectually preserve the stock in good condition, and prevent exhaustion of gas.

Church and House Clock-makers to the Hon. Board of Ordnance, the Russian Government and the Emperor of China.

Manufactory, Sekford works, St. James's-walk, Clerkenwell, London.

E. and W. H. JACKSON beg to call the attention of Builders and the Trade to the LOW PRICES of their PATENT PLATE GLASS, BRITISH PLATE, silvered and for glazing, of unrivalled quality and finish. They have also every variety of Furniture for the complete furnishing of a Bedroom.—HEAL and SON'S ILLUSTRATED and PRICED CATALOGUE of BEDSTEADS and BEDDING, sent free by post.—HEAL and SON, 196, Tottenham court-road

TODD'S PATENT METALLIC PROTOXIDE PAINT.

THE PATENT METALLIC PROTOXIDE PAINT now offered has been found, after the most severe trials, to be peculiarly efficacious in preserving Iron from Oxidation, Wood from Decay, and Masonry and Brickwork from Dampness. Applied to Iron, it unites with it most intimately, forming a complete coating; so that thus protected, it will be found equal to the best galvanized iron. Hence its great value to all Engineers and Iron Founders as an application to iron vessels, iron roofs, steam and water pipes, &c. &c. It adheres firmly to iron, even at a red heat. For stuccoed buildings it will be found to be effectual in preventing the discolourations formed by vegetation, and keeping out all dampness.

For terms, application to be made at the Offices of the Company, 12, Bishopsgate-street Within; or to the following Agents:—
Messrs. PITCHFORD, Island Lead Works, Limehouse, } LONDON. | Messrs. D. and G. BRYMNER ..... GREENOCK.
Messrs. G. and T. WALLIS, 64, Long-acre, ...

HUBBUCK'S PATENT WHITE ZINC PAINT. The PERMANENT WHITE of the Ancients, previously confined by its cost to the use of the artist, is now, by Hubbuck's Patent, reduced to the price of White Lead.

The principal characteristics of HUBBUCK'S ZINC PAINT are—Economy, Health, Beauty, and Durability.

Builders and Contractors find Hubbuck's Paint the only one adapted to all their purposes; possessing the great desiderature of economy, combined with its high excellence as a paint, it ranks alone. Contractors effect a saving of 25 per cent. by using HUBBUCK'S ZINC PAINT.

HUBBUCK and SON feel it necessary a caution should be circulated against imitations of their Paint. These manufactures, containing frequently pernicious adulterations, are founded to build and worthless in use, whilst the inexperience of these imitators in the production of pigments is evidenced, not alone by the coarse grainy appearance, but also by the deficiency of that body in their produce, which is known to the painter to be all-essential. That an imposition be not practised, therefore, notice that the cask is marked with the name of the original manufacturer, thus—

HUBBUCK —LONDON —PATENT.

If not so marked, the receipt may be inferred.

Every information in the circular to be had of THOMAS HUBBUCK and SON, Paint and Varnish Manufacturers, Upper East Smithfield (opposite the London Docks), London.

THE VIEILLE MONTAGNE ZINC MINING COMPANY'S PURE PATENT WHITE ZINC PAINT is unequalled for permanency of colour, hardness, and brilliancy of surface: it is unaffected by sulphureous or any other vapours or emanations, hence completely innocuous and free from the pernicious effects of whitelead, it may be employed in all apartments whilst in use without any inconvenience to the inmates.

The greatest caution is recommended to avoid any spurious compounds that might be sold at cheap rates as Pure Oxide of Zinc. If any adulteration has taken place in the oxide, either in consequence of impurity in the material primarily made use of to produce it, an imperfect mode of oxidation, or by a mix ure with the oxide certain substances calculated to give it increased weight, it then produces a very inferior instead of a very superior paint, and the economy realized by the purchasers of such oxides becomes a very expensive result to the owner of the premises painted with them

The VIEILLE MONTAGNER ZINC OXIDES, dry or ground in oil, are sold with the VM mark—In Hull, by Messrs. BUNDELL, SPENCE, and CO.; when ground and dry, by Messrs. T. H. MORLEY and CO., and by the Company's Grinding Agents in London, Messrs. CHARLES DEVAUX and CO., wholesale agents, 62, King William-street, City; JACK and BRADY, wholesale and retail agents, 8, Tottenham court, New-road, and 89, Upper Thames-street, City. In Manchester and Liverpool, by Messrs. LAWFORD and CO. of 40, Norfolk street, Liverpo l, who are also acknowledged Painters to the Company for Zinc Paints, and undertake painting ships, warehouses, dwelling houses, &c. In Leith, by Messrs. R. ANDERSON and CO. Timber-bush. Dry OXIDES and PAINTS, in kegs of 14, 21, and 28 lbs. and upwards, to be had of the Company's Agents in Birmingham, Newcastle, Glasgow, Bristol, Plymouth, Portsmouth, Norwich, Ipswich, Poole, and the Isles of Jersey, Guernsey, Man, and Wight; also in Dublin, Cork, and Belfast.

The Company also employ an acknowledged painter in London, who will undertake any description of painting with Zinc Paint by contract.

For further particulars, apply to the Company's General Agent in London, Mr. SCHMOLL, 12, Manchester-buildings, Westminster.

THE VIEILLE MONTAGNE ZINC MINING COMPANY beg to inform the public that they have appointed Messrs. T. and S. KNIGHT, of great Suffolk-street, Southwark, as their painters, who will be ready to execute any description of painting and decorating with the Pure Patent White Zinc Paint.

PATENT LIQUID CEMENT for Fronts of Houses, &c.—This valuable and economic material is always ready for use, simple in application, and only one-eighth the cost of oil paint. It will not decompose or wash off, but beauty stands pre-eminent, giving the appearance of fine cut stone, and 1 cwt. will cover 400 to 500 square feet. Sold in casks of 1, 2, and 3 cwt. at 3s. 12s. and 1.21s. each; casks exclusive.

PATENT PERMANENT COLOUR is particularly suited for halls, kitchens, school-rooms, railway stations, &c. as a substitute for oil paint: is without smell, dries in an hour, and may be applied over wood, oil paint, stucco, or any other surface. Sold in casks of 1 cwt. at 15s. 6d. each.

PATENT ZINC PAINTS. These paints are ready mixed for use, economical, unchangeable in colour, greatly superior to, and will last much longer than common oil paints, and will cover a much larger surface than the same quantity of white lead paint. Price 6s. per gallon, ordinary colours; Mineral chocolate brown, 8s.

Permanent Brilliant Black, for all kinds of outside work, barges, park railing, &c. 2s. per gallon.

PATENT INDIA-RUBBER PUTTY, which never shrinks, but remains in a tough plastic state, and is permanently waterproof. Price 4s. per stone.

DAMP WALLS.—PATENT ELASTIC PAINT, an effectual remedy, by which they are rendered fit for papering or finished in oil colours. Price 10s. per gallon, which will cover and finish about 12 square feet.

PATENTEES, GEORGE BELL and CO. Steam Mills, 3, Wellington-street, Goswell-street, London.

WHITE OXIDE of ZINC and ZINC PAINT. (Langstaff Scott's Patent)

CROWLEY, WHITE, and CROWLEY, Sole Manufacturers, now supply this innocuous substitute for White Lead to shippers and the trade, either in powder or paint, of genuine purity, wholesale under brand, of unrivalled colour and texture, direct from the Works, Grand Surrey Docks, Rotherhithe

Zinc Paint is below the price of white lead, possesses equal body, and perfectly unchangeable in colour

Price list and prospectus of its superior properties for interior, exterior, and marine purposes, forwarded in answer to letters addressed to Messrs. CROWLEY, WHITE, and CROWLEY, 10, Leonard street, London.

KEENE'S and PARIAN CEMENTS and FRENCH PLASTER for internal uses.—These well known hard stuccoes dry quickly, and can be painted upon within a few days.—Made and sold by JOHN BAZLEY WHITE and BROTHERS, Millbank-street, Westminster.

6, South Wharf, Paddington.

PORTLAND CEMENT.—CHARLES RICHARDSON has the greatest confidence in introducing to the Trade the above new article, being of uniform colour and quality (a desideratum never before attained in Portland Cements). It possesses extraordinary cementitious qualities, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, turn green, or crack; combined with which its eminent hydraulic properties stamp it at once as the first cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. CEMENT, being of uniform colour and quality (a desideratum never before attained in Portland Cements). It possesses extraordinary cementitious qualities, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, turn green, or crack; combined with which its eminent hydraulic properties stamp it at once as the first cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. CEMENT, manufactured by R. GREAVES, Esq. at his Works, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

PORTLAND CEMENT.—ASPDIN'S PATENT.

Messrs. ASPDIN, ORD, and Co. have much pleasure in informing consumers of this valuable Cement, that they have, by means of a recent discovery patented by Mr ASPDIN, much improved the quality of this Cement without any increase in price.

Engineers and architects are recommended to specify "Aspdin's Patent," as there are numerous imitations sold as Portland Cement, resembling it only in colour.

ASPDIN, ORD, and CO. beg to call attention to their SECOND QUALITY, which is equal, if not superior, to most of the Cements sold as Portland, and is considerably cheaper.

A report of experiments made to prove the extraordinary strength of their Patent Portland Cement, may be had at their Office, New Wharf, Westminster, London; at their Works, Gateshead-on-Tyne; or from their Agent, Mr. HENRY ROBINSON, 31, King street, Liverpool.

PORTLAND CEMENT.—JAMES WESTON having enlarged that portion of his CEMENT WORKS on Mill-wall, Poplar, for Manufacturing the above CEMENT, begs to inform the Trade in general that they can be supplied with any quantity they may require, either at his Works, St. Andrew's Wharf, Earl street, Blackfriars, or Middle Wharf, Scotland yard, Westminster. Manufacturer of Roman, Lias, and Mastic Cements, English and French Plaster, &c.

PORTLAND CEMENT WORKS, NORTHFLEET, KENT.—Messrs. ROBINS and CO. with much pleasure announce to their friends and the Public, that they have completed the enlargement of their works, in order to meet the great increasing demand for their Cement; and are now prepared to supply any quantity of the very best PORTLAND CEMENT, manufactured by them for all the purposes Cement is applicable.—Orders received at Great Scotland-yard, and at the Works.

ROMAN and OTHER CEMENTS. Manufactured by J. M. BLASHFIELD, successor to the Patentees, PARKER and WYATT, who, in 1796, first introduced PARKER'S ROMAN CEMENT; also Tarras and Portland Cements, English and French Plaster, Terra Cotta Chimney Pots, Trasses, &c

Manufactory, Mill Wall, Poplar; Depôts Commercial-road, Lambeth; and Paddington-basin.

PARIAN CEMENT, for internal use, to be painted in a few hours, and papered within a couple of days. CHARLES FRANCIS and SONS, Manufacturers of Roman, Parian (under patent), and all other Cements in use for building purposes. Nine Elms, London.

ATKINSON'S CEMENT, so long known and esteemed in London, for plastering purposes, is a quick-setting Cement, that requires no colouring.—Sold exclusively by JOHN BAZLEY WHITE and BROTHERS, Millbank street, Westminster; and Seel-street, Liverpool.

ARTIFICIAL HYDRAULIC or PORTLAND CEMENT combines the valuable qualities of the natural Cements with the additional advantage that it greatly excels them in its cementitious properties; that it is not affected by frost, and does not vegetate in damp situations. Account of COMPARATIVE EXPERIMENTS on the strength of this and other Cements (read at the Institute of Civil Engineers), to be obtained from the makers, JOHN BAZLEY WHITE and BROTHERS, Millbank-street, Westminster, who prepare one quality only of Portland Cement.

GEO. & THOS. EARLE, CEMENT MANUFACTURERS, HULL.—Light and Dark, equal to any made. Manufacturers also, and dealers in Plaster, Parts White, Mastic, Hair, Lias Lime, Laths, Slates, and Slate Slabs, Firebricks, Grindstones, Cement Chimney-tops, ditto Vases, Ridging, &c. Paints, Stucco, &c. Marble Merchants and Importers of Pozzolano.

BLUE LIAS LIME.—NELSON and CO. beg most respectfully to call the attention of Engineers, Architects, Contractors, Builders, and others connected with the building trade, to the superior quality of their BLUE LIAS LIME, the natural hydraulic properties of which, and the great estimation in which this kind of Lime is held for buildings in wet and damp situations, such as wharf-walls, docks, &c. and for concrete foundations, is a sufficient recommendation for the adoption of it in all works of the above description. It is also peculiarly adapted for stucco. Orders received by—London Agents, BLYTH, BROTHERS, 16, South Wharf, Paddington; and at the Works, Stockton-fields, near Southam, Warwickshire.

GREAVES'S BLUE LIAS LIME.—The superior manner in which the above is ground renders it cheaper for concrete or stucco than any other lime or cement. The shell lime for mortar is burnt on an improved principle, leaving scarcely any core. The satisfaction constantly expressed by Engineers, Architects, and Contractors, of the above, is its best recommendation.

Gibbs, Canning, and Co.'s Blue Vitrified Bricks, Pipes, Junctions, Bends, and Fire Goods.

ROMAN, PORTLAND, PARIAN, ANSTON, and LIAS Cements of the best quality.

SEGONDS, PAVIOURS' STOCKS, and other Bricks.

CHARLES RICHARDSON, 6, South Wharf, Paddington.

GROUND ABERTHAW LIME (for Hydraulic Works), Blue Lias Cement, Cambrian Plaster, Caustic Flour of Lime for Agricultural and Gardening purposes, and Portland Cement, shipped at Cardiff, in barrels, to all parts of the world, or forwarded by railway direct out of the works, in sacks or barrels, to any part of the kingdom.—JAMES BIRD and CO. Cambrian Cement Works, Cardiff.

ALBERT LIFE ASSURANCE COMPANY established 1838 Eastern Branch, 7, Finsbury square LOANS granted, in connection with Life Assurance, on freehold, leasehold, and personal security.

W. S. VARDY, Manager.

BRITON LIFE ASSOCIATION, 36A, Moorgate-street.

Assurers in this Office may receive the amount assured during Life, without increased Premium.

Loans can all times be obtained and repaid by small instalments.

Investment Policies secure a payment of the amount assured in 12, 15, or 7 years, or at death if it should previously occur, on which advances can be obtained.

Persons about to subscribe to Building Societies, will find the Building Policies issued by this Office combine the Assurance of Life with all the advantages derived from a Building Society.

Medical Gentlemen remunerated in all cases for their reports.

Annuities granted. All descriptions of Life Assurance transacted

Policies indisputable. Office hours from 10 a.m. to 4 p.m.

EDWARD PARSONS, Secretary.

HAND-IN-HAND FIRE and LIFE INSURANCE SOCIETY, 1, New Bridge-street, Blackfriars, London.—Instituted in 1696. Extended to Life Insurance, 1836. Immediate, Deferred, and Survivorship Annuities granted.

ADVANTAGES OF ASSURING WITH THIS COMPANY.

The Premiums are on the lowest scale consistent with security.
The Assured are protected by an ample subscribed capital—an Assurance Fund of 480,000l. invested on Mortgage and in the Government Stocks—and an income of 80,000l. a year.

Premiums to Assure 100l.			Whole Term.	
Age.	One Year.	Seven Years.	With Profits.	Without Profits.
20	£0 17 8	£0 19 9	£1 15 10	£1 11 10
30	1 1 3	1 2 7	2 5 5	2 0 7
40	1 5 0	1 6 0	3 0 7	2 14 10

60	3 2 4	3 17 0	6 12 9	6 0 10

MUTUAL BRANCH.

Assurers on the Bonus system are entitled, at the end of five years, and afterwards annually, to participate in four-fifths, or 80 per cent. of the profits.

The profits assigned to each policy can be added to the sum assured, applied in the reduction of the annual premium, or be received in cash.

At the first division a return of 20 per cent. in cash on the premiums paid was declared; this will allow a permanent reduction in the future annual payments for life of from 9 1-2 to 11 per cent. according to the age, and a reversionary increase varying from 6s. to 28 per cent. on the premiums, or from 1 to 3 per cent. on the sum assured.

One-half of the "whole term" premium may remain on credit for seven years, or one-third of the premium may remain for life as a debt upon the policy at 5 per cent. or may be paid off at any time without notice.

Claims paid in one month after proofs have been approved.

Loans upon approved security.

No charge for policy stamps.

Medical attendants paid for their reports.

Persons may proceed to or reside in any part of Europe or British North America without extra charge.

The medical officers attend every day at Throgmorton-street, at a quarter before two o'clock.

E. BATES, Resident Director.

WESTMINSTER FIRE OFFICE.

WESTMINSTER AND GENERAL LIFE ASSOCIATION.
King-street, Covent-garden, London.—Established 1836.
Life Assurance in all its branches effected.
Eight-tenths of the Profits divided among the Assured.
A Division of Profits every Five Years.
The Bonus additions have amounted to One-half the Premiums paid on the Policies.
Assurances without profits at reduced rates.
Any information respecting either Fire or Life Insurance, with proposals and forms of application, may be obtained on application at the Office.

W. M. BROWNE, Secretary and Actuary.

Agents required in the principal Country Towns.

GUTTA PERCHA TUBING.—May be buried for years, without injury, and it is therefore valuable for conveying water, chemicals, &c. It is peculiarly valuable for liquid manure, drain, and soil pipes. Being a non-conductor, it is not affected by the frost of winter or drought of summer, like metal or leather. Its strength is extraordinary; the small half-inch diameter tubing having resisted a pressure of 250 lbs on the square inch, without bursting. The smaller sizes may be had in 150 feet, and the larger in 50 feet lengths. The joints are easily made. As a conductor of sound it is most valuable for conveying messages in lieu of bells. ELECTRIC TELEGRAPH WIRES INSULATED WITH GUTTA PERCHA. The GUTTA PERCHA COMPANY, Patentees, 18, Wharf-road, City-road, London.

FARM AND COTTAGE PUMPS.

WARNER'S PATENT

CAST IRON PUMPS, for the use of FARMS, COTTAGES, MANURE TANKS, AND SHALLOW WELLS.

Patent Pump £1 15 0
Patent Pump, with 15 feet of lead pipe attached, and nuts and nutscrews ready for fixing..... 2 0 0
Larger sizes if required.

The smaller sizes are also much used for supplying Hot, Forcing, and Plant Houses, from underground Water Tanks, and can be readily fixed in any situation.

May be obtained of any Ironmonger or Plumber in town or country, or of the Patentees and Manufacturers,

JOHN WARNER AND SONS,
8, CRESCENT, JEWIN-STREET, LONDON.

Every description of Machinery for raising Water, Fire Engines, &c.

The usual allowance to the Trade.

FOWLER'S IMPROVED FARM and COTTAGE PUMPS.

To be had of any Ironmonger or Plumber, 1l. 15s.

The usual allowance to the trade.

PUMPS of SUPERIOR CONSTRUCTION bored perfectly true by improved machinery, in various plain and ornamental patterns, for squares and market-places, roads, conservatories, liquid manure, ship, barge, brickmakers, contractors, gold diggers, brewers, chemical works, and in wrought and cast-iron, copper and brass, for hot or cold liquors, &c. &c. Long barrel and hydraulic lift-pumps, with handles on planks; and engines of various powers, for wells of any depth.

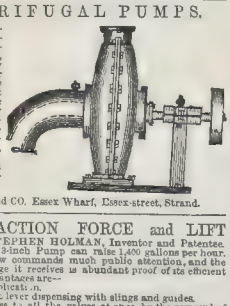
PUMPS on HIRE! The largest stock in England of single and double pumps, from 4 in. to double 12 in. barrels, prepared for hand or steam power, ready for use on reasonable terms, at

BENJ. FOWLER'S, Hydraulic Engineer, Hot-water, Steam and Gas Apparatus Manufacturer, New Factory, Whitefriars-street, Fleet-street.

M. A. RICHARDS and SON, PUMP MANUFACTURERS and ENGINEERS.

Pumps in Wrought and Cast Iron and Brass, bored by machinery, and fitted in the best possible manner, suitable for excavators, roads, brickmakers, farms, gardens, stables, liquid manure, ships, barges, well-sinking, &c. adapted for any depth. Hydraulic Pumps for deep wells.

PUMPS ON HIRE.



Pumps of any size, single or double barrel, up to double 18in. diameter, kept ready for use at reduced prices.

N.B. The above can be worked either by hand, horse, or engine power.

Iron Pails 38s. per doz. painted
Ditto . . 48s. per d° galvanised.

Upper Ground-street, Blackfriars Bridge, Surrey Side.

CENTRIFUGAL PUMPS.

Contractors, Builders, Engineers, Paper makers, Brewers, Manufacturers, and all who may have water, or other liquids (hot or cold) to raise, will find it their interest to use these Pumps. For ECONOMY, EFFICIENCY, SIMPLICITY, DURABILITY, & POWER, they have no equal. Every information can be had on application to

GWYNNE and CO. Essex Wharf, Essex-street, Strand.

DOUBLE-ACTION FORCE and LIFT PUMP.—STEPHEN HOLMAN, Inventor and Patentee.

One man with a 3-inch Pump can raise 1,400 gallons per hour. This invention now commands much public attention, and the increasing patronage it receives is abundant proof of its efficient operation. Its advantages are—

1st. Universal application.
2nd. An eccentric lever dispensing with slings and guides.
3rd. Speedy access to all the valves at once, by the removal of one door, secured only by one screw.
4th. Great quantity raised with little power.

This Pump is well worthy the attention of Water Companies, Builders and Brewers; it is applicable for all ordinary purposes of pumping on farm premises, and being portable is invaluable for land or ship fire-engines.—All further particulars may be obtained on application to the Inventor, S. HOLMAN, Engineer, Asylum, Colney Hatch; or of Mr. B. FOWLER, Pump Manufacturer, White Friars-street, Fleet-street.

TO CONTRACTORS.

PATENT PORTABLE PUMPING ENGINES,

mounted on strong waggon-wheels, iron chimney horse shafts complete. Strong, simple, for immediate use. Several are ready for delivery, from six-horse power to twenty-five-horse power and upwards, adapted to contractors' work generally. May be hired at a rental, or purchased, and can be seen at work at Messrs. MEDWIN and HALLS', Engineers and Portable Engine Makers, 99, Blackfriars-road. These engines have been successfully employed for years.

JAMES MICHIE, Engineer, Battersea-park,

Nine Elms, Manufacturer of all kinds of STEAM ENGINES (portable and stationary), Pumps, Sawing Machines, Cranes, Crabs, &c.

N.B. Several High-pressure Engines for sale.

TO BE SOLD, in consequence of one of greater power being required,

A STEAM CRANK ENGINE by Braithwaite about 10 horse power, complete on an iron frame, with powerful fly wheel, about 10 feet diameter. Price 60l.—May be seen at any time in full work at Mr. MEWBURN'S Saw-mills, 504, Westbourne-street, Pimlico, and may be removed at convenience.

LEEDS TERRA-COTTA and SANITARY TUBE WORKS.

PRIZE MEDAL, CLASS 23.

HIGH-PRESSURE VALVE COCKS.—LAMBERT'S PATENT

These Cocks have, during the last five years, been extensively and most successfully used in many Towns under continuous high pressure, varying from 100 to 330 feet; their efficiency and durability is by experience established.

The Equilibrium Half-valve is simple and certain in its action, and is cheaper than the common Cocks now in use.

Enamelled iron, self-acting, and other closets, upon economic arrangements, suitable for public buildings, cottages, asylums, &c

THOMAS LAMBERT and SON,
Brass and Iron Founders, Short-street, New-cut, Lambeth

TO WATER COMPANIES AND PLUMBERS.

HIGH-PRESSURE COCKS & CLOSETS.

The Health of Towns Commissioners having recommended the adoption of the high-pressure principle in all towns, WARNER'S HIGH-PRESSURE COCK is recommended as a Cock free from leakage, and applicable for all purposes and situations. Patent Closets and Basins with supply-valve for attaching direct to main pipes without a cistern, cocks, or wire.

LEAD, IRON, and TIN PIPE.
JOHN WARNER and SONS, Manufacturers, 8, Crescent, Jewin-street, London.

PEAKE'S TERRO-METALLIC TILES,

PIPES, &c.—Notice is hereby most respectfully given, that the LONDON DEPOT for this WARE is REMOVED to No. 21 WHARF, Maccle-field-street North, City-road Basin. Secondly, that the trade term, "TERRO-METALLIC," is the exclusive right of the Proprietor, and, thirdly, that the "REPORTS OF THE JURIES," page 681, of the Great Exhibition, rank the Manufactories known so long as "The Tileries," Tunstall, Staffordshire, as the first of the kind in the world.

MAW'S ENCAUSTIC TILE PAVEMENTS.

MAW and CO. send free, per post, their NEW BOOK OF DESIGNS,

with prices, adapting this most durable, economical, and decorative production of mediæval art to entrance-halls, passages, conservatories, verandahs, and every description of modern and ancient building.

BENTHALL WORKS, near Broseley, Shropshire.

and TWO Good Second-hand BRICK CARTS. Also a 9-ton VAN, and several good strong NAVVY BARROWS.—Apply to Mr. GRAY, at Harrison's Manufactory, King's-road, Hoxton Old Town, London.

MONEY LENT on PERSONAL SECURITY.

—Sums from 5l. to 200l. advanced two or three days after application, repayable any day in the week, by weekly, monthly, or quarterly instalments, for two years, one year, or six months, and co-debtor dispensed with. LONDON and PROVINCIAL LOAN and DISCOUNT COMPANY; Private offices, 69, Gosweil-road, London. Open daily from NINE till EIGHT, thus avoiding inconvenience or publicity. Charges extremely moderate, and strict confidence observed. Forms of application gratis on receipt of stamped envelope.

MONEY on LOAN, at 3l. per Cent. per Annum.—ARNEWAY'S CHARITY.—NOTICE IS

HEREBY GIVEN, that the Trustees of this Charity are enabled to lend out the Trust Moneys to poor occupiers or traders resident within the City and Liberty of Westminster, that is to say, within the parishes of St. Margaret and St. John the Evangelist, St. Anne, Soho, St. Clement Danes, St. George, Hanover-square, St. James, St. Martin in the Fields, St. Mary-le-Strand, and St. Paul, Covent-garden. The amount of each loan is not to exceed 10l. is to bear interest after the rate of 3l. per cent. per annum, and is to be secured by the bond of the borrower, with two sureties. Printed Forms of Application, and all necessary information, may be obtained by applying personally, between the hours of Ten and Three o'clock, at the Office now open at No. 5, Clerk and Solicitor to the Trustees, No. 14, Great Queen-street, St. James's Park.

By order, EDWARD S. STEPHENSON, Clerk and Solicitor to the Trustees.

NOTE.—The Trustees meet on the second Wednesday in every month, to consider such applications for loans as have been sent in one clear week at the latest before the first day of the month.—The sureties must be unexceptionable.

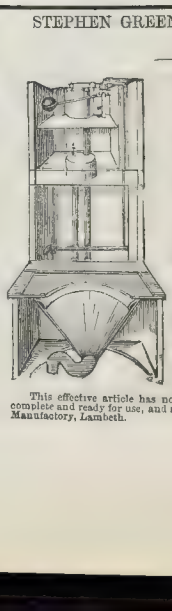
TO CAPITALISTS

TWO GENTLEMEN, of undoubted respectability, business attainments, extensive town and country connexion, engaged in a wholesale and manufacturing concern, in the most perfect working order, in the City, capable of immense increase, and yielding a highly remunerative profit, are desirous of meeting with an influential CAPITALIST, to invest 3,000l. at least, to carry out more fully its most promising operations. The abilities of the parties guarantee its likelihood of being the first concern of its kind.—Apply, by letter only, in first instance, to BETA, 27, Thornhill-square, Islington.

SHOW-CASES. — WANTED, SECOND-HAND SHOW-CASES; length, 5 to 16 feet; height, 7 to 8 feet; depth of shelves, not under 15 inches. Price must be moderate. Offers to be addressed to BROUX and CO. 3, Bury-court, St. Mary-axe, City.

STEPHEN GREEN'S IMPERIAL POTTERIES, LAMBETH.

IMPORTANT TESTIMONIALS



TO THE EFFICIENT WORKING OF

STEPHEN GREEN'S

PATENT SYPHON FLUSHING BASIN,

AND

SELF-ACTING CLOSET CONNECTIONS.

Oxford, November, 1849.

GENTLEMEN,—Sixteen of your Closets having been put into operation at Christ Church College, I have great pleasure in giving you my testimony as to their efficiency and simplicity

HENRY J. UNDERWOOD, Architect.
R. S. HOGGAR, Engineer.

Royal Arsenal, Woolwich, June 24, 1852.

GENTLEMEN,—I have much pleasure in giving my testimony in favour of your Patent Syphon Flushing Basin, with Self-acting Closet Connections. There are several fixed here, which have been in use for upwards of twelve months, giving perfect satisfaction.

I am, Gentlemen,
Your obedient Servant,
WILLIAM CARTWRIGHT.

This effective article has not any Crank or Wire to get out of order, and is all complete and ready for use, and may be seen in operation at STEPHEN GREEN'S Manufactory, Lambeth.

CRYSTAL PALACE—JENNINGS'S CLOSETS.

GEORGE JENNINGS has great pleasure in informing his Patrons that he has received instructions to provide and fix the whole of the LAVATORIES and URINALS required for the Exhibition Building.

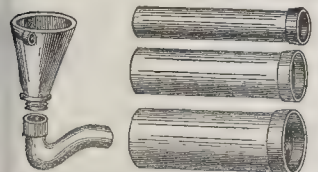
The ROYAL APARTMENTS are also to be fitted with JENNINGS'S IMPERISHABLE WATER-CLOSETS, as also various OTHER IMPORTANT DEPARTMENTS of the Building.

The arrangement of the Urinals will be found to be entirely new in every respect; eight being fixed in a diameter of 5 feet, similar places raised in the centre of public crossings in the same style, would be at once useful and ornamental.

As all new things require publicity, and something to recommend them, GEORGE JENNINGS respectfully invites Architects' attention to the following in relation to his IMPERISHABLE WATER-CLOSETS. Charles Lee, Esq. Architect, of Gordon-square, has two of these Closets fixed at his offices and private residence. The result is, that he has specified sixty to be used in the Model Lodging-houses, Broad-street, Golden-square, as also sixty of JENNINGS'S BALL COCKS. Cases like this might be multiplied, but we will suffice.

GEORGE JENNINGS has just obtained Patents for Measuring Water to Water closets, and preventing Waste of Water; also another Patent for Improvements in Drain-pipes, and in Connexion and Junctions for the same. Full particulars will shortly appear.

N.B. A Book containing particulars of all JENNINGS'S SANITARY IMPROVEMENTS can be had on application, or by post if two stamps are sent to



GEORGE JENNINGS,

ENGINEER AND PLUMBERS' BRASSFOUNDER, 29, GREAT CHARLOTTE-STREET, BLACKFRIARS-ROAD, LONDON.

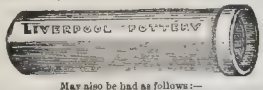
JAMES STIFF, MANUFACTURER of GLAZED STONE-WARE DRAIN PIPES, BENDS, JUNCTIONS TRAPS, &c. 39, HIGH-STREET, LAMBETH, LONDON. Established 1751.

Water-Closet Pans, with Syphon Traps, 7s. 6d. each.

STRAIGHT TUBES, in Socket Joints, in Two Feet Lengths.

The great advantages attending the use of these articles are now so generally understood, as to render any enumeration of them almost superfluous. Their cheapness, efficiency, and durability, are universally admitted; while the rapidly increasing demand for them proves their estimated superiority over every other kind hitherto before the public for similar purposes.

Inspection is invited to an assorted Stock of Drain Tubes, of every form and size, adapted to the various situations for which they may be required; as also to the WATER-CLOSET PANS OF IMPROVED CONSTRUCTION, and in tenor glaze, far surpassing any other manufactured of Brown Stone Ware.



N.B. These are made without the discharge-hole being turned downwards.

May be had also at Messrs. GLADDISH'S LIME WHARFS, Pedlar's-acre, Westminster-bridge; City-road Wharf, City Basin; Cook-head, Bermondsey; Dauvey's Wharf, foot of Batteresa-bridge, Chelsea; Pratt Wharf, King's-road, Camden New Town. TURNER 2, South Wharf, Praed-street, Paddington; and at COLWILL, Brothers, 33, Bryd ges-street Covent Garden.

Drawings and List of Prices will be forwarded free, on application.

JOHN DOULTON, BROTHERS, AND CO. LIVERPOOLPOTTERY, ST. HELEN'S

DOULTON AND WATTS'S

REGISTERED CLOSET PANS IN

ENAMELLED STONE WARE,

LAMBETH POTTERY, LONDON.

These Closet Pans are manufactured in a new kind of stone-ware, HIGHLY GLAZED, vitreous, of a white colour, are much improved in form, and are used and recommended by the engineers connected with the General Board of Health.

The Traps are smaller at the inlet, gradually enlarging towards the outlet, as a security against the introduction of improper substances into the drain.

They may also be had turned down.

PRICE 7s. 6d. each,

The same as for ordinary stone-ware, and may be had fitted with copper fans of the best construction at 1s. 3d. each extra.

HENRY MILLICHAMP, Son-in-Law and Successor to THOMAS BULLOCK,

Bends, Elbows, Urinals, Gully-Traps, Flap-Traps, Syphon-Traps, &c. always kept in Stock.

DRAWINGS and LIST of PRICES FORWARDED FREE ON APPLICATION.

SUPERIOR GLAZED STONEWARE

DRAIN PIPES, invented and manufactured by

WILLIAM NORTHEN, UNION POTTERY, No. 14, VAUXHALL-WALK, LAMBETH.

W. NORTHEN begs to inform surveyors, contractors, builders, water companies, &c. that he has completed "Spencer's" new patent machinery for making GLAZED STONEWARE DRAIN PIPES, JUNCTIONS, BENDS, ELBOWS, SYPHON-TRAPS, &c. &c. Amongst the many advantages of pipes made by this machinery over all others may be mentioned, that it insures perfect uniformity in form and size, both of pipe and sockets, the dies being of a different and better construction than any others now in use; and the pipes and sockets being made by one process are secure from separation.

W. N. invites particular attention to the superior quality of the glaze used in his manufacture, which is equal to glass, and rendering stoppage in the drains impossible.

W. NORTHEN'S PIPES MAY BE INSPECTED AT THE FOLLOWING PLACES, WHERE ORDERS ARE RECEIVED:

Rosher and Co.'s Wharfs: Kingsland, Blackfriars, and Mill bank.—Martin and Wood's Market Wharf, Regent's-park Basin.—J. C. Hilton's, Crown and Horse shoe Wharf, No. 6, Upper Thames-street.—W. Peters's, North Wharf, Paddington.—C. Richardsen's, South Wharf, ditto.—G. Erith's, Cambridge Heath Wharf, Hackney.—Millwood and Co.'s Wharfs, Kensington Basin, and Creek Wharf, Hammersmith.—J. Corbet's Depôt, Britton-street, Chelsea; and at the Pottery.

TO LOCAL BOARDS OF HEALTH, WATER COMPANIES, &c.

A DESIDERATUM in SLUICE-VALVES.

FREEMAN ROE'S Patent Sluice-valve, can be repaired without being removed from the main. All sizes, from 2 inch to 36 inch. Patent Hydrants, self-closing Cocks, fire and other Pumps, Hot-water Apparatus, Baths, &c. Surveys made, and estimates given by FREEMAN ROE, Hydraulic, Sanitary, and Gas Engineer, 79, Strand, and Upper Marsh, Lambeth.

TO WATER COMPANIES AND PLUMBERS.

DEVEY and DALE'S CYLINDER BALL-VALVE and BALL, Registered Oct. 23, 1854. No. 3,526.

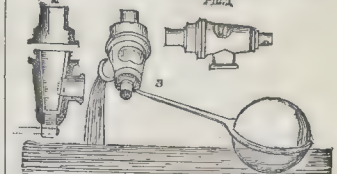

Fig. 1 represents the Cylinder Ball-valve in elevation. Fig. 2 is a Section of the Interior, showing the uninterrupted course of the Fluid. Fig. 3 shows the Cylinder Ball-valve in action.

This Valve is peculiarly suited to High-pressure. The greater the weight of fluid, the more secure the Valve becomes, and the more effectually prevents waste.—Manufactured solely by DEVEY and DALE, 8 and 9, Shoe-lane, and may be had of respectable Plumbers.

MILL WALL POTTERY (near Scott Russell's).—Messrs. WILLCOX and CO invite the attention of Contractors, Builders, and Wholesale Dealers to their extensive assortment of articles in WHITE EARTHENWARE for sanitary purposes. The only manufactory of the kind in the neighbourhood of London.—Particulars forwarded on application.

FINDON'S PATENT WATER-CLOSETS.

J. BLACK, having succeeded to the business of the patentee, begs to call the attention of architects, of builders, and the trade, to the many advantages of these closets over all others as to economy, durability, and simplicity, only requiring one pipe from either main or cistern, which pipe may be branched from for any other purpose. May be seen at the Manufactory, 190½, High Holborn.

VICTORIA POTTERY, LEIGH,

NEAR SOUTHEND, ESSEX.

DAVID MOUNTAGUE,

MANUFACTURER of superior GLAZED STONEWARE PIPES (in accordance with the rules established by the Commissioners of Sewers), Bends, Traps, Closet-pans, Jars, Bottles, and every article in Stone Ware on advantageous terms. Also MANUFACTURER of superior Roman Cement and Plaster of Paris at Orchard House, Blackwall. Orders executed from the above places, from Falcon-wharf, 80, Bankside, Blackfriars, and from Harrow-bridge-wharf, Stratford, Essex.

LADDERS, BARROWS, &c. for SALE or HIRE.—G. ELL invites the attention of builders, decorators, and the trade generally, to the Large Stock of Ladders; excavators', brickmakers', and other Barrows; Painters' Machines, Trestles, Steps, &c. he has always on hand, at a very low scale of charges.—Manufactory, 3, TOTTENHAM-COURT, NEW-ROAD, opposite Hampstead-road.

SALES BY AUCTION.

WISTON, NEAR BAWTRY.—Important Sale for Timber Dealers, Manufacturers, and Others, of an unparalleled nature.

G. SMITH, Auctioneer, of Lincoln, has the honour to announce that he has been favoured with instructions from the Executors of the late Mr. JOHN BOND, that he has been honoured with instructions to SELL by AUCTION, on MONDAY, MAY 23rd, 1864, commencing with lot 1, at 10 o'clock precisely, the whole of the valuable and extensive STOCK of fully grown RED WILLOW TREES now growing on the bank of the river Idle, 20 feet each, which have been grown on the bank of the river Idle, but now removed and lain in lots suitable for the use of the canal side, which is very convenient for removal by water land, or railway; was carriage to all parts of the kingdom. The usual credit given, or discount for cash money. For part values see catalogues, to be had of the Auctioneer; and of Mr Dixon, at Brake Holes Inn, near Rossehill Station.

IMPORTANT SALE AT RUGBY.—To Builders, Timber-merchants, Contractors, and Others.

HENRY ELVINS has received instructions from Mr J. Hart, who has disposed of the premises at Rugby, to SELL by AUCTION, on MONDAY, TUESDAY, and WEDNESDAY, the 23rd, 24th, and 25th days of MAY, a large and excellent assortment of TIMBER and other EFFECTS, comprising about 35,000 feet run of oak and deal flooring boards, battens, pine planks, deals, sawlings, two scaffold poles, and six-teen inch, parallel laths, all upwards of 12 feet in length; also a Bigg and Swedish timber, a portable 6-horse power steam-engine, with pair of cylinders, table fuel blower, saw bench and circular saw complete, 4 and 5 inch iron pumps, which have been at work about 3 months, large quantity of strong iron pitch chain, double and single inch and 1½ inch screws, large quantity of iron pipes and bars, cog wheels, and various other machine works, strong timber carriage, scotch, tire, and two 3-inch wheels, with other parts, and two powerful cart horses, with a great variety of other useful articles, together with a pair of Hearle's patent perforated tiles, and about 100,000 of draining and other tiles and pipes. The bricks and tiles will be on WEDNESDAY, the 25th MAY instant. Particulars are in the forenoon of Hand Catalogues to be had, and [illegible] on the premises, or at the Auctioneer; Globe Hotel, Warwick; and the Eagle Hotel, Rugby. The above property is within the goods station of the Midland and North Western Railway at Rugby, where the Sale will take place punctually each morning at ELEVEN o'clock.

MAZE HILL, GREENWICH.—Capital Building Materials of a large Mansion adjoining Vanbrugh Castle

PULLEN and SON are favoured with instructions to SELL by AUCTION, on the PREMISES, on TUESDAY, MAY 24, and following day, at TWELVE, the whole of the excellent BUILDING MATERIALS, of the spacious mansion known as the Red House, adjoining Vanbrugh Castle, Maze Hill, Greenwich, comprising about 400 squares of slating, 18 inches, fifteen tons of lead in large flats, gutters, cisterns, and pipes; stout oak and fir timber roofs; 100 squares of boarded and timber floors; plate, sashes, and shutters, 7 inch bolection and other doors, elegant 1 mahogany, and inferior fittings of a superior description, plain and painted stairs, oak, spindle, and other balusters, and style fittings, York and clunch paving, 2 tons iron railing, and gates, stone curb, sills and coping, erection of large glazed conservatory, marble figures and pedestals, stoves, ranges, coppers, and the entire fixtures throughout the mansion.—May be viewed on Saturday and Monday previous, and Inventories had of Pullen and Son, 5, Percival-street, Clerkenwell.

Valuable Freehold Land Premises, adjoining the Railway Station at Enfield, to be SOLD by AUCTION by

MR. W. S. FRANCIS, at the AUCTION MART, Bartholomew-lane, opposite the Bank of England, on THURSDAY, JUNE 9, 1864, at TWELVE o'clock precisely. The premises comprise a stonemason's yard, sheds-room, workshops, stables, sheds and dwelling-residence, all let with a large garden, having a frontage to the London road of 133 feet, by a depth of 80 feet; are well adapted to the purpose of a builder, tradesman, or manufacturer; and, by reason of the commencement of the great improvements effecting in the neighbourhood, there is an excellent opening; or would be extremely eligible for building purposes, there being room for nine third or fourth rate houses, close to the station, and fronting the London road, and were late in the tenure of Messrs. Hobson.—Particulars and Conditions of Sale may be had of Mr. Docking; the Greyhound Inn, Enfield Town; Messrs. Hughes, Kearsey, and Masterman, 17, Bucklersbury; and of the Auctioneer, 18, St. George-street, and 44, Wellclose-square, St. George's East.

Important Sale.—Taps, Brass, near the Middlesbro' Station, Great Western Railway.—To Timber Dealers, Railway Contractors, Saw Millers, Builders, Bankers, and Others.

MR. PREECE is instructed by the Assignees of the estate and effects of Mr. G. Lyon's-inn Hall, Strand.

COMPETITIONS.

TO ARCHITECTS, SURVEYORS, AND OTHERS.

PLANS, DESIGNS, and DRAWINGS are required for BUILDING TWO CEMETERY CHAPELS adjoining each other and LODGE for the Holbeach Burial Ground. The expense of the Chapels is not to exceed 600l. and the Lodge 250l.

Plans to comprise Elevations and Ground plans, accompanied by approximating estimate of the expense.

£5. is offered for the plan considered to be the best (unless the Architect shall also contract for the works); £3. for the second best, and £2. for the third best.

N.B. The above amounts are offered by way of premium, and the Architect whose plans are accepted will be employed to overlook the execution of the Works at the usual commission of £5. per cent.

The plans to be sent to the Clerk sealed and indorsed, on or before the 31st day of MAY inst.

By order of the Burial Board,
EDWARD GEORGE AYLIFF, Clerk.

Holbeach, 17th May, 1854.

TO ARCHITECTS, SURVEYORS, AND OTHERS.

PLANS and DRAWINGS are required for BUILDING TWO CEMETERY CHAPELS (separate from each other), together with a Lodge and Entrance Gates for the Boston Burial-ground. The whole expense for these several erections is not to exceed the sum of 1,200l. Plans and drawings are also required for planting, fencing, and draining the said burial-ground, and for the laying out of the walks thereon: the expense is not to exceed the sum of 200l. The plans for the building must include both elevations and ground plans, accompanied by an approximating estimate of the expense. Ten pounds are offered for that which is considered to be the best (unless the architect shall also contract for the works), and Five pounds for the second best. The whole of the plans are to be sent to the Clerk of the Burial Board, sealed and indorsed, on or before the 31st day of JUNE next.

By order of the Burial Board,
B. S. SIMPSON, Clerk.

Boston, May 20, 1854.

COMPETITIONS.

14, Stanhope street, Clare-market, London.

FIRE—ROBBERY—VIOLENCE—PILLAGE—MILNER'S HOLDFAST and FIRE-RESISTING SAFES, the strongest safeguards in the world against.

EXTENSIVE FIRE IN GLASGOW.
MESSRS DAVIS HOOD AND CO.

Gentlemen,—At the serious fire in Union-street yesterday, by which my counting-house was destroyed, I owed the preservation of my books to the MILNER'S SAFE in which they were kept. The contents of a wall safe were totally destroyed at the same time. You will please send me immediately another "Milner" of the same size as the one I used, being thoroughly satisfied of their safety, after the test I have just seen.
I am, Gentlemen, your obedient servant.
(Signed) JOHN DODD.
27, Union-street, Glasgow, Feb. 22, 1854.

MILNER'S PHŒNIX SAFE WORKS, Liverpool; London Depôt, 47a, Moorgate-street, City

FIRE-PROOF CONSTRUCTION.—FOX and BARRETT'S PATENT.

This improved system of fire-proof construction has been most extensively adopted, and its application has been extended to nearly EVERY DESCRIPTION OF BUILDING, whether public or private

The system combines ECONOMY, with great simplicity of construction, perfect security from fire, increased durability, and many other important advantages

The floors and roofs are formed by a combination of joists of wrought or rolled iron with concrete; so constructed that each floor becomes in effect a beam of artificial stone, with ribs of iron; the structure possessing great strength and rigidity, and forming a fire-proof foundation adapted to receive a finished surface, either of the ordinary flooring-boards, or of cement, asphalte, tiles, slate, or other material.

Some of the largest and most important buildings in the kingdom are now in course of erection upon this principle, which is recommended to the notice of all who are interested in building, both as superseding the necessity for cast-iron girders and brick arches, and as bringing the great desideratum of fire-proof construction, even for ordinary dwelling-houses and domestic buildings, within the reach of every one.

Further information may be obtained of the Proprietor of the patent,—Mr. BARRETT, 12, York-buildings, Adelphi.

FOUNDRY AND IRON WORKS,
83, DRURY-LANE, and CHARLES-STREET, DRURY-LANE.
GLOVER, BROS.,

HOT WATER APPARATUS MANUFACTORY, whilst respectfully soliciting the attention of Architects, Builders, &c. to their superior apparatus for warming churches, mansions, halls, offices, and public buildings, by the circulation of hot water in pipes, beg to call particular attention to the accompanying statement in the "Builder" of Jan. 14, 1854, which fully bears out the able address of the Rev. H. J. Bigge's, delivered at a meeting of the Architectural Society, wherein Mr Bigge shows that heating by hot water is truly the only effective system applicable to warming churches and other large buildings It is free from all objections, is economical in its working, and produces perfect ventilation with a uniform comfortable warmth throughout large buildings.—Messrs JOHN WEEKS and CO. will guarantee their Hot-Water Apparatus for thirty years at 5 per cent.

HEATING by HOT WATER.—J. JONES, Iron Merchant, has always a great variety of CONICAL and SADDLE BOILERS in Stock; also fire and furnace bars, ornamental and plain, sash bars, &c.; also fire and furnace frames, furnace grates, soot doors for the same, hot water pipes, elbows, tees, syphons, throttle valves, stop cocks, flange unions, socket elbows, &c.; also, trough pipes. Drawings and prices of the above, on application to J. JONES, Ironbridge wharf, No. 6, Bankside, London, near the Southwark iron-bridge

HOT WATER APPARATUS, adapted for Horticultural and every other description of Buildings, improved Boilers, requiring no brickwork; Warm Air Apparatus, &c. Apply to SPILLER and TAYLER, Engineers, Battersea.

A large assortment of Rim, Drawback, Mortise, Iron Gate, and every other kind of Locks and Latches. Finger-plates, Levers, and Bell-pulls, en suite.

An extensive stock of bright and black Register Stoves in every variety of design, at remarkably low prices

BAR, HOOP, SHEET, AND ROD IRON. RAIN-WATER PIPES AND GUTTERS, ALL SIZES.

The Stock of this Establishment is too extensive to be described in the limits of an advertisement, and the most correct idea that can be given of it is by saying that every trade consuming ironmongery can here select whatever they require at WHOLESALE PRICES.

WALMSLEY'S new Show-rooms are now open with a Modern and Choice Stock of General Furnishing Ironmongery unequalled in variety, and all at unprecedented low prices.

MOREWOOD & ROGERS'S PATENT PLUMBIC ZINC,

A SUBSTITUTE FOR SHEET-LEAD FOR

ROOFING, RIDGES, GUTTERS, FLOORING,

AND ALL OTHER PURPOSES TO WHICH SHEET-LEAD IS APPLICABLE.

This Metal consists of distinct layers of Lead and Zinc, perfectly united in the process of Manufacture, one side of each sheet being pure Lead, and the other pure Zinc; it therefore combines the Suffices of Zinc with the Durable Qualities of Lead. The Lead side of the sheet being laid outward, effectually protects the Zinc below from those atmospheric influences which so rapidly cause its decay, whilst the Zinc on the Lead defends and supports the Lead as to make a sheet of Plumbic Zinc equal in strength to one of Lead of several times its thickness and weight.

Plumbic Zinc not requiring to be more than one fourth or one-fifth as thick as Sheet-Lead, is consequently much cheaper than that material

For covering Terraces, Flats, Floors, Stairs, Passages, &c. it is well suited, being like Lead to the tread, whilst the Zinc on the under side of the sheet prevents it from treading out of shape.

The Size of the Sheets is 7 feet by 2 feet 8 inches.

No. 11 Gauge weighs about	18 oz.	per foot super.	
No. 12	"	"	20 oz. do. do.
No. 13	"	"	23 oz. do. do.
No. 14	"	"	26 oz. do. do.

For further particulars apply to

MOREWOOD AND ROGERS, GALVANIZED TINNED IRON WAREHOUSE,

DOWGATE DOCK, UPPER THAMES STREET, LONDON.

GEORGE HART, 253, STRAND,
Near Temple bar.
WHOLESALE, MANUFACTURING, AND FURNISHING IRONMONGER.

Proprietor and Manufacturer of Pitt's Patent Self-adjusting spindled Door Furniture.
Lists on application.

JAMES LAURIE and CO. Warehouse, Cousin-lane, Upper Thames-street, supply Railway Chairs and Sleepers, Fishing Pieces, Bolts and Nuts, Spikes and Tie-Bars, Columns, Ladders, Socket Pipes, Rain-water Pipes, Gutters, Railing and Palisading Bars, and all kinds of Iron Castings. Also, Henderson's Patent Derrick Cranes.

DR. ARNOTT'S NEW SMOKELESS FIRE GRATE.—P. EDWARDS and SON, beg to inform Architects and the Public that the above new Stove is to be seen in daily operation at their manufactory, and that they are prepared to supply new, and to alter old grates to the same principle.—42, Poland-street, Oxford street.

THE SMOKE-CONSUMING STOVE invented by Dr. ARNOTT, and explained by him at the Society of Arts on Wednesday, MAY the 16th, insures perfect combustion, economises fuel, improves ventilation, and requires much less attention than the register-stoves in general use, was manufactured by B. and E. BAILEY, 271 and 274, Holborn, who are prepared to supply new, or adapt old stoves to the principle.

TO MANUFACTURING CHEMISTS, PLUMBERS, BUILDERS, &c.

ANDREW CLARK and COMPANY, PLUMBERS,
THE BEAR GARDEN LEAD WORKS, SOUTHWARK.

Sole Manufacturers of Bolbrink's Patent Autogenous Soldering Apparatus, invite the attention of Manufacturing Chemists to their Patent method of

UNITING LEAD TO LEAD WITHOUT SOLDER.

Leaden Chambers, or any leaden vessels, made or repaired by this process, making them complete, without the introduction of any foreign metal.

PLUMBERS and BUILDERS can be SUPPLIED with SHEET LEAD and PIPE, cut to any dimensions, and EXCHANGED for OLD LEAD, on the LOWEST TERMS.

WHOLESALE IRONMONGERY WAREHOUSE, 18, Blandford-street, Manchester-square (running out of Baker-street, Portman-square), where a large stock is always kept on hand for the exclusive supply of the above trades.
JOHN YOUNG, Birmingham and Wolverhampton, Agent and Factor

WIRE STRAND FENCING, as furnished with all its fittings, by R. S. NEWALL and CO, having elicited the unqualified approval of practical men, is confidently recommended as the best fencing for park and farm inclosures, or subdivisions, for temporary agricultural inclosures (instead of any kind of hurdles), for road-side and all other fencing.

The PATENT WIRE STRAND FENCE possesses an economy, security, and durability, not to be found in combination in any other fence hitherto introduced. This fence, as fitted by R. S. Newall and Co. (after the model of the fences of this material in the Slopes and Home-park, at Windsor), has the inherent property of remaining equally tight and rigid, under any variations of temperature.

N.B. Estimates given at so much per running yard, for fencing, fixed complete. Specimens, sketches, or any other particulars, will be forwarded on application.

OFFICES.—Gateshead-on-Tyne.
13, Strand, London.
67, Hyde-park-street, Glasgow.

Lists of prices at the quarries and depots, also cost for transit to any part of the kingdom, furnished on application to Bath Stone Office, Corsham, Wilts.

ITALIAN and GALWAY MARBLE QUARRIES.
Depôt, Whitewall Wharf, Parliament-street, Westminster.
Now landing Twenty Blocks of large Statuary, suitable for Sculpture, &c. some opened (choice).
Fifty Blocks of good Vein and Sicilian, &c. &c.
Also, 100 Tons of Galway Black Marble, in blocks and slabs of large dimensions.
Apply to Mr. FRANKLIN, Proprietor of the Quarries.

MARBLE.—Mr. J. FABBRICOTTI, of Carrara, Italy, Proprietor of Marble Quarries, and the only person in the United Kingdom selling Italian Marble the produce of his own quarries, begs to inform the gentlemen connected with the Marble Trade that he has established, in London, the most extensive Depôt of Statuary, Veined, Sicilian, Dove, and Black and Gold Marbles, at CARRARA WHARF, THAMES BANK, PIMLICO, the foot of Vauxhall-bridge.

MARKET-WHARF, REGENT'S-PARK-BASIN, WEST END DEPOT, for Yorkshire Paving, Portland and Bath Stone, Blocks, Slabs, &c. Also Bricks, Lime, Cement, Pinster, Tiles, Laths, and Fire Goods. MARTIN and WOOD invite the attention of Builders, Masons, and others, to their Stock as above, where everything will be charged at the lowest prices. Headstones, Ledgers, Steps, Landings, &c. cut on the shortest notice. Country orders promptly attended to.

TO BUILDERS, MASONS, AND OTHERS.

THE largest STOCK in England of MARBLE in Blocks and Slabs, veined, Brocilla, dove, black, black and gold, Sienna, St. Ann's, statuary, serpentine, verdant que, &c. Portland, Harehill, Park-spring, and other stone, in blocks, slabs, landings, and headstones. Yorkshire paving, granite curb, &c. All goods carefully packed and forwarded to any part of England. THOMAS JACKSON, Marble and Stone Sawing-Mills, Commercial-road, Pimlico, London.

TO BUILDERS, MASONS, AND CONTRACTORS.

OBSERVE!!! the cheapest Depôt in England for MARBLE CHIMNEY-PIECES of superior quality and workmanship is the Westminster Marble Company's Patent Works, Earl-street, Bridewell street, Millbank. An inspection of their superior Stock of Statuary, Sienna, Black and Gold, Vein, and other Chimney pieces, Tombs, Monuments, Tablets, &c. is earnestly solicited.

BANGOR WHARF, King's-road-bridge, Camden-town. STRINGFIELD and COOPER, late W. W Rawlins, beg to call the attention of Builders and others to their stock of Bangor slates, laths, plaster, Roman, Portland, and Keene's cement, blue lias, Dorking, and chalk lime, plasterers' hair, Yorkshire plain, pan, and ridge tiles, glazed sewer pipes, closet-pans, and traps, Welsh fire-bricks, gravel and shells for garden paths, ballast, sand, &c. Materials landed, wharfed, and carted.

VALENTIA SLATE SLABS.—The Valentia Slab Company invite attention to their Slabs now supplied, of very large dimensions and of superior quality. They have been used at the British Museum, National Gallery, Bethlem Hospital, various Lunatic Asylums, the Ordnance Works, Model Prison, Pentonville, and other Penitentiaries; Malting Floors in Bedford-shire and Hertfordshire, Breweries, the Race Stand at Brighton, Pirmouth Barracks, and are kept in stock in large quantities by Messrs. FREEMAN, Millbank-street; also by Messrs. Sharpe, Tooley-street; and Messrs. Braby's, Belvidere-road, where terms may be obtained.

THE TREVALGA SLATE COMPANY invite particular attention to their SLATE in SLABS, which will be found on inspection to be vastly superior in strength to any other, and admirably adapted for shelves, Cisterns and every description of Slab work, Cisterns, Sinks, Slate Tanks, with slate-pipes sides, for fish ponds, &c. and every description of Slab work wrought and fixed on the shortest notice. 1½ inch Slate Paving, in runs, planed on one side, and squared, fitted to lay, warranted stronger than 3-inch York, 6d. per foot super.—Baltic Wharf, Commercial-road, Lambeth.

MAGNUS'S ENAMELLED SLATE.—Mr. MAGNUS having, at great expense and hazard, and by dint of unwearied perseverance during a period of FOURTEEN YEARS, succeeded in obtaining for his invention of Enamelling Slate to imitate Marbles the PATRONAGE of HER MAJESTY, PRINCE ALBERT, and the Aristocracy of nobility, and most every Architect, Builder, and Decorator of any note, and having been rewarded with the MEDAL of the SOCIETY of ARTS and the PRIZE MEDAL of the GREAT EXHIBITION, finds that his success has given rise to a number of petty imitators, who, though they may not affect him in a pecuniary light, inflict vast injury by their wretched imitations of his productions, which are, in most cases, passed off as "MAGNUS'S ENAMELLED SLATE." He therefore respectfully requests those who are disposed to patronize his establishment, to assure themselves that they are supplied from his manufactory, as unfortunately AT LESS THAN HALF THE COST AND LABOUR NECESSARY TO SECURE PERMANENCY, a counterfeit can be made which will not endure, and damages the reputation of his Enamelled Slate. This caution is particularly necessary in regard to the fittings of the retiring places at railway stations, and wherever there is much wear.
N.B. The Tariff for 1854 is now ready.
Pimlico Slate Works, 39 and 40, Upper Belgrave-place.

SLATES, Slabs, Cisterns, Enamelled Chimney-pieces, Plain ditto, Urinals, Baths, Sinks, Lining, Skirting, Roofing, Hall-me Floors, Panels, Ridge and Roll, and Slab-work generally. Export orders supplied without detention, a large stock of slates and manufactured goods being usually kept on hand. Price-lists may be had upon application, either personally, or by post.—Address, JOSEPH BRINDLEY, Slate Merchant, Steam Slate-works, Bermondsey-wall, London.
N.B. Wharf opposite the Wapping Entrance of London Docks.

GUERNSEY GRANITE.—C. D. BENNETT, Stone Merchant and Quarry Proprietor, Saint Sampson's, Guernsey, in returning thanks for past favours, begs to inform his friends and others that he is always prepared to supply them with first quality Broken Granite on liberal terms, from a single cargo to 20,000 tons, or upwards.
N.B.—Pitching, Curb, &c. as usual.

GRANITE.—The Cheesewring Granite Company, of Liskeard, Cornwall, are now prepared to supply Granite of excellent quality, and the largest sized blocks. Prices may be ascertained on application to N. TREGELLES, 3, Pinner's-court, Old Broad-street, City; or to JAS. J. TRATHAN, Liskeard.

PAVING, in great varieties.—Sinks, sills, steps, &c.; rubbed coping; tooled ditto; rubbed and tooled sills; Harehill and self-faced slab; rubbed York paving; pipes, pots, &c. all at low prices. Builders and masons are invited to inspect a list sent free on application to E. and W. STURGE, Bridge-wharf, City-road. -Established 1821.

CAEN and AUBIGNY STONE.—F. FOUCARD, Stone Merchant and Quarry Proprietor, Quai des Abattoirs, Caen, and at 8, Red Lion-street, Borough-market. Contracts taken for any quantities. Cargoes shipped to order from Caen to any port.

"	"	1¼	"	26s. 6d.;	24s. 6d. "

All other kinds of wood goods at equally reasonable prices, for Cash. N.B. The extensive saw-mills now erecting on the wharf, are expected to be ready for work by the 1st of May.

PREPARED FLOORING, &c.—ALFRED ROSLING begs to inform parties shipping wood goods to the colonies that he can supply any quality or description at the lowest prices of the day, and with the greatest possible despatch. Also Mouldings in great variety. A large stock of Baltic deals kept in bond for export.—Southwark-bridge Wharf, Bankside.

TO BUILDERS AND OTHERS.
AT the LOWEST PRICES.—TIMBER, DEALS, MAHOGANY, and WAINSCOT. A large assortment of seasoned prepared FLOORING and MATCH-BOARDING, of all descriptions. Also an extensive stock of dry White, Yellow, and Pine out Stuff, Slating, Battens, Paintly Laths, Oak Plank, Sash Stiles, &c. Timber of all kinds, Planks, Deals and Battens, fitched from the docks, sawn by patent machinery on the best manner and delivered at the shortest notice.—THOMAS JACKSON, Sawing and Planing Mills, Commercial-road, Pimlico London.

TO BUILDERS CARPENTERS AND SHOP-FITTERS
THE REMAINING STOCK of FINE MAHOGANY VENEERS of the late Mr. C. TUELY, will be SOLD at REDUCED PRICES. Dry Wainscot, in board and plank; very dry Pine Deals and plank, on view at Bridge Wharf, City-road.

IMPROVEMENT IN WOOD MOULDINGS.—JAMES SIMMONS, Improved Moulding Manufacturer, respectfully returns thanks to his friends and customers, for the liberal patronage already conferred, and begs to say his present Stock will be found worthy their attention for variety and quality, being manufactured from the best dry pine only.—Steam-works, 20 North Wharf-road, Paddington-basin.
N.B. J. S. begs to inform his old customers and the public that Mr. Hart, his late travelling collector, has no authority to receive money or transact business of any kind on his account.

TO FANCY-WOOD MERCHANTS
VENEER CUTTING-MACHINE (by knife only), by which process double the number of veneers can be produced more than by the ordinary method. For specimens of work and particulars of price, apply to J. CLARK, Sole Patentee, Veneer Cutting Works, 44, Robert-street adjoining the King's-road Saw-mills, Chelsea.

TIMBER WHARF, SAWING, PLANING, and MOULDING MILLS, Belvidere-road, Lambeth.—The General Wood-cutting Company beg leave to inform their customers that the temporary additional charge of 20 per cent. on their mouldings (as advertised on the 8th of November last) is removed, from this date, consequently, the prices will be those inserted in their Moulding List, as heretofore.
1st January, 1854.

EAST HAM.—BUILDING LAND.—TO BE LET, on BUILDING LEASES, several eligible lots of LAND, close to the Rising Sun Inn, and near the Forest-gate Station, and immediately abutting on the London, Tilbury, and Southend Railway, and on the high road to London. The lots will have a frontage of 60 feet with depths of about 150 feet, and are well adapted for the erection of houses of from 25l. to 35l. a year. Money advanced on security of the buildings erected on the certificate of the surveyor.—For particulars apply to Messrs. GEO. MICHELSON and SON, 4, Old Palace-yard, Westminster; or to THOS. SMITH, Esq. 14, Hart street, Bloomsbury.

CRANBOURNE-STREET.—TO BE LET, on REPAIRING or REBUILDING LEASE, No. 14 in the 3 streets, and 2 and 3, Cranbourne-passage adjoining; also, 57, Greek street, Soho.—For particulars apply to Messrs. GEO. MICHELSON and SON, 4, Old Palace-yard; or to THOS. SMITH, Esq. 14, Hart-street, Bloomsbury.

BUILDING LAND TO BE SOLD or LET, on long building lease, in plots, at EALING, WOOD GREEN, near HORNSEY, ENFIELD, PUTNEY, BROCKLEY HILL, near FOREST HILL, WARE ROAD, HERTFORD, CASTLE HILL, READING, and HOUND HILL PARK, BRIGHTON.—Apply at the Offices of GEORGE MORGAN, Esq. 5, Chancery-lane.

GROUND TO LET, for Building, in the parish of SHOREDITCH, at the rear of Messrs. Bellingham's Distillery, Queen's-road, Dalston, in Plots, which will be pointed out by Mr. HARRIS, at the Counting-house on the Estate; and in the parish of ISLINGTON, at Green-road, near the Cock, Upper Holloway, in Plots, which will be pointed out by Mr. GREEN, at the Counting-house, on the Estate.—Apply for particulars as above, or to D. HUGHES, Solicitor, 13, Gresham-street, Guildhall.

BUILDING GROUND.—Some Frontages, in Oakley-street, Chelsea, of 18 feet 6 in. for the erection of third-rate houses of eight rooms, TO BE LET, at 7l. 7s. ground-rent. Term, about eighty-nine years; main sewer formed. The street is 60 feet wide, leading to the chain-pier and intended embankment. Soil, gravel. Apply to EUSTACE ANDERSON, Esq. Solicitor, 13, Lincoln's-inn-fields; EDWARD GUILLAUME, Esq. Solicitor, 1, Angel-court, Bank; or to SOLOMON PAIN, Esq. Solicitor, 9, New-inn, Strand.

CRYSTAL PALACE.—SHOPS.—FOUR PLOTS of Freehold Land, suitable for first-class SHOPS, the property of the company, and close to the Palace, may be had on BUILDING LEASE, with option of purchase.
For particulars apply to Messrs. BANKS and BARRY, Architects and Surveyors, 37, Sackville-street, Piccadilly.

CRYSTAL PALACE.—BUILDING LAND.—The well-known DULWICH WOOD, the chief ornament of this beautiful locality, has been let on building lease, and most attractive plots for building Mansions or Villas may now be had for a term of eighty-four years, land-tax redeemed. Leases may be had direct from Dulwich College
As it is the object of the leaseholder and of the College to preserve the greater part of the wood, only a limited number of houses will be built; and the residents will have access to the woods themselves, which will be preserved for their use only. A good supply of water from the Lambeth Company's mains may be had.
Apply to Messrs. BANKS and BARRY, Architects and Surveyors to the Sydenham hill Estate, 37, Sackville street, Piccadilly.

CRYSTAL PALACE.—BUILDING LAND, for the erection of a first-class tavern, shops, and private residences, on the Palace-road Estate Anerley, opposite the entrance to the Palace railways, and overlooking the ornamental grounds of the Palace. TO BE LET, for long terms, at moderate ground-rents.—Apply to Mr. JAMES BRAGG, Surveyor, Devonshire-villas, Norwood-junction.
N.B.—Advances to builders, if required.

DOWGATE-HILL.—BUILDING LEASE, TO BE LET, all that desirable piece of vacant GROUND, on the east side of Dowgate hill, opposite Tallow Chandlers'-hall, with a frontage of 80 feet.—Apply to Mr FISHER, the Clerk at the Hall; or at No. 80, Fenchurch-street, where a plan can be seen.

BUILDING LAND TO BE LET, at ACTON, HOMERTON, WIMBLEDON, CHERTSEY, (close to the Station), SUDBURY (near Harrow), at CROYDON (within a mile of the Station), and at NORWOOD (within three minutes' walk of the Station), and LOWER NORWOOD, near Tulse Hill, admirably situate for building purposes.—For particulars apply to Mr. W. F. LOW, Solicitor, 67, Wimpole-street, Cavendish-square. Leases direct from the Freeholder. Money advanced if required.

NORWOOD.—BUILDING LAND TO BE LET, within three minutes' walk of the Norwood Station in Wimpole (hereafter to be called Lincoln) Road, South-hill, with a full view of the Crystal Palace and Grounds, and only one mile distant, southern aspect, with some of the most magnificent views in the county of Surrey, on which building has commenced, and houses nearly completed for occupation, close to a church. The roads are substantially made, and the water of the South Lambeth Company, from Thames Ditton, laid on to the houses erected. Builders and gentlemen desirous of a first-rate site will find this spot worthy their attention, and advances will be made if required. For further particulars and plans of the Estate, apply to Mr. W. F. LOW, Solicitor, 67, Wimpole-street, Cavendish-square. Upwards of Forty trains stop at the Norwood Station during the day. Leases direct from the freeholder.

FREEHOLD BUILDING LAND.—TO BE SOLD, in Plots of 50 feet frontage by 130 feet deep, in the Thorpe Lee-road, about half a mile from Staines bridge, and a mile from the Staines station of the London, Richmond, and Windsor Railway. Price 20l. per plot.—Apply to Mr. SLADEN, Solicitor, 38, King street, Cheapside; or Messrs. BROWN and ROBERTS, 22, Throgmorton-street.

FREEHOLD BUILDING LAND TO BE SOLD, on Surbiton-hill, Kingston Station, South Western Railway, within half a mile of the station, in Plots, varying from five to Thirteen Acres, adapted for first-class villas. Price from 200l. to 250l. an Acre, according to situation.—Apply to Mr. POWELL, House-agent, near the Church, Surbiton hill, Kingston, Surrey.

TO WHARFINGERS, BUILDERS, ENGINEERS, MANUFACTURERS, RAILWAY CARRIERS, &c.
TO BE SOLD, FREEHOLD and part LEASEHOLD, BRUNSWICK WHARF and DRAW DOCK, VAUXHALL, many years established in the Brick, Tile, Slate, and Lime Trade, &c. Excellent residence, offices, stabling, and warehouses in substantial repair. Area near 14 acre adjoining the South Western Railway, with 135 feet frontage to the River Thames, and 140 feet next the high road leading to Wandsworth.—Apply on the Premises, or to Mr. T. M. NELSON, Architect, Regent Chambers, No. 38, Regent Circus, Piccadilly.

BERKSHIRE.—READING.—To FREEHOLD LAND SOCIETIES or PRIVATE SPECULATORS.—FOR SALE, by PRIVATE CONTRACT, or TO BE LET, on building leases, either in one or several lots, the greater portion of an ESTATE of 37 acres, which has been laid out, and is admirably adapted for building purposes. The whole is ornamentally timbered, and divided into half acres and larger quantities, with good quickset hedges, and is pleasantly situate on rising ground, commanding extensive views of the adjoining country, and within twenty minutes' walk of the Reading Railway Stations and the Market-place.—For further particulars, and to view, apply to Mr. WILLIAM WEELON, Solicitor, 61, Minster-street, Reading.

FREEHOLD LAND for SALE.—To BUILDING SOCIETIES and OTHERS seeking eligible investments.—About THREE and a HALF ACRES of LAND, with two substantial and recently built houses thereon, within nine miles of London, and about five minutes' walk from two railway stations.—Apply to Mr. H. D. ROBERTS, Solicitor, 8, Barge-yard-chambers, Bucklersbury.

TO BUILDERS AND UNDERTAKERS.
TO BE DISPOSED OF, in a decidedly healthy and rapidly improving neighbourhood, a compact BUILDER'S PREMISES and BUSINESS, doing a respectable trade.—Apply to F. DEW, Wellington-road Hounslow.

TO CARPENTERS, BUILDERS, MEMBERS OF BUILDING SOCIETIES, AND OTHERS
TO BE SOLD, Four well-built fourth-rate SIX-ROOMED CARCASSES. Part of the purchase-money may remain till the houses are finished.—Apply at 30, Grafton-road, Kentish-town.

ABOUT Two or more Acres of well-drained FREEHOLD LAND required in the neighbourhood of London for the erection of a public charity. Persons having such property to sell can forward particulars of locality, site, frontage, mode of access, and price, to S. S. Messrs. Rundell and Phillips, 39, Newgate-street, City, London, by ELEVEN o'clock, on or before TUESDAY next.

ST. MARGARET'S, near RICHMOND.—CONSERVATIVE LAND SOCIETY.—RIGHTS of CHOICE in this valuable Estate are now on SALE, at the Offices, 33, Norfolk-street, Strand. The Register of the Rights to be disposed of is open daily for public inspection. The allotment is fixed for WEDNESDAY, the 7th of JUNE.
CHARLES LEWIS GRUNEISEN, Secretary.

ARCHITECTURE, CIVIL ENGINEERING, and SURVEYING.—Messrs. HYDE, SMITH, and LEWIS, Architects, Civil Engineers, Surveyors, &c. beg to inform their friends and the public that they have rebuilt upon their large and capacious Offices with every requisite, including Models and Instruments of every description. The COURSES are all remodelled and enlarged, embracing all the latest improvements. Gentlemen who cannot attend at the Offices can be attended at their residence, in any part of the country, by Mr. SMITH or Mr. LEWIS.—Prospectuses and full particulars may be had by applying at the Offices, 3, Guildford-street, Russell-square.
N.B. An Evening Class is also opened for Architecture and Civil Engineering Drawing. Terms, One Guinea per Quarter.

THE ARCHITECTS', ENGINEERS', BUILDERS', and OPERATIVES' DRAWING CLASSES for the study of ARCHITECTURE, CIVIL ENGINEERING, &c with the practical application of Geometry, Perspective, Ornamental, and Mechanical Drawing of every description: Conducted by J. HILL, Architect, assisted by mathematical and mechanical masters.—Offices, 15, Old-street (late Hatton-row).
Terms. Daily instruction. Entrance fee 10s. 6d and 2l. 2s per quarter, or 1l 10s per month. Hours of attendance 10 till 4 and 6 till 9.
Evening instruction, 1l 1s. per quarter, with the entrance fee, or 8s. per month. Hours of attendance 6 till 9, or 7 till 10 (Saturdays excepted).
Instruction in Measuring and taking out Quantities, included in the above terms. Patentees and builders assisted. Plans taken and drawn out on conveyances. Detailed prospectuses to be had on application.

MESSRS. RODGERS and STYRING, of Sheffield, beg to acquaint the nobility, clergy, gentry, and architects that they have made arrangements for the DECORATION OF CHURCHES, MANSIONS, PUBLIC BUILDINGS, &c. in the most correct style of art from designs, and under the direction of H. TAYLOR BULMER, Esq. of Sunrawbury Bank, whose works may be seen at St. Barnabas's Church, Pimlico; St. Mary's, Farm-street, Berkeley-square, London; the Great Hall of the Sheffield Mechanics' Institute; and numerous other works in town and country.

HOUSE DECORATIONS.—J. MAC LACHLAN, Painter and Decorative Artist, 35, St James's-street, and at Clapham-common, informs Architects, Surveyors, and others, that he is practically acquainted with his trade in all its details, and respectfully requests a trial from those who may wish to have their work nicely executed at a very moderate charge, and punctual to time. J. MacL. will be glad to make designs for the decoration of rooms, or public buildings, in any part of the kingdom, with estimates. —Tenders for general repairs

TO ARCHITECTS, CIVIL ENGINEERS, CONTRACTORS, AND BUILDERS.
A SURVEYOR, of considerable practical experience, is ready to take out quantities, and prepare estimates, or measure off work, and make out the bills for any Architect, Civil Engineer, Contractor, or Builder, who may require such aid.—Letters to be addressed to A. B. care of Mr. Weale, Architectural Publisher, 59, High Holborn.

JOHN WEEKS & CO., HORTICULTURAL BUILDERS, King's Road, Chelsea, think it now necessary to inform the nobility, gentry, and public in general, that they have NOT HAD ANY CONNEXION WHATEVER with the EDWARD and ALFRED WEEKS, who lately carried on business at Chelsea.—May 18th, 1854.

TO DECORATORS, &c. AT THE CRYSTAL PALACE.
UPHOLSTERERS' CLOTHS, BAIZES, and DRUGGETS in every width, colour, and quality, at HILL and SON'S, 88 and 89, St. Martin's-lane, Charing cross.

TO PLASTERERS.
A GOOD SUBSTITUTE for HAIR.—SHORT COCOA-NUT FIBRE is not injured by hot lime or mortar more than hair; is not one-third the price, and is ready for use without such a loss of time and labour as there is in beating and cleaning hair.—For samples and particulars, apply to the PATENT COCOA FIBRE COMPANY, King-ston-upon-Thames.

PURE WATER, for manufacturing purposes, may be obtained at very moderate cost by RANSOME'S FILTERING STONE. Estimates given for large or small quantities. Builders and Plumbers supplied with the association and other filters at trade prices. These filters, at one, two, three, and four guineas each, yielding 50, 100, 150, and 200 gallons per diem, will be found sufficient for ordinary domestic requirements; are self-acting, and not liable to get out of order. Reference to parties satisfactorily supplied with quantities up to 30,000 gallons per diem, may be obtained on application at the depôt, 71, Baker-street, Portman-square, London.

C. LEETWICH, VARNISH MANUFACTURER, LEAD, GLASS, and COLOUR WAREHOUSE, 21, Munster street, Regent's-park. 20s. per cwt. given for Old Lead. C. L. begs to call the attention of the Trade to his stock of plumbers' clip traps, plug ditto, brass work, &c. sheet-lead, and patent pipe, plate, patent plate, sheet and crown glass, white-lead, milk, colour, and varnish manufacturers for home or pavements, vaults, &c. 20 PER CENT GIVEN for OLD LEAD; GLASS ILLUMINATORS for FLOORS, AREA VAULTS, &c.

ELECTRIC COLOURS.—The ELECTRIC POWER LIGHT and COLOUR COMPANY is prepared to supply the trade generally with their Colours, which for quality and lowness of price are unequalled. Samples of the Colours may be seen at the Offices of the Company, No. 51, Pall-mall.—Address, W. PROSSER, Esq. Commercial Manager, Frogmore lane, Wandsworth, Surrey.

NORRIS'S PATENT RAILWAY CHAIR COMPANY beg to draw the attention of Railway Companies and Engineers to NORRIS'S PATENT RAILWAY JOINT CHAIRS. This patent has received the unqualified approbation of some of the most eminent engineers of the day, as the most effective, economical and perfect joint in use at the present time. The simplicity of its construction is such as will allow of its application on all kinds of railway, with the least amount of alteration to the ordinary traffic during the time that it is being laid down. The saving in the preservation of the permanent way and rolling stock, by the application of Norris's Patent, is incalculable; and wherever adopted must very considerably decrease working expenses. To railway companies, having old and bad roads, the principle is peculiarly advantageous, as its application will not only restore the road to a perfectly safe and serviceable state for many years, but, at the same time, bring into efficient use all the old and broken chairs. To the railway world in general, it is of the greatest value, as it admits of the easiest locomotion, and is most simple and economical in principle. Every information will be given, and models forwarded for inspection, on application to the Manager, at the Offices of the Company, Wolverhampton.

ROYAL ACADEMY of ARTS, Trafalgar-square.—The Exhibition of the Royal Academy is NOW OPEN. Admission from Eight o'clock till Seven. One Shilling Catalogue, One Shilling
JOHN PRESCOTT KNIGHT, R.A. Secretary.

ARCHITECTURAL EXHIBITION to be held in GLASGOW, in the Month of DECEMBER, 1854, under the Patronage of the Hon. the Lord Provost and the Magistrates of the City.
The Council of the Architectural Institute of Scotland have resolved to hold Architectural Exhibition in Glasgow, in the month of December next. This resolution has been come to from the conviction that so splendid a exhibitions of the nature now proposed, when conducted on a specific and form such as the best means, in our art, of conveying instruction to the public mind, and of creating a taste among its professors. They need hardly mention what is now so well understood, that, independent of other advantages, correct taste in the arts of design has become an essential element in the maintenance and progress of commercial prosperity. They therefore confidently hope that, by this Exhibition, a great stimulus may be given to the extension of artistic talent to a right direction hitherto much neglected, and that the public taste will be refined and elevated by a mode of instruction so practical and attractive.
In addition to Views, Models, Plans, and Details of Buildings, the Exhibition will embrace Specimens of the various Works of Art and Manufactures connected with Architecture, such as Carpets, Furniture, Tapestry, Hanging Draperies, and all Painted, Carved, and Sculptured Decoration.

MAUNDER'S TREASURY OF NATURAL HISTORY
London LONGMAN, BROWN, GREEN, and LONGMANS.

THE FREEMASONS' QUARTERLY MAGAZINE. New Series. Enlarged, price 2s. 6d. A Specimen Number will be sent on receipt of six postage-stamps the cost of postage. No. IV. for April just published.
GEO. ROUTLEDGE and CO. Farringdon street; and R. SPENCER, 314, High Holborn.

TO THE CABINET AND UPHOLSTERY TRADE.
SMEE and SON'S NEW BOOK of DESIGNS of CABINET FURNITURE, containing more than 600 designs, together with a Book of Prices, is now ready, price four guineas. To be obtained only at SMEE and SONS, Wholesale Cabinetmakers and Upholsterers, 8, Finsbury-pavement, London.

Forwarded free on receipt of Thirty Postage-stamps.
ARCHITECTURAL BOTANY. "Mr. W. P. Griffith sets forth, *secundum artem*, the geometrical distribution of foliage, flowers, fruit, &c. which he exemplifies in twenty-six floral designs, adopted from the vegetable kingdom."—*Gentleman's Magazine.*
3, St. John's-square, London.
. Part II. with numerous illustrations is nearly ready.

FRENCH in ONE MONTH, ditto German, and Italian, by DE PORQUET'S TRESORS, for translating English into the above at sight, 3s. 6d. each; also First French, German, and Italian Reading Books, Parisian Grammar, Pocket Dictionary.
London: SIMPKIN, MARSHALL, and CO.

"THE VICTORY," with the BODY of NELSON on board, towed into GIBRALTAR seven days after TRAFALGAR. The Celebrated PICTURE, painted by CLARKSON STANFIELD, Esq. R.A. for Samuel Morton Peto, Esq. M.P. On View at the GALLERY of ART, 53, Cockspur-street. Admission by Presentation of Card.
53, Cockspur street, Charing-cross.

SOUTHWELL CHURCH.
Imperial Folio, price 3l. 3s. sewed in stiff cover.
ILLUSTRATIONS of the COLLEGIATE CHURCH OF SOUTHWELL, in a Series of Ten Views, Executed in the Tinted Lithography, from Drawings by E. H. BUCKLER. With Architectural Description by the Rev. J. F. DIMOCK, M.A. Minor Canon.
London: SIMPKIN, MARSHALL, and CO.; Southwell: J. WHITTINGHAM.

ARCHITECTURAL PUBLICATION SOCIETY.—Instituted 1848. Copies of the works for the first year (1848-9) are required for new subscribers. The DICTIONARY OF ARCHITECTURE commenced for the year 1852-53, is supplied to members on payment of the annual subscription of one guinea.
Treasurer, THOMAS L. DONALDSON, Bolton Gardens, Russel-Square.
Honorary Secretary, WYATT PAPWORTH, Esq. 141 Great Marlborough-street, from whom a list of the works issued can be obtained.

TO DRAUGHTSMEN AND CIVIL ENGINEERS.
H. MORRELL, BLACK LEAD PENCIL MANUFACTURER, No. 149, Fleet-street, London.
These Pencils are prepared in various degrees of hardness and shades.

H H H for drawing on wood.	F F light and shading.
H H H for architectural use.	F for general use.
H H for engineering.	B black for shading.
H for sketching.	B B ditto ditto.
H B hard and black for drawing.	B B B ditto ditto.
H medium.	B B B B ditto ditto.

Sold by all the principal Stationers in town or country.

LIGHTNING CONDUCTORS.—R. S. NEWALL and CO. Patentees of the Copper Rope Lightning Conductor, beg to inform the nobility, clergy, &c. that they supply Lightning Conductors, with the point and all staples complete for one shilling the foot.
R. S. NEWALL and CO.'s Patent Copper Rope Conductor is being used by architects, engineers, and scientific men in all parts of the world.
OFFICES.—Gateshead-on-Tyne.
136, Strand, London.
67, Hanover-street, Glasgow
27, Dale-street, Manchester.

PURE GAS.—TO GAS COMPANIES, ENGINEERS MANUFACTURERS, and OTHERS.
PATENT CLAY PURIFICATION.—No cheap process has yet been discovered for freeing gas from ammonia, and the removal of the bisulphuret of carbon (the monster nuisance of gas burning) has been covered up in despair. Clay removes most these impurities, and when taken from the purifiers the bisulphuret of carbon is visible, completely blackening the clay. The light of the gas is increased in proportion to its thorough purification. The proprietors of the patent are now ready to grant licenses for its use.—Terms, and directions for the employment of clay, may be obtained from Mr. JOHN WHITTAKER, Agent to the Patentees, Gas Works, Wakefield

ARTESIAN WELLS, Boring for Water, Sinking Shafts, &c.—The Nobility, Gentry, Water Companies, Water Millers, Brewers, and Manufacturers of every description, may be supplied with any quantity, by DAVID GREENLEY, Civil Engineer and Patentee of Boring Tools, 10, Cumming-street, Pentonville. Pumps and machinery for raising water from deep wells boring tools, and well-pipes, for exportation. Men and tools supplied to bore for railroads, minerals, &c.

LEEDS TERRA-COTTA and SANITARY TUBE WORKS—Show-rooms, Great George's street, near the Town-hall, Leeds—WILKS and PERKINS, Manufacturers of every description of Ornamental Terra-cotta and Sanitary Wares, Trusses, Pots, Flower Vases and Pots, Chimney Tops, Bridge Tiles, Watercloset Pans, Fire-grate Backs, Fire-bricks, Quarries, &c.

THE PERMANENT WAY COMPANY call the attention of Railway Directors and Engineers to their PATENT RAILS, SLEEPERS, FISH JOINTS, and other important improvements, now in use on upwards of 2,000 miles of railway.
Extract from the half-yearly report of the Directors of the Midland Railway, February 21, 1854:—
"An important feature in the contract for the maintenance of the Permanent Way, is that the contractors are bound to reduce their charges to 2*l.* per mile per annum, whenever the Plan Joint, or certain other improvements are hereafter introduced."
Every information may be obtained on application to Mr. CHARLES MAY, C.E. the Manager; or Mr. WILLIAM HOWDEN, the Secretary, 29 Great George-street, Westminster.

LADDERS, BARROWS, &c. for SALE or HIRE.—G. ELL invites the attention of builders, decorators, and the trade generally, to the large stock of Ladders; examined, well-makers, and warranted. Barrows; Painters' Machines, Trestles, Steps, &c. he has always on hand, at a very low scale of charges. Manufactory, 4, TOTTENHAM-COURT, NEW-ROAD, opposite Hampstead-road.

TARPAULINS for COVERING ROOFS during Repairs. SCAFFOLD CORD and every description of ROPE used by Builders upon the lowest terms. Marquees and temporary Awnings on sale or hire. Orders per post receive the most prompt attention.—WILLIAM PIGGOTT, 115, Fore-street, City. Manufacturer, by appointment, to her Majesty's Honourable Board of Ordnance.

The Builder.

SATURDAY, MAY 27, 1854.

BYRON says something about—

——"the perils that environ
The man who meddles with cold iron:"

and although he certainly did not mean iron in the shape of girders and columns, the remark may be quite correctly extended to those who without proper knowledge take upon themselves the use and disposition of these important elements of a fire-proof construction. The fall of the cotton-mill at Oldham in 1844, not to mention half a dozen other disasters, may be pointed to as showing the want of judgment and of knowledge that has been displayed in the use of this material; and even in buildings of later date, evidence of ignorance of the laws which govern its strength, or of great inattention to what these laws should teach, may often be observed.

Mr. Fairbairn's new work "On the Application of Cast and Wrought Iron to Building Purposes" is eminently calculated to diffuse correct information on these heads; and we cordially recommend it to the study of all our readers,—even to those most versed in the subject, because it records the most recent experiments, and describes the latest important application of them.* It consists of three parts and an appendix: No. 1 treats of *cast*-iron beams for supporting the floors of buildings, including compound or trussed cast-iron beams or girders: No. 2, of *wrought*-iron beams for the same purpose, with experiments on trellis-girders; and No. 3, of the construction of fire-proof warehouses, and gives a description of the enormous pile of buildings known as the Saltaire Mill, near Bradford, in Yorkshire—a mill so large that, when it was opened last year, 3,500 guests sat down to dinner in the combing-shed without being hot or crowded! One main object of the book is to recommend (as we have often done, and that, too, at a time when there were fewer to agree with us than there are now) "the advantages of wrought-iron beams or joists, in substitution of the more cumbersome and uncertain ones of cast-iron now in general use." Our objections to trussed girder-beams are also fully borne out by the experiments recorded in these pages, and the able theoretical investigations of Mr. Tate.

The first instance on record of the successful application of cast-iron beams to building purposes appears to be in a mill built by Messrs. Philips and Lee, of Manchester, in 1801, for which Boulton and Watt designed the beams and columns. Unaided by previous experiments, Watt made a tolerably correct approximation to the form which affords the greatest strength with a given quantity of material, and yet so much does strength depend on the form, that the same quantity of metal that Watt's beam contained might be run into a shape but slightly different which would carry at least one-third more weight. The form adopted by Watt prevailed however for a quarter of a century, and then (1827) Mr. Hodgkinson commenced his inquiry at our author's works, and published the results in the "Memoirs of the Manchester Philosophical Society." Mr. Fairbairn had himself previously made some experiments with a view to improve the design of cast-iron beams, and so too had Tredgold. The latter adopted and recommended the beam with equal flanges at top and bottom as the strongest and best form. (Fig. 1.) The correctness of this conclusion, however, was refuted by experiment, and it was conclusively shown that the strength was increased by enlarging the size of the bottom

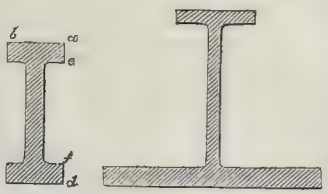

FIG. 1. FIG. 2.

flange, and as shown by fig. 2, which is now considered the section of greatest strength.

The introduction of the new form of beam gave increased confidence to constructors, and enabled them to increase the distance between supporting columns from 14 feet to 20 feet, and then to 25 feet. In bridges, Mr. Fairbairn thinks, where the span does not exceed 40 feet, this form of girder may be used with perfect safety, if proper precautions are taken to ensure sound and perfect castings.

Truss-beams grew out of the knowledge that wrought iron possesses great powers of resistance to extension, while cast iron presents great resistance to compression. In these beams wrought iron is solely employed to give strength to the bottom part of the beam by its tensile resistance, while cast iron is employed in the top to resist the compression; and if the two materials could be brought to act in perfect concert, the arrangement would doubtless effect great economy of material; but it appears clear that this is impracticable. Under the most favourable circumstances, there is very little gained in the strength of cast-iron beams by the addition of malleable iron truss-rods.

Beams wholly of wrought iron are of recent origin. At first the box-beam was employed,

FIG. 3.

FIG. 4.

of which we give a section (fig. 3), but Mr. Fairbairn gives the preference to the plate-beam, (fig. 4.), on account of its simplicity of construction, and he dwells at some length on the advantages which may be gained by its introduction on a large scale in the building of warehouses, cotton and flax mills, and dwelling-houses. Amongst the advantages is "the scope which it gives for an extension of space to any distance commensurate with the convenience of the establishment, or the taste of the architect or engineer. Most of the improved cotton-mills are from 60 to 65 feet in width, with two or three rows of columns, at distances of 15 to 16 feet across the mill, and from 9 to 10 feet in the direction of its length. These columns present serious obstructions to the convenient arrangement and free working of the machinery, but they cannot well be avoided where cast-iron beams are used. By the employment of wrought iron they quickly vanish, as one row of columns in the middle, with only two beams in width, not only meets the objection, but removes all doubts as to the security of the structure. In these constructions, however, it must be borne in mind that an increase of space is attended with a considerable increase of expense; but when the latter is not a serious consideration, fire-proof mills might be built upwards of 60 feet in width without the introduction of a single column or any other obstruction whatever. In large public buildings this may be effected with perfect ease, and the beams so constructed as to carry a load of 4 to 5 tons to the square yard."

In a building which requires a centre column with a distance of 30 feet between the bearings, as shown in the following cut (fig. 5), the beams, 31 feet 6 inches long and 30 feet between the supports, may be composed of plates 22 inches deep, $\frac{5}{16}$ths thick, and angle iron $\frac{3}{4}$ths of an inch thick, riveted on both sides. The breaking weight of this beam Mr. Fairbairn puts at 27·5 tons in the middle, or 55 tons distributed equally over the surface.

Assuming that the cost of cast-iron beams and wrought iron plate girders be nearly the same, although he is of opinion that the latter might be made to be even cheaper than cast iron, we have in the case of the wrought iron not half the weight of metal to carry; and, moreover, the superior lightness of the wrought iron will enable us to fix the beams in their places at considerably less cost.

"Should this description of beam become general in its application, it is more than probable that all those under 12 cwt. might be delivered at once, of the required form, from the rolling-mill; and it would be premature to

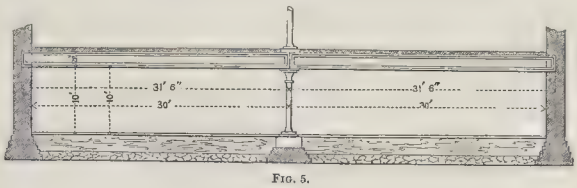

FIG. 5.

assume, that even the larger sizes, such as we have just described, could not be manufactured in the same way. The skill and intelligence of the iron manufacturers of this country have surmounted greater difficulties; and I have no doubt that a demand has only to be created in order to insure perfect success in all the manipulations connected with that important process. If this could be accomplished, a very important saving of the mineral treasures of the country would be effected; nearly two-thirds of the metal would be saved, and the price (supposing the beams to be taken from the rolls), reduced to nearly one-half, or from 16*l.* to 8*l.* or 10*l.* per ton. Under these circumstances, cast-iron would be no longer admissible for such a purpose, and buildings would be rendered much more secure from the chance of failure and equally secure from the ravages of fire."

We have before now recommended that Government should offer a sufficiently large premium, say 1,000*l.* for the production of the best machinery to roll large girders.

In the manufacturing districts many of the newly-erected buildings are made fire-proof; and in the construction of warehouses for the reception of merchandise elsewhere, the same system is being adopted to a certain extent, and will be more so. The author points out the urgent necessity of building all warehouses so as to be secure against fire, and gives the following as the principles on which they should be constructed:—

"1. The whole of the building to be composed

* On the Application of Cast and Wrought Iron to Building Purposes. By William Fairbairn, C.E. F.R.S. &c. John Weale, 59, High Holborn. 1854.

of non-combustible materials, such as iron, stone, or brick.

"2. In order to prevent fire, whether arising from accident or spontaneous combustion, every opening or crevice communicating with the external atmosphere to be closed.

"3. An isolated stone or iron staircase (well protected on every side by brick or stone walls) to be attached to every story; and the staircase to be furnished with a line of water-pipes, communicating with the mains in the streets, and ascending to the top of the building.

"4. In a range of stores, the different warehouses to be divided by strong partition-walls, in no case less than 18 inches thick, and no more openings to be made than are absolutely necessary for the admission of goods and light.

"5. That the iron columns, beams, and brick arches be of strength sufficient not only to support a continuous dead pressure, but to resist the force of impact to which they are subject by the falling of heavy goods upon the floors.

"Lastly. That in order to prevent accident from intense heat melting the columns, in the event of fire in any of the rooms, a current of cold air be introduced into the hollow of the columns from an arched tunnel under the floors."

Mr. Fairbairn inclines to the belief that wrought-iron plates, one-fourth of an inch thick, 3 feet wide, and bent in the segmental form of an arch, 10 feet wide, with ribs of T iron at the junctions, the whole carried on rolled beams, having the haunches filled up with concrete to form level floors, will take the place of cast-iron beams and brick arches before long; and he includes full illustrations of the plan. To give a notion of the size of the structures in which fire-proof construction is being employed, he points to the cotton-mill of the Messrs. Whittaker, near Ashton-under-Line.

"The main building is 300 feet long, 60 feet wide inside, and six stories high. It contains, including the weaving-shed and warehouse, 24,000 square yards of flooring, about 40,000 spindles, and 1800 looms. It cards, spins, and weaves into cloth about 54,000 yards, or 30 miles of calico per day. In the transmissive machinery it gives motion to 92 or nearly 100 spur and bevel wheels, 4,800 feet of shafting, on which are fixed 1,250 drums or pulleys for driving the different machines; the whole of which weighs 460 tons. This great weight, exclusive of the preparatory and finishing machinery, is kept in motion, at a velocity varying from 50 to 200 revolutions per minute, by two engines of the nominal power of 300 horses, but whose actual duty is equal to a force of upwards of 800 horses, in operation for ten hours per day throughout the year. Taking the year at 316 working days, this gives the enormous production of 17,064,000 yards, or 9,480 miles of calico per annum."

Beside the Saltaire-mill, however, already mentioned, it must "hide its diminished head." That pile is six stories high, 550 feet in length, 50 feet in width, and about 72 feet in height! The top story, being above the entrance archway and engine-houses, extends the whole length, and is supposed to be the largest room in Europe, not excepting the long gallery of the Paris Louvre. The whole structure is fire-proof, with stone walls, cast-iron columns, and hollow brick arches. Of this building, however, we may speak more fully another time: our present purpose is to make known the scope of Mr. Fairbairn's treatise, and recommend the study of it.

Bridgewater Exhibition in aid of Church Restoration.—An exhibition of works of art, manufactures, natural curiosities, &c. is to be opened on 1st August, at Bridgewater, in aid of the parish church restoration fund.

WINDOW JAMB FROM SANTA MARIA DEI MIRACOLI, VENICE.

The church from which this elegant specimen is taken is one of the gems of the so-called "pestilent Renaissance." Count Cicognara gives us the history of this building, which is not a little curious. This church was the offspring of a public competition, which was conducted in a manner singularly like the way in which competitions are conducted now. From an ancient document now existing it appears that about the year 1480 a committee was formed to judge of the designs sent in in competition for the new church. One was selected, but the document omits to state the name of the designer! (Very like a nineteenth century proceeding). The committee then met again to determine who was to carry out the design! (Another great similarity). This task was deputed to Pietro Lombardo, who it may be supposed, as it often happens now, had some friend on the committee. The designs were given to Pietro Lombardo, who went to work and finished the shell; when he came again to the committee and informed them that they had selected a design which did not provide for a nave ceiling, and in which the choir had been forgotten altogether! "Then," said the committee, "you must design these yourself!" What had become of the unfortunate architect who made the original design history does not relate, but in the year 1489 the church was completed,—ceiling, choir, and all, and if imagination may be allowed to fill up the blank, we may rest sure that Lombardo presented the committee with a very tolerable bill of extras. If we take this description and only alter the names, it would do almost *verbatim* for the history of the proceedings of some English country town committee, and yet this happened in the days and native city of Titian and Tintoret. So much for "the foundations," now for the superstructure.

This is a small church of a very simple and beautiful plan. The nave is oblong, with a wood ceiling and a richly-carved western gallery. The choir is square on plan surmounted by a cupola on pendentives, with exquisite little circular windows filled with stained glass in the tympana of the arches. This choir is elevated on a lofty flight of steps, having a balustrade and wall on either side, having two small doorways and two exquisite little marble pulpits corbelled out. The choir arch, the altar-rails, and the seats for the clergy, are of the most rich and fanciful design. Casts of many of these details now decorate the Renaissance Court of the Crystal Palace at Sydenham. Externally the church presents a composition of two fanciful orders, two superb doorways, and that beautiful appendage to Venetian architecture, a semicircular roof. The windows are all semicircular-headed, with beautiful splayed and moulded jambs. It is the internal jamb of the choir windows (singularly omitted in Cicognara) which is given in the annexed engraving. The most noticeable features in this elegant composition are the alternation and contrast of two different kinds of ornament. The one sort boldly and deeply cut, the other sort very lightly and delicately so. The one sort *incised* in the moulding, the other *relieved upon* the moulding. This is a species of contrast that was thoroughly understood by the *cinque centisti*, and is a substitute, in richly-ornamented compositions, for a contrast between ornament and plain surface.

A. B.

ON THE OPEN SPACES OF OUR METROPOLIS.

The somewhat exclusive title of my paper induces a very natural wish on the part of its author, that on examination there may be found in it "more than meets the eye," in the words themselves, though I fear I must not allow myself to indulge in such a consolatory aspiration; for on glancing over our great Metropolitan chart, I observe but comparatively few important sites left unencumbered by ever-expanding bricks and mortar, with the bright exception of "London's silent highway," the majestic Thames!

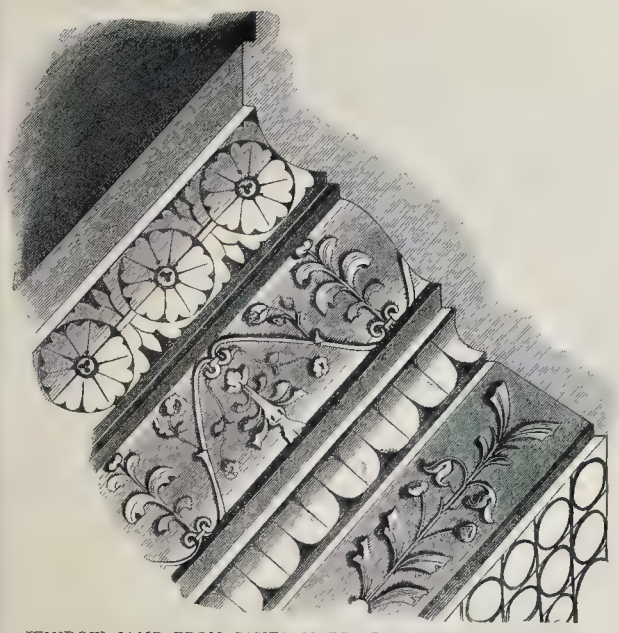
The immediate purport of this paper is to secure (as far as may be practicable) from future encroachments such open spaces as are now left to us; an attempt which I am the more induced to make by the now daily increasing desire in corporate and parochial bodies to adorn and improve our cities and towns. With this view it has occurred to me that some memoranda culled from the "wise saws" of our old Chronicles, and from the "modern instances" of our living authors, might afford useful information for our guidance: these, with my humble services as your Cicerone, I now offer during half an hour's imaginary ramble through the "open spaces of our metropolis."

Proposing at the outset to take "high ground," I can only regret that I have not a "Mons Capitolinus" for my summit level. In the absence of so crowning an eminence, I thought I could establish a Mons Palatinus on Tower-hill as my starting point, for Fitzstephen says, "on the east of London stands the Palatine Tower," but having consulted Dugdale and Wren, I believe the Palatine Tower referred to must have been at Castle Baynard: we must therefore, I consider, be content with Tower-hill without such lofty pretensions.

The historical associations connected with this spot are of intense interest, but on this occasion I feel that I must confine my remarks to the topographical part of my subject.

Stow describes the site thus:—"Tower-hill, sometime a large plot of ground, now greatly straitened by encroachments (unlawfully made and suffered), for gardens and houses." I am inclined to think, however, that these encroachments have since been removed to make way for two of the most successful buildings of the present century, the Trinity-house and the Mint, which stand on a very airy and refreshing open breathing-spot, which I have always found more free from fog and smoke than any other in the metropolis. I must not venture into the precincts of the Tower itself: the military engineers having taken possession of the architect's department, any remarks on my part might, perhaps, not be considered coming within the civil bounds of professional etiquette.

Descending from my Palatine flight, I approach the less aspiring "Fish-street-hill," which is, however, not without its glories, for upon it "was one great house which pertained for some time to Edward the Black Prince:" it formed also the main approach to old London-bridge, and it still possesses two of Wren's choicest works, the Monument, and the church of St. Magnus.



Travelling onward, I will not detain you at St. Mary-at-Hill, St. Dunstan's, Dowgate, or St. Bennet's-hills, nor need I stop on the declivity to the Fleet river (now arched over), by Ludgate on the south line of main thoroughfare, nor on that of the north by Newgate,

"Where from Snow-hill, black steepy torrents run;"

a Charybdis more dreaded by civic navigators than the Scylla-like obstructions of Middle-row; but even this omnibus-engulfing vortex may, I hope, before long be raised to its proper level: we surely need not despair when we see the energetic doings of the London corporation in the immediate vicinity, and know that one of its most influential officers, in his grand and comprehensive plan for a "central city terminus," made one "fell swoop" of this abominable blockade of progress and free communications.

Although I have for many years been acquainted with Saffron-hill, I have not found it to be a *district* possessing many attractions. I will therefore proceed with you to the more verdant and salubrious height of Primrose-hill (London's "Aventine mount," if you please), once the favourite resort of Londoners. It forms part of a large estate belonging to Eton College, and although its immediate site is, I trust, for ever secured to the public, its once picturesque ascent and tree-crowned summit are now sadly shorn of their former beauties: bricks and mortar have displaced its verdure, and I fear the most indefatigable botanist would now find great difficulty in discovering a solitary specimen of the flower from which the hill derives its name.

I possess a small view of Primrose-hill taken in its flourishing days by that truly English artist Thomas Girtin, the fellow-student of

WINDOW JAMB FROM SANTA MARIA DEI MIRACOLI, VENICE.

Turner, and one of the first to lead the way to that perfection to which the art of painting in water-colours attained, before the modern style of "relievo" in body colour was introduced.

Our parks come next in the order of my series. St. James'-park was first formed by Henry VIII. but it appears to have reached its zenith in the reign of Charles II. who is said to have employed Dr. Morrison upon its embellishment: others claim for Le Notre the merit of laying out the grounds, which contain about 87 acres. Rosamond's pond, the canal, and the decoy, have all now disappeared; and though the antiquary may lament their loss, the lovers of the picturesque are perhaps of opinion, that the present appearance of the park is fully as agreeable as it could have been in the days of the "Merrie Monarch," Nell Gwynne, Killigrew, and his Grace of Buckingham.

The adjacent Green-park was originally called Upper St. James'-park: it contains about 56 acres, but was formerly larger, a portion having been taken off in the reign of George III. to enlarge the gardens of Buckingham House. On the east side there are some noble mansions. Spencer House (the work of Vardy), one of our palatial gems; Stafford House, and Bridgewater House. I regret I cannot extend my admiration to the royal buildings on the opposite boundary of this park.

Hyde-park is stated to have been enclosed with brick walls in the time of Charles II. It was formerly a deer park, in which the French Ambassador hunted with Edward VI. in 1550. It has always been celebrated for its drives and promenades. Pepys relates, that he used to ride there in his coach, and that on one occasion he met the Duke of York, "who did eye my wife mightily." If the gossiping secretary could see Hyde-park at the present day, I wonder what his exclamations would be upon the Colossus from the Monte Cavallo! and on the Cavallo perched upon the Arco Colosso!

George IV. when Regent, gave us an additional metropolitan lung in the park named after his title, and we are indebted to the skill of the late Mr. Nash for its general arrangement and plan: it contains, with its surrounding terraces, altogether about 450 acres.

At the eastern extremity of London we have Victoria-park (another modern creation), and on my list I next find Whetstone-park; but as I am not acquainted with any beauties in it to describe, nor the number of acres to enumerate, I will pass on to Battersea-park, which can scarcely yet be considered *in esse;* while Highbury-park, which I fear is still *in nubibus*, I have not ventured to include in my catalogue.

Our public gardens may not inappropriately follow our parks. Kensington-gardens are "*par excellence*" the *gardens* of the metropolis: they originally contained only 26 acres, to which Queen Anne added 30, and George II.'s Queen 300, making altogether 356 acres, where—

> "The dames of Britain oft in crowds repair,
> To gravel walks and unpolluted air,
> Here while the town in damps and darkness lies,
> They breathe in sunshine, and see azure skies."

Spring-gardens, which in the time of Charles I. and II. had a bathing-pond, pheasant-yard, and bowling-green, in the reign of Victoria present no other rural feature than the name.

Privy-gardens have in like manner undergone a change, and bricks and mortar have now invaded the fair "three and a quarter acres," which Pepys describes as having been laid out in his time in sixteen compartments, having a standing statue in the centre of each.

The Temple-gardens are fortunately still preserved to us in nearly all their integrity, represented in Canaletto's views: long, long, may they continue with their green plots, and flowers, and fountains "sparkling in the sun," and in the sweet words of Elia, "So may the fresh-coloured and cleanly nursery-maid, who, by leave, airs her playful charge in your stately gardens, drop her prettiest blushing curtsy as ye pass, reductive of juvenescent emotion."

Gray's-inn-gardens are also well preserved, and I expect are not very far different from what they were in the days of the *Spectator* and the *Tatler*, saving the encroachments of Verulam and Raymond's buildings. Lord Bacon is said to have planted some of the trees; and Howell, writing from Venice, in 1621, to Mr. Richard Altham, in Gray's-inn, says, "I would I had you here (in Venice), with a wish, and you would not desire in haste to be at Gray's-inn, though I hold your walks to be the pleasantest place about London, and that you have there the choicest society." Mr. Cunningham, in his instructive "Hand-book of London" observes, that the gardens in Charles II.'s time possessed an uninterrupted view towards Highgate and Hampstead. "We are stepping westward," says Mr. Cunningham; "Moorfields gave way to Gray's-inn, Gray's-inn to the Mall in St. James's-park; the Mall to the Ring, and the Ring to the Long Walk in Kensington-gardens."

Hatton-gardens' flourishing days seem to have departed in Evelyn's time; for the good knight describes the foundations being laid out "for a longe street and buildings designed for a little towne, lately an ample garden."

Many of the City companies' halls have gardens attached to them, the principal of which are those belonging to Drapers' Hall, in Throgmorton-street, which contain nearly two acres. These gardens are interesting to the London antiquary from the circumstances so minutely related by Stow, of the arbitrary proceedings, in 1541, of Thomas Cromwell, Earl of Essex. Stow's father had a garden there, of half of which the Earl deprived him: he tells us, "No warning was given him, nor other answer, when he spake to the surveyors of that work, but that their master, Sir Thomas, commanded them so to do: no man durst go to argue the matter, but each man lost his land, and my father paid his whole rent, which was 6s. 6d. the year, for that half which was left." Old Stow adds, "Thus much of my own knowledge have I thought good to note, that the sudden rising of some men causeth them to forget themselves." Ward, in his "London Spy," commends these gardens as a fashionable promenade "an hour before dinner-time." In 1552, we find the following regulations for these gardens:—"The gardyner to suffer no strangers to bowle, in case there be any of the company disposed to bowle in the place; neither to take erbys or fruite."

In our own days, we have our Zoological and Botanical gardens, richly compensating us for the loss of the Bear-garden in Bankside, the Dog and Duck in St. George's-fields, and the Cock-pit at Whitehall.

The fields of London as well as our gardens require some notice, and although it is complained that we have now "no more fields," we have still the open spaces, if not "the daisy'd banks embroidered o'er." Of these, for extent, Lincoln's-inn-fields claim the first notice. The earliest accounts describe them as the resort of bad characters, and as being used for breaking in horses.

In the *Daily Journal*, 9th July, 1735, we find that "the plan for beautifying Lincoln's-inn-fields is now before his Grace the Duke of Newcastle: there are to be four iron gates, one at each corner, and dwarf walls with iron palisades: this plan has been agreed to by the inhabitants."

In the reign of Charles II. Thomas Sadler, a notorious thief, who had the supreme daring to steal the mace and purse of Lord Chancellor Finch, made his mock procession, with his booty, at night, through Lincoln's-inn-fields; and, in our own days, mobs have assembled there to agitate questions of supposed political grievances.

On the south side of the square is the College of Surgeons, originally the work of Dance, but since altered and enlarged by Sir Charles Barry. On the west, stand Newcastle House, Powis House, and Lindsey House, the works of Inigo Jones: on the north side, is the Museum (formerly the residence) of Sir John Soane, a real lover and munificent patron of art, whose liberal feeling towards this Institute must always be gratefully remembered.

The east side of Lincoln's-inn-fields, which was formerly separated from the adjoining gardens by a low wall, now presents a successful group of buildings in the mediæval style, the first important work of a young friend of mine, who appears determined that the name of Hardwick shall continue to be associated with success in art, and worthy of the recent honour so deservedly bestowed by the Institute on his esteemed father. We have all heard that the area of Lincoln's-inn-fields is equal to the base of the great Pyramid. I must honestly confess myself no advocate for covering this most noble "of our open spaces" with buildings, however

useful or ornamental they may be; though we [illegible] to avail ourselves of [illegible] "open space," by providing good access to it.

Moorfields, within my recollection, were bounded on the south side by a long gloomy [illegible] building, with pavilions at the ends, enclosed by a high brick wall, with entrance piers surmounted by those master-pieces of Cibber, so characteristic of the abode of which they appeared to form a part. We must all rejoice that this hospital has been removed to a more open and spacious situation in St. George's-fields, where, thanks to the philanthropy and common sense of the age, the lunatic is now treated with skill and kindness, and that, immediately opposite to the site of the former repulsive fabric, there now stands a building devoted to the purposes of literature and science.

Casting a glance only at Goodman's-fields, Spital-fields, Pothill-fields, Spa fields, and passing through Bartholomew close, we enter that celebrated field, where, in days of yore, a Lord Mayor of London won his spurs, and William Walworth's unerring dagger became the heraldic emblem of London's chivalry.

The site of Smithfield is as full of historical interest as Tower-hill itself, and its reminiscences are about as painful: whatever may be its future destination, I feel confident that those who have the control will devote it to the purposes best suited to the requirements of the age, with a due regard to the interests of the adjoining Royal Hospital of St. Bartholomew.

The squares of London are well deserving a few words of notice: they form one of the most agreeable features of our metropolis, and I am not acquainted with any continental city in which they are equalled in point of number or in general arrangement.

St James's-square, formed in 1676, has always been inhabited by the gentry and nobility. There are some noble mansions in it,—the residence of our noble President,—Norfolk House, by Brettingham, Lichfield House by Athenian Stuart, and London House, by the present accomplished professor of architecture at the Royal Academy.

Grosvenor-square, so called after Sir Richard Grosvenor, who died in 1732, also possesses many noble mansions, and has more of an aristocratic air than any other of our London squares. An equestrian statue of George III. formerly in the centre, has disappeared. Portman-square, commenced in 1764, was not completed till twenty years afterwards. Manchester-square was formed in 1776. Cavendish-square was laid out in 1718: the north side, which was reserved for the residence of the Duke of Chandos, has been since built over, the two centre houses being, I believe, from the designs of Sir William Chambers. On the west side stands Harcourt-house, inhabited by the Duke of Portland, which presents with its high court walls and "*porte-cochère*," more of the appearance of a Parisian mansion than any other house in London. The equestrian statue in the centre is that of the Duke of Cumberland, and on the south side there has lately been placed a statue of the lamented Lord George Bentinck.

Hanover-square, named in honour of George I. was formed about 1718. This square, in connection with George-street, has always struck me as one of the most scenic architectural displays that London presents: the street expanding towards the square, the unique and elegant style of the surrounding mansions, the judicious mixture of red brick and stone, Chantrey's statue, and the successful ecclesiastical work of James, altogether produce the most agreeable effect.

Leicester-square was built about 1635. On the north side was formerly the residence of the Prince of Wales, father of George III. Hogarth, Sir Joshua Reynolds, and the celebrated John Hunter, the surgeon, dwelt here; and in St. Martin's-street adjoining, the immortal Newton lived.

I do not know whether we may consider this square as one of the lungs of St. Martin's parish: if it is, I fear its respiratory action must be somewhat impeded by the large obstruction now formed in its centre.

I cannot take leave of this square without a passing word of praise on the clever and original design of the Panopticon, the successful work of a talented young member of this Institute.

Trafalgar-square claims a front rank in our list of "open spaces," more particularly when putting forth its claim as "the finest site in Europe." When the decorative accompaniments to Nelson's Column are completed, and George IV. is allowed to have an equestrian companion on the now vacant pedestal, we may perhaps be better enabled to decide upon the merits of Trafalgar-square.

Of the Piazza proper of Covent-garden, I may remark that it was designed by Inigo Jones in 1631, with the arcade as at present on the north and east sides, the church on the west, and the wall of Bedford House on the south: the mansion was taken down in 1704: next this wall was a grove of trees where the market used to be held: in the centre of the square was placed a column with a dial.

Gay has well described the church and the square in these expressive lines:—

> "Where Covent-garden's famous Temple stands,
> That boasts the work of Jones' immortal hands,
> Columns with plain magnificence appear,
> And graceful porches lead along the square."

The present market was built in 1830, our brother member, Mr. Fowler, being the architect.

I must not weary you by a tour through the other squares of the metropolis, in Belgravia, Tyburnia, and Westminster. Bloomsbury, which the Grand Duke Cosmo was taken to see as one of the wonders of England; Finsbury and the Minories, all put in a claim for their "open quadrangular spaces," and in that gigantic effort of Post-office literature, the "Directory," I am told that more than 100 will be found enumerated. I am sure, therefore, I shall stand excused for having presented a selection only.

Of the greens in London, Clerkenwell and Bethnal are the only ones that now occur to me. Strype tells us that a mansion was built on the latter in 1570 by John Thorpe, the architect of Holland House.

Of yards we possess several, but I will only name the two Palace-yards, Scotland-yard, and Whitehall-yard.

The Tenter-ground and the Artillery-ground are both good-sized "open spaces." I believe the latter to be the only one where the military ardour of the citizens has a field for active exercise.

The markets of London, I fear, will not strictly come under the title of my paper as "open spaces," but I cannot altogether pass them over: however disposed I might feel to place them in the condemned schedule, the great improvements which are now making by the Corporation of London, under the excellent judgment of their architect, in the fields of Copenhagen and on the shores of Billingsgate, induce me to look forward to an early period, when the shambles of Newgate-street shall give place to an extension of the paths of literature of Paternoster, and the hides and the beeves, and the fish, the flesh, and the fowl of Leadenhall shall find a more suitable abode, and resign their present site to the enlargement of thoroughfares, and the increase of that important branch of industry and commerce, our colonial market!

There is one attractive feature in most continental cities which unfortunately is entirely wanting in London. I allude to planted avenues of approach, or surrounding Boulevards. What can be more agreeable and refreshing when escaping from the town's noisy streets than the shady repose of a leafy avenue? The effect both on entering and on departing is materially affected by the character of the thoroughfare. I trust, therefore, the day is not far distant when, in direct contrast to our New-road and City-road, Curtain-road, and New-cut, we may have a spacious open Via Regia from the Regent's-park to princely Hampstead, in accordance with the noble design of the accomplished Professor of Architecture of the Royal Academy.

My brother architects will readily recal to their minds those lines of Spratt's, introduced in the "Parentalia":—

> "Fountains and trees our wearied pride do please,
> Even in the midst of gilded palaces:
> And in our towns that prospect gives delight
> Which opens round the country to our sight."

I fear by this time your Cicerone—like many others of his class—must have nearly exhausted your patience. May I ask you kindly to extend it to me for a very short period, while I detain you with the most important part of my subject, "St. Paul's-churchyard."

Our indefatigable antiquaries have put in a claim for a temple to Diana on this spot, but Wren, who had a good opportunity of forming a judgment when preparing his foundations, discovered no corroborative proof in support of Apollo or Diana. Sir Christopher's own words are,—"I must assert that having changed all the foundations of St. Paul's, and upon that occasion rummaged all the ground thereabouts, and being very desirous to find some footstep of such a temple, I could not discover any; and therefore can give no more credit to Diana than to Apollo." And in the excavations for Messrs. Cooks' warehouse, no fragments of great antiquity were found, excepting the Runic stone, a cast of which our brother member, Mr. Knowles, has kindly presented to the Institute, and several short pieces of deers' horns: a Stukeley would immediately connect these with a fane to the goddess, and rear his temple with the same facility as a Paleologist constructs his gigantic monsters from a dental fragment, or a solitary vertebra. I should much prefer some columnar shafts and Ionic volutes to these pieces of deers' horns, which I think may possibly have been intended to form rosaries for paternosters. A statue, however, of a Roman soldier of the 2nd legion was found near the neighbouring Ludgate, and as the topographical inscription under the sculptured boy in the adjoining Pannier-alley informs us,

> "That if you search all London round,
> Still this you'll find the highest ground,"

it may be reasonably inferred that the site of St. Paul's Churchyard formed an important part of Roman London.

I may here perhaps be allowed to remark, that I doubt whether we have ever justly appreciated the importance and size of the metropolis in its Roman days: the numerous fragments of mosaic pavement that have been found, the Hypocaust at the Coal Exchange in Lower Thames-street, the numerous specimens of pottery and coins, and the great accumulation of *débris*, all tend to show that very considerable buildings must at that period have occupied sites now covered by far less substantial erections.*

S. ANGELL.

PREVENTION OF SMOKE FROM OUR ORDINARY FIRES.

ADMITTING, as seems clear, that it is a sufficiently simple and, moreover, a profitable matter to consume the smoke of large *furnaces*, there remains behind the great question of what is to become of the smoke issuing from the *one million* chimneys of our 300,000 private houses in London! That is the difficulty which if any man can satisfactorily solve, he will become one of the greatest benefactors of his age.

For myself, my desire in this letter will be abundantly gratified if I can, in some degree, induce our men of science, our mechanicians, and our philanthropists, so to consider this great question, that ultimately, in the progress of our social reforms, the nuisance of smoke may be utterly abolished from our large towns.

It is known that anthracite produces little or no smoke, but for private fires it possesses the disadvantage of being slow to kindle, and when kindled, it burns with a dull visage, extremely unlike a John Bull Christmas fire, and therefore not to be thought of by Englishmen. The substitution, as has been proposed, of coke, or coke and gas, for coal, is amenable to the same kind of objections, although the coke and gas, or gas and platinum fires, are easy of management, and free of all smoke and dust, and therefore well worthy of consideration.

Cutler's stove, as improved and amended by

* To be continued. The foregoing paper was read at the Royal Institute of British Architects, on the 8th inst.

Dr. Arnott, appears to me, although economical in its working, and possessed of other good points, still amenable likewise to the above objections, of being slow and dull, to say nothing of the pecuniary difficulty of converting every old grate in London into an *Arnot-Cutler* grate, if I may be allowed the expression.

A plan somewhat on the idea of the Cutler grate suggests itself to me, as feasible in many cases, especially with kitchen-grates, viz. to construct the grates with double bottoms, and always feed the fire by supplying the coal between these two bottoms, having previously, each time as required, raked out the cinders from between the two bottoms. By this process, nearly all the smoke issuing from the freshly supplied coals would pass through and around the already incandescent coals above, and be consumed in its transit. The chief objection to this plan would be, that it would be a little troublesome, and *cook* below, and *mamma* upstairs, I fear, would, often thinking only of *self*, neglect the public good.

With reference to the smoke of ordinary fires, a most simple, but not a universally known *old wife's cure* would be almost entirely sufficient, viz. on every occasion after *mending* the fire to hold a sheet of paper or a sheet of iron, or, better still, a sheet of some *pliable* but incombustible substance before the open part of the grate, so as to cause a strong draught: the effect of this, as most good housewives know, is to cause newly-mended fires almost instantaneously to blaze up, so that the coals get rapidly ignited, and all, or nearly all, the smoke set free is immediately caught up by the flame and consumed. But the objection to this plan is, that as in the last case, although it is very simple and very easy, yet people would not be "bothered" with it; and besides an inexpensive slowly smouldering fire is for many hours of the day all that is required in moderate weather.

Another plan suggested itself to me on the principle of a pipe chimney passing say 6 feet up the old chimney, then curving over and descending behind the grate, and again curving round and ascending into the centre of the ignited fire. I find by experiment that smoke will readily be inducted into this *circle*, and if so, it is evident that it would be an easy method of consuming the smoke, but it is a plan which will not do unless some outlet can be found for those noxious gases, the products of combustion; for as this chimney is on the plan of an endless circle, it does not afford an exit to the gases spoken of.

What, then, is to become of us? It appears to me that no plan left for its fulfilment to the individual management of each household can ever have more than partial success. John Bull's house is his castle, and his fire is all the world over his "ain fire-side," and accordingly he must be allowed to sit after dinner with his feet on the fender and with his poker in his hand (N.B. Not the *full dress* poker) to poke and knock about his own coals, no person and nothing (not even the Russians) daring to make him afraid, except high prices. The smoke nuisance must then be abated *for him* from *without;* and I beg, therefore, to propose the following plan for his consideration.

I thought the plan about to be proposed was my own, but, after working at it for two months, I accidentally heard that Mr. Beard had had the main features of the idea tumbling about in his brain for some sixteen years, our chief difference being that whereas Mr. Beard would condense his smoke by pressure, a method which I and others believe to be utterly impracticable,—I would avail myself of the plan shown by Mr. Hedley (see Blue Book on this subject published 1843, p. 127) to be practised with the most perfect success at various manufactories in the north of England, and condense my smoke, &c. by the action of descending water.

The main features of the plan are as follow:—Every fire in London is to have its smoke received into a pipe connected with the chimney-top; these pipes to communicate with a main pipe, which is to pass down the wall of the house, just as the waste water-pipes now do. These house-pipes are to communicate with a street main, and these street-mains are to converge to local centres, where are to be erected steam-engines, to work as vacuum-engines, on the principle of those formerly used on the Croydon Railway. By the action of atmospheric pressure, the smoke will thus be drawn with great rapidity—a rapidity varying with the power of the engine—into *grand* mains connected with vacuum chambers; and as the smoke, &c. passes into these chambers, it will be precipitated by the fall of water on the principle propounded by Mr. Hedley.

The matters precipitated by this water will be soot, tar, &c. (see Blue Book, as above) and water: the solid matter will be retained by a porous stone filter, while the water will pass through into a tank, again to be pumped up and re-employed in the process of precipitating the soot, &c.

Now, I confess that the plan appears sufficiently Utopian, but is it *primâ facie* more so than the plans for supplying London with water by pipes, or with inflammable gas by pipes, were, when first propounded? It appears to me that the question is one merely of money; and I have the opinion of a practical engineer to the effect that it does not present any apparent mechanical impossibilities.

I find that in London there are about 3,000,000 tons of coals consumed annually; and I am informed by Messrs. Easton and Amos, that by consuming the smoke, manufacturers find that they save above 11 per cent. on their fuel; while, in the 54th number of the *Journal of the Society of Arts*, Messrs. Truman, Hanbury, Buxton, and Co. state the saving to be about 30 per cent. but this is by burning inferior coal, unsuited for private use. If, then, we value the coals at 18s. per ton—a low average—we get 2,700,000*l.* as the value of the coals annually consumed; 11 per cent. saved on which is equal to 297,000*l.* a year, which amount saved we should secure in the form of soot and tar, &c. in our reservoirs as before explained.

Suppose from this sum of 277,000*l.* we deduct 20,000*l.* a year for coals consumed by our engines, and 20,000*l.* a year in the form of wages paid to 500 workmen at 40*l.* a year each, and further deduct 60,000*l.* for contingencies, we still have 197,000*l.* remaining of net annual profits, which, on a capital of 1,225,000*l.* at which I estimate the cost of the alteration necessary, would yield a dividend of 6*l.* 6s. 3d. per cent.

But were the smoke totally consumed, the amount that would be saved by the inhabitants of London in washing, and the amount saved in the better preservation of furniture, books, pictures, &c. and in papering and painting the houses, &c. cannot be estimated at less than 1,000,000*l.* a year; while some estimate the destruction of property and the extra expense in washing caused by smoke as high as 3,000,000*l.* annually.

It must not be forgotten, that all methods of consuming smoke by various contrivances applied within each house, result in the setting free of enormous amounts of poisonous gases, &c. as carbonic acid gas, carbonic oxide, and sulphuric acid, &c. all of which would be precipitated into our reservoirs. The plan, also, would render such a thing as a smoky chimney an impossibility, so long as our engines were in order, as a good draught would be constantly operative in every chimney in London; and not only would there be no smoky chimneys so long as our engines were intact, but every chamber in London *nolens volens* would be in a condition of perpetually good ventilation; while the architecture of our house-tops would no longer be disfigured by hideous cans and zinc stalks, and weather vanes, and we should be entirely freed from those "rascally blacks," which are for ever precipitating themselves upon us like a pestilence, and our atmosphere without would be as clear, if not clearer, than that of the Isle of Wight. Floriculture could be carried on without the necessity of Ward's cases! and altogether the health, and the linen, and hands and faces of our population would be in a state hitherto unknown to us!

Arrangements, of course, would require to be made for periodically sweeping the pipes, and also arrangements for allowing the smoke to escape by the old channels, in the event of any isolated engine getting temporarily out of order; but these and a hundred other minor details do not present insuperable difficulties. And again I say, in conclusion, that Utopian as the scheme appears, it is not more so than the idea of the gas movement once was. But by whatever method we are to get rid of our smoke, it is at least in the meantime to be hoped that the law which is shortly to be applied to large manufactories, will be extended to the numerous minor manufactories, such as cook-shops, hotel kitchens, &c. so as to compel a sufficiently careful feeding of their fires to prevent all *gross* smoking; and although we must accept with gratitude each instalment in this matter, still I think it impossible for the philanthropic mind to despair of the time coming when the inhabitants of our large towns will live "above the din and stir of this *dim* spot," and breathe the benignant air of heaven almost as pure as it comes to the open country from the hand of the "ever bountiful Giver of all Good."*

GEORGE WYLD, M.D.

COMPETITION FOR BANK AT BRISTOL.

WE are informed that the directors of the West of England and South Wales District Banking Company met on Friday last, and came to the following decision as to the designs for their new building, viz.:—The design prepared jointly by Mr. William B. Gingell of Bristol, and Mr. T. R. Lysaght of London, is to be carried out under their superintendence. The premium of 50*l.* is awarded to Mr. E. M. Barry, of London; the premium of 30*l.* to Mr. John Gibson, of London; and the premium of 20*l.* to Messrs. Gabriel and Hirst, of Bristol. Upwards of fifty designs were sent in from all parts of the kingdom.

CONVERSAZIONI.

BY a shake of the bag, some of the principal *conversazioni* of the season have been shuffled very closely together. For Tuesday, 30th, the President of the Institution of Civil Engineers has issued cards for the annual large gathering in Great George-street. On Wednesday, 31st, Earl de Grey will entertain the Royal Institute of Architects, and has invited a large number of distinguished persons to meet them. For Thursday, June 1st, Lord Londesborough, as president of the Numismatic Society of London, has invited the entire body of the members to a *soirée* at his town residence in Carlton House-terrace; and on Saturday, June 3rd, Lord Rosse, as President of the Royal Society, will hold his third reception.

RICHARD CŒUR DE LION AND STATUES GENERALLY.

YOUR correspondent (p. 233, *ante*), who suggests one of the angles in front of Buckingham Palace, as a fitting site for Marrochetti's fine statue of Richard Cœur de Lion, must surely think that statues are merely useful to fill up unsightly vacancies! What is there in common between Buckingham Palace and a work of art, or between this new crumbling palace and a Crusader king? All kinds of sites have been suggested for this statue; but the proposers of the various sites seem to have no idea of the conditions required to render a work of art effective. Had Dinocrates carried out his proposal of converting Mount Athos into a statue of Alexander, it would have required no relief, and invited no criticism, as its entire effect would have been derived from its immensity; but a statue of moderate size requires a frame to impart to it full picturesque effect; and there is not one of the famous equestrian statues in Europe that attract the admiration of travellers, be it that of Marcus Aurelius at Rome; that of Frederic the Great by Rauch, which makes the present king of Prussia blush, at Berlin; that of Emmanuel Philibert, by Marrochetti, at Turin; or that of the elector Maximilian, by Thorwaldsen, at Munich, that would not be utterly lost and unobserved if placed in an open space in Hyde-park, as has been proposed by some for Marrochetti's statue. The frame required depends on the size of the statue,

* At the Great Exhibition of 1851, Mr. G. Devey exhibited a scheme exactly similar to this proposed by our correspondent. Particulars and illustrations of it will be found in the "Architectural Quarterly Review," p. 166.—ED.

and I am inclined to think that the site lately occupied experimentally by the model-statue of Richard I. was too confined and secluded to have allowed it full justice. There is but one site in London that fulfils all the required conditions, viz. the north front of Westminster Abbey. Let the statue be placed with its back to the north door of the cathedral, looking towards Whitehall, just at the boundary of the burial ground; and when this shall cease to be a disgrace to the country, and be levelled, the statue will there produce an admirable effect, and be in perfect keeping and character with the surrounding objects. This position is prominent enough, and a thoroughfare open enough, and yet sufficiently enclosed by buildings to form a frame for the statue. The site is architecturally appropriate, as a portion of Westminster Abbey and Westminster-hall existed in the time of the warrior king; and historically appropriate, as Richard was only famous as a crusader in defence of the church, for which he would here appear standing forward as the redoubtable champion. There is no other position in London in which Marrochetti's magnificent representation of the lion-hearted crusader would not appear anomalous and out of place.

R. G.

THE CARLTON CLUB FRONT.

A general meeting of the Carlton Club has been summoned for Thursday, June 1, to decide finally on the plan of the new house.

Some few years ago Mr. Smirke furnished a plan for an entirely new building, part of which was immediately executed, viz. the present coffee-room. Shortly before the execution of the rest of Mr. Smirke's plan was to be taken in hand, some members of the club started objections to it, and, at a meeting held in April, carried a resolution to the effect that the plan should be greatly altered; two of the principal alterations consisting in the destruction of the present coffee-room, and in shifting the Pall-mall entrance from the centre to the western extremity of the building. The proposal to adopt these alterations was carried by a majority of about twenty in a meeting of not more than eighty members, a small proportion of a club containing 1,500. It now appears that this April meeting has been pronounced by counsel "learned in the law" to have been illegal, and that the club is bound to fulfil its original engagement with Mr. Smirke; and a general meeting has been summoned for Thursday, June 1, to consider this subject. The external appearance of our club-houses is a matter of public concern and interest, and we trust that the members of this great club will have a due regard to the importance of their decision, as affecting public taste and the beauty of a considerable building.

THE QUEEN'S COLLECTION OF PICTURES.

Her Majesty and the Prince have given Mr. S. C. Hall, the editor of the *Art Journal*, permission to engrave and publish a series of pictures selected from their private collections, and Mr. Hall has just now announced the plan on which they will be issued. The collections in question contain many fine works. At Buckingham Palace are choice specimens of Rembrandt, Ruysdael, Hobbema, Cuyp, Paul Potter, Vandevelde, Mieris, Ostade, Wouvermans, Jan Steen, Teniers, Vander Heyden, &c.; and at Windsor Castle there are beautiful productions of Correggio, Titian, Domenichino, Canaletti, Guido, Zuccharelli, &c. together with the renowned Vandyckes, and choice works by Rubens.

At Osborne her Majesty and the Prince have collected works of modern art chiefly of the British School, but with many examples of the schools of Germany, Belgium, and France, numbering upwards of 150 pictures. Amongst them are the works of Calleott, Callow, Cooper, Cope, Corbould, Dyce, Eastlake, Fielding, Frost, Grant, Haghe, Hayter, Herring, Landseer, Leitch, Maclise, Philip, Roberts, Ross, Stanfield, F. Tayler, Uwins, Wingfield, &c. together with productions of the foreign painters, Berg, Delaroche, Koekkock, Krauss, Airy and J. Scheffer, Van Eycken, Wappers, Winterhalter, and others.

From these several collections, permission has been accorded to select the choicest, with the sanction of the painters, in all cases of living masters, who have agreed to touch the proofs; and we may expect the result will be a work of great interest and beauty. Copies of a number of the pictures may be seen at Messrs. Colnaghi's.

The manner in which this boon has been granted to Mr. Carter Hall, as a recognition of good service done in the cause of the arts, must be exceedingly gratifying to that gentleman, and to all who know him. To show that it is well deserved, it would be sufficient to point to his conduct of the *Art Journal* for nearly sixteen years; but his friends would have no difficulty in educing other proofs. We are glad of the opportunity to express our personal regard and respect for one who has been always ready to lend a helping hand to rising talent, and has done so much to advance the interests of art; and we sincerely hope that he may personally derive that advantage from the privilege, which both her Majesty and Prince Albert evidently desire he should.

WORKMEN'S CLUB FOR THE CULTIVATION OF TASTE.

It is necessary in this country to urge and assist the adoption of every plan, the successful carrying out of which would be calculated to lead to the formation and extension of refinement and taste among artizans and working men. For this purpose we would propose, after the manner of the German æsthetic societies, institutions for sowing and spreading a sound knowledge of art-topics among this class; for the discussion of philosophical subjects; attention to studies immediately connected with the business in which they are daily employed; and the investigation of the principles on which the different kinds of work on which they are employed, proceed. The operatives would enter such a circle as a relaxation after the drudgery of their profession is over—rest they would find here, and at the same time much to stimulate their ambition. But they should breathe here in an atmosphere of poetry. The excitement raised in it must be purifying; no politics, no stimulants, which brutalise, must enter into a place set apart for calm contemplation, and for the softening influences of the beautiful. We know there are those who rail at poetry as something superfluous, and something never intended for the working classes. "But it is sufficient," says a useful writer,* "for the argument, that poetry appeals to faculties common to all. That is our warrant for their educational development. Who shall pronounce that capacities given by God ought to be idle? Who shall put out the love of beauty which he has kindled? Who shall exclude the bulk of mankind from that rich heritage of noble thoughts which has been bequeathed, with no restriction, to the whole human family?"

* Lalor Prize Essay on Education.

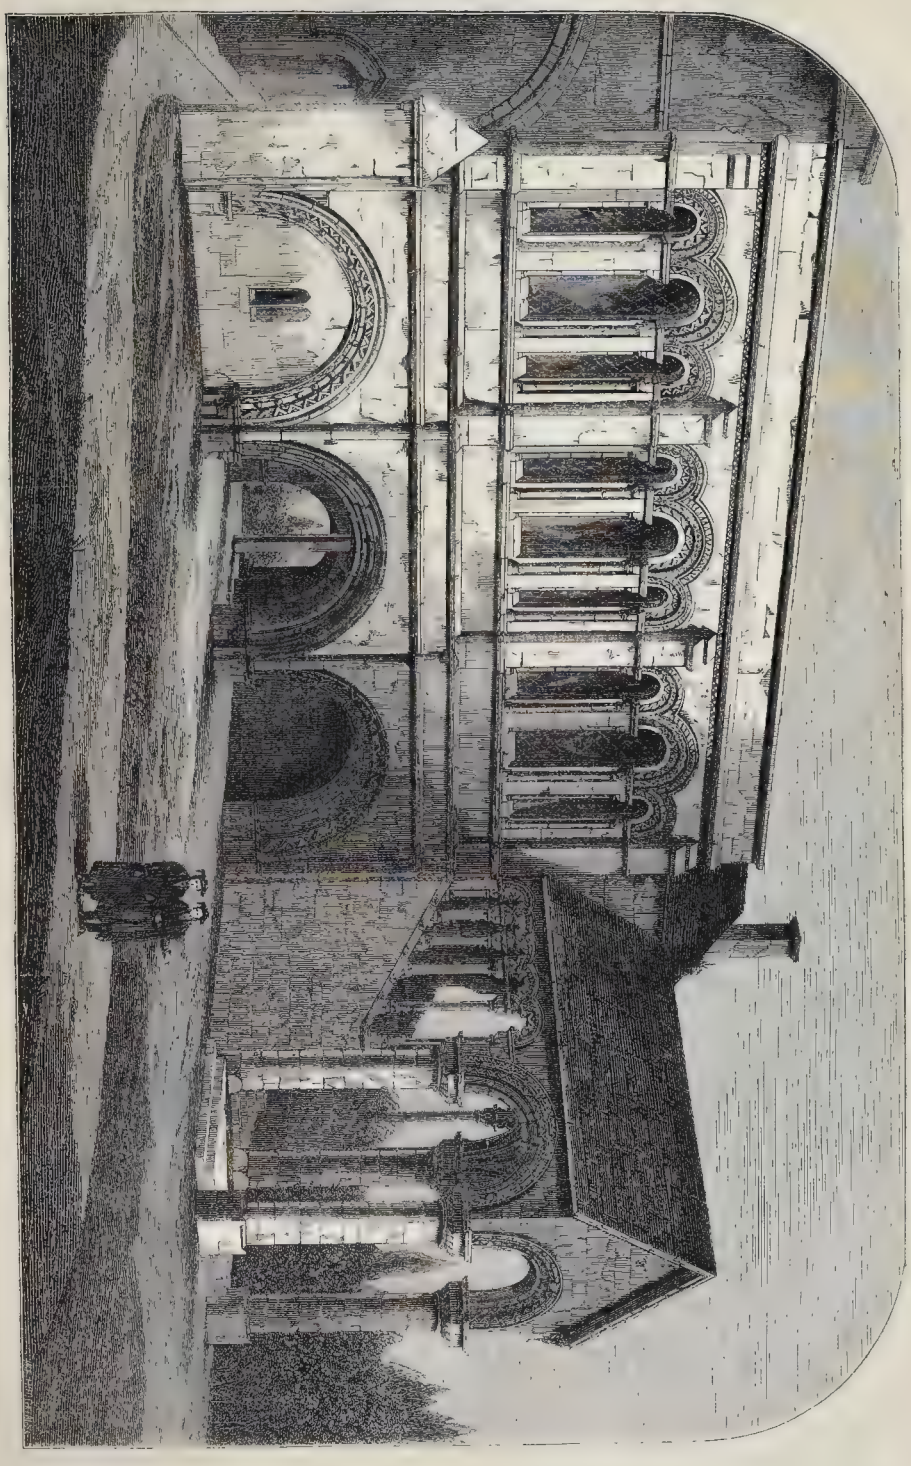
ST. PAUL'S IN TWO ASPECTS.

The removal of the hoarding at the end of Cannon-street has enabled the passers-by to see St. Paul's Cathedral as it was never before seen, and has shown what we have often spoken of—the unequalled beauty of its outline. In aid of the endeavour which is being made to keep the plot of ground at the end of Cannon-street open (and we are forced, by the remarks of one or two of the speakers at the Institute the other night, to remind them that it was in our pages the importance of effecting this was first pointed out),—we would once more appeal to the corporation and to the metropolis generally.

At the time of the great fire of 1666, which purged the City after the plague, the architect of St. Paul's proposed that London should be laid out in a system of streets at right angles. At that time the Corporation of London did not agree with the architect's plan. It is, however, certain that if the wise idea had been carried out, it would not only have been a saving of a large sum of money, but it would also have saved the infliction of many distempers, much loss of life, and of that prostration and adulteration of the natural powers, which render many born in London less energetic and vigorous than those who are natives of provincial districts.

The view of St. Paul's Cathedral, which has been exposed by the removal of the buildings at the east end (at the corner of Cannon-street), is magnificent: it forms a picture which no one who has seen it can possibly forget. Men who have seen this view will, in the next generation, speak of its beauty to others, if it should be, unfortunately, blocked up, and will say how short-sighted were the views, which, for money considerations, prevented the maintenance of so noble an improvement.

There are few "lungs" (as breathing-places have been very appropriately called) in the city; and who can say the value of the space at the east of St. Paul's, even in this respect. Look at it from Ludgate-hill: how pleasant it seems! there cannot be two opinions on the subject by any one who has seen the place. It is said that the site is worth 60,000*l.* and that the money can be realised to-morrow. It will, if blocked up and built upon, be enormously increased in value, and be placed quite out of reach of those who come after. At any rate, the Corporation may keep the land in their hands for a time. We fully agree with those members of the civic body who say that the whole metropolis might fairly be called on to contribute to obtain what is for the benefit of all.



In calling attention to the improvement of the access to St. Paul's, would it not be well to hint to the dean and chapter that it would be a very graceful thing to take the opportunity of effecting the long-wished for change in the railings? If the City gives up 60,000*l.* there would be propriety in the church authorities making this change, and an offer to do so would probably quite decide the point.—C. M. W.

KING'S SCHOOL, CANTERBURY.

We have frequently in our notices of Canterbury Cathedral mentioned the skill with which the late architect to the dean and chapter, Mr. Austen, carried out the very extensive works intrusted to him in the restoration of that building: he has been succeeded in office by his son, who, as occasion requires, carries on the work connected with the cathedral. He has lately been engaged in erecting a new school-room for the use of the King's scholars, in the place of the dilapidated building they have occupied so long. As our engraving will show, the room is built on the old Norman arches which were said to form a portion of the refectory, and the new work is made to accord with that of nearly 800 years back. The erection of this building has also caused the surrounding space to be laid more open, by the removal of several old buildings and walls which formerly too much enclosed it: a better view of the very beautiful Norman staircase is thus obtained, and if no other good had been gained, this in itself would be a great boon, as there is no other specimen of the same kind to be found in the country.

The cost of the new work has been about 1,000*l.*

Royal Institute of the Architects of Ireland.—At a meeting held May 6, Mr. Jacob Owen, V.P. in the chair, Mr. Parke Neville, honorary secretary, read a paper on the sewerage of towns and buildings, in which, after briefly describing the great works executed by the ancient Romans for the drainage of Rome, he alluded to the great improvements made of latter years in the general system of sewerage, and then proceeded to explain his plans for the improvement and completion of the sewerage of the city of Dublin, and described the works at present in progress under his directions: he also entered into the subject of house drainage, and recommended the use of vitrified stoneware pipes for the purpose, in preference to drains built of rubble masonry or brickwork; and in conclusion, brought under the consideration of the Institute some of the plans for house drainage laid down by the Board of Health in London. A discussion followed. On the 20th, Mr. McCurdy read a preliminary paper on "The adaptability of style to purpose and design," which was referred to the council for publication.

KING'S SCHOOL, CANTERBURY.

EXHIBITION OF STUDENTS' WORKS AT GORE HOUSE.

THE exhibition of the works of the advanced students of the provincial and metropolitan schools of art, at Gore House, Kensington, includes anatomical studies; painting ornament from the flat, or copies; painting general, direct from nature; the human figure from casts and in colour; modelling ornament; the figure, and flowers; elementary design; and technical studies in architectural design, surface decoration, plastic design, &c.

It shows very promising advance in many respects, and should be visited. An interesting feature will be found in the result of a requirement on the part of the Board, that the space within a given outline should be filled with the leaves and flowers of the wood anemone, ornamentally arranged, either treated in self-colours or in complementary. The variety obtained with these few elements is very remarkable.

The *architectural* works of the metropolitan normal school (under M. Semper), are very unsatisfactory. It would have been wiser to have kept them out of sight altogether.

PROVINCIAL NEWS.

Nottingham.—St. George's-hall here was formally opened on Tuesday evening before last. Though not so large as either the Exchange-hall or the Mechanics' Institution, it is adapted for concerts, lectures, &c.

Lincoln.—The building of the new church of St. Michael-on-the-Mount, has been commenced. Workmen are now actively employed, under Mr. Charles Ward, the contractor, in excavating, and laying the concrete for the foundations. The funds are still far short, only 1,700*l.* having been obtained, while the estimated cost of the building is 2,556*l.*

Boston.—The new gasometer here is just completed. It is said to be the largest in Lincolnshire, and will hold 75,000 feet of gas.

Woolpit.—The new tower of Woolpit Church is now advanced to the spring of the belfry windows. The necessity for rebuilding the tower and spire, it may be remembered, arose from their being struck by lightning in July 1852. The roof had previously been restored in oak, at a cost of upwards of 1,000*l.* An appeal is being made by advertisement on behalf of the works in progress.

Heyford.—Under the heading of "A model church," the *Banbury Guardian* says that, from a correspondence handed about, it appears that the rector of a parish in this part of the diocese of Oxford, complains to his churchwardens that "men who chew tobacco in the western gallery during service-time, render that part of the edifice *like an alehouse*;" and the churchwardens assert that "the rector's chancel-window is so ruinous as to permit the ingress of birds, who make the east end resemble *a rookery or a hen-roost*."

Worcester.—Mr. Hawkesley, the engineer selected by the town-council of this city for further preliminary investigation of sanitary measures, has at length inspected Mr. E. L. Williams's plans, and made a tour of the city with his clerk and Mr. S. Purchas, the surveyor to the local board. The springs and other sources of water supply in the neighbourhood were inspected. A local paper states that no opinion was expressed by Mr. Hawkesley as to the plans to be recommended, but that his report is to be ready at the next meeting of the town-council.

Bristol.—The first stone of the new Congregational chapel in Cheltenham-road was to be laid on 22nd inst. The building will be erected from designs by Messrs. Foster and Wood.

Newcastle-upon-Tyne.—A fountain, similar in appearance to one at Osborne, and valued at 200*l.* has been presented to the Infirmary, at Newcastle-upon-Tyne, by Mr. Aspdin, of the Portland Cement Works, Gateshead, for the purpose of ornamenting the pleasure-grounds in front of the institution.——A grant of 300*l.* has been made towards providing a parsonage-house for the incumbent of St. Peter's, in this town, and a further aid of 200*l.* is expected from the governors of Queen Anne's Bounty, in case two or three hundred pounds can be raised by subscription, making the whole 700*l.* or 800*l.* Subscriptions have been commenced, and several contributions promised. It is proposed that the payment of subscriptions be distributed over a period of several months.

Tynemouth.—The guardians of Tynemouth Union met last week at North Shields for the purpose of examining the estimates of persons wishing to contract for the erection of a schoolhouse and dormitories for the children in Tynemouth Union Workhouse, when the appointment fell upon Mr. John Younger for the mason's work, and Mr. William Taylor for the joiner's work. The building will be forthwith commenced.

Falkirk.—The Wellington statue for this town is now placed on its pedestal. The local *Herald* explains that it is chiselled from a block of freestone from the Red Hill quarry, and declares it to be the best statue of the duke that the writer has seen. "The figure of the duke rests familiarly against the shoulder of his horse, with his plumed hat in his left hand, and the bridle-rein thrown carelessly over the right arm—with the ample folds of his martial cloak so arranged as partially to expose his broad chest, decorated with a star." The statue is to be surrounded with an iron railing, and two lamp-posts of an ornamental character are to be placed near it—one in front and the other behind the statue.

Arbirlot.—The free church of Arbirlot, according to the *Arbroath Guide*, was opened on Wednesday before last by Dr. Guthrie, of Edinburgh. The new building stands on the site of the old manse. It is about 30 feet wide by 68 feet in length, while the height of the walls is 19½ feet, and the perpendicular height of the roof 25 feet. The style of the building appears to be Gothic. The interior is lighted by double Gothic windows, of which there are upwards of a dozen—one of the large windows in the east gable, looking towards the village, being bordered by stained glass. The east gable is the most prominent feature, and is surmounted by a belfry. The architect is Mr. Mila, of St. Andrew's. The architect of the manse is Mr. Alexander Kirk, son of the Rev. Mr. Kirk. The congregation had raised the sum of 773*l.* while they had contracted obligations to the amount of 1,347*l.*—leaving to be made up 574*l.* After the opening, a collection was made, which amounted to no less than 554*l.* 9s. but of this Lord Panmure contributed 500*l.* His lordship also gave the site of both church and manse.

Coolfin.—The Marquis of Waterford is erecting at Coolfin, near his lordship's estate, a race-course, which is to be similar to that at Manchester.

St. Helier's, Jersey.—The college, erected here after the design of Mr. Hayward, is a building of considerable importance. It stands on the summit of a hill, commanding an extensive view. The style is collegiate, and the material used for the walls is native granite from the Saint Brèlade quarries, with Caen stone dressings. The principal school or hall is 100 feet long and 28 feet wide, with an open roof of good design. M. Rossignol was the contractor. The total cost has been 7,000*l.* The college was erected in commemoration of the Queen's visit to Jersey, and it has been founded for the education of the islanders.——A new market has just been completed, under the superintendence of M. Gallichan, the surveyor to the States. It is covered in the centre with an iron rod tie-roof of considerable span. The sides are roofed with galvanized metal, curved. A timber portico faces the street at one end; and at the other end, which abuts also upon a public thoroughfare, there are granite piers and gates.——The Congregationalists are about to erect a new church in Halkett-place, from the designs of Messrs. Poulton and Woodman, of Reading. The building is to be constructed of native stone, random walling, with Caen stone dressings. It is designed after the model of the chapel built by Mr. Poulton, at Winchester (illustrated in No. 563 of the *Builder*). The building is to be lighted mainly from the roofs. The style is Early Decorated. The contractor is M. Rossignol, at the sum of 1,928*l.*——A new cemetery is being laid out, also from the designs of the same architects; and a chapel, in the Anglo-Norman style, to accommodate 100 persons, and lodges and entrances of the same character, are to be erected.——A new bank, of Italian style, has just been finished, under the direction of the surveyor to the States.

THE CARPENTERS' STRIKE AT NOTTINGHAM.

MACHINERY IN AID OF LABOUR.

IN the old and obsolete suicidal attempts of the working classes to destroy spinning-jennies, &c there was this excuse for them, that the question was a new one, and that to ignorant minds it did appear, on the face of it, as if spinning-jennies were about to deprive them of their means of obtaining a livelihood, while, in truth, these useful machines were but preparing the way for a maintenance, not only to them, but to rapidly multiplying and increasing multitudes of their progeny then as yet unborn, and who, without these machines, would have come into the world without their only obvious, available, or visible means of support, and hence, in fact, without their best friend. Now, however, there is no such excuse of ignorance, even to the most uneducated, far less to men who rank amongst the more intelligent of their order. Will it be credited, then, that in this age of machinery, and of the wonderful benefits it has conferred on *all*, in not only providing, with the utmost and cheapest abundance, many luxuries as well as necessaries required by *all* yet which few could have otherwise afforded, but also in providing *everything* (in the shape of a livelihood) to thousands and tens of thousands amongst a rapidly accumulating population,—that in such an age as this, the *question* of machinery *versus* labour should have been started anew,—not among ignorant clodhopping destroyers of those thrashing-machines which now do work that clodhoppers themselves reject as only fit for machinery or horses to do,—not among mere strike-mad mill-workers of spinning-jennies,—but among a class of men who rank among the most intelligent of those employed in the building trades,—the working carpenters? Yet no: we ought not to cast such a slur upon working carpenters as a class: they know better in the mass; and in many towns throughout the country they have made no objection whatever to the aid of machinery in their trade. It is but a crotchet, entertained by the joiners of one single, town of which we speak.

For sometime past the Nottingham carpenters have been at loggerheads with their employers, and are now on strike, respecting the use of machinery and steam-prepared work in their establishments. This contest, which commenced some years ago with the introduction of steam saw-mills, and then waxed warmer upon the adoption of planing machinery, has now come to a positive collision, in consequence of many of the employers obtaining a part of their mouldings from Hull, where they are "stuck" by machinery, and of others adopting in their shops an exceedingly useful little machine for mortising with rapidity and precision. After a series of angry contentions, a few weeks since, the men employed by Mr. William Smith, of Woolpack-lane, struck unanimously, on one of them being ordered to fix a shelf which had been planed by steam power—the hands employed by Messrs. Grecnsmith and Lacy abandoned their work in consequence of machine-wrought mouldings being introduced into the shop—and Messrs. C. C. and A. Dennett's men simultaneously quitted their work, upon seeing an apprentice working a mortising machine. These acts were deemed by the employers to be so extremely unjustifiable and tyrannical in their nature—so much the result of mistaken views—that on consulting together upon the subject they came to the determination of showing themselves unanimous in resisting, or rather in not giving way to them. After a series of notes had been exchanged, on 11th instant the united masters met a deputation of the workmen's society, for the purpose of discussing their differences, and striving to come to some amicable conclusion. This meeting was held at the Crown Inn, Long-row, and consisted of between twenty and thirty employers, and nine operatives.

The *Nottingham Review* reports the discussion which followed at full length; and the arguments sustained by the masters were so forcible and so clear, that if their mistaken operatives are not convinced by them of the absurd error into which they have fallen, we think their case is hopeless; and for our own part, we feel it quite superfluous to add anything to the force of this report, unless it simply be that, even although the employers should be entirely mistaken in believing that the working carpenters of Nottingham will be benefited instead of injured by the introduction of the new mortising or other machines,—as, surely, they themselves must now admit that they already have been by steam saw-mills,—still the attempt of the Nottingham carpenters to stem the tide of machinery, and expel it from their own particular field of labour, is about as hopeless a task as

was the old woman's endeavour to sweep out the ocean with a mop.

If mortising machines are objectionable, and "would" be injurious to the working carpenters (all their arguments, be it noted, are based on woulds and mays and ifs · the deputation who attended had not a single fact—a solitary case of adversity—to fall back upon),—why, by parity of reason, do they allow the use of planes and chisels? these are mortising machines; and if they could compel their employers to return to the more primitive flint knife of the savage, who cuts and carves so ingeniously with it, perhaps that would benefit the working carpenters of Nottinghan,—or else not. The one case is assuredly quite as rational as the other, and to men of soft brains it really would appear that if all mortising were obliged to be done with a flint knife, it would take an immense number more of carpenters to do the work than it now does with the mortising chisel or plane. Yet we question whether even these, weak as their understandings were, would not soon begin to have a glimmer of doubt on the subject, and to suspect that perhaps in place of increasing the employment of mortisers, such a suppression of "machine" work would only diminish the demand for mortising, and play the deuce with the whole trade in it. And precisely so, on the other hand, the introduction of still more improved mortising machines than the hand chisel, in place of diminishing the employment of mortisers, will assuredly only increase the demand for mortising, so cheaply, readily, and rapidly done, and thus improve, in place of injuring, the prospects of the trade operatives.

But to return to the meeting of which we spoke: the result of the whole proceedings was, that at an adjournment, the employers again met in great force, and, after considerable discussion, agreed, without one dissentient voice, to the following resolution:—

"That the master builders of Nottingham, being unanimously resolved to adopt all such facilities as they think will enable them satisfactorily to carry on their business, are determined not to allow any of their workmen to dictate the nature or extent of machinery or machine-made articles they shall employ; and that they give notice that the workmen hereafter employed by them be expected to acquiesce in this arrangement."

This, by Saturday last, was to be published in every shop in the town, and the operatives will have now had an opportunity of deciding what course they will adopt; but the only wise one, as remarked by the local paper alluded to, will be to return to their employment, "determined to make themselves acquainted with the more skilful appliances of the age, to improve their individual position, and to elevate their profession." In the kindest spirit, and with the greatest consideration for their welfare, we implore them not to waste their means in the madness of a strike.

EXTENSIVE FRAUDS UPON BUILDERS.

DOUGLAS, HURST, MARSH, AND HURST v. AUSTIN —The plaintiffs in this action, in the Marylebone County Court, are builders' carters, and they separately sued, for a week's wages, the defendant, a builder.

Mr. G. Keene, solicitor, said of all the impudent actions ever brought in a court of law, the present was the worst. The very men who now sued his client ought, if justice had been done, to be transported. Mr. Austin had discovered a system of frauds upon builders deserving their immediate notice. The three men who now sued his client were considered confidential, and had daily been entrusted with moneys to purchase materials of a nondescript nature. In the suburbs of London, where so much building was going on at present, it became necessary to found new roads, and the builders found no material so cheap or serviceable as broken crockery for the under part. The depôts for this material were the various dust-yards, and his client sent the three plaintiffs out with horses and carts to purchase this *débris*. He gave them moneys to pay for it, at the rate of two shillings per load. They each, upon an average, collected four loads a day of this core, and for a long time drew two shillings per load. Mr. Austin fortunately discovered that his men had only paid to the dust contractors eighteenpence per load throughout the numberless loads they had charged him two shillings for; and finding that other builders had been similarly plundered, he gave all the plaintiffs into custody for embezzlement. At the Marylebone Police-court, the magistrate at the intercession of Mr. Austin, somewhat reluctantly discharged the three prisoners, and intimated that the least Mr Austin could do would be not to take these men again into his employ, and to mulct them of their wages due. The leniency shown to these fellows was acknowledged by three summonses. He contended that, under these circumstances, workmen were, in law, under the same ruling as domestic servants, and that the plaintiffs could not recover. Mr. Keene then called Mr. Fell, the chief clerk to the police-court of Marylebone, to corroborate his statement as to the magistrate's intimation to withold all wages due.

Proof was given of the receipt by the carters of two shillings per load, and that they paid but eighteenpence.

Mr. Austin denied the assumption of the men as to their privilege of buying this core as cheap as they could, and charge the money advanced, and said he could produce many of his brethren who had suffered from precisely the same fraud as the present, and he hoped the system of robbery practised would be made known to the trade.

The Judge (Adolphus) said: Well, I certainly have some outrageous claims before me, but I cannot reconcile the present with any plaint. Mr. Austin has a complete answer to the case. The magistrate, if he had known or foreseen the present vexatious proceedings, would not, I am convinced, have listened to the merciful appeal of the defendant. I have no hesitation in giving a verdict for the defendant, and shall allow costs against each of the plaintiffs.

PROPOSED WESTMINSTER BRIDGE.

YOUR publication of the 20th instant contains a description of the iron bridge about to be constructed at Westminster, under the direction of Mr. Thomas Page, engineer to the Board of Works, accompanied by two elevations, one of the bridge itself, and the other of one of its arches.

Having been employed by Mr. George Rennie, junior, in the month of April, 1850, to make a drawing from his designs for Westminster-bridge—a copy of which was subsequently shown in the Great Exhibition of 1851—I was struck with the similarity of the designs published in "The Builder" to that drawn by me, they being, in fact, with a few slight deviations, nearly fac similes, both in the dimensions and shape of the arches; the decorations of the spandrils and parapets also bearing a close resemblance, and the arches being now represented as elliptic instead of Gothic, as originally shown in Mr. Page's Parliamentary drawings.

The following are the comparative dimensions. Each design has seven semi-elliptical arches.

Mr. Page's.		Mr. Rennie's.	
1st arch,	95 feet span.	1st arch,	94 feet span.
2nd ,,	105 ,,	2nd ,,	100 ,,
3rd ,,	115 ,,	3rd ,,	120 ,,
4th ,,	121 ,,	4th ,,	130 ,,
5th ,,	115 ,,	5th ,,	120 ,,
6th ,,	105 ,,	6th ,,	100 ,,
7th ,,	95 ,,	7th ,,	94 ,,

Giving for Mr. Page's design 751 feet, and for Mr. Rennie's, junr. 758 feet total waterway, making a difference of only seven feet total waterway, and the rise of the centre arch in each case being the same, viz., 20 feet. H. ANDREW.

MANUFACTURE OF GAS AWAY FROM LONDON.

YOUR correspondent, "W. H. B." whose letter appeared in your impression of the 13th inst. is probably not aware that a project to manufacture gas for London at the Coal-fields was started ten years ago, but was found, after investigation, to be impracticable, owing to the great cost of a main 120 miles long, and to the supposed loss from leakage under the necessarily great pressure required to transmit the gas so far.

"W. H. B." supposes that the "advantage is obvious" of sending coke to London, in lieu of coal, on account of its greater lightness, but forgets its greater bulk, and consequent higher freight.

The project to which you allude in the foot-note to the above letter—of which Mr. J. Simpson is chairman, and Mr. Clegg the engineer,—is to bring the coal to London, and to convert it into gas on the banks of the Thames, and to supply it into the gas-holders of the existing companies. The works will be sufficiently distant from the metropolis to avoid any chance of their becoming a nuisance, and yet so near that the capital necessary to be expended in mains will be compensated for by the saving of all land carriage of the coals, and other advantages.

S. W.

TOWER HAMLETS SEWERS AND SEWERS-RATES. —From a Parliamentary return made by the Metropolitan Sewers Commission, into whose hands the Tower Hamlets district came in 1847-8, it appears that the amount of rates collected from that district from 1843 to 1847 inclusive, amounted to 41,501*l.* while the sum laid out in new sewers was 28,923*l.*; and that the rates from 1848 to 1853 inclusive, amounted to 31,291*l.* while the expenditure on new sewers was 22,151*l.* To the expenditure of course must in both cases be added that for repairs and cleansing of existing sewers and other outlay.

Notices of Books.

Miscellanea Graphica: a Collection of Ancient, Mediæval, and Renaissance Remains, in the possession of the Lord Londesborough. Illustrated by FREDERICK W. FAIRHOLT, F.S.A. No. I. London: Chapman and Hall.

UNDER the above title, Mr. Fairholt has commenced the illustration of the very extraordinary collection of works of ancient and mediæval skill, made by Lord Londesborough. We scarcely like the word "Remains," as it applies to portions of a whole, and gives an idea of incompleteness, whereas nearly every object that is to be represented is perfect. The extent of the collection may be judged of from the terms of the announcement, that "*each* volume of the present work will be completed in nine numbers. Each number will be published quarterly, and will contain four plates," one in gold and colours. The ninth part will include an index and historical treatise, to form introduction to the volume when bound. The well-known skill of Mr. Fairholt as an antiquarian draughtsman, is a sufficient assurance as to the manner in which the work will be executed. The illustrations in the first number are engraved by the artist himself, and consist of jewels of the 16th century, decorative vessels for the table, shield of *cuir bouilli*, and objects in ivory.

The Old Printer and the Modern Press. By CHARLES KNIGHT. Murray: Albemarle-street. 1854.

To this charming little work is prefixed the appropriate and pleasantly-worded French motto, "*Plus on lit, plus on lira; plus il faut, plus il faudra des livres,*" from *L'Histoire des Français des divers Etats.* As for Mr. Knight's volume itself, no one can sit down to it without being betrayed, as we have just been, into an expenditure—we cannot call it a waste—of much more time than he may have at the moment to spare even for such a purpose. It is needless for us to offer any special recommendation of such a work by one who has already done so much to popularize useful and entertaining knowledge, and to bring "the modern press," in the higher and better phases of its cheap and periodical literature, to its present state of development. We most cordially sympathise with the eloquent support of free popular libraries with which Mr. Knight concludes his little volume, the second part of which embraces a comprehensive view of the progress of the press to our own day, especially in relation to the important subject of cheap popular literature, while the first, together with an interesting biography of Caxton and his efforts, gives a compact narrative of the state of knowledge before the invention of printing at all.

Miscellanea.

SLEDGE RAILWAY SCHEME.—A new project has been patented, under the title of "Daft's Improvements in Inland Conveyance, as applicable to Railways." It begins with stripping the carriages of their wheels, axles, springs, and iron framework, and the line of its tunnels, embankments, &c. and its iron rails, substituting a wedge-sided wooden rail for the latter, and light sledges for heavy carriages, the only wheels used being those of the engine, which are ringed with india-rubber, to enable them to take a sufficient grip of the sledge rail, the rubber being so united with the iron rim of the wheel as to be incapable of either yielding by friction or of being torn off. For mere feeders to railway lines such a project may be available from its extreme economy, but for any main trunk, or even branch line, the advantages of this "Daft" scheme are not so very certain.

ARCHITECTURAL EXHIBITION IN GLASGOW.—We wish to draw the special attention of our professional and other readers to an advertisement in our present impression, announcing an Architectural Exhibition at Glasgow, influentially supported by the Architectural Institute of Scotland, and various noblemen and gentlemen, and which is to be held in December next. Committees of Management at Edinburgh and Glasgow have been appointed, and also Committees of Sections. The Committees of Management are anxious to secure the cordial support of all who feel more especially interested in such an Exhibition, and we are confident the London architects will not fail in supporting their Scottish brethren on an occasion such as this.

IMPROVED DWELLINGS AT LIVERPOOL FOR THE WORKING CLASSES.—An influential meeting was held on Wednesday in last week in the Public-hall, Hackin's-hey, to decide upon the formation of a local association for improving the dwellings of the industrious classes. Archdeacon Brooks presided, and appropriate resolutions were passed approving the plan of forming in Liverpool a branch of the metropolitan association; and a committee was appointed to carry out the object. Twenty-two cottages have lately been completed in Upper Frederick-street, Liverpool, on the plans exhibited by Prince Albert in Hyde-park. They have not been inhabited long enough to show any sanitary results, but the pecuniary results are said to be satisfactory. They cost, including land and all extras, 4,200*l*. They let, as fast as completed, at rents varying from 4s. to 5s. 9d. per week, by which they yield a gross rental of 308*l*. per annum. If from this sum 98*l*. for repairs, bad debts, rates, &c. be deducted, a net rental of 210*l*. remains, or a return of five per cent. per annum on the total outlay.

INSTITUTION OF MECHANICAL ENGINEERS.—The members of this institution met in week before last at Birmingham, and several papers were read,—one of them by Mr. Robert Jobson, of Dudley, on an improved mould for casting metals, the invention of Mr. John Jobson, of Litehurch Works, Derby. "Its object," says the *Birmingham Journal*, "is to facilitate and economise the moulding of iron and other castings, by making a reversed mould in plaster for both sides, those reversed moulds being accurately fitted together in the first place, and then subsequently used as blocks upon which the future sand moulds for casting are made by the simple process of ramming, without any care being required to insure a perfect fit between the two moulds, except in the case of making the original blocks. . . . . The process was shown to the meeting, illustrating the rapidity with which it was effected, and the freedom of the undressed castings from what is technically known as 'fin' was also noted as very remarkable."

KILKENNY ARCHÆOLOGICAL SOCIETY.—The May meeting of the Kilkenny and South-east of Ireland Archæological Society was held, on Wednesday before last, at the Society's apartments, in Patrick-street, Kilkenny, Mr. Joseph Burke, P.L.I. barrister-at-law, in the chair, when no less than thirty-one new members were elected, a number only exceeded, in the five years' existence of the society, at one previous meeting, when forty names were added to the list of members. Mr. Graves called attention to a series of lithographs of ancient Irish crosses. Some letters, with accompanying papers or remarks, were then read, and the secretary laid on the table the printed proceedings and transactions of the society for March, now ready for delivery, as the second *fasciculus* of the part for 1854. Various donations were then presented, and Mr. Graves gave some account of a recent discovery of ancient architectural remains and armorial bearings of the Shee family, in a house at Kilkenny; and a communication from Mr. W. Hackett, of Midleton, on ancient boundary marks, was read. The papers subsequently submitted to the meeting were as follow:—"Cromwell at Carlow," by Mr. R. Malcomson, of Carlow; "Architectural Notes on St. Mary's Collegiate Church, Youghal," by the Rev. Samuel Hayman, of Youghal; and "Observations on Tulachs" (or sepulchral mounds), by Mr. John O'Daly, of Dublin.

WINDSOR ROYAL SOCIETY FOR IMPROVEMENT OF DWELLINGS.—At the annual meeting of this society, it was reported that the model cottages erected last year had been highly successful, having already yielded at the rate of more than 6 per cent.; and that, therefore, it had been determined to erect twenty-eight additional tenements, at a probable cost of 2,800*l*. The model lodging-houses had not succeeded so well as the model-cottages; nevertheless, a dividend of 4 per cent. on the whole capital, for the nine months preceding, was declared, and the report adopted. The twenty-eight new cottages are expected to be completed by 1st of June.

PANYER-ALLEY, CITY.—I beg leave to ask you what has become of that ancient "landmark of the highest ground in London," which stood in Panyer-alley, at the top of Newgate-street? The "landmark" was the figure of a boy carved in stone; a copy of it will be found in "Hone's Table or Every-day Book." I hope somebody is responsible for the preservation of the original. I cannot conceive that it has been lost sight of by the corporation of London, whose veneration for ancient matters is well known.—A CITIZEN.

SALE OF MR. GWILT'S LIBRARY.—It may be useful if we draw attention to the advertisement of the sale of the library of Mr. Joseph Gwilt, by Messrs. Puttick and Simpson. We understand there are few private libraries so rich in works on the history and science of architecture as that of Mr. Gwilt.

SILICA IN THE ARTS, &c.—At the Royal Institution a paper was lately read by the Rev. J. Barlow on this subject, in which he pointed out that besides insoluble substances such as glass, silica formed a soluble glass when united with an alkali such as soda alone, which soluble silicate or glass was applicable to several purposes, such as the protection of building stones from decay, occasioned by the sulphureous acid of towns or otherwise, the carbonic acid of the air being regarded as capable of decomposing the *soluble* silicate, leaving the silica as a deposit, but more probably by the conversion of the soluble silicate into an insoluble by its conjunction with lime, magnesia, or other bases in the stone. Another proposed use of the "water-glass" was that of hardening cements, mortars, &c. so as to render them impermeable by water, or waterproof, and acting as a substitute for size in whitewashing, carbonate of lime, mixed with a weak solution of water glass, not being easily removable as whitewash, or when a coat of common whitewash is washed with one of water glass. The Stereochrome of Fuchs was also explained as an application of the formation of insoluble cement by means of water glass.

CHURCH ACCOMMODATION AT WESTMINSTER.—The Marquis of Bristol has promised to contribute 500*l*. the Earl of Derby 500*l*. and Sir W. Farquhar 500*l*. towards a fund of 15,000*l*. for increased church accommodation in the parish of St. James, Westminster. The Bishop of London offers 1,000*l*. on condition of 4,000*l*. being subscribed in sums of not less than 500*l*. The parish contains 20,000 poor, and there is not free church accommodation for more than 810 adults.

WORKMEN'S FUNERALS.—In reference to this subject, a prospectus, with drawings, has been sent us, from Boston, Lincolnshire, of "Massingham's Patent Funeral Car and Bier," as supplying a desideratum towards the attainment of a suitable mode of conducting workmen's funerals. In this case, however, the friends, instead of carrying the coffin, may only be called upon to aid in moving the car by means of handles at the sides and ends. The whole is arranged very becomingly, either with canopy and pall, or pall alone, and probably for the conducting of funerals to a distance of several miles, as in many metropolitan funerals, such an arrangement would be better than the simple Scottish mode of dispensing with either car or bier, but certainly either of these modes is, at all events, preferable to the noxious and reprehensible system of hiding and confining the bearers under the pall.

THE INJURY TO HANWELL CHURCH.—The following are some particulars of the injury done by lightning to Hanwell church. The church was struck on Tuesday, the 9th ult. about five o'clock in the afternoon. The clock which was fixed in the south side of the tower was blown out from its place across the road into a garden opposite, and several bricks were picked up upwards of 100 feet from the church, in an adjacent field. The spire is forced considerably out of the perpendicular. It has, I believe, been condemned by the district surveyor, and the scaffolding for its removal will be got up as soon as possible. The works of the clock at the time of the accident were taken out for the purpose of being repaired, but several of the wheels, &c. remained, and were picked up with the face. There was, of course, no lightning-conductor.—T. S.

ELECTRO-TELEGRAPHIC PROGRESS.—The *subterranean* line of telegraph between Liverpool and London was opened to the public on 10th inst. messages forwarded and a considerable reduction made in the tariff of charges. The previous charge of 5s. from Liverpool and Manchester to London was replaced by one of 2s. 6d.; and Manchester, Liverpool, and Birmingham were put into intercommunication for 1s. instead of 2s. 6d. No charge is made for name and address in the messages, and despatches by this company are to be delivered free of charge within a circuit of a mile from the different offices. The directors state, that as a system of cheap telegraphs demanded by the mercantile classes is now placed by this company within their reach, it should not be left in the lurch when other tariffs are reduced to the same liberal amount. The mayor and principal merchants of Manchester were present at the first experiment, and messages were sent to Paris direct and responded to in one minute. The Mayor of Manchester congratulated the mayors of Paris on the establishment of a direct communication between the two places, and the Prefect of the Seine sent "warm thanks and assurances of the cordial sentments of the city of Paris for the city of Manchester."

OXFORD ARCHITECTURAL SOCIETY.—The first meeting of this term was held on 17th inst. The union of the Art and the Architectural Society was reported on as under consideration. The Worcester Diocesan Architectural Society invited the members to their meeting at Coventry, in June. Mr. Bruton read a paper on the proposed new halls for students.

SURREY ARCHÆOLOGICAL SOCIETY.—We ought to have mentioned last week that this new society made a very successful *début* on Wednesday in week before last, when two inaugural meetings were held at the Bridge-house hotel—Mr. H. Drummond, M.P. in the chair on both occasions. At the morning meeting the council of the society presented its report, from which it appears that the society already numbers 365 members, 38 of them life members. Many objects of antiquarian interest were exhibited at the public meeting in the evening, when Mr. Drummond delivered an introductory address; after which the Rev. Mr. Jessop read an inaugural paper on the religious bearing of archæology upon architecture and art; and the honorary secretary, Mr. G. B. Webb, read a paper on the military road between Staines and Silchester, with memoranda by Mr. Lance on Roman entrenchments and other works in the same district.

THE TIMBER TRADE.—In all branches of the timber trade there is a decided stagnation, caused in some measure by reaction from the high prices of last year, but principally by the discouragement that warlike prospects offer to speculative house-building. The demand for wood is now restricted to purposes only that cannot be dispensed with or postponed. Of Dantzig timber the stock in the London market is large—less of full than under-sized; the sale slow, and prices declining. Of Memel timber, on the contrary, the stock is inconsiderable. For Stettin timber there is no great demand. Memel and Dantzig deals are in good demand all over England: the stocks on the other side are exhausted, and orders are on hand there which will probably consume all the deals converted from round wood during the next month or two. This article is rising in price, and must advance still further. Staves, in consequence of the enormous supply, have become a complete drug in all the English markets. Oak planks and deck deals are being purchased largely by the French government, whose agents are busy, it appears, in the northern Prussian ports; and these articles are both scarce and dear in the London market.

EXETER DIOCESAN ARCHITECTURAL SOCIETY.—The usual quarterly meeting of the Plymouth branch was held at the society's rooms, Royal Union Baths, Plymouth, on 11th inst. The Rev. Mr. Coppard read a paper in continuation of his description of the priory church of Plympton St. Mary. He was followed by Mr. Spence, who read a fourth section of his "Iter Cornubiense, or Journal of Rambles in search of the Ecclesiastical Antiquities of the county of Cornwall." At the termination of the meeting, the secretaries were requested to make arrangements for an excursion, to comprehend the churches of Broad Hempston and Berry, near Totness.

CONSECRATION OF THE RHONDDA VALLEY CHURCH.—This new church, dedicated to Saint David, was consecrated by the bishop of the diocese, with the usual ceremonies, on Tuesday in last week. The edifice, which is in the Early Christian style of architecture, is capable of holding 253 persons, and is built of stone furnished from the quarries of Mr. Lewis Morgan, of the Hafod, the donor of the site, who also contributed the stone for the parsonage-house and schools, now in course of erection. The church is perfectly plain and simple in its internal arrangements.

NEW MACHINE FOR RAISING WATER.—An apparatus for raising water has just been patented by Mr. P. Hillou, of Bucklersbury. It is said to be capable of raising, according to size, from 150 to 40,000 gallons per minute. One machine, about 2 ft. square, is represented as capable of raising 200 gallons per minute. Extreme simplicity of construction is claimed for these machines as a chief recommendation. Another patent taken out by Mr. Hillou, by the way, is one for depriving caoutchouc manufactures of the offensive smell which forms such a drawback on their other advantages.

PARTNERSHIP LIABILITY.—In a case tried lately at the Sheffield County Court, an ironfounding firm sought to recover from two defendants, masons and builders, a sum of 11*l*. 17s. for fixtures supplied under a contract signed by a son of one the defendants, as was alleged for the whole as partners, they having as such paid money to account and promised payment of the remainder due. For the defendants it was urged that the young man who signed the contract alone was legally liable. The judge decided that the defendants had so mixed themselves up with the contractor that all were liable, and gave judgment accordingly.

METROPOLITAN BUILDINGS ACT.—In answer to Sir J. Shelley the other evening, Lord Palmerston said the Government had had under their consideration the introduction of a Bill for the amendment of the Metropolitan Buildings Act, and relating to buildings in general, but the difficulties in the way were so great that he very much doubted whether there would be any possibility of introducing it this session.

RAILWAY MATTERS.—A danger signal has been patented by Mr. G. Dugmore and Mr. G. H. Millward, of Birmingham, by means of which a train may be warned of the stoppage or obstruction of another train in the way. The agency is electro-telegraphic, a battery in the train communicating either through a special inner line of rails connected by copper wires, or through the rails already laid if the electric course be properly insulated, so that the battery might act through the ordinary wheels of the carriage or tender conveying it. When put in action, the electric force is to act on the coming train through the wheels, connected with a bell apparatus, so as to ring it with continued violence. The patentees also provide for the event of the overturn of the carriage, truck, or tender containing the apparatus.——The great shaft or caisson, designed by Mr. Brunel for the Prince Albert Railway suspension-bridge across the Tamar, at Saltash, was launched on Monday before last, and was to be sunk into its perpendicular position end of the week. The shaft is nearly 90 feet long, and between 30 and 40 feet in diameter. When sunk upright, and made tight, a granite pier is to be built, commencing from the Rock of Dun Stone, at the bottom of the Tamar, over which, at high water, there will be no less than 83 feet of water. Mr. Brunel has thus to make his Britannia rock in mid channel; and over it, when built up about 10 feet above high water, two cylindrical piers, about 140 feet in height, are to be built of cast iron, and on the top of these, and on either side of the river, on the top of the stone piers, built from low-water mark, are to be placed the cylindrical beams, nearly 50 feet in length, which are to carry the iron railway, suspended by chains like the Chepstow bridge, which has been found to answer. The advantage of bridges of this description over the tunnel tubes of Mr. Stephenson is the saving of weight, the quantity of iron used being less than half; and as a single line is deemed sufficient, it will be built at less than one-fourth the expense of the double one across the Menai.

PUBLIC BUILDINGS IN DOWNING-STREET. — It appears from a parliamentary paper lately issued, that the expenses incurred in the alterations, repairs, and improvements in the various public buildings in Downing-street from 1831 to 1853 inclusive, amounted in the whole to 24,971*l.*

ENGLISH CARVING.—The *Sheffield Independent* mentions that the head of the Heredia family of Malaga, in Spain, has had carved, by Mr. Hyball, of Sheffield, one of the exhibitors in the Great Exhibition of 1851, an oaken altar-piece, 10 feet high, and worth 200*l.* carved from a design by Mr. Goldie, of Weightman, Hadfield and Goldie, and decorated, gilt, &c. by Mr. H. T. Bulmer, also of Sheffield. Candelabra for it are being executed at Birmingham

ST. JAMES'S BATHS AND WASHOUSES, WESTMINSTER.—From a report just issued it appears that from the opening of this establishment on 14th June, 1852, to 25th March, 1854, inclusive, the bathers have been 168,506 men, and 32,687 women and children. They were in the proportion of three of 2nd class to one of 1st class. The washhouses had already afforded accommodation to poor women upon 54,273 occasions, averaging about three hours at each time. The amount received from bathers and washers was, for the year ended 31st Dec. 1853, 2,038*l.* odd, and the total expenditure 1,791*l.* odd, leaving a surplus of about 247*l.* This first full year's experience of the establishment, therefore, is regarded as eminently successful in conferring benefit on the working classes, while it has proved the establishment to be already more than self-supporting.

ENTRANCE TO THE READING-ROOM, BRITISH MUSEUM.—What are the authorities ashamed of? The state of the catalogues,—the deficiencies in the library,—or the *status* of those who go to read? There must be some cause, or why is the public obliged to go in by a back entrance,—comparatively speaking, like the way to a pawnbroker's shop. If the approach to the chiselled remains of bygone ages must be through massive columns, why should the avenue to thoughts that never die be through an obscure passage? It is to be hoped that the entrance to the reading-room, now commenced, will be from the hall.—W. H. B.

DECAY OF STONEWORK.—I shall be greatly obliged if any of your correspondents can tell me any means by which I can stop the decay of some stonework in a new building. The stone is a Magnesian limestone, but much less compact and hard than that of Bolsover Moor or Mansfield, and much whiter in colour: the decay begins by an efflorescence on the surface, as described by your correspondent, J. B. Davis, and proceeds very rapidly. The edges of the stone suffer most, and some parts of the surface of a stone remain quite sound, whilst other parts have considerably decayed. The building stands in the country, and is not exposed to smoke, or any other action than that of the atmosphere. J. A. D.

FALL OF TWO HOUSES IN ANGEL-COURT, LONG-ACRE.—On Tuesday afternoon in last week, two houses fell with a tremendous crash in Angel-court, Long-acre. A few minutes before the fall several persons observing that the party walls gave tokens of insecurity, ran away with all speed, and in a few minutes the wall fell, dragging with it the roof and floors. The miserable condition of the houses in this court is alluded to in "London Shadows."

THE IMPURITIES IN OUR GAS.—Another report to the City Court of Sewers has been made by Dr. Letheby, professor of chemistry and toxicology in the London Hospital, in which many additional facts are adduced in support of his previous report. To some of these we may have occasion hereafter to refer; meantime we give the conclusions of the new report:—"It may now be asked, whether I can suggest any remedy for the evil. I reply that the remedy is threefold—first, in respect of the manufacture of gas; secondly, as regards its purification; and, thirdly, in a more perfect system of ventilation. At present gas is manufactured from materials which are known to contain a large per centage of bi-sulphuret of iron, and the temperature at which the gas is made is far too high for sanatory purposes. 2ndly. Although much attention has been directed to the purification of gas from one or two of its impurities, little or no notice has hitherto been taken of the most important of all, namely, bi-sulphuret of carbon. This, I believe, has been in consequence of the difficulty which the public has in recognising it, and a hope has therefore been entertained that it would pass unnoticed. It is, however, one of the most formidable of all the impurities contained in coal gas. [To a new and easy way of getting rid of this impurity we lately drew attention.] 3rdly. It is advisable that gas should be burnt outside the room or shop wherever it is practicable; and when this is not the case, the products of the combustion should be conveyed away by special contrivance as speedily as possible; indeed, they ought not to be allowed to escape into the room at all. [On this we have also again and again insisted.] I am quite sure that many elegant [and not a few simple and cheap] arrangements may be suggested for this purpose whenever the public are made aware of its importance." The report was unanimously ordered to be printed.

THE IRON TRADE.—Some of the evil fruits of wanton speculation in this trade may be gathered by anticipation from such remarks as the following, which we quote from the *United States Mining Journal*. "Those who have watched the rapid development of the iron manufactures in the Union, need not the hourly confirmation of our views which is exhibited by the erection of furnaces, and by the multiplication of iron companies, headed by energetic and practical men. So rapid is this progress, that the more prudent of the British ironmasters have refused to countenance any further advance in the prices of iron, well knowing that *every shilling per ton increase in the value of this staple is but another nail in the coffin of their monopoly*. The day has already dawned which shall emancipate us from the thraldom of bringing from Europe that metal which lies in inexhaustible masses at our doors. Already Missouri and Lake Superior iron has been shipped to Sheffield, converted into steel there, and returned to us in cutlery of the finest quality. Ere long, not only shall we dispense with British iron, but the superior properties of our iron will drive the Russian and Swedish steel iron from the British markets." And however boastful our Yankee brethren may be in their anticipations, still they strive to realize their boastings; and our iron trade gambling having already opened their eyes to their own interest in this matter, they are not likely to sleep over it.

A FEAT IN HOUSE-MOVING.—The State House of South Carolina in Columbia, has been removed from the position which it has long occupied, to make room for a new and more imposing capitol, which is to be erected upon its site. The *Carolinian* says,—"This is one of the greatest feats in house-moving we have ever heard of,—no chimneys removed, no plastering disturbed, and, indeed, the Legislature might have been in session without being at all annoyed by the process of moving." The work was done by a Yankee from Massachusetts.

DECORATION OF LECTURE-ROOM AT SHEFFIELD MECHANICS' INSTITUTION.—The trustees of this institution have lately had their lecture-room decorated from designs gratuitously offered, together with superintendence of the execution, by Mr. H. T. Bulmer. The decorations are Greek in character. The ceiling is divided into 156 panels, coloured with crimson, blue, yellow, and pink. The cross beams which divide them into groups are so covered beneath with the Greek fret ornament, and on the sides with the egg and tongue and other ornaments, in colours, as to embellish the ceiling. A cornice, with frieze of the honeysuckle ornament, surrounds the room. The wall facing the gallery is divided into three panels, having ground colours of orange, and borders of red, gold, black, blue, and brown. The panels are divided by black pilasters, covered with an arabesque ornament in green, and bordered with gold. The lower portion of the walls, all round the room, to an elevation of about eight feet, is painted in a deep crimson, with the Greek wave ornament in black as a border. The windows are treated as panel spaces, and are divided by pilasters of same colours and patterns. The wall over the principal entrance is occupied with three panels, to harmonize with those at the end of the room. The gallery front is occupied by a long procession, painted by Mr. Godfrey Sykes, an artist well known at the local School of Art. In this work there are about sixty figures, relieved after the manner of the Grecian bas-reliefs, upon a blue ground. These figures are partly classical and partly characteristic of Sheffield industrial employments; but we have not room for detail. The panels over the door, and at the end of the room, are also filled with classical figures. The general decorations have been executed by Messrs. Rodgers and Styring, of Sheffield. Other improvements, as in lighting, have been effected.

THE CANADA WORKS, BIRKENHEAD.—Messrs. Brassey, Jackson, Peto, and Betts, the contractors for the Grand Trunk Railway of Canada, are here constructing their plant and materials. The main building is 900 feet long by 36 wide. The yard encloses a long water basin, where coals, &c. are landed. A railway also runs from the docks to all parts of the yard. The establishment is divided into two distinct compartments: one for the manufacture of locomotives, waggons, carriages, and plant, and the other for the construction of bridges, all the large ones tubular, and one of them, over the St. Lawrance, a mile and three-quarters in length. The general manager of the works is Mr. Harrison: the "bridge department" is superintended by Mr. Evans. Two large stationery high-pressure engines, of 30-horse power each, supply the motive power to the numerous slotting, planing, punching machines, steam hammers, and other mechanical contrivances for assisting the labour of handicraftsmen. The locomotives are constructed ten at a time. The number of men already employed is upwards of 300, and every week additional hands are being taken on, till the maximum of 600 is reached. The wages of the mechanics range from 28s. to 34s. per week, the average being 31s. 6d. The monthly expenditure in wages alone is now upwards of 5,000*l.*; and, when the works are in full operation, it will be more than double that amount, or at the rate of 120,000*l.* per annum.

GATESHEAD BATHS AND LAUNDRIES.—The shell of this new establishment, in Oakwellgate, Gateshead, is now nearly completed. The architect is Mr. W. Hall, the borough surveyor, and the style is Elizabethan, with a tall chimney, which, according to the *Gateshead Observer*, who promises an engraving, is made to play a pleasing part in the general effect. There will be first and second class baths for men and women respectively; and a plunge-bath may be subsequently added. The washing-stalls will be thirty-six in number, with a suitable provision of drying-horses. The *Observer* is naturally somewhat jealous of an innovation on the ancient *Arms* of the borough, which consist of a goat's head and castle, and are chiselled on the exterior along with a motto, "*Caput inter nubila condit*,"—remarking that while the absence of any motto seems to prove the antiquity of the Arms, their real meaning has long been thus embodied in an old song:—

"Gyatshede her beарde shall freely wagge
Atte her proude neibоure o'er the way
Lette her displaye her flaunting flagge
Onne her Newe Cassel as shee may."

[ADVERTISEMENT.]

Another Severe Test of CHUBB'S FIRE-PROOF SAFES in Manchester.—All the Books, Bank-notes, and Policies saved.

"Store-street Mills, Manchester.
May 16th, 1854.

"Messrs. Chubb and Son,—

"Gentlemen,—We have the satisfaction of informing you, that the 'Fire-proof Safe' we purchased from you about three years ago, for our premises in Store-street (the counting-house and blowing-room of which were completely destroyed by fire last evening), has secured the entire of our books contained therein, together with cash, notes, policies, &c. to our astonishment, considering the intense heat the Safe was exposed to from being built in the chimney flue.

"You are at liberty to refer parties to us, should any further particulars be required.

"We are, Gentlemen, yours respectfully,
WM. JONES and SONS."

CHUBB and SON, Patent Lock and Fire-proof Safe Makers, 57, St. Paul's-churchyard.

TENDERS

For the erection of new premises in Wood-street, Cheapside, for Messrs. Munt and Brown. Mr. G. Somers Clarke, architect :—

Lucas (Brothers)	£17,319 0 0
John Glenn	17,185 0 0
Geo. Myers	17,100 0 0
Lawrence and Sons	16,934 0 0
Brass and Sons	16,834 0 0
John Jay	15,914 0 0

For alterations and additions to Park Farm, Tooting, for G. Bousfield, Esq. Mr. James Harrison, architect, quantities furnished by Mr. Young :—

Lucas (Brothers)	£1,699 0 0
Grimsdell	1,683 0 0
Haynes and Eyre	1,560 0 0
Ashby and Sons (accepted)	1,508 0 0

For Farm Buildings, Homestead, &c. for his Grace the Duke of Buccleugh, on the Buccleugh estates. Messrs. Henderson and Drake, architects. Quantities not furnished :—

	Amount of Tender exclusive of Materials to be provided by the Estate.	Amount of Tender including all Materials without deducting for old Materials
	£.	£.
Pennerley Farm.		
Dover (Brothers), Winchester	2,133 0 0	2,483 0 0
Ivy and Co, Beaulieu	2,160 5 0	2,495 19 6½
Messrs. Philps, Sherley	1,715 0 0	2,021 0 0
Geo. Banks, Lymington	1,568 0 0	1,882 0 0
Ley Green Farm.		
Dover (Brothers)	1,917 0 0	2,317 0 0
Messrs. Philps	1,893 0 0	2,314 0 0
Geo. Banks	1,482 0 0	1,946 0 0

G." "W. L. G." "L and M." "R. B." "F. F." (essays would have little effect). "Mr. P." "R. E." "F. C." (will appear). "T. J. P." (we decline forwarding letters addressed to our office). "Dr. L." "J. B." "W. R. C." "P. L." "C. L." "R. H. and Son." "W. H." "J. W. P." "E. G. L." "Rev. J. P." "Alpha." "Inge-street, Birmingham" (name unobtainable), "J. C. C." "E. S." (monument has been already mentioned).

* *Books and Addresses.*—We have not time to point out books or old addresses.

NOTICE.—All communications respecting *advertisements* should be addressed to the "Publisher," and not to the "Editor:" all other communications should be addressed to the EDITOR, and *not* to the Publisher.

ADVERTISEMENTS.

TO the Worshipful the MAGISTRATES of the County of Middlesex.

MY LORDS AND GENTLEMEN.—Having been admitted as a Candidate for the now vacant office of District Surveyor to the Tower-hill liberty, &c. I beg most respectfully, in soliciting your support at the Election on Thursday next, June 1st, to remind you that at the last Election the successful Candidate obtained by one vote more than the number given for me. My testimonials are lodged with the Clerk of the Peace, and having already been deemed sufficient to entitle me to the favour of your support once, may I trust be safely relied upon now, to secure for me that additional support requisite to obtain the appointment.—I have the honour to remain, my Lords and Gentlemen, your obedient servant,

FRED. WM PORTER.

13, Charlotte-street, Bedford-square, May 15th, 1854.

CLERK Wanted, who is capable to take charge of PLANS of House property, collect rents, and keep accounts. The strictest inquiry into character will be made, and security required.—Apply, stating where last employed, and salary expected, to A. T. Z. Office of "The Builder."

TO JOINERS.

SEVERAL good JOINERS (bench hands and fixers) can obtain IMMEDIATE and CONSTANT EMPLOYMENT at an advance rate of country wages, by applying to Mr. W. WILLICOMBE, Builder, Tunbridge Wells. N.B.—None but sober, industrious and good workmen need apply.

BOROUGH OF SUNDERLAND.

THE CORPORATION of the BOROUGH of SUNDERLAND are desirous of appointing a SURVEYOR, or CLERK OF THE WORKS, to act under the Engineer. The person so appointed will be required to give up the whole time to the service of the Borough, and must be competent to superintend the construction of Sewers, Culverts, Roads, Streets, and the Paving and Cleansing of the Borough; to measure off Work, inspect Houses in the course of erection relative to drainage and ventilation, and any matters arising under the Public Health Act; to make Working Drawings, and occasionally set out the levels of Sewers, &c. The salary will be 120*l.* per annum. All persons desirous of applying for the office are requested to send their applications, accompanied by their testimonials, addressed to the Town Clerk, Sunderland, not later than the 7th of June, 1854, endorsed, "Application for Sub Surveyor." Further particulars may be known on application to the Corporation Engineer, East Cross street, Sunderland.

By Order, WM. SNOWBALL, Town Clerk.

Sunderland, 12th May, 1854.

TO ROAD SURVEYORS AND OTHERS.

WALSALL IMPROVEMENT MARKET ACT, 1848.—WANTED, by the Commissioners under the above Act, a TOWN SURVEYOR, who will be required to devote the whole of his time to the duties of the office. The salary will be 100*l.* a year, with house and office rent-free, and gas in the office and sitting-room, also free. Applications and testimonials to be sent to the Commissioners' Clerk's Office, by or before FOUR o'clock, on MONDAY, the 5th day of JUNE next. Notice will afterwards be given to such applicants as the Commissioners may desire to have a personal interview with. Any candidate canvassing the Commissioners will be disqualified.

SAMUEL WILKINSON, Jun. Commissioners' Clerk.

Walsall, May 17, 1854.

TO CIVIL ENGINEERS, &c.

WANTED, by a Surveyor and Draughtsman, a SITUATION in a CIVIL ENGINEER'S Office. Salary not so much his object, as a desire to improve himself.—Address A. T. Office of "The Builder."

TO ENGINEERING SURVEYORS.

WANTED, an accurate and expeditious SURVEYOR and DRAUGHTSMAN, accustomed to triangulate and make town surveys in accordance with the specimen plans of the Board of Health, as also to take levels. None but those who have had good practice need apply.—Address, stating full particulars, with terms, to ALPHA, care of Mr. Cooper, Stationer, Market-place, Great Yarmouth, Norfolk.

TO PAINTERS, &c.

WANTED, a respectable Youth as an IN-DOOR APPRENTICE; one who has been at the business preferred. For particulars, inquire at 37, Goswell-road, near the Angel, Islington.

WANTED, a YOUTH, from 16 to 20 years of age, who can write a good bold hand, and understands accounts; one who has a knowledge of architectural drawing would be preferred.—Apply to A. B. Phelp's News-office, The Change, East-road, City-road.

WANTED, by an ARCHITECT and SURVEYOR, a competent ASSISTANT; must be a good draughtsman, &c.—Address, Y. X. stating terms and qualifications, City News Rooms, Cheapside. Also, an IMPROVER WANTED, whose advancement would be considered an equivalent for his services for a year or two.

CARPENTER AND JOINER.

WANTED, a WORKING FOREMAN of JOINERS, one who thoroughly understands the business, can set out work and take orders; must be steady and sober. Good reference required.—Apply by letter, O. F. Mr. Sandman's, 9, York-street, Borough Market.

WANTED, ACTIVE AGENTS for the AMAZON LIFE ASSURANCE and LOAN COMPANY, and SICK BENEFIT SOCIETY. A liberal commission and procuration fees allowed.—Applications to be made to Sir E. GRAHAM, Bart.

1, Ironmonger-lane, London. Manager pro tem.

Loans on personal security.

WANTED, by a Builder, an experienced FOREMAN of PLASTERERS, to superintend a first rate job in town, one who understands modelling and groined ceilings. Apply by letter, to E. F. 48, Penchurch street, City.

TO ARCHITECTS, &c.

WANTED by a Young Man, who is about to be disengaged, owing to the completion of Works on which he has been occupied, a SITUATION as CLERK of WORKS. He can produce good testimonials as to character and ability.—Address X. Y. Z. Mr. Coventry's, Bookseller, Hackney.

TO BUILDERS AND OTHERS.

WANTED, by a thorough practical Man, a SITUATION as OUT-DOOR FOREMAN or CLERK of WORKS. Is a good draughtsman, writes a good hand, and can produce unexceptionable testimonials from previous engagements.—Address A. Y. 89, St. John-street-road, Islington.

TO LANDLORDS, HOUSE-AGENTS, AND JOBBING MASTERS.

WANTED, PERMANENT EMPLOYMENT in the GENERAL REPAIRING line. Town or country.—Address, Y. Z. 4, King-street, Kensington, Middlesex.

TO BUILDERS AND CONTRACTORS

WANTED, a SITUATION as FOREMAN of BRICKLAYERS, or GENERAL FOREMAN, by a good practical bricklayer, who has filled the above situation for the last twelve years.—Direct. C. B. 40, Agnes-street, Waterloo-road.

TO MASTER PLUMBERS.

WANTED, by a respectable Young Man, a PERMANENT SITUATION as PLUMBER'S LABOURER. Wages moderate.—Address, G. H. Globe Coffee-house, Long-acre, St. Martin's-lane.

WANTED, by an experienced practical Man, a RE-ENGAGEMENT as CLERK of WORKS, or GENERAL or SHOP FOREMAN in a respectable firm. Good reference as to character and abilities. Age 35. Address, W. M. 7, Windsor-place, City-road.

WANTED, by the Advertiser, aged 30, a SITUATION as TIMEKEEPER, or in any other capacity where he could make himself useful to his employer; he is a good penman, correct at accounts, and can give satisfactory references as to honesty, sobriety, &c.—Address, HOPE, 1*a*, Blenheim-terrace, Abbey-road, St. John's wood.

WANTED to PLACE a YOUTH, respectably connected, aged 16, with a BUILDER in the country, to learn the business; he has been some time in a London shop.—Address, E. C Mr. Light's, Grocer, Barnsbury-road, London.

TO MASONS AND BUILDERS.

WANTED, by the Advertiser, a Situation as FOREMAN of MASONS; has a practical knowledge of the business in all its departments, and can have first-rate recommendations from firms where he has filled situations for the last seven years.—Address, W. M. 9, St. James's-terrace, Caledonian-road, Islington.

TO BUILDERS AND HOUSE AGENTS

WANTED, by a respectable Young Man, a SITUATION in town or country as CARPENTER and JOINER, or to collect rents and do general repairs.—Address A. Y. Z. No. 1, Barnham-street, Tooley-street.

TO PLUMBERS, BUILDERS, &c.

WANTED, by a thoroughly practical Man, a SITUATION as PLUMBER or THREE-BRANCH HAND. Reference from his present employer.—Address, A. B. 16, Vine-terrace, Waterloo-road, Lambeth.

TO ARCHITECTS.

WANTED, by the Advertiser, who is about to leave his present employment, a SITUATION as ARCHITECTURAL DRAUGHTSMAN; is fully competent to get up neat contract working, and other drawings, possesses a thorough knowledge of perspective, and is perfectly conversant with the usual routine of an architect's business. Can obtain the highest testimonials of ability from his present and previous employers. London would be preferred, but no objection made to a country office.—Address, L. 36, Prince-street, Bristol.

TO BUILDERS AND OTHERS.

A YOUNG MAN of steady habits, a BRICKLAYER, wishes to ENGAGE HIMSELF. Wages not of so much import as constant employment. No objection to town or country.—Direct to S. A. 3, Saville-street, Marylebone-street.

TO ARCHITECTS, SOLICITORS, BUILDERS, AND OTHERS.

A YOUNG PRACTITIONER would be glad to undertake the following, at a moderate remuneration, getting out plans and working drawings, perspective drawings, surveys and levels, putting plans on deeds, and other ordinary work.—Address, O. M. care of W. Dawson and Sons, Abchurch-yard, City.

A MIDDLE-AGED MAN wishes to ENGAGE HIMSELF as HOUSE CARPENTER to a Gentleman. No objection to town or country. Undeniable references can be given as to character and ability. Apply to A. B. 10, College-street, Brompton-road, Middlesex.

A YOUNG MAN is desirous of meeting with an ENGAGEMENT in an ARCHITECT'S OFFICE, in town or country. He has been regularly educated to the profession in a London office, and is acquainted with the general routine of an architect and surveyor's practice. Address, C. L. Office of "The Builder."

TO BUILDERS.

A YOUNG MAN, of business habits, fully competent to prepare working and finished drawings, measure, and take out quantities, and superintend work, wants a RE-ENGAGEMENT. He is practically acquainted with two trades. First-rate testimonials.—Address, B. F. 8, Buckingham-place, Pimlico.

TO CARPENTERS, PIECE-MASTERS, AND OTHERS.

A YOUNG MAN who has been at the above trades for four years, but chiefly in the Building and Fixing, wishes for a better INSIGHT at the BENCH. Wages not so much an object. He can do anything in the business, or go out jobbing.—Apply to J. GODFREY, 9, Short-street, Richmond-street, Edgware-road, London.

TO ARCHITECTS.

A GENTLEMAN, disengaged after Five o'clock, is desirous of making arrangements with Architects in extensive practice to ASSIST them, when pressed with business, in furnishing working and detail drawings, and tracing the same at his own residence.—Address W. W. care of Mr. Elmslie, Post-office, Braxton-road.

A YOUNG MAN, aged 24, wishes to meet with a SITUATION as JUNIOR CLERK in a Builder's office. Can have very good reference.—Address J. B 25, Leybourne-road.

A THOROUGHLY practical CARPENTER and JOINER, who can prepare plans, elevations, and detail drawings, measure, &c. requires a SITUATION as GENERAL or SHOP FOREMAN, or to take charge of a job. N B Country not objected to. Address, ALPHA, 133, Bunhill-row.

TO ARCHITECTS.

AN ARCHITECTURAL DRAUGHTSMAN and DESIGNER is open to an ENGAGEMENT in town or country. Understands details, quantities, specifications, and finishing perspective drawings in an artistic manner. No objection to travel. References and testimonials unexceptionable. Address, C. C. D. 22, Leybourne-road, Camden-town.

TO ARCHITECTS, &c.

AN Architectural Draughtsman is open to an ENGAGEMENT. He is accustomed to perspective, finished, working, and detail drawings, &c. Salary moderate. Unexceptionable reference can be given. Address to A. W. Office of "The Builder."

TO BUILDERS AND OTHERS.

A YOUNG MAN desirous of IMPROVING HIMSELF for TWO YEARS. Wages not a consideration; has been at the trade five years.—Address, A. B. 5, Paradise-place, Hackney.

THE Advertiser (aged 22), a good Draughtsman (geometrical and perspective), and competent to get out finished and working drawings, take out quantities, &c. is desirous of a TEMPORARY ENGAGEMENT. Terms moderate. Address L. B. Mr. Bridge's Newspaper-office, Sherrard-street, Regent-street.

TO CONTRACTORS, BUILDERS, AND OTHERS.

THE Advertiser, a person of experience, OFFERS his SERVICES to the above, either partially or otherwise. He is well acquainted with the several trades, in book-keeping, plain drawing, estimating, and measuring work.—Address, post-paid, A. B. Mr. Reynolds's Office, 303, Brick-lane, Spitalfields.

TO ARCHITECTS, SURVEYORS, BUILDERS, AND OTHERS.

THE A vertiser having for many years being in the constant habit of PUTTING UP STAIR-CASES and HAND RAILS of every description for the trade, takes the liberty of soliciting your favours in those departments, and you may rely on his executing the work in the best manner. Patent veneered handrails. Estimates given.—Address, W. STARR and SON, No. 85, Dean street, Soho, London.

TO MASTER PLASTERERS OR BUILDERS.

THE Advertiser, a sober, industrious, single Man, wishes to meet with an ENGAGEMENT in a respectable firm, as FOREMAN PLASTERER; is a good plain and ornamental workman, well acquainted with all kinds of cements, and can model. No objection to go to any part. Good reference can be had.—Address, T. G. H. CARTER, Upton, Chester.

EVENING EMPLOYMENT WANTED by an Architect and Surveyor's Assistant, in taking off and preparing Bills of Quantities, making out Drawings, Specifications, &c.—Address A. W. 17, Winter-terrace, Trinity-square, Southwark.

A PARTNER WANTED.—Good references will be expected and given, by SAMUEL RUGG, Composition Stone Works, Truro.

PARTNER WANTED.—A Timber Merchant and Builder, established in London, having extensive waterside premises, and now doing a very considerable business in the wood trade, which would profitably admit of large extension, is desirous to meet with a PARTNER willing to introduce a capital of 2,000*l.* or 3,000*l.* for the purpose of more fully developing the capabilities of the establishment.—Apply to Mr. WM. DOUGLAS, Estate Agent, Lowndes-street, Belgrave-square.

TO ARCHITECTS.

COMPETITION and other DRAWINGS.—Mr. THOMAS S. BOYS, Member of the New Society of Painters in Water Colours, and author of "The Picturesque Architecture of Paris, Ghent, Rouen," &c. and of "London as it is," offers his services in Tinting Backgrounds, Landscapes, Perspective Views, Interiors, &c. From the long experience he has had in such subjects, he is fully aware of the points essentially necessary to be attended to. Drawings and designs lithographed in a superior manner.—Address, Mr BOYS, 33, Albany-street, Regent's-park.

LITHOGRAPHY.—Plans of Estates, Maps, Bills of Quantities, Isometrical Views, and every description of Lithography executed in the best style of the art. Engineering and Mechanical Drawings correctly detailed by experienced hands. Artists and amateurs supplied with every requisite for Lithographic Crayon Drawing and Oil and Water-colour Painting; Presses, Stones, Chalks, &c. Specimens of every class of work for inspection. Estimates given. Instructions afforded.

CHARLES MOODY, 297, High Holborn.

W. TAYLOR and SON, PLASTERERS and MODELLERS, No. 47, Whittlebury-street, Euston-square, beg to inform all those who require sound and well-finished PLASTERING and effective MODELLING, that they are now ready to execute the same at very low prices, in town or country. ORNAMENT only executed with any material on the shortest notice. N.B. A large collection on view.

TO ARCHITECTS, BUILDERS, CONTRACTORS, &c.

HARTLEY'S PATENT ROUGH PLATE GLASS

1-8th thick, or 2 lbs. to the foot; 3-16ths, or 3 lbs.; and 1-4th, or 4 lbs. to the foot, for

RIDGE AND FURROW ROOFS, GREENHOUSES, RAILWAY STATIONS, ENGINE SHEDS, MILLS, MARKET HALLS, AND PUBLIC BUILDINGS GENERALLY.

It being universally admitted that Glass in Roofs of a permanent character should not be less than one-eighth of an inch thick, weighing two pounds to the foot, Messrs. JAMES HARTLEY and CO. have directed their attention to the manufacture of a description of

ROUGH PLATE GLASS, THAT COMBINES SIZE AND STRENGTH WITH ECONOMY OF COST.

The PATENT ROUGH PLATE is manufactured in sizes expressly for Ridge and Furrow Roofs, giving a span of from 6 to 12 feet, at a price not exceeding weight for weight that of common Crown Glass. Not being transparent, blinds are unnecessary, and when used in Greenhouses no scorching occurs; its NON-TRANSPARENCY and strength render it eminently suitable for the Glazing of Conservatories and Roofs of all kinds; also Factories, Workshops, &c for which purposes it is supplied in squares of all sizes, from 8 by 6 inches and upwards.

For further information apply to Messrs. JAMES HARTLEY and CO. Wear Glass Works, Sunderland.

N.B.—The Patent Rough Plate is supplied at a much lower cost than the common Rough Plate.—May 1, 1851.

GLASS.—HARTLEY AND CO.'S GLASS TARIFF NEWSPAPER

Will be forwarded Gratis, on application, "post-paid," to

Messrs. JAMES HARTLEY and CO. Wear Glass-works, Sunderland; or Purfleet Wharf, Earl-street, Blackfriars, London.

BOWDEN'S BRILLIANT CUT ORNAMENTAL WINDOW-GLASS.

MANUFACTURERS—MARK BOWDEN AND COMPANY.

OFFICE, 60, ALDERMANBURY, LONDON; WORKS, NELSON-STREET, BRISTOL.

MAY BE OBTAINED THROUGH ALL GLASS MERCHANTS IN THE KINGDOM.

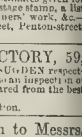
MOORE'S PATENT MOVABLE GLASS VENTILATOR, for Windows, Partitions, Factories, Workshops, Warehouses, Greenhouses, Cottages, Stabling, Granaries and other Buildings, Palaces and Private Houses, &c. For Farms, Dairies, Out-buildings, &c. the Ventilator can be made for fixing in the wall, as in sketch, and is most suitable also for Ventilating inside doors, sashes, &c. It is most suitable also for sky or fan lights, and other purposes. A considerable saving and additional safety by having fixed window sashes.

MOORE'S PATENT "LEVER VENTILATOR," forming a regular current of air, is calculated to effect all that is required for improving internal atmospheres in health. The whole air is entered at the open one left for that purpose. To such parts they are particularly free from dust, as from their capabilities of removing the foul air caused by the gas, the whole room will then be constantly preserve the stock in a good condition, and prevent evil consequences.



Chief Steel House Clock-maker to the Hon. Board of Ordnance, the Russian Government, and the Emperor of Russia.

Manufactory, Sekford works, St. James's walk, Clerkenwell, London.

TODD'S PATENT METALLIC PROTOXIDE PAINT.

THE PATENT METALLIC PROTOXIDE PAINT now offered has been found, after the most severe trials, to be peculiarly efficacious in preserving Iron from ridation, Wood from Decay, and Masonry and Brickwork from Dampness. Applied to Iron, it unites with it most intimately, forming a complete coating; so at thus protected, it will be found equal to the best galvanized iron. Hence its great value to all Engineers and Iron Founders as an application to iron ssels, iron roofs, steam and water pipes, &c. &c. It adheres firmly to iron, even at a red heat. For stuccoed buildings it will be found to be effectual in pre- nting the discolourations formed by vegetation, and keeping out all dampness.

For terms, application to be made at the Offices of the Company, 12, Bishopsgate-street Within; or to the following Agents:—
essrs. PITCHFORD, Island Lead Works, Limehouse, } LONDON. | Messrs. D. and G. BRYMNER ..... GREENOCK.
essrs. G. and T. WALLIS, 64, Long-acre, ...

UBBUCK'S PATENT WHITE ZINC PAINT. THE PERMANENT WHITE of the Ancients, viously confined by its cost to the use of the artist, is now, by abbuck's Patent, reduced to the price of White Lead.
The principal characteristics of HUBBUCK'S ZINC PAINT — Economy, Health, Beauty, and Durability.
Builders and Contractors find Hubbuck's Paint the only one apted to all their purposes; possessing the great desideratum of onomy, combined with its high excellence as a colour, it must ons. Contractors effect a saving of 25 per cent. by using UBBUCK'S ZINC PAINT.
UBBUCK and SON feel it necessary a caution should be cirated against imitations of their Paint. These manufactures, stamine frequently pernicious ingredients, are baneful to health d worthless in use, whilst the inexperience of these imitators in production of pigments is evidenced, not alone by the coarse shy appearance, but also by the deficiency of that body in their dduce, which is known to the painter to be all-essential. That imposition be not practised, therefore, notice that the cask is arked with the name of the original manufacturers, thus—
HUBBUCK—LONDON—PATENT.
f not so marked, the reason may be inferred
Every information on the circular to be had of THOMAS EBBUCK and SON, Paint and Varnish Manufacturers, Upper et Smithfield (opposite the London Docks), London.

HE VIEILLE MONTAGNE ZINC MINING COMPANY'S PURE PATENT WHITE ZINC INT is unequalled for permanency of colour, hardness, and liancy of surface; it is unaffected by sulphureous or any other ours or emanations. Being completely innoxious and free from pernicious effects of whitelead, it may be employed in all rtments whilst in use without any inconvenience to the inbitants.
The greatest caution is recommended to avoid any spurious mpounds that might be sold at cheap rates as Pure Oxide of nc. If any adulteration has taken place in the oxide, either in sequence of impurity in the material primarily made use of to duce it, an imperfect mode of production, or by mixing with oxide certain substances calculated to give it increased weight, hen produces a very inferior instead of a very superior paint. I the economy realized by the purchasers of such oxides omes a very expensive result to the owner of the premises nted with them
The VIEILLE MONTAGNE'S ZINC OXIDES, dry or ground oil, are sold with the VM mark—In Hull, by Messrs. BUNELL, SPENCE, and CO.; when ground and dry, by Messrs. B. MORLEY and CO.; and by the Company's sole drug Agents in London, Messrs. CHARLES DEVAUX and CO. wholesale ers, 82, King William-street, City; JACK and BRADY, wholesale and retail agents, 8, Tottenham-court, New-road, and Upper Thames-street, City. In Manchester and Liverpool, by essrs. LAWFORD and CO. of 48, Norfolk-street, Liverpool, who also acknowledged Painters to the Company for Zinc Paints. I undertake painting ships, warehouses, dwelling houses, &c. ndon, by Messrs. ALEXANDERSON and CO. Thames-bank, Dry IDES and PAINTS, in kegs of 14, 21, and 28 lbs. and upwards, be had of the Company's Agents in Birmingham, Newcastle, ngow, Bristol, Plymouth, Portsmouth, Norwich, Ipswich, ole, and the Isles of Jersey, Guernsey, Man, and Wight; also in blin, Cork, and Belfast.
he Company also employ an acknowledged painter in London. o will undertake any description of painting with Zinc Paint on tract.
or further particulars, apply to the Company's General Agent London, Mr. SCHMOLL, 12, Manchester-buildings, Westster.

HE VIEILLE MONTAGNE ZINC MINING COMPANY beg to inform the public that they e appointed Messrs. T. and S. KNIGHT, of Great Suffolk-street, thwark, as their painters, who will be ready to execute any cription of painting and decorating with the Pure Patent ite Zinc Paint.

ATENT LIQUID CEMENT for Fronts of Houses, &c.—This valuable and economic material is always dy for use, simple in application, and only one-quarter the cost of paint. Sold in casks of 1, 2, and 3 cwt. at 18s. and 21s. each, casks exclusive.
ATENT PERMANENT COLOUR is particularly suited for ls, kitchens, school-rooms, railway stations, &c. as a substitute oil paint: is without smell, dries in an hour, and may be lled over wood, oil paint, stucco, or any other surface. Sold nks of 1 cwt. at 15s. 6d. each.
ATENT ZINC PAINTS. These paints are ready mixed for economical, unchangeable in colour, greatly superior to, and less much longer than common oil paints, and will cover a ch larger surface than the same quantity of white lead paint. ce 8s. per gallon, ordinary colours, Mineral chocolate brown, 5s. rmanent Brilliant Black, for all kinds of outside work, ges park railing, &c. 3s. per gallon.
ATENT INDIA-RUBBER PUTTY, which never shrinks, but ains in a tough plastic state, and is permanently waterproof. ce 4s. per stone.
AMP WALLS PATENT ELASTIC PAINT, an effectual edy, by which they are rendered fit for papering or finishing in colours. Price 10s. per gallon, which will cover and finish ut 150 square feet.
ATENTEES, GEORGE BELL and CO. Steam Mills, 2, Wellington-street, Goswell-street, London.

HITE OXIDE of ZINC and ZINC PAINT. (Langston Scully Patent.)
ROWLEY, WHITE, and CROWLEY, Sole Manufacturers, y supply this innoxious substitute for White Lead to shippers the trade, either in powder or paint, of genuine purity, wholesale under brand, of unrivalled colour and texture, direct from the rks, Grand Surrey Docks, Rotherhithe
ine Paint is below the price of white lead, possesses equal body, d perfectly unchangeable in colour.
rice list and prospectus of its superior properties for interior, and marine purposes, forwarded in answer to letters addressed to Messrs. CROWLEY, WHITE, and CROWLEY, 10, ntard street, London.

EENE'S and PARIAN CEMENTS and FRENCH PLASTER for internal uses.—These well known and success dry quickly, and can be painted upon within a few s.—Made and sold by JOHN BAZLEY WHITE and OTHERS, Millbank-street, Westminster.

ORTLAND CEMENT, 6, South Wharf, Paddington.
CHARLES RICHARDSON has the greatest confidence in roducing to the Trade the above superior CEMENT, being of form colour and quality (a desideratum never before attained Portland Cements). It possesses extraordinary constitutional alities, resists the action of frost and heat, and is more durable an any other Cement; does not vegetate, turn green, or crack; nbued with which its eminent hydraulic properties stamp it at e as the first cement of the day for work where all the above alities are requisite. It is manufactured on the only principle rtland Cement can be, and contrary to the statements put forth those who have hitherto had the monopoly.—Manufactured by GREAVES, Esq. at his Works, near the River Avon, and sent all parts of the Kingdom per boat or rail, at a reduced price to trade.

ORTLAND CEMENT.—ASPDIN'S PATENT.
Messrs. ASPDIN, ORD, and CO. have much pleasure in informing consumers of this valuable Cement, that they have, by means of a recent discovery (patented by Mr. ASPDIN) much improved the quality of this Cement without any increase in price.
Engineers and architects are recommended to specify "Aspdin's Patent," as there are numerous imitations sold as Portland Cement, retained largely on their own account.
ASPDIN, ORD, and CO. beg to call attention to their SECOND QUALITY, which is equal, if not superior, to most of the Cements sold as Portland, and is considerably cheaper.
A report of experiments made to prove the extraordinary strength of their Patent Portland Cement, may be had at their Office, New Road, Westminster, London; at their Works, Gateshead-on-Tyne; or from their Agent, Mr. HENRY ROBINSON, 31, King-street, Liverpool.

ORTLAND CEMENT.—JAMES WESTON having enlarged that portion of his CEMENT WORKS on Millwall, Poplar, for Manufacturing the above CEMENT, begs to inform the Trade in general that they can be supplied with any quantity they may require, either at his Works, St. Andrew's Wharf, Parliament-street, Blackfriars, or Middle Wharf, Scotland-yard, Westminster. Manufacturer of Roman, Lias, and Mastic Cements, English and French Plaster, &c.

ORTLAND CEMENT WORKS, NORTHFLEET, KENT.—Messrs. ROBINS and CO. with much pleasure announce to their Friends and the Public, that they have completed the enlargement of their works, in order to meet the great increasing demand for their Cement; and are now prepared to supply any quantity of the very best PORTLAND CEMENT, manufactured by them for all the purposes Cement is applicable.—Orders received at Great Scotland-yard, and at the Works.

ARIAN CEMENT, for internal use, to be painted in a few hours, and papered within a couple of days. —CHARLES FRANCIS and SONS, Manufacturers of Roman, Parian (under patent), and all other Cements in use for building purposes, Nine Elms, London.

ATKINSON'S CEMENT, so long known and esteemed in London, for plastering purposes, is a quick-setting Cement, that requires no colouring.—Sold exclusively by JOHN BAZLEY WHITE and BROTHERS, Millbank street, Westminster; and Seel-street, Liverpool.

ARTIFICIAL HYDRAULIC or PORTLAND CEMENT combines the valuable qualities of the natural Cements with the additional advantage that it greatly excels them in its cementitious properties; that it is not affected by frost, and does not vegetate in damp situations. Account of COMPARATIVE EXPERIMENTS as to the strength of this and other Cements (read at the Institute of Civil Engineers), to be obtained from the makers, JOHN BAZLEY WHITE and BROTHERS, Millbank-street, Westminster, who prepare one quality only of Portland Cement.

GEO. & THOS. EARLE, CEMENT MANUFACTURERS, HULL.—Light and Dark, equal to any made. Manufacturers also, and dealers in Plaster, Paris White Mastic, Hair, Lias Lime, Laths, Slates, and Slate Slabs, Fire-bricks, Grindstones, Cement Chimney-tops, ditto Vases, Ridging, &c. Paints, Stucco, &c. Marble Merchants and Importers of Pozzolano.

BLUE LIAS LIME.—NELSON and CO. beg most respectfully to call the attention of Engineers, Architects, Contractors, Builders, and others connected with the building trade, to the superior quality of their BLUE LIAS LIME, the natural hydraulic properties of which, and the great estimation in which this kind of Lime is held for buildings set and damp situations, such as wharf-walls, docks, &c. and for concrete foundations, is a sufficient recommendation for the adoption of it in all works of the above description. It is also peculiarly adapted for stucco. Orders received by—London Agents, BLYTH, BROTHERS, 16, South Wharf, Paddington; and at the Works, Stockton-fields, near Southam, Warwickshire.

GREAVES'S BLUE LIAS LIME.—The superior manner in which the above is ground renders it cheaper for concrete or stucco than any other lime or cement. The shell lime for mortar is burnt on an improved principle, leaving scarcely any core. The satisfaction constantly expressed by Engineers, Architects, and Contractors, of the above, is its best recommendation.
Gibbs, Canning, and Co.'s Blue Vitrified Bricks, Pipes, Junctions, Bends, and Fire Goods.
ROMAN, PORTLAND, PARIAN, ANSTON, and LIAS Cements of the best quality.
SEGONDS, PAVIORS', STOCKS, and other Bricks.
CHARLES RICHARDSON, 6, South Wharf, Paddington.

GROUND ABERTHAW LIME (for Hydraulic Works), Blue Lias Cement, Cambrian Plaster, Caustic Flour of Lime (for Agricultural and Gardening purposes), and Portland Cement, shipped at Cardiff, in barrels, to all parts of the world, or forwarded by railway direct out of the works, in sacks or barrels, to any part of the kingdom.—JAMES BIRD and CO. Cambrian Cement Works, Cardiff.

TERRA COTTA.—Vases, Figures, Capitals, Coats of Arms, Friezes, Consoles, Chimney Shafts, Flower Traps, &c. &c. manufactured by M. BLASHFIELD, Mill Wall, Isle of Dogs near the West India Docks), and sold at No. 1, Praed-street, Edgware-road, Paddington.

JOHN WARNER and SONS, Patentees of IMPROVEMENTS in the MANUFACTURE of LARGE BELLS.
J. W. & SONS having of late years devoted much time and study to the long neglected art of Bell Casting, have recently invented and patented a new process connected therewith, by which they are enabled to manufacture Bells of any size, note, or weight, of superior tone, truer in form, and at less cost than has hitherto been accomplished.
Bells for Churches, Chapels, Colleges, Schools, Turret Clocks, &c. cast for any size, note, or weight, singly or in peals.
TUNED BY MACHINERY.
Stocked and wheeled ready for hanging. Old Bells recast or taken in exchange.
MUSICAL HAND-BELLS tuned to the Chromatic Scale, with improved Clappers, and pegged on a new system, which gives a superior tone and facility for ringing.

HAND-IN-HAND FIRE and LIFE INSURANCE SOCIETY, 1, New Bridge-street, Blackfriars, London. Instituted in 1696. Extended to Life Insurance 1836. Immediate, Deferred, and Survivorship Annuities granted

DIRECTORS.

The Hon. William Ashley.	John Garney Hoare, esq.
The Hon. Sir Edward Cust.	R. Fuller Maitland, esq.
Arthur Eden, esq.	William Scott, esq.
John Letteam Elliot, esq.	John Sperling, esq.
James Esdaile, esq.	Henry Wilson, esq.
Harvie M. Farquhar, esq.	W. Isdaile Winter, esq.

LIFE DEPARTMENT.—Insurances effected before the 24th June next, will participate in profits one year earlier than if effected after that date.
In the years 1848, 1850, 1851, 1852, 1853, and 1854, the Premiums on all policies entitled to participate WERE ABATED 25 per cent.—that is to say, a PREMIUM of 100l. WAS REDUCED to 47l. 10s. No charge for stamps.
FIRE DEPARTMENT.—Insurances are effected on every description of property, at the usual rates, for one or five years.
RICHARD RAY, Secretary.

BRITON LIFE ASSOCIATION, 36a, Moorgate-street.
Assurers in this Office may receive the amount assured during Life, without increased Premium.
Loans can all times be obtained and repaid by small instalments.
Investment Policies secure a payment of the amount assured in 13, 10, or 7 years, or at death if it should previously occur, on which advances can be obtained.
Persons about to subscribe to Building Societies, will find the Building Policies issued by this Office combine the Assurance of Life with all the advantages derived from a Building Society.
Medical Gentlemen remunerated in all cases for their reports.
Annuities granted. All descriptions of Life Assurance transacted.
Policies indisputable. Office hours from 10 a.m. to 4 p.m.
EDWARD PARSONS, Secretary.

VENTILATION.
D. and E. BAILEY beg to call the attention of Architects and others to their improved
CIRCULAR REVOLVING EXCENTRIC VENTILATORS,
which are more sightly than the square ones in general use, much less liable to get out of order, and the flaps being hung from the top, do not admit any smoke caused by down draught.
Price, bronzed, from 6s. 6d.
D. and E. BAILEY, 272, Holborn.

VENTILATION.—PURE AIR.
Sheringham's Ventilator for the admission of pure air through an EXTERNAL WALL.

With single pulley, from 6s. 6d.; each additional pulley, from 6s. 6d.
These Ventilators are arranged that the requisite quantity of air may be admitted for the due ventilation of an apartment without the slightest draught being felt by the occupants; and as they are placed in the external wall, their action is not impeded when the house is closed for the evening, at which time a constant supply of fresh air is most required. HAYWARD, BROTHERS, sole Manufacturers, 196, Blackfriars-road, and 117, Union-street, Borough; and of all respectable ironmongers, builders, &c.

SUCCESSFUL VENTILATION.—WATSON'S PATENT SELF-ACTING DOUBLE-CURRENT VENTILATORS have been successfully applied to Churches, Chapels, Public Halls, Stables, and almost every kind of Building, as well as to withdraw Steam, Smoke, Dust, and Heat. Testimonials and other information forwarded on receipt of a postage stamp. Instructions sent for fixing. Apply at the Manufactory to CHARLES WATSON, King Cross-lane, Halifax, Yorkshire, who is the patentee and sole maker.

PAPER-HANGINGS.—The CHEAPEST HOUSE in London for every description of PAPER-HANGINGS is CROSS'S WHOLESALE WAREHOUSE, 22, GREAT PORTLAND-STREET, Oxford-street, where you can select from the LARGEST and MOST EXTENSIVE Assortment in the Kingdom, THIRTY PER CENT. CHEAPER than any other house in the Trade. Builders, Decorators, Dealers, and large consumers will do well to visit this establishment.

PAPER-HANGINGS.—JEFFREY, ALLEN and CO. Paper Stainers, beg to call the attention of the trade to their patterns of Paper-hangings for the present season, which comprise every description of style and quality, from the most elaborate decoration to the cheapest paper that can be produced, and which they are prepared to offer at very low prices. J. A. and CO also respectfully inform the trade that they have OPENED a WAREHOUSE at No. 500, OXFORD-STREET, where all goods can be obtained on the same terms as at the Factory
GUTTA PERCHA PAPER FOR DAMP WALLS. J. A. and CO. are the sole vendors of this well-known remedy for Damp Walls.
115, Whitechapel, near the Obelisk, and 500, Oxford-street.

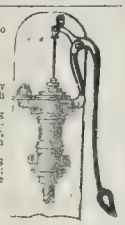
GUTTA PERCHA TUBING.—Many inquiries having been made as to the durability of this tubing, the Gutta Percha Company have pleasure in drawing attention to the following letter received from Mr. C. Hacker, surveyor to the Duke of Bedford: "Office of Works, Woburn-park, Jan. 14, 1852.—In answer to your inquiries respecting the gutta percha tubing for pump suctions, I find that the water has not affected it in the least, although it will eat lead through in two years, we have adopted it largely, both on account of being cheaper than lead, much easier fixed, and a more perfect job. Yours, &c. C. Hacker."
N.B. The Company's Illustrated Circulars, containing instructions to plumbers for joining tubes, lining tanks, &c. will be forwarded on the receipt of three postage stamps.—The Gutta Percha Company, Patentees, 18, Wharf-road, City-road, London.

M. A. RICHARDS and SON, PUMP MANUFACTURERS and ENGINEERS

Pumps in Wrought and Cast Iron and Brass, bored by machinery, and fitted in the most possible manner, suitable for excavators, roads, brickmakers, farms, gardens, stables, liquid manure, shops, barges, well-sinking, &c. adapted for any depth. Hydraulic Pumps for deep wells.

PUMPS ON HIRE.

Pumps of any size, single or double barrel, up to double 12-in. diameter, kept ready for use at reduced prices.



N.B. The above can be worked either by hand, horse, or engine power.

Iron Pails 9s. per doz. painted.
D.to . . . 48s. per doz. galvanized.

Upper Ground-street, Blackfriars Bridge, Surrey Side.

TO BUILDERS AND PLUMBERS.

The attention of the Trade is called to JOHN WARNER & SONS' PATENT VIBRATING STANDARD PUMP,

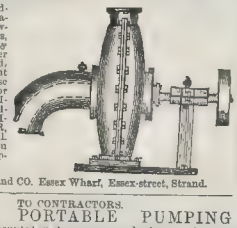
which is recommended for the simplicity of its construction, and the ease with which it works.

By the introduction of the vibrating standard, the cumbrous carriage and expensive slides and guides are unnecessary, rendering the price considerably less than pumps made on the old plan.

Rear and Water Engines for raising fluids from a depth not exceeding 28 feet; also, Garden Engines constructed on the same principle.

JOHN WARNER & SONS,
8, Crescent, Jewin-street, London,
Manufacturers and Patentees.

FOWLER'S IMPROVED WROUGHT PUMPS for CONTRACTORS, BRICKMAKERS, EXCAVATORS, and OTHERS.



The attention of this house for more than fifty years past having been almost exclusively paid to the manufacture of every description of pump-work for every variety of purpose, attention is respectfully requested to their very superior Wrought Pumps, with plain or sliding telescope suction, galvanized and ungalvanized. A large stock of all sizes is kept ready to finish off to order, according to length required, at the shortest notice.

This description of Pump-work varying in almost every case, it is impossible to quote a general price, but the fullest particulars will be given on application.

A large stock of Wrought Pumps, from 3-inch single to double 15-inch barrel, is also kept on hire prepared for hand or steam power, on reasonable terms, at

BENJAMIN FOWLER'S
ENGINE-PUMP MANUFACTORY,
Whitefriars-street, Fleet-street, London.

CENTRIFUGAL PUMPS.

Contractors, Builders, Engineers, Paper-makers, Brewers, Manufacturers, and all who may have water, or other liquids (hot or cold), to raise, will find it their interest to use these Pumps. For ECONOMY, EFFICIENCY, SIMPLICITY, DURABILITY, & POWER, they have no equal. Every information can be had on application to

GWYNNE and CO. Essex Wharf, Essex-street, Strand.

TO CONTRACTORS.

PATENT PORTABLE PUMPING ENGINES, mounted in strong waggon-wheels, iron chimney horse shafts complete. Strong, simple, for immediate use. Several are ready for delivery, from six horse power to twenty-five-horse power and upwards, suitable for contractors' work generally. May be hired at a rental, if purchased, and can be seen at work at Messrs. MEDWIN and HALL'S, Engineers and Portable Engine Makers, 92, Blackfriars-road. These engines have been successfully employed for years.

JAMES MICHIE, Engineer, Battersea-park, Nine Elms, Manufacturer of all kinds of STEAM ENGINES (portable and stationary), Pumps, Sawing Machines, Cranes, Crabs, &c.

N.B. Several High-pressure Engines for sale.

TO WATER COMPANIES AND PLUMBERS.

HIGH-PRESSURE COCKS & CLOSETS.

The Health of Towns Commissioners having recommended the adoption of the high-pressure principle in all towns, WARNER'S HIGH-PRESSURE COCK is recommended as a Cock free from leakage, and applicable for all purposes and situations. Patent Closets and Basins with supply-valve for attaching direct to main pipes without a cistern, cocks, or wire.

LEAD, IRON, and TIN PIPE.

JOHN WARNER and SONS, Manufacturers, 8, Crescent, Jewin-street, London.

STEAM-ENGINES, BOILERS, and MACHINERY, various for SALE, new and second hand, a 20, 14, 8, and 4 horse-power, also a portable steam pumping-engine, a set of emery stampers, a pair of India-rubber cleaning rolls, and a 9-horse over-shot water-wheel.—Apply at the Spa-works, Spa-road, Bermondsey.

STEAM BOILERS of every description, Wrought Iron Girder Bridges, Gas-holders, and general Castings, Cranes, Cables, and Contractors' Iron Work, manufactured by MELDRUM and HUSSEY, Phœnix Works, Tividale, near Dudley.—London Office, 78, Hatton-garden.

BLUE TILES and BRICKS, DORDON, BY ATHERSTONE.—J. SCARROTT, Manufacturer of Blue Bricks, Blue Roof Tiles, Blue and Red Quarries, Sewerage Pipes, Fire-bricks, and all kinds of Blue Brick Materials for Building, Kiln Tiles, Coping Bricks, Ridge Tiles, &c. &c. The above works are one mile from the Coventry Canal, and two and a half from the Trent Valley Railway Station, Atherstone.

PEAKE'S TERRO-METALLIC TILES, PIPES, &c.—Notice is hereby most respectfully given, that the LONDON DEPOT for this WARE is REMOVED to No. 21 WHARF, Macclesfield-street, North, City-road Basin. Secondly, that the trade term, "Terro-Metallic," is the exclusive right of the Proprietor; and, thirdly, that the "Mirrors of the Arts," page 581, of the Great Exhibition, rank the Manufactories known so long as "The Tileries," Tunstall, Staffordshire, as the first of the kind in the world.

MAW'S ENCAUSTIC TILE PAVEMENTS

MAW and CO. send free, per post, their NEW BOOK OF DESIGNS,

with prices, adapting this most durable, economical, and decorative production of mediæval art to entrance-halls, passages, conservatories, verandahs, and every description of modern and ancient building.

BENTHALL WORKS, near Broseley, Shropshire.
Specimens at 11, Aldersgate-street.

BRICKS from COWLEY and KENT. Also WHITE, YELLOW, and RED FACING BRICKS. BLUE VITRIFIED BRICKS;
Fire Bricks, Quoins, and Tiles.
CHARLES RICHARDSON, 6, SOUTH WHARF, PADDINGTON

GREAT EXHIBITION 1851, Class 27, No. 111.—JAMES LUFF, Manufacturer of all kinds of Ornamental Bricks and Tiles, Red and White of the best quality, suitable for chimney-shafts, ridge-crests, cornices, and mouldings of every description, TUDDENHAM, IPSWICH

N.B. Builders furnishing detail drawings can have all sorts of ornamental designs executed; a small additional charge made for the moulds.

BRICKS.—Malm Cutters, Yellow and Pale Seconds, Paviors, and Pickings, of good and sound quality, constantly on sale at H. DODDS, Sir Abels, which are only a quarter of an hour's walk from the City. H. D. earnestly requests purchasers to favour him with a visit, in order to inspect his stock, and to judge for themselves.

Malm Place, half washed Stocks, and Place Bricks also on sale. These bricks are sound, well burnt, and unusually free from defects; a very large proportion of the stock being suitable for external facing.

Apply to HENRY DODD and CO. at the Counting-house, Hoxton Brickfields, Grange-walk, near the Rosemary Branch, N. E.

N.B. Light-coloured Pit Sand of approved quality constantly on sale upon reasonable terms. This Sand, from its not containing any saline matter, is acknowledged to be preferable to river sand.

TO BUILDERS AND OTHERS

TO BE SOLD, very cheap, at the Pepper Warehouse, Eastern Counties Railway Station, Blackwall, a quantity of good PATENT BRICKS, and DUCHESS and COUNTESS SLATES. For price and particulars, inquire of Mr. SHAW, at the above-named place.

BRICKS, PANTILES, &c.—J. H. ANDREWS, Wisbech, Cambridgeshire, beg to offer BRICKS at 35s. per 1,000; PAN TILES, at 47s. 6d. per 1,000; PLOOR BRICKS and 6-inch PAVIORS, at low cash prices.—Delivered at Bishopsgate Station, London. All kinds of DRAIN-PIPES.

NEW BRICKS.—MR. BENJAMIN GOUGH is now prepared to execute orders for New Bricks to any extent.—Apply at No. 37, Newington-crescent, Newington butts.

MESSRS. EASTWOOD and SONS beg to inform their Customers that they commence delivering NEW BRICKS from their Fields, Queen's-road, Peckham (a short distance from the five bridges), on THURSDAY next, the 1st of

THE BEST HERTFORDSHIRE MALM SECONDS,

Also COWLEY and KENT STOCKS,
In any quantity, now ready for delivery
J. EASTWOOD and SONS, Belvidere-road, Lambeth.

FIRE-BRICKS, FIRE-LUMPS, and TILES, FIRE CLAY, &c.—In addition to their usual stock of ALLOA FIRE-BRICKS, TRAQUAIR and MORGAN have now got to hand a most extensive assortment of FIRE LUMPS and TILES of the same unequalled quality, to which they most respectfully invite the attention of Engineers, Furnace Builders, and consumers generally.

N.B. TRAQUAIR and MORGAN, 9, Bankside, Southwark close to Southwark-bridge.

BRICKS! BRICKS! BRICKS!—PARK ESTATE BRICKFIELDS, near the Royal Arsenal, Woolwich.—Price for the present Month, and until further notice, Stocks, 30s.; Place, 30s. per thousand. Ready money on the field.
February 20, 1854. L. DAVIS, Proprietor.

TUBULAR and HOLLOW BRICKS for SALE, at very moderate prices, for cash, at the Company's Works, Copenhagen-fields, Caledonian-road, Islington.—Parties desirous of contracting for large quantities must apply to the Patentees, NORTON and BORIE, Union Works, New-park-street, Southwark-bridge.

BREEZE.—To BRICKMAKERS, LIME and CEMENT BURNERS, and OTHERS. The Directors of the Equitable Gaslight Company are willing to receive TENDERS for any quantity of good BREEZE, from 100 to 1,000 chaldrons, of forty bushels to the chaldron, to be carted from their works, or put into barges in the river Thames, alongside of their wharf, at Thames-bank, near Vauxhall-bridge. Sealed Tenders, stating price with the quantity required, and time of clearing, to be addressed to the Secretary, Equitable Gaslight Company, 91, John-street, Adelphi, endorsed, "Tender for Breeze," on or before MONDAY, the 20th MAY instant.

N.B. The Directors do not bind themselves to accept the highest or any Tenders.

21, John-street, May 17, 1854.

GREAT REDUCTION.—Pantiles 60s. per thousand; plain 38s.; Cowley Stocks 35s. at WARD'S OLD-ESTABLISHED HONDURAS WHARF, BANKSIDE, London.—Builders, Engineers, Gas Companies, and others, supplied with every sort of country Brick and Tile goods; Fire Bricks, Lime Tiles and Clays. Patent Maltine and Corn drying perforated Tiles, real Dutch Clinkers, River sand, Concrete Gravel, Founders' Loam, White and Red House Sand, &c. &c. at the cheapest rate.—Chief Office, 27, Regent-street.

TO BRICKMAKERS

A QUANTITY of IMPLEMENTS (principally new) FOR SALE, comprising off bearing, trowding, and hay barrows, hacking carts, ladders, tile mill, moulder's stool, &c. &c. The proprietor will exchange them for bricks if required.—Address to Mr. CARTER, 15, Gloucester-place, Pavilion-road, Old Kent-road.

MACHINE for GRINDING STONE.—Wanted, a rapid Method of Grinding the SURFACE (to the depth 1-16th of an inch) off Lithographic stone. The stone to vary in size and thickness, and are of a hard, close character. Any one having a suitable machine is requested to send particulars by letter post-paid to L. B. Messrs. Street, Brothers, 11, Berkstreet, Lincoln's-inn-fields, London.

BRICKS! BRICKS!

BEART'S PATENT BRICK COMPANY

have now in Stock at their Depôt in the Yard of the

GREAT NORTHERN RAILWAY GOODS STATION,

a good supply of

PATENT PERFORATED WHITE BRICKS,

made by Steam Power at their extensive works Absey. These Bricks are now selling at

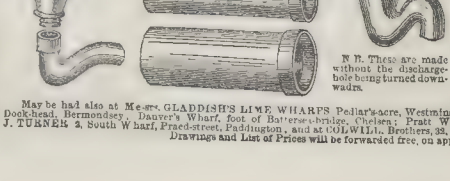
REDUCED PRICES.

Their superiority over those moulded by hand, both for beauty of appearance and solidity in the work, is acknowledged by all who have used them and the large quantity sold to builders in the metropolis and suburbs during the past year of their introduction has fully established the reputation in which they are now held. London, 25th May, 1854.

WILLIAM NORTHEN'S

WHITE ENAMELLED STONEWARE,

UNION POTTERY, 14, VAUXHALL-WALK, LAMBETH, LONDON.



W. N. solicits an inspection of his IMPROVED WHITE ENAMELLED STONEWARE CLOSET PAN, being an entire new description of stoneware, perfectly vitrified and highly glazed, far surpassing anything of the kind yet offered to the public.

SAME PRICE AS BROWN STONEWARE—7s. 6d. Pan and Trap. WITH BLUE INSIDE, ENAMEL, 1s. extra.

JAMES STIFF, MANUFACTURER of GLAZED STONE-WARE DRAIN PIPES, BENDS, JUNCTIONS, TRAPS, &c. at HIGH STREET, LAMBETH, LONDON. Established 1751.

Water-Closet Pans, with Syphon Traps, 7s. 6d. each.

STRAIGHT TUBES, in Socket Joints, in Two Feet Lengths.

The great advantages attending the use of these articles are now so generally understood, as to render any enumeration of them almost superfluous. Their cheapness, efficiency, and durability, are universally admitted; while the rapidly increasing demand for them proves the estimate of superiority over every other kind hitherto before the public for similar purposes.

Inspection is invited to an assortment of Stock of Drain Tiles, of every form and size, adapted to the various situations in which they may be required; as also to the WATER-CLOSET PANS OF IMPROVED CONSTRUCTION, and interior glaze, far surpassing any other manufactured of Brown Stone Ware.

N.B. These are made without the discharge-hole being turned downwards.

May be had also at Messrs. GLADDISH'S LIME WHARFS, Pedlar's-acre, Westminster-bridge; City-road Wharf, City Basin; Dock-head, Bermondsey; Dawes's Wharf, foot of Battersea-bridge, Chelsea; Pratt Wharf, Kings-road, Camden New Town; J. TURNER, 3, South Wharf, Praed-street, Paddington, and at COLWILL, Brothers, 32, Bridges-street Covent Garden.

Drawings and List of Prices will be forwarded free, on application.

ENNINGS'S PATENT DRAIN-PIPES, AND CONNECTIONS TO DRAIN-PIPES.

DRAWINGS OF THE ABOVE ARE NOW BEING MADE, AND WILL SHORTLY APPEAR.

THE FOLLOWING ARE SOME OF THE ADVANTAGES:—

The Pipes, which are plain at both ends, are laid in chairs similar to the metals of a railway, each pipe being kept 6, 9, or 12 inches art, according to their diameter.

The Pipes have to be laid in the chairs, renders the disturbance of ground under the Pipes to get at the joints (as at present) necessary, as the top part of the chair (which for distinction is called a saddle piece) being the last fixed, enables the workman d superintendent to see that the Pipes are properly laid and carefully jointed.

In case of stoppage the saddle is easily removed without DISTURBING THE INVERT, or general drain, d the Pipes being some distance apart, the state of the drainage can be immediately ascertained, and if necessary A HOSE or other trument introduced.

Should a Pipe become Broken by removing two of the saddles, another Pipe can be dropped in its place, and the drain MADE ERFECT IN A FEW MINUTES, without disturbing MORE THAN the broken pipe.

It is proposed to make saddles with every sized junction, either tee, cross, or bend, so that in private or public works, all the work- an will have to do will be to remove a plain saddle, and fix in its place a saddle with a junction or bend of the size of the house drain, uch would be applicable for either side of a street by merely reversing the saddle piece.

Many other advantages might be pointed out, such as Economy, certainty of each pipe taking a proper bearing, and being operly laid and jointed, &c. &c.

Licences will be shortly granted to Manufacturers in every part of the United Kingdom.

LOCAL BOARDS OF HEALTH are respectfully informed that Jennings's Imperishable Water-Closets have been chosen for e Royal Apartments at the Crystal Palace, and the same Closet and Trap may be had in yellow ware for a few shillings.

A Sample Closet, with Stool complete, packed and sent to any part, on receipt of a Post-office Order for 70s.

A Book containing illustrations, descriptions, and prices of Jennings's High-pressure Ball, Ball, and Stop Cocks, Sluice Valves, d Fire Cocks, Urinals, Lavatories, Pumps of all kinds, Fronting-pieces, Gully Traps for STREETS, STABLES, or MINES, &c. &c. n be had on application, or by post if two postage-stamps are enclosed to

GEORGE JENNINGS,
ENGINEER AND GENERAL BRASSFOUNDER,

DOULTON AND WATTS'S

REGISTERED CLOSET PANS IN

ENAMELLED STONE WARE,

LAMBETH POTTERY, LONDON.

These Closet Pans are manufactured in a new kind of stone-ware, HIGHLY GLAZED, vitreous, of a white colour, are much improved in form, and are used and recommended by the engineers connected with the General Board of Health.

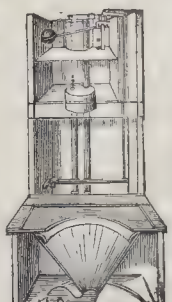
The Traps are smaller at the inlet, gradually enlarging towards the outlet, as a security against the introduction of improper substances into the drain.

They may also be had turned down.

PRICE 7s. 6d. each,

The same as for ordinary stone-ware, and may be had fitted with copper fans of the best construction at 1s. 3d. each extra.

Superior Glazed Stoneware Pipes, Bends, Junctions, Traps, &c. Hopper and other Pans, ith best White Glaze inside.



yphon Pan, with or without STEPHEN GREEN'S Patent Air-tight Valve.

Registered Flushing Basin,—the most effective Syphon-trap yet offered to the public.

STEPHEN GREEN'S IMPERIAL POTTERIES, LAMBETH.

IMPORTANT TESTIMONIALS

TO THE EFFICIENT WORKING OF

STEPHEN GREEN'S

PATENT SYPHON FLUSHING BASIN,

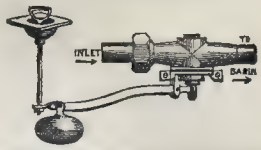
AND

SELF-ACTING CLOSET CONNECTIONS.

Oxford, November, 1848.

GENTLEMEN,—Sixteen of your Closets having been put into operation at Christ Church College, I have great pleasure in giving you my testimony as to their efficiency and simplicity.

HENRY J. UNDERWOOD, Architect
R. S. HOGGAR, Engineer.



Royal Arsenal, Woolwich, June 24, 1852

GENTLEMEN,—I have much pleasure in giving my testimony in favour of your Patent Syphon Flushing Basin, with Self-acting Closet Connections. There are several fixed here, which have been in use for upwards of twelve months, giving perfect satisfaction.

I am, Gentlemen,
Your obedient Servant,
WILLIAM CARTWRIGHT.

This effective article has not any Crank or Wire to get out of order, and is complete and ready for use, and may be seen in operation at STEPHEN GREEN'S Manufactory, Lambeth.

LAMBERT'S SELF-CLOSING LAVATORY AND CLOSET-VALVE

Is adapted for high or low pressure, and for any kind of BASIN. Many hundreds are in use under continuous pressure of 100 to 300 feet; they are found to be exceedingly durable, and are cheaper than common cocks. Manufactured solely by the Patentees,

THOS. LAMBERT and SON,
Brass Founders and Engineers,
Corner of Short-street, New Cut, Lambeth.

MANUFACTURERS of GLAZED STONEWARE PIPES, Bends, Junctions, &c.; also FIRE BRICKS, Vitrified Blue Bricks (as used by her Majesty's Commissioners of Sewers), White Fire Clay, Facing Bricks, &c., &c. Agents.—CHARLES RICHARDSON, No. 6, South Wharf, Paddington, London.

TO LOCAL BOARDS OF HEALTH, WATER COMPANIES, &c.

A DESIDERATUM in SLUICE-VALVES.

FREEMAN ROE'S Patent Sluice-valve, can be repaired without being removed from the main. All sizes, from 2 inch to 36 inch. Patent Hydrants, self-closing Cocks, fire and other Pumps, Hot water Apparatus, Baths, &c. Surveys made, and estimates given by FREEMAN ROE, Hydraulic, Sanitary, and Gas Engineer, 70, Strand, and Upper Marsh, Lambeth.

TO WATER COMPANIES AND PLUMBERS.

DEVEY and DALE'S CYLINDER BALL-VALVE and BALL, Registered Oct. 28, 1853. No. 3,336.

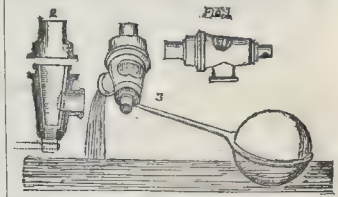


Fig. 1 represents the Cylinder Ball-valve in elevation. Fig. 2 is a Section of the Interior, showing the uninterrupted course of the Fluid. Fig. 3 shows the Cylinder Ball-valve in detail.

This Valve is peculiarly suited to High-pressure. The greater the weight of Fluid, the more secure the Valve becomes, and the most effectually prevents waste. Manufactured solely by DEVEY and DALE, 8 and 9, Shoe-lane, and may be had of respectable Plumbers.

MILL WALL POTTERY (near Scott Russell's).—Messrs. WILLCOX and Co. invite the attention of Contractors, Builders, and Wholesale Dealers to their extensive assortment of articles in WHITE EARTHENWARE for sanitary purposes. The only manufactory of the kind in the neighbourhood of London.—Particulars forwarded on application.

FINDON'S PATENT WATER-CLOSETS.

J. BLACK, having succeeded to the business of the patentee, begs to call the attention of architects, of builders, and the trade, to the many advantages of these closets over all others as to economy, durability, and simplicity, only requiring one pipe from either main or cistern, which pipe may be branched from for any other purpose.—May be seen at the Manufactory, 190½, High Holborn.

VICTORIA POTTERY, LEIGH, NEAR SOUTHEND, ESSEX.

DAVID MOUNTAGUE,
MANUFACTURER of superior GLAZED STONEWARE PIPES (in accordance with the rules established by the Commissioners of Sewers), Bends, Traps, Closet-pans, Jars, Bottles, and every article in Stone Ware on advantageous terms. Also MANUFACTURER of superior Roman Cement and Plaster of Paris at Orchard House, Blackwall. Orders executed from the above places, from Falcon-wharf, 80, Bankside, Blackfriars, and from Harrow-bridge-wharf, Stratford, Essex.

BATHS, DEEP WELL and HOUSE PUMPS, WATER-CLOSETS, and URINALS of superior construction, Slate Cisterns and Filters, efficiently and economically FIXED, in town or country, by JAMES JACKSON, Plumber, 61, Broad-street, Golden-square. Estimates furnished for all descriptions of Plumbers' work.

REDUCTION of PRICE in UNGLAZED DRAIN PIPES.

Manufactured by CHAS. FRANCIS and SONS, NINE ELMS.

The price in future will be,

6s. 9d. per foot for the 3 inch bore.			
6s. 3d.	"	4	"
6s. 5d.	"	6	"
6s. 8d.	"	9	"
1s. 2d.	"	12	"
2s. 3d.	"	15	"

These pipes are made under steam pressure, and burnt to great hardness, and are capable of bearing nearly double the hydraulic pressure of ordinary glazed pipes. The prejudice against red ware is overcome by this manufacture. And it is well known that good earthenware, UNGLAZED, is the oldest material discovered in a perfect state in Rome, Babylon, Nineveh, &c. &c.

Agent for Southampton, R. L. PLUDER, American Wharf.

TO COOPERS, BUILDERS, AND OTHERS.—CAPITAL OAK TIMBER, BROOM WOOD, RICKLING and UGLY, Essex, to be SOLD by AUCTION, by

MESSRS. NOCKOLDS and KING, upon the PREMISES, on FRIDAY the 2nd of JUNE, 1834, at ELEVEN o'clock, about 100 OAK TIMBER TREES, 1831 ditto, and 250 SAPLINGS, also some OAK TOPWOOD. Many of the trees are of good dimensions, and excellent quality for immediate conveyance, will be given, subject to the usual conditions, which will be read at the time of sale. May be viewed, and Catalogues had of Mr. Richard Woodward, at Rickling-green; also at the Inns in the neighbourhood; and of Messrs. Nockolds and King, Land Agents, &c., Saffron Walden, Essex.

Valuable Freehold Land and Premises, adjoining the Railway Station at Enfield to be SOLD by AUCTION, by

MR. W. S. FRANCIS, at the AUCTION MART, Bartholomew-lane, opposite the Bank of England, on THURSDAY, JUNE 5, 1834, at TWELVE precisely. The premises comprise a stonemason's yard, showroom, workshops, stables, sheds, and other erections, together with a large garden, having frontage to the London road of 138 feet, by a depth of 90 feet; are well adapted to the purpose of a builder, mason, or general commission yard, for which, in consequence of the great improvement now offering in the neighbourhood, there is an excellent opening; or would be extremely eligible for building purposes. The Railway is for nine-tenths of its length completed close to the station, and fronting the London road, and were also in the tenure of Messrs. Hudson. Particulars and conditions of Sale may be had of Mr. Doore, at Greyhound Inn, Enfield Town; Messrs. Hudson, Railway, and Masters, 17, Buckingbury, and of the auctioneer, 18, St. George's-test, and 44, Wellclose-square, St. George's-East.

The Professional and Private Library of Joseph Gwilt, esq. F.S.A. of Abington-street; also the beautiful Architectural and Topographical Drawings of the late Mr. Caron.

PUTTICK and SIMPSON, Auctioneers of Literary Property, will SELL by AUCTION, at their great Room, 191, Piccadilly, on WEDNESDAY, MAY 21, and two following days, the LIBRARY of Joseph Gwilt, esq. removed from his residence in Abingdon-street; comprising a large collection of Works of eminent and modern authors on architecture, building, and antiquities, also numerous interesting books in other classes of literature, history, topography, tissues &c. the whole fine condition, mostly handsomely bound. Catalogues will be sent on application (if at a distance, on receipt of six stamps).

CAMDEN TOWN.—To Contractors, Builders, and others.

MR. LEREW will SELL by AUCTION, on the PREMISES, Jeremy's-place, Camden-street, on THURSDAY, JUNE 5, at TWELVE precise, Two powerful cart-horses, 2 good carts, truck, 2 sets of harness, 19 barrows, 200 deals, 100 feeld boards, 100 ditto poles, and 17 dozen cords 90 pullocks, 400 dye squares 8 ladders, 13 pails, 2 iron pumps, 2 windlasses, and other items, the usual PLANT of a CONTRACTOR.—May be viewed the day before the Sale, and catalogues had on the Premises, and of the Auctioneer, Cardington-street, Hampstead road, near the Euston Station.

SALES BY AUCTION.

CONTRACTOR'S STOCK, TOTTENHAM.—Eight very Superior and Powerful Young Cart Horses, Excellent Hackney, five years old, capital Brick or Gravel Carts, Light Van, Chaise, Cart nearly new, Harness and Effects, by

MR. RICHARDS, on the PREMISES, the Georges and Vulture Yard, Tottenham, on TUESDAY, MAY 20th, at ONE o'clock, by order of Mr. A. G. Fidler, who has entirely relinquished the Contracting, the POWERFUL and EXCELLENT STOCK of HORSES, five and six years old, of constant work, and a fast-trotting hackney, five years old; equal to new 4-inch and narrow wheel brick or gravel carts; ten sets of excellent heath new harness, plated chaise harness, stable utensils; also a quantity of timber, stone, and a variety of useful materials, large heap of manure, good-brick, &c. On view day preceding and morning of sale, and catalogues at the Greyhound, Smithfield; Plower pot, Bishopsgate-street; Bull, Romford; Cock, Waltham Abbey; White Horse, Potters-bar; Cherry-tree, Southgate; on the Premises; and of the Auctioneer, Tottenham.

TOTTENHAM.—Powerful Cart Horses, excellent new Liquid Manure, and Road Waggons, Built and Cart Harness, Timber, Three Corn and Coal Carts, Lucy Planks, Deals, Doors, Gates, Box and Seasoning Boards, Large Oak Trees, &c. to Fells to be

MR. RICHARDS, on the PREMISES, near the Ship Inn, Tottenham, and in High Cross-lane, on MONDAY, JUNE 9, at ELEVEN o'clock, on account of the nominee, close by order of the proprietor, retiring from business. The Stock comprises nine handsome and powerful cart horses, mostly 7 inch wheel; also other ditto new 4-inch wheel timber, wain, lurry, and 3 carts, being a ring cart new seven-rail, 17 feet long wide end, 4-inch wheel right draft, feather edge hurling, useful mat rails fencing, wedging-rails, coal sacks, cart and chaise harness, eight tons of useful wrought and cast iron, a large quantity of bricks, manure, and effects. The morning of sale; catalogues on the Premises, and of the Auctioneer, Tottenham.

A RARE OPPORTUNITY.—TO SMITHS, STOVE MAKERS, ENGINEERS, AND IRONMONGERS.—TO BE DISPOSED OF, an OLD ESTABLISHED TRADE, now if considered in examinable, with good returns, in a great increase, in a most healthy locality in the central part of London.

MR. J. J. CLEMMANS has received instructions to SELL the LEASE and GOOD WILL of the above, which is a first-rate situation, the premises are extensive, and in good repair; there are nine good rooms up stairs, to which is a private door and side passage; the shop is shewy with a double frame; behind which is a convenient counting-house, large workshops, and smithery. On the basement are good kitchens, and other offices. The purchaser will find a good investment, as there being no parish assessed. The rent for the last year was above £90. The lease has 3 years unexpired at Michaelmas, 1834, at the low ground rent of £6 per year. The premises will be sold at a great sacrifice, and may be viewed by tickets, which, with particulars, may be obtained of Mr. J. J. CLEMMANS, 21, Holywell-row, Finsbury-square.

BRENTWOD, ESSEX.—Very valuable Freeh ld Building Land, close to the Railway Station at Brentwood. Land-tax redeemed.

MR. PONSFORD is instructed to SELL by AUCTION, at the ESSEX ARMS HOTEL, near to the said Station at Brentwood, on THURSDAY, the 26th day of JUNE, 1834, at TWO for THREE o'clock in the afternoon, FORTY-ONE LOTS of front eligible FREEHOLD BUILDING GROUND, with frontages to Essex-street and to the high road leading from Brentwood to Warley, &c. The present extended demand for business in the vicinity of Brentwood, the advantageous position of the land for building on, the rapid increase of the town, and the facilities for obtaining bricks, lime, and other building materials very near to the spot, render it unusually desirable for building purposes, and as a profitable medium of investment.—Particulars, with lithographic plans of the property, may be had ten days before the Sale of Messrs. Burton, Mearman, and Dennis, Solicitors, 25, Austin-friars, London, at the principal Inns in the neighbourhood; and at the Offices of Mr. Ponsford, 21, Mourgate-street, London.

UXBRIDGE, on MARKET DAY.—Second portion of Railway Cart Horses, Harness, Stabling as recently, small Offices, large Yard, Building in centres, Baulk, Firewood, &c.—To be SOLD by AUCTION, by

MESSRS. RYMILL and GOWER, on the RAILWAY WORKS, near the Green Man, Uxbridge, on THURSDAY, JUNE 5th, at TWELVE o'clock, about FORTY Horses well known as the property of Mr. Thomas Brothers, being the residue of those been employed by Mr R. Brothers of, who has just completed Ballasting on the Uxbridge Branch, and well-selected Effects, the property of the same, which stock is fully equal to the former lot, which gave such universal satisfaction. The horses are all first-rate, combining immense strength with good working qualities; among them are a splendid team of blacks and greys, a powerful grey stallion, and 4 years old black mare, strongly recommended to public notice, and for unreserved sale. Uxbridge is about two miles and a half from the West Drayton Station, where conveyance will be provided to meet each suitable train.—May be viewed on the works. Catalogues to be had at the Green Man, Ruxbridge; of Messrs. Rymill and Gower, Uxbridge; at Drayton Station, and of the Auctioneers, at their Repository, Birch-lane.

WARD'S PERIODICAL TIMBER SALES.

MR. WARD will SELL by AUCTION, at the TIMBER-YARD, 8, Oxford-street, near Tottenham-court-road, on THURSDAY, JUNE 5, at TWELVE o'clock precisely, a large quantity of seasoned Spanish and Honduras Mahogany, in logs, flitches, planks, and boards, in Bird's eye, pencil, bird, mahogany, crotch, and other Italian walnut veneers, rosewood and wainscot-tree planks, American ash and lime-tree boards, English ash, elm, oak, pine planks, white and yellow deals and battens, Baltic and American fir, &c. May be viewed two days prior and morning of Sale; catalogues had on the premises, and forwarded, free of expense, on application to Robert Ward, 7, near Ashburner-street, Fitzroy-square.

N.B.—The greater portion of these goods will be sold without the least reserve.

NOTICE.—The Castleman Estate, Barnes, Surrey.

JOHN HIND has been honoured with instructions to submit for absolute SALE by AUCTION, at GARRAWAY'S, Change-alley, on TUESDAY, the TWENTY-FOUR FREEHOLD PAIR-VILLA SITES of this truly desirable estate. The estate (the peculiarly attractive and rare features of which are well known to the public) is situate on the banks of the Thames, in the parish of Barnes, and immediately contiguous to the Suspension-bridge of Hammersmith. For ease of reference it may be supposed; and the property is bounded on the south, by Mortlake and Hammersmith; *Journal of Arts*, &c. Essex-street, Strand; T. W. Hobb, Esq. Sub-Inst. 19, Paternoster-row; Garraways; and of John Hind, Auctioneer and Land-valuer, 37, Charing-cross-road.

TO FREEHOLD LAND SOCIETIES, BUILDERS, AND OTHERS.

MESSRS. DAVIS and VIGERS will SELL by AUCTION at the MART, in JUNE (one or more days), unless previously sold by private contract, 26 acres of FREEHOLD LAND, situate between Brixton Hill and Clapham New-park, and near to Brixton Church; a most eligible site for building purposes with front age to existing and proposed roads, admitting of 5 and 6 feet—Further particulars of which and conditions of sale, which may be had of Messrs. Chambers and Maynard, Solicitors, Coleman-street, City, at the Mart; and Auctioneers' Offices, 3, Frederick's-place, Old Jewry.

SALES BY AUCTION.

MEMEL TIMBER.

MESSRS. CRUSO and SON are favoured with instructions to SELL by AUCTION at the Harbour Branch of the East-Anglian Railways, King's Lynn, on WEDNESDAY, the 27th day of JUNE, 1834, commencing at ELEVEN o'clock precisely, 350 LOADS of MEMEL TIMBER, 4 and 3-inch Planks, a quantity of Contractors' Rails, and about 5 tons of Wrought Iron Bolts, lately forming the temporary railway bridge over the middle level drain. Also several lots of Gas Fittings and Piping. The Auctioneers beg to call the attention of contractors and builders to this important Sale of Timber, the greatest part of which is in pieces upwards of 40 feet in length. Three months' credit will be given upon approved security.—Catalogues may be obtained at the Office of the Auctioneers, King's Lynn, one week prior to the Sale.

RENHOLD, BEDFORDSHIRE, four miles from the Railway Station at Hedf rd—100 Fine Oak, 200 Ash, and 147 Elm Timber Trees, 100 Fire, and a quantity of Logwood and Faggots, to be SOLD by AUCTION by

JOHN USHER, on THURSDAY and FRIDAY, JUNE 1st and 2nd, 1834. The Company are requested to meet on the first day at Mr Walker's Home Close, G Hington at ELEVEN o'clock. Luncheon will be provided in the room of the Sale. Six months' credit will be given on all accounts above £5 on approved joint note-of-hand security, a discount being paid the sale-day. The oaks are very fine, of good length and size, and will be marked in excellent rotation and numbered. Catalogues may be had seven days prior to the sale, at the Sun Inn, Hitchin; Swan Inn, Potton and Biggleswade; and of John Usher, Architect and Surveyor, St. Peter's Green, Bedford.

PLAISTOW Votes for the Southern Division of the County of Essex.

MR. J. T. FISHER is instructed to SELL, by PUBLIC AUCTION, at the KING'S ARMS INN, PLAISTOW on TUESDAY, JUNE 3, 1834, at ONE for TWO o'clock precisely, FIFTY PLOTS of eligible FREEHOLD BUILDING GROUND; Land-tax redeemed, most desirably situate in the main road from Stratford to Plaistow, on a gravelly subsoil, and on the highest part of the parish of West Ham, comprising about 2,500 feet of frontage by suitable depths, with wide substantial roads and sewers, and having the entire range of gas and water supplied. The proximity to Messrs. Marcand Co.'s commenced Building Works at Victoria Docks; Eastern Counties Railway Company's works and station; and other large factories, render this property most desirable for safe and profitable investment, the supply of houses in this locality being totally inadequate to the demand, and the rentals highly remunerative.—Plans and particulars may be obtained at the George Barking; Crown and Anchor, Romford; Spotted Dog, Upton; Commercial Road; Globe, Mile-end; Messrs Sykes and Gaisford, Solicitors, 80, Lombard-street, City; and of the Auctioneers, Rokeby-house, Stratford, and Plaistow, Essex.

ANGLESEA HOUSE, back of the Red Lion, Shooter's Hill, Kent TO CONTRACTORS, BUILDERS, and others.—BUILDING MATERIALS of two Houses, Out-buildings, Wood Inuit School-rooms, &c. which will be SOLD by AUCTION by

J. D. BINKS, on TUESDAY, MAY 30th, 1834 at TWELVE o'clock, on the PREMISES, comprising 1,000 excellent bricks, 17,000 plain, pan, and ridge tiles, 5 squares of slating, rafters and frames, excellent panel doors, 5 quantity of sashes of superior description, other sorts, coppers, oven, rafters, posts, floor boards a large wood-built school room with three iron columns chimney-pots, marble jambs, hearth stones, and a quantity of the rubbish.—May be viewed on SATURDAY next, MAY-DAY 29th, and Morning of Sale; and Catalogues had at the Red Lion, and of Red Lion, Shooter's Hill; Fortune of War, King's Arms, Ordnance Arms, Red Lion Arms, Woolwich; Dover Castle and Barrack Arms, Plumstead; and at the Auctioneer's Furnishing Warehouse, Wellington-street, Woolwich.

TO FURNISHING IRONMONGERS GAS-FITTERS, SMITHS, AND OTHERS.

MESSRS. CHURCH & SON, are instructed to SELL by PRIVATE TREATY, in consequence of the withdrawal of a partner, the valuable GOODWILL and STOCK-IN-TRADE of an old and well-established concern in the above branches, together with the LEASE of the desirable business premises, situated in one of the most populous parts of the metropolis, and near to a railway station. Held for an unexpired term of nineteen and a half years, at a moderate rental. This business has now been successfully carried on upwards of sixty years, in a most respectable neighbourhood, and is worthy the attention of any person in the line, of energy and perseverance, who, by the judicious employment of sufficient capital, cannot fail to realise a large and profitable return.—Further information and particulars may be obtained by application to Messrs. CHURCH & SON, Auctioneers and Valuers, William-street, Woolwich.

TO CARPENTERS, BUILDERS, &c.

MR. PETER BROAD has for DISPOSAL a thoroughly genuine BUSINESS, established upwards of fifty years, situate in a populous, respectable locality, near the Crystal Palace, having a large and lucrative connection. The premises include every convenience for the trade, with a capital dwelling-house attached. The concern is of long standing, and will be found a valuable opportunity.—Terms, with cards to view, at the Commercial Agency Offices, 29, Tavistock-street, Covent-garden.

TO STONEMASONS, BUILDERS, AND OTHERS.

TO BE DISPOSED OF, the LEASE and GOODWILL of an OLD-ESTABLISHED BUSINESS, situated in a leading thoroughfare; the premises are roomy and commodious, with large Workshops, Stable, &c. Stock, Fixtures, Sheds, &c. with a most desirable Dwelling-house attached, containing seven rooms, at the low rent of £40 per year, which may be cleared by letting a portion. This will be sold a bargain. Most satisfactory reasons given for leaving. Particulars upon application to BOURNE, BROTHERS, Auctioneers, 16, Chancery-lane, Fleet-street.

TO CABINETMAKERS, UPHOLSTERERS, CARVERS, &c.

TO BE DISPOSED OF, a good BUSINESS in a first-rate situation.—For cards of address apply to Mr. TAYLOR, Bookseller, 210, Strand.

TO BE SOLD, ONE HUNDRED EARTH-WAGGONS, 4 8/4 Gauge, and TWO TRAVELLING CRANES, with Jacks, and every requisite.—Apply to Mr. DIGGLE, Dover, Kent; or to view, to Mr. DIGGLE, Boston Spa, York-hire. P.S.—A BRICK-YARD in Surrey and Hants TO DISPOSE OF.

SURVEYS and ESTIMATES for Buildings, Repairs, or Dilapidations, carefully made. Architect's work measured and valued, plans and working drawings made, Builders' accounts kept, and work superintended, on very moderate terms, by the Advertiser, who has had many years' experience in every branch of his profession.—Address to G. S. No. 6, Regent-street, Chelsea.

SWISS DRAWING INSTRUMENTS, of equal quality to the very best London-made instruments, and considerably cheaper.—Apply to Mr. S. BARLOW, Drawing Roll and Instrument Maker, &c. to H.R.H. Prince Leopold, 9, Orse for Patents, Duke-place, Exchange, Manchester.

LONDON: Printed by CHARLES WYMAN, of 13, Hunter-street, Brunswick-square, in the Parish of St. George, Bloomsbury, Printer at the Printing-office of COX (late) and WYMAN, 74 & 75, Great Queen-street, Lincoln's-inn-fields, in the parish of St. Giles-in-the-Fields; and published by the said Charles Wyman, at the Office of "The Builder," 1, York-street, in the Parish of St. Paul, Covent Garden, all in the County of Middlesex.—Saturday, May 27, 1834.

CONTRACTS.

TO CONTRACTORS.

Royal Engineers' Office, Chatham, 26th May, 1854.

NOTICE is hereby given, that TENDERS will be received at the Ordnance Office, Pall-mall, London, on or before THURSDAY, the 15th day of JUNE, 1854, from persons desirous of CONTRACTING with the Honourable Board of Ordnance, for BORING for a better supply of WATER, in the ORDNANCE WELL, at Sheerness. Plans and specifications of the work are to be seen, and forms of Tender obtained, on application from at the Royal Engineers' Office, Sheerness, between the hours of TEN and FOUR, till the 14th of JUNE, 1854, Sundays excepted. The person whose Tender may be accepted will be required to enter into a bond, with two eligible securities, jointly and separately to be bound under a penalty of £—for the due performance of the contract. Tenders to be addressed to the Secretary to the Board of Ordnance, Ordnance Office, Pall mall, London, and to be delivered free, endorsed "Tender for Works at Sheerness." No Tender can be admitted after the said 15th day of JUNE, 1854. The Board of Ordnance reserve to themselves the right of rejecting the whole or any of the Tenders.

Royal Engineers' Office, London District, May 30, 1854.

CONTRACTS.

NOTICE to BUILDERS.—ORDNANCE CONTRACT.—The Commanding Royal Engineer of the Woolwich District hereby gives Notice, that the Honourable Board of Ordnance are about to enter into a special CONTRACT for CONSTRUCTING a

MAIN SEWER at PURFLEET, in ESSEX,

and that such persons as may wish to Tender for the same may inspect the plan, and obtain a copy of the specification and form of Tender for the work, by applying to Mr. CARTWRIGHT, Clerk of Works, at the Royal Engineer Office, Royal Arsenal, Woolwich, or to Mr. MACNAMARA, Foreman of Works, Purfleet, on or before the 7th of JUNE, 1854, between the hours of TEN and FOUR.

Tenders upon the printed forms prepared, to be delivered at the Office of Ordnance, Pall-mall, London, on the 8th of JUNE, 1854, addressed to the Secretary to the Honourable Board of Ordnance, and marked, "Tender for Work at Purfleet."

The Board of Ordnance reserve to themselves the right of rejecting the whole or any of the Tenders.

Woolwich, 22nd May, 1854.

TO BUILDERS.

SEALED TENDERS for BUILDING BARRACKS and STABLES for the Royal Artillery, to be ERECTED at DEVONPORT, with separate TENDERS for the ASPHALTE WORK, will be received at the Ordnance Office, Pall-mall, London, on or before the 8th of JUNE next, at NOON, addressed to the Secretary to the Board of Ordnance, and endorsed, "Tender for Artillery Barracks, Devonport," "Asphalte Works for Artillery Barracks, Devonport," as the case may be, on the left hand corner of the envelope. The Royal Artillery Barracks comprise a range of stables, with four horses' rooms and two workshops at one end, and four soldiers' rooms over the central stables; infirmary stables and yard; barns for hay and straw and corn store; forge shoeing shed, meeting store cook-house, and ablution room; guard-house, privies, dung and ash pits, enclosure walls, gates, entrance-door, roads, parades, drains, &c. &c. Plans and specifications, with forms and conditions, may be seen, and forms for Tenders, and every information obtained, at the Royal Engineers' Office, at Devonport, between the hours of NINE and FOUR o'clock, each day, from THURSDAY, the 25th of MAY instant, to WEDNESDAY, the 7th day of JUNE next, both days inclusive.

Royal Engineers' Office, Devonport, May 16, 1854.

TO CONTRACTORS.

Royal Engineers' Office, Chatham, 26th May, 1854.

NOTICE is hereby given, that TENDERS will be received at the Ordnance Office, Pall-mall, London, on or before THURSDAY, the 29th day of JUNE, 1854, from persons desirous of CONTRACTING with the Honourable Board of Ordnance, for providing additional STORE ACCOMMODATION, at the ROYAL ENGINEER DEPOT, at ST. MARY'S CREEK, near Chatham. Plans and specifications of the work are to be seen, and forms of Tender obtained, on application at the Royal Engineers' Office, Chatham, between the hours of TEN and FOUR, till the 14th of JUNE, 1854, Sundays excepted. The person whose Tender may be accepted will be required to enter into a bond, with two eligible securities, jointly and separately to be bound under a penalty of 1,000*l.* for the due performance of the contract. Tenders to be addressed to the Secretary to the Board of Ordnance, Ordnance Office, Pall mall, London, and to be delivered free, endorsed "Tender for Works at Chatham." No Tender can be admitted after the said 15th day of JUNE, 1854. The Board of Ordnance reserve to themselves the right of rejecting the whole or any of the Tenders.

FIRE—ROBBERY—VIOLENCE—PILLAGE—MILNER'S HOLDFAST and FIRE-RESISTING SAFES, the strongest safeguards in the world against

EXTENSIVE FIRE IN GLASGOW.

MESSRS DAVID BAIRD AND CO.

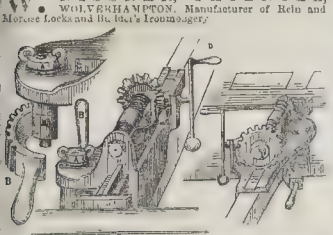
Gentlemen,—At the serious fire in Union-street yesterday, by which my counting-house was destroyed, I owed the preservation of my books to the MILNER'S SAFE in which they were kept. The contents of a wall safe were totally destroyed at the same time. You will please send me immediately another "Milner" of the same size as the one I had, being thoroughly satisfied of their safety, after the test I have had upon.

I am, Gentlemen, your obedient servant,

(Signed) JOHN DODDS.

27, Union street, Glasgow, Feb 22, 1854.

MILNER'S PHŒNIX SAFE WORKS, Liverpool; London Depôt, 47A, Moorgate-street, City



TO ARCHITECTS AND BUILDERS.

CHUBB'S WROUGHT-IRON and FIRE-PROOF DOORS and FRAMES, for strong Rooms A large stock of the above of all sizes made in the best manner, and of great strength, fitted with CHUBB'S PATENT DETECTOR LOCKS, throwing from two to twenty bolts, constantly on sale, at very moderate prices. FIRE PROOF SAFES of every size and Patent Detector Locks and Latches for all purposes.—C. CHUBB and SON, Sole Manufacturers, 67, St. Paul's Churchyard, London.

PATENT CAST IRON SINKS, with TRAP complete, of the following sizes:—2 feet, 8s. 6d. each; 2 feet 6 inches, 7s. 6d. each; 3 feet, 8s. 6d. All above about Ten Tons of Half-iron. Gutters, more or less broken to the required length below the usual prices.—ALFRED JONES, No. 5, Barksides, Southwark.

PATENT CRAMP FOR FLOORS, DOORS, AND SASHES.

W. BISSELL, PATENTEE, WOLVERHAMPTON, Manufacturer of Rein and Morrice Locks and Builders' Ironmongery.

AA A set screw and pin moving in slab C, to regulate for any thickness of jack, from ¾ to 2 inches.

B An eccentric notched lever, to be turned and pressed against the jack.

C The cramp upon the last close up to the bead, move the set screw will catch up to the side of the last, then as the set screw is turned the notches of lever B will push the last from it, and by the handle D, the lever will gradually be thrown all out of the cramp; the greater the strain, the more tightly by its eccentric cramp the lever binds. The Patentee, in order to attention of Builders and others, assures them that his cramp possesses great advantages. It is a novel cramp of the best kind, and as well as all Patents and such as failures. From its superior mechanical principles, it has greater power, and will be found to work quickly and easily used than any yet brought out, and at the same time it is light and portable.

TO ARCHITECTS, SURVEYORS, PLUMBERS, BUILDERS, &c.

DR. ARNOTT'S NEW SMOKELESS FIRE GRATE. E. EDWARDS and SON beg to inform Architects, and the Public generally, that they have got to be seen in daily operation at their show rooms, and that they are prepared to apply this and to other stoves to the same principle.—1, Poland-street, Oxford-street

THE SMOKE-CONSUMING STOVE invented by Dr. ARNOTT, and explained by him at the Society of Arts on Wednesday, MAY 10, fully insures perfect combustion of the gases of coal, and a great saving of fuel. It is less in first cost, requires less attention, and is more economical than any other stove. Mr. EDWARD BAILEY, 30, Size-lane, London, is prepared to supply them, or any of the stoves in common use, on the principle.

HOT WATER APPARATUS, adapted for heating buildings of every description, on the most improved principles, requiring no brickwork: Warm Air Apparatus, &c.—Apply to SPILLER and TAYLER, Engineers, Battersea.

DARLINGTON WORKS, 16 to 19, SOUTHWARK-BRIDGE ROAD, LONDON.

JOHN WEEKS and CO. HORTICULTURAL BUILDERS, King's-road, Chelsea, think it now necessary to inform the Nobility, Gentry, and Public in general, that they have NOT HAD ANY CONNECTION WHATEVER with the Bankrupts, Edward and Alfred Weeks, who LATELY carried on business at Chelsea.—June 2nd, 1854.

WARMING by HOT WATER.—J. WEEKS and CO. KING'S-ROAD, CHELSEA, HOT WATER APPARATUS MANUFACTORY, whilst respectfully soliciting the attention of architects, builders, &c. to their superior apparatus for warming churches, mansions, halls, offices, and public buildings, by the circulation of hot water in pipes, beg to call particular attention to the scientific statement in the "Builder" of Jan. 14, 1854, which fully bears out the able address of the Rev. H. J. Boge's, delivered at a meeting of the Architectural Society, wherein Mr. Boge shows that heating by hot water is truly the only effective system applicable to warming churches and other large buildings. It is free from all objections, is economical in its working, and produces perfect ventilation with a uniform comfortable warmth throughout the largest buildings. Messrs. JOHN WEEKS and CO. will guarantee their Hot Water Apparatus for thirty years at 6 per cent.

CALORIFERE.—Gold Medal, Paris Exhibition, 1849.—A 200,000 cubic feet room warmed by hot air only, at 65 degrees Fahrenheit, in burning 10 lbs. of coal per hour. The most complete safety against fire, healthiest and most powerful ventilation, without any machinery, are obtained by BOILEVE'S PATENT CALORIFERE. The constant supply of fresh air carries out instantaneously, by a new well-improved process, all damp or vitiated air, that makes it very desirable for churches, schools, theatres, hospitals, manufactories, clubs, houses of any size, laundries, and green-houses. The Calorifere has been adopted by his Grace the Duke of Bedford, at Woburn Abbey, by several architects, and may be seen in operation in many places in London and country. Apply, per post, to T. BOILEVE, French Engineer, 85, King William-street, City.

MARBLE WORKS by PATENT MACHINERY, Commercial-road, Pimlico, London.—THOMAS JACKSON begs to draw the attention of the public to the most extensive stock of Marble Chimney-Pieces in the Metropolis; consisting of a selection of upwards of two hundred, and manufactured by steam power from the finest Italian and other marble, and with that careful attention to the details and finish so necessary in good marble work. The Stock consists of elegant Drawing-Room Chimney-Pieces in Statuary Marble; bold, massive Chimney-Pieces, in Black, Black and Gold, Brèche, Sienna, Verd Antique, Brocatella, Dove, St. Anne's, and Serpentine Marble, suitable for Dining-Rooms, Libraries, Vestibules, and Entrance Halls; and a great variety of others in Veined, San Juan, Emperor's Red and Amber Marble, for Boudoirs, Breakfast-Rooms, best and secondary Bed-Rooms, &c., als... Monuments, Tombs, Tablets, and Pedestals for Busts and Statues, and Slabs for Cabinet Work, &c.; the whole executed from the most classical designs, and in all the varieties of the finest Italian and British Marble, at the lowest remunerative prices.

MARKET-WHARF, REGENT'S-PARK-BASIN, WEST-END DEPOT, for Yorkshire Paving, Portland and Derby Stone, Bangor Slates, Slabs, &c. Also Bricks, Lime, Cement, Plaster, Tiles, Laths, and Fire Goods and others, to their Stock as above, where everything will be charged at the lowest prices. Headstones, Kerbsets, Steps, Landings, &c. cut on the shortest notice. Country orders promptly attended to.

MARBLE.—Mr. J. FABBRICOTTI, of Carrara, Italy, Proprietor of Marble Quarries, and the only person in the United Kingdom selling Italian Marble the produce of his own quarries, beg to inform the gentlemen connected with the Marble Trade that he has established, in London, the most extensive Depôt of Statuary, Veined, Sicilian, Dove, and Black and Gold Marbles, at CARRARA WHARF, THAMES BANK, PIMLICO, the foot of Vauxhall bridge.

BATH STONE OF BEST QUALITY.

RANDELL and SAUNDERS, QUARRYMEN AND STONE-MERCHANTS, BATH.
(DEPOTS.)

Great Western Railway Station....	PADDINGTON
Great Western Railway Station....	BRISTOL
Hope-street, Mount-pleasant	LIVERPOOL
Castle-fields	MANCHESTER.

List of prices at the quarries and depots, also cost for transit to any part of the kingdom, furnished on application to Bath Stone Office, Corsham, Wilts.

ITALIAN and GALWAY MARBLE QUARRIES.
Depôt, Whitewall Wharf, Parliament-street, Westminster.
Now landing, Twenty Blocks of large Statuary, suitable for Sculpture, &c. some exposed for choice.
Fifty Blocks of good Vein and Sicilian, &c. &c.
Also, 100 Tons of Galway Black Marble, in blocks and slabs of large dimensions.
Apply to Mr. FRANKLIN, Proprietor of the Quarries.

TO BUILDERS, MASONS, AND CONTRACTORS.
OBSERVE!!! the cheapest Depôt in England for MARBLE CHIMNEY PIECES of superior quality and workmanship is the Westminster Marble Company's Patent Works, Earl-street, Lloyd-square, Pentonville. An inspection of their superior Stock of Statuary, Sienna, Black and Gold, Vein, and other Chimney-pieces, Tombs, Monuments, Tablets, &c. is earnestly solicited.

VALENTIA SLATE SLABS.—The Valentia Slab Company invite attention to their Slabs now supplied, of very large dimensions and of superior quality. They have been used for the British Museum, National Gallery, Bethlem Hospital, various Lunatic Asylums, the Ordnance Works, Model Prison, Pentonville, and other Penitentiaries; Malting Floors in Bedfordshire and Hertfordshire, Breweries, the Race Stand at Brighton, Portsmouth Barracks, and are kept in stock in large quantities by Messrs. FREEMAN, Millbank-street; also by Messrs. Sharpe, Tooley-street; and Messrs. Braby's, Belvidere-road, where terms may be obtained.

THE TREVALGA SLATE COMPANY invite particular attention to their SLATE in SLABS, which will be found on inspection to be vastly superior in strength to any other, and admirably adapted for shelves. Cisterns and every description of Slab work, Cisterns, Sinks, Slate Tanks, with plate-glass sides, for fish-coophites, &c. and every description of Slab work wrought and fixed on the shortest notice: 1¼ inch Slate Paving, in runs, planed on one side, and squared, fitted to lay, warranted stronger than 2-inch York, 3d. per foot super.—Baltic Wharf, Commercial road, Lambeth.

MAGNUS'S ENAMELLED SLATE.—Mr. MAGNUS having, at great expense and hazard, and by dint of unwearied perseverance during a period of FOURTEEN YEARS, succeeded in obtaining for his invention of Enamelling Slate to imitate Marbles the PATRONAGE of HER MAJESTY, PRINCE ALBERT, the chief of our nobility, and almost every Architect, Builder, and Decorator of any note, and having been rewarded with the MEDAL of the SOCIETY of ARTS and the PRIZE MEDAL of the GREAT EXHIBITION, finds that his success has given rise to a number of petty imitators, who, though their wretched imitations of his productions, which are, in most cases, passed off as "MAGNUS'S ENAMELLED SLATE." He therefore respectfully requests those who are disposed to patronize his manufactory, as unfortunately AT LESS THAN HALF THE COST AND LABOUR NECESSARY TO SECURE PERMANENCY, a counterfeit can be made which will not endure, and damages the reputation of his Enamelled Slate. This caution is particularly necessary in regard to the fittings of the retiring places at railway stations, and wherever there is much wear. N.B. The Tariff for 1854 is now ready.
Pimlico Slate Works, 39 and 40, Upper Belgrave-place.

SLATES, Slabs, Cisterns, Enamelled Chimney-pieces, Plain ditto, Urinals, Baths, Sinks, Lining, Skirting, Roofing, Malting Floors, Patent Ridge and Roll, and Slab-work generally. Export orders supplied with out detention; a large stock of slates and manufactured goods being usually kept on hand. Price-lists may be had upon application, either personally, or by post.—Address, JOSEPH BRINDLEY, Slate Merchant, Steam Slate works, Bermondsey-wall, London.
N.B. Wharf opposite the Wapping Entrance of London Docks.

GRANITE.—The Cheesewring Granite Company, of Liskeard, Cornwall, are now prepared to supply Granite of excellent quality, and the largest sized blocks. Prices may be ascertained on application to N. TREGELLES, 2, Pinner's-court, Old Broad-street, City; or to JAS. J. TRATHAN, Liskeard.

ABERDEEN and PETERHEAD POLISHED GRANITE Chimney-pieces, Monuments, Columns, Pedestals, Vases, Monumental Urns, &c. executed on the shortest notice, and at the lowest possible prices, on application to JAMES WRIGHT, Manufacturer, 112, John-street, Aberdeen; or A. and F. MANUELLE, Granite Merchants, 12, Trinity-square, Tower-hill, London.

YORK LANDINGS for SALE.—About 400 feet sup. of SELF-FACED YORK LANDINGS FOR SALE, at 6d. per foot, sup. 4 inches, 4½ inches, and 5 inches thick; average 16 feet sup. each landing; must be cleared immediately.—May be seen at W. CROAKER'S Building-material Yard, Dover road, Borough.

PAVING, in great varieties.—Sinks, sills, steps, &c.; rubbed coping; tooled ditto; rubbed and tooled sills; Hurnehill and self-faced slab; rubbed York paving; pipes, pots, &c. all at low prices. Builders and masons are invited to inspect a list sent free on application to E. and W. STURGE, Bridge-wharf, City-road.—Established 1831.

Area near 1½ acre adjoining the South-Western Railway, with 153 feet frontage to the River Thames, and 140 feet next the high road leading to Wandsworth. Apply on the Premises, or to Mr. T. M. NELSON, Architect, Regent Chambers, No. 38, Regent Circus, Piccadilly.

ELIGIBLE WATERSIDE PREMISES, close to London bridge. North side—Part of DYER'S HALL-WHARF and PREMISES, TO BE LET. Also the well-known "STEAM-BOAT PIER adjoining.—Apply to 35, Upper Thames-street.

TO BUILDERS

TO BE SOLD, the LEASE of extensive PREMISES, long established, in the BUILDING TRADE, together with the Business and Building Utensils, which may be viewed and particulars had by applying on the Premises No. 22, Lower Kennington-lane, Lambeth.—No house agents need apply.

BERKSHIRE.—READING. — To FREEHOLD LAND SOCIETIES or PRIVATE SPECULATORS. FOR SALE, by PRIVATE CONTRACT, or TO BE LET, on building leases, either in one or several lots, the greater portion of an ESTATE of 37 acres, which has been laid out, and is admirably adapted for building purposes. The whole is ornamentally timbered, and divided into half acres and larger proportities, with good quickset hedges, and is pleasantly situate on rising ground, commanding extensive views of the adjoining country, and is within twenty minutes' walk of the Reading Railway Stations and the Market place.—For further particulars, and to view, apply to Mr. WILLIAM WEEDON, Solicitor, 61, Munster-street, Reading

FOREST HILL, adjoining Sydenham.—TO BE SOLD or LET.—The CARCASSES and Parts of Carcases of Four first-rate Dwellings to be SOLD or LET, on a rental. They stand in a lovely situation, within twenty-five minutes' walk of the Crystal Palace. They may be let at a ground rent, and the value of the materials remain on mortgage at Five per cent.—For further particulars, apply to Mr. B. J. WOODCOCK, Architect, Adelaide-chambers, 32, Gracechurch-street, City.

RED-HILL, REIGATE.—DETACHED VILLA CARCASSES.—TO BE SOLD or LET, at a ground-rent, several HOUSES in CARCASS, well built and delightfully situate.—Apply to Mr. W. GOLTON, Woodlander-road, Redhill; or Mr. W. NASH, Estate Agent, Bull's-pond, Islington.

FREEHOLD BUSINESS PREMISES, suitable for a Builder, and convertible for a Mill, Brewery, Foundry, or Factory, having capital stabling, long range of building, and land, if desired, in the rear extending to the Thames, in a commanding situation near the Bridge, Kingston,—TO BE SOLD or LET.—Apply to Mr. H SELFE.

WANTED, a FACTORY, or LAND (from Two to Three Acres), to build upon; near a river or canal, and within ten miles of London. Address, stating full particulars, to F. R. S., Thomas, Davies, and Co. Advertising Offices, 1, Finch-lane, Cornhill, London.

ST. MARGARET'S ESTATE, TWICKENHAM.—FOUR RIGHTS of CHOICE of ALLOTMENTS TO BE SOLD. The choice to be made on Wednesday next, the 7th inst. Also TO BE DISPOSED OF, a 50l ALLOTMENT in the FOREST HILL ESTATE Apply at No 120, Pall-mall

NATIONAL PROVIDENT FREEHOLD LAND SOCIETY, 42, New Oxford-street, and 80 Cheapside.—The Great Arbour Hill Estate, Slough, Bucks, adjoining the railway station, on the most extensive views of the surrounding country and Windsor Castle; has been laid out for villa residences, and is now on sale. A List of "Rights of Choice" to be disposed of may be inspected at the office Shares, 50l.; Entrance, 1s 6d.; Monthly payments, 8s. No quarterage or extra payments. Allotments on the Staines Estate of one-fifth of an acre for a 50l share Allotments with 20 feet frontage and 210 feet depth for 25l. JOHN P COX, Secretary.

TO PLUMBERS, PAINTERS, AND GLAZIERS.

A SMALL JOBBING BUSINESS, with a good Glass cutting Trade attached, TO BE PARTED WITH for the price of the Stock and Fixtures, in consequence of the proprietor leaving London. A first-rate opportunity for a young man entering business; has been established nearly nine years. Apply before TEN in the morning, or after SEVEN in the evening, at 3, Caledonian-road, King's-Cross, near the station of the Great Northern Railway

AN Old-established LAND and ESTATE AGENCY and SURVEYOR'S BUSINESS for DISPOSAL, with a year's introduction, situate at the west-end of London, and offering a good opportunity to a young man of energy and reasonable capital.—Apply, by letter, addressed to A. Z., Messrs. Labourn and Topham's, 37, Wigmore-street, Cavendish-square.

TO BUILDERS AND OTHERS.

TO BE DISPOSED OF, a very excellent BUSINESS, established about forty years, situate within twenty minutes' walk west of the City, having a good and extensive building connexion, together with other general building, decorating, and agency business. The premises are most convenient and well arranged, held at a very moderate rent, all in excellent repair. Only removals need apply, and must be in possession of from 2,000l to 3,000l. Immediate possession may be had, and every facility will be afforded the purchaser by the present proprietor. For particulars, address, per letter (prepaid), to T. V. Office of "The Builder."

GENTLEMEN finding their own Material in the building trade, can meet with a practical Man to CONTRACT for the LABOUR of the BRICKWORK, CARPENTERS' WORK, and JOINERS' WORK.—Apply by letter, post paid, to A. B. 94, Star-street, Edgware-road.

WANTED to PURCHASE about 3,000 FEET of LIGHT POST and RAIL FENCING; to be delivered at any railway station in the neighbourhood of London. Particulars, with lowest price, to be sent to Mr. GEORGE CLARKSON, Surveyor, 48, Penton-street, Pentonville.

GLAZING ROLLERS.—TO BE DISPOSED OF, TWO PAIRS of GLAZING ROLLERS, with standards and gear complete. Dimensions as follows:—Length, 42 inches and 24 inches; diameter, 12 inches and 10 inches. For further particulars, apply to Mr. GEORGE MORGAN, Brook's Wharf, Upper Thames-street, London.

WHARF CRANE for SALE.—A capital second-hand double-purchase iron-post WHARF CRANE, warranted to lift two tons, 10 feet radius, 16 feet jib, in good condition.—For further particulars and price, apply to M. A. RICHARDS and SON, Engineers, Upper Ground-street, Blackfriars-bridge (Surrey side).—N.B. Estimates given, fixed complete with brick or stone well included if required.

TO BE SOLD, ONE HUNDRED EARTH-WAGGONS, 4 8l Gauge, and TWO TRAVELLING CRANES, 6 l.abs. made to lift twenty tons.—Apply to Mr. DIGGLE, Dover, Kent; or to view, to Mr. DIGGLE, Boston Spa, York-shire. P.S.—A BRICK-YARD in Surrey and Hants TO DISPOSE OF.

LIGHTNING CONDUCTORS.—R. S. NEWALL and CO. Patentees of the Copper Rope Lightning Conductor, beg to inform the nobility, clergy, &c. that they supply Lightning Conductors, with the point and all staples complete for fixing, at one shilling the foot.

R. S. NEWALL and CO's Patent Copper Rope Conductor is being used by architects, engineers, and scientific men in all parts of the world.

OFFICES.—Gateshead-on-Tyne.
139, Strand, London.
67, Hyde-park-street, Glasgow.
27, Dale-street, Manchester.

MEASUREMENT and VALUATION of all WORKS connected with BUILDING.—Mr. FREDSTENT continues to measure and value all work and materials, and to adjust accounts between masters and workmen. Estates surveyed and mapped. Quantities taken out.—Apply at Mr. FRED. STENT'S Offices, 24, Orchard-street, Portman-square.

TO ARCHITECTS.

COMPETITION and other DRAWINGS.—Mr. THOMAS S. BOYS, Member of the New Society of Painters in Water Colours, and author of "The Picturesque Architecture of Paris, Ghent, Rouen," &c. and of "London as it is," offers his services in Tinting Backgrounds, Landscapes, Perspective Views, Interiors, &c. From the long experience he has had in such subjects, he is fully aware of the points essentially necessary to be attended to. Drawings and designs lithographed in a superior manner.—Address, Mr. BOYS, 32, Albany-street, Regent's-park.

LITHOGRAPHY.—Plans of Estates, Maps, Bills of Quantities, Isometrical Views, and every description of Lithography executed in the best style of Art. Engineering and Mechanical Drawings correctly detailed by experienced hands. Artists and amateurs supplied with every requisite for Lithography. Coloured Drawing and Oil and Water-colour Painting; Presses, Stones, Chalks, &c. Specimens of every class of work for inspection. Estimates given. Instructions afforded.
CHARLES MOODY, 257, High Holborn.

C. LEFTWICH, VARNISH MANUFACTURER, LEAD, GLASS, and COLOUR WAREHOUSE, 21, Munster-street, Regent's-park. C. L. begs to call the attention of the Trade, Builders, &c. to his stock of plumbers' closet-basins, ping dutto, brass-work, &c. &c. sheet-lead, and patent pipe, plate, patent plate, sheet and crown glass, white-lead, oils, colours, &c. &c. PER CWT. GIVEN for OLD LEAD; GLASS ILLUMINATORS for FLOORS, AREA VAULTS, &c.

HOUSE DECORATIONS.—J. MAC LACHLAN, Painter and Decorative Artist, 35, St James's-street, and at Clapham-common, informs Architects, Surveyors, and Others, that he is practically acquainted with his trade in all its details, and respectfully requests a trial from those who may wish to have their work nicely executed at a very moderate charge, and punctual to time. J. MacL. will be glad to make designs for the decoration of private, or public buildings, in any part of the kingdom, with estimates. Tenders for general repairs.

TO PLASTERERS.

A GOOD SUBSTITUTE for HAIR.—SHORT COCOA-NUT FIBRE is not injured by hot lime or mortar more than hair; is not one-third the price, and is ready for use without such a loss of time and labour as there is in heating and cleaning hair.—For samples and particulars, apply to the PATENT COCOA FIBRE COMPANY, Kingston-upon-Thames.

ARCHITECTURE, CIVIL ENGINEERING, and SURVEYING.—Messrs. HYDE, SMITH, and LEWIS, Architects, Civil Engineers, Surveyors, &c. beg to inform railway directors, public companies, landed proprietors, noblemen, gentlemen, solicitors, land agents, and others, that they EXECUTE every description of professional work on the most reasonable terms. Railways, roads, water-works, &c. planned, surveyed, levelled, and completed. Engineering and architectural plans, sections, and designs, prepared and executed. Estates, manors, parishes, and townships surveyed and mapped. Land, timber, buildings, &c. measured and valued. Houses surveyed, and estimates of dilapidations given. Maps, plans, &c. drawn, copied, and reduced with accuracy and despatch.—34, Guildford-street, Russell-square

ARCHITECTURE, CIVIL ENGINEERING, and SURVEYING.—Messrs. HYDE, SMITH, and LEWIS, Architects, Civil Engineers, and Surveyors &c. beg to inform their friends and the public that they have refitted up their OFFICES with every requisite necessary for acquiring a thorough practical knowledge of the profession, including models and instruments of every description. The courses are all remodelled and enlarged, embracing all the latest improvements. Gentlemen who cannot attend at the offices can be attended at their residence in any part of the country by Mr. SMITH or Mr. LEWIS.—Prospectuses and full particulars may be had by applying at the Offices, 14, Guil ford-street, Russell-square.

ARCHITECTURAL, CIVIL ENGINEERING, and SURVEYING OFFICES, established by Messrs. HYDE, SMITH, and LEWIS, Architects, Civil Engineers, Surveyors, &c. For preparing General Plans, Working Drawings, Measurers, Surveyors, Levellers, Draughtsmen, Measurers Valuers, &c. and for giving EVENING INSTRUCTION in Architectural and Civil Engineering, Drawing and Colouring, Making Finished and Working Drawings, Preparing Specifications, Taking out Quantities, Preparing Estimates, &c. &c.—Terms One Guinea per Quarter.—For Prospectuses, &c. apply at the Offices, 24, Guildford-street, Russell-square.

FOR WATERING GARDENS, DISTRIBUTING LIQUID MANURE, &c.—JAMES LYNE HANCOCK'S VULCANIZED INDIA-RUBBER TUBING is now manufactured especially for the above purposes, and is of greater flexibility than any other description of hose or tubing. It is also manufactured to resist great pressure, suitable for attaching to the mains of water-works or to tanks or water-butts, of high elevation. WATERING HOSE fitted up with brass joints, unions, stop-cocks, roses, and jets complete Vulcanized India-rubber suction-pipes for pumps, any length or size, to order; HOSE for brewers' use, fire-engines, &c. VULCANIZED INDIA-RUBBER WASHERS for STEAM and WATER JOINTS, and VULCANIZED RUBBER in SHEETS of ANY SIZE and THICKNESS. Solid vulcanized India-rubber tubing and cord for the joints of glass doors, sashes, frames, &c. Prices and every information may be had on application at the Manufactory, Goswell-mews, Goswell-road, London.

GUTTA PERCHA TUBING.—May be buried for years, without injury, and it is therefore valuable for conveying water, chemicals, &c. It is peculiarly valuable for liquid manure, drain, and soil pipes. Being a non-conductor, it is also manufactured to resist great cold or heat of summer, like metal or leather. Its strength is extraordinary; the small half-inch diameter tubing having resisted a pressure of 250lbs on the square inch, without bursting. The smaller sizes may be had in 100 feet, and the larger in 50 feet lengths. The joints are easily made. As a conductor of sound it is most valuable for conveying messages in tubes of bells. ELECTRIC TELEGRAPH WIRES INSULATED WITH GUTTA PERCHA. The GUTTA PERCHA COMPANY, Patentees, 18, Wharf road, City road London.

THE PERMANENT WAY COMPANY call the attention of Railway Directors and Engineers to their PATENT RAILS, SLEEPERS, FISH JOINTS, and other important improvements, now in use on upwards of 2,000 miles of railway.

Extract from the half yearly report of the Directors of the Midland Railway, February 14, 1854:—

"An important feature in the contract for the maintenance of the Permanent Way, is that the contractors are bound to reduce their charges 50l per mile per annum, whenever the Fish Joint, or certain other improvements, are hereafter introduced."

Every information may be obtained on application to Mr. CHARLES MAY, C.E. the Manager; or Mr. WILLIAM HOWDEN, the Secretary, 26, Great George-street, Westminster.

TARPAULINS for COVERING ROOFS during Repairs. SCAFFOLD CORD and every description of ROPE used by Builders upon the lowest terms. Marquees and temporary Awnings on sale or hire. Orders per post receive the most prompt attention.—WILLIAM PIGGOTT, 193, Fore-street, City, Manufacturer, by appointment, to her Majesty's Honourable Board of Ordnance.

HER MAJESTY having graciously intimated her intention of honouring with her presence the OPENING of the CRYSTAL PALACE on SATURDAY, the 10th JUNE the Directors beg to announce that, with the exception of those specially invited to take part in the Ceremony, NONE but SEASON TICKET HOLDERS will be admitted.

G. GROVE, Secretary.

CRYSTAL PALACE.—SEASON TICKETS, the HOLDERS of which will ALONE be ADMITTED to the OPENING CEREMONY on the 10th of JUNE next, may be obtained on the following terms:—

Single Season Tickets	£2 2 0 each.
Do. do. including Railway conveyance from London-bridge to the Palace and back	£4 4 0 each.

Family Season Tickets, with or without Railway Conveyance, at a reduction from the above prices, in proportion to the number of tickets taken. The tickets will be admissible on all occasions when the Palace and Park are open to the public, until the 30th April, 1855.

Tickets, including Railway Conveyance, can be had only at the Office of the Secretary to the Brighton Railway Company, London-bridge; and at 14, Regent-street.

Tickets for the Palace and Park, without Railway Conveyance, may now be had at the Palace; at the Offices, 3, Adelaide-place, London-bridge; and 14, Regent-street; at the Brighton Railway Terminus, London-bridge; at SAMS', 1, St. James's-street; MITCHELL'S, Bond-street; GUNTERS, Lowndes-street; PURCHON'S, Bishopsbridge; KEITH, PROWSE, and CO.'S, Cheapside; LETT, SONS, and STEERS, Royal Exchange; DAWSON and SONS', Cannon-street, and HAMMOND'S Advertising Offices, 77, Regent-street, London; BRILL'S Royal Baths, Brighton; W. BROOKS'S Office, 2, High-street, Southampton, and at Messrs. SMITH and SONS' Book stalls on the R. Railways.

CRYSTAL PALACE.—Admission from 12th to 17th JUNE. During the week immediately following the opening of the Palace, viz. from the 12th to the 17th, both inclusive, the PALACE and PARK will be OPEN ONLY to the HOLDERS of SEASON TICKETS, and to the public on payment at the latter of Five Shillings each, exclusive of conveyance by railway.

By Order,

G. GROVE, Secretary.

May 30, 1854.

SURVEYS and ESTIMATES for Buildings, Repairs, or Dilapidations, carefully made. Artificers' work measured and valued, plans and working drawings made, Builders' accounts kept, and all work superintended, on very moderate terms, by the Advertiser, who has had many years experience in every branch of his profession.—Address to G. S. No 6, Regent-street, Chelsea.

BY ROYAL LETTERS PATENT.

IMPORTANT TO BUILDERS, DECORATORS, &c.—The present season is recommended for the use of the Patent Tools to establish beyond a doubt, for despatch and superiority of work. Designs of woods of the most elaborate description are produced instantaneously; its merits having been tested by the first talent of the day, is pronounced to be an indispensable tool in the hands of grainers. The saving of time is immense, and enables the prior workmen to produce first-class work not surpassed by the ordinary method of graining. The tools can be obtained with all necessary information of J. BELLAMY, 8, York place, Upper-street, Islington, London; where specimens can be seen. A sample of the tools forwarded to the country, upon the receipt of One Guinea. Post-office orders payable at Islington Post-office, to JOHN BELLAMY.

The Builder.

SATURDAY, JUNE 3, 1854.

CROWDS still fill the little closets of Trafalgar-square, into which are jammed and piled the choicest works of a school of art now rightly preferring claim to high ropean rank. Past the door of the room re, in years gone by, a first hour was well nt, an architect was drawn on the other day the surging throng,—possibly not reluctant lefer the disagreeable task which the *Builder* nevertheless performed, till such time as he looked on something that might perchance etify in the intellect, if not expand the heart. , the position of architecture in the Academy been every year worse and worse, and men eminence have now no inclination towards the our of preparing elaborate drawings, which, rung at all, are placed where they cannot be n. It is not without reason that we claim architecture a position as the head of all the s, and the architect in question may be par- ied if, with his views of the right position of Royal Academy *of Arts*, he dreaded that his per might be ruffled even more than of late rs, by what would be evidence of the short- nings of one august body, though not of the nerits of his brethren. Haply he felt that if ot to admire" be "all the art" some *critics* now," it is right for architects and others to serve the *disposition* to be pleased, though y oblige us sometimes to say that we are erwise.

But to see as they should be seen, any of the ncipal paintings, was for him impossible. ough able to use elbows as well as eyes— ch pairs of corporal members being, it would pear, essential—and (as he now feels ashamed say) soon falling into the breaches of good eding which each and all seem to recognise belonging to the *etiquette* of the room,— erposing the opaque head and shoulders fore each other person in succession—this ponent affirmeth, that he departed, after the ual gossip of the day, but as little able to preciate the nature and merits of the chief oductions as though he had never visited the hibition. From a moderate distance, to have ncealed the lower portion of the picture, or exhibit as though to a short-sighted person— glad to gain an inch" at a time—was scarcely e intention with which any one of the accom- ished artists set to work. Of the serious portance to them, of this question of space, uch has been said—much more than it is cessary to repeat. All days are not alike; t on all, the crowd is too great to see such a ork as the large canvass of Maclise, as a pic- re,—that is to say, unless the ardent lover of t can rise at cock-crow, and get a quiet hour ith the morning light.

Some such effort our architect made, that he ight receive those valuable ideas which he elieved, as an artist he could derive from other orks than architectural drawings and designs. et us see what the margin of his catalogue ay supply in the way of hints on questions out which the lucubrations of an architect ight be not unworthy, also, of the attention of he painter and the sculptor. The cultivation f æsthetics in the rooms of the Royal Academy, owever, seems to have been the pursuit of nowledge under difficulties; for one of the first mpressions which interrupts the attention of he practical architect, is this one of the utter nsufficiency of the space, *even for that portion of he works of the year which are admitted.* The pportunity of seeing the whole of each picture t one time, should surely be an object to be provided for in planning a gallery, and in arranging the works in it. Errors of plan allowing the entering and returning crowds to struggle through the same doorways, are not the only causes of inconvenience.

It is worthy of consideration whether each one of the principal works should not be railed round; the pictures should be distributed over a larger area,—not less than twice the present space being devoted to the same number of works; and no pictures, or at least none of small size, whether in oil or water colours, should be placed within a distance from the ceiling, of one-third the height of the room. It may be difficult to avoid altogether the injurious effects of one picture upon another, and to place them even as far apart as they are in the National Gallery; the question of classification, by some thought essential to the due appreciation of devotional subjects (like one this year which has called forth equal ridicule as praise) may be impossible under the varying circumstances of an annual exhibition; but it does seem to us that no such use as that which is at present, should be made of the space we have referred to. A work of real merit—as it has been often urged—would be more serviceable to the artist, if out of the gallery altogether, than placed where many are, and space should rather be left bare, than used for pictures which have to be chosen—as it would seem—on account of their *inferiority*. The Academy has higher objects than to minister to the anxiety of the public to have plenty for their money, and should set itself against any desire which can be gratified by glitter of *frames*. Suggestions have been made in the *Builder*, as well as in the *Art-Journal*, for the better arrangement of galleries, but have led to no positive result. One suggestion in the periodical last mentioned, indeed, provided for the use of the upper part of the walls, by allowing the pictures there, to be viewed from a raised platform, in the centre of the room,—which, as shown, did not itself appear to involve loss of space.

Another question in the arrangement of a gallery, is the important one of light. The argument—other than that of combination with a fine architectural effect—in favour of a "*gallery*" as a place of location, should be derived from its pre-eminent and perfect advantages in this particular. Referring to the case of a large mansion;—if there are not such advantages, it is better that the pictures should remain in ordinary apartments; which are, in some respects, the most consistent with the manifestation of influences of which all artists do, or should believe that their works are capable. But, the rooms at the Royal Academy, well lighted as compared with many, are by no means what should be desired. It seems as though the pictures within a space at the upper part of the rooms, about equal to that before mentioned, were always in shade. Certainly the days have not lately had much, or long-continued, sunlight: but that is the case through the greater part of the year, and in the month of May, not unfrequently. The difference in the effect of Danby's picture, when a gleam of sunshine passes over it, could scarcely be anticipated by looking at it as it is generally seen. Details and points of light came forth, as the architect stood before it, which a moment earlier, were part of a dark mass.

These are not the only questions which naturally rise to the mind of an architect, in the course of an inspection of the paintings and sculpture. There are important matters just now being debated in all the walks of art, and these turn upon the same fundamental points. What is art? What is the peculiar vocation of the artist? and what is the use which he is to make of the great origin and teacher of all art—Nature? We are ready to contend that of all the arts, there is none which derives so much from nature, as that one in which the mere forms have least direct resemblance to those of nature. "Sculpture and painting," thinks a writer in the *Quarterly Review*, "are entirely founded upon the imitation of nature," whilst architecture, taking "many a principle from nature, consults nature for *lessons* and not for *models*."

The great question of our time, then, is this one of the extent to which imitation should enter into art, as a principle. Confusion of ideas with many persons, even as to the meaning of Reynolds, has resulted from his use of the term; and the real value of "models," and of the power of representation, have not been very clearly apprehended. Imitation thus in the sense in which it is commonly understood—as *fac-simile* reproduction—is not art, or the object of the true artist,—whether architect, designer in "practical" art or painter, or sculptor. If we are asked to look with respect on doubtful allegory, or on the model-painting style of the Pre-Raphaelites, because either has been deliberately adopted, we also may ask that views of the nature of art, such as have proceeded from the greatest thinkers of modern and ancient times, should not be hastily objected to, and much less ridiculed. Some have fallen out with the expression, that it is the office of the artist to *correct* nature, as involving something like impiety; but, in truth, if the words used show the insufficiency of language to express the subleties of thought—which, by their very removal from the level of words, enter into the region of art—they are at least founded upon correct reasoning. Just as the crude ore of the mine is such, *in order that* the labour and the intellectual power of man may fashion it into the tool, or into one of the beautiful forms of art, so the artist is left to deduce from the variations in nature, the central type—the ideal from which all others are modified. In like manner, we may talk of a particular colour—we may even conceive an idea somewhat definite of the meaning of writers; yet it is perhaps impossible to find, or to produce, the exact "positive," of which we make logical inference, but which we see only in the countless hues, tints, and shades of nature, influenced by "simultaneous contrast," or the physical organism of the observer. We can often properly assume, as in moral excellence, a standard which we have never seen.

We say that to demonstrate what precise use is to be made of natural forms in architectural ornament, or in the varying cases of sculpture, historical painting, landscape art, and portraiture, might be scarcely possible in words, even though we had a volume to devote to the subject. It is enough here to set forth, that true art has not for its *object* the reproduction of nature. Goethe, somewhere, has a sentence like this:—"Art is called art, because it is *not* nature." The Academy have placed upon their catalogue—from the poet whose essays throughout are rich in knowledge and criticism, applicable to every branch of art—these lines:—

> "Nature, like liberty, is but restrained
> By the same laws which first herself ordained."

Our friend, perhaps thinking that the words were not separated from their context with entire advantage) has presumed to freely alter them thus:—

> "True Art, like Nature's self, is but restrained
> By the same laws which Nature first ordained."

Pope would have approved of the new sentiment, if not of the liberty taken.

But what say the Pre Raphaelites, unless we fail to interpret their meaning from their works? They wholly repudiate the doctrine of the ideal. Moreover, in their rendering of nature, their pictures seem to be painted for the short-sighted observer of the gallery, alluded to above. One might count the links of mail in "The Wounded Knight," by Mr. W. Gale; or study botany from the flowers in the picture called "A

Thought of Bethlehem," by Mr. Collins. In these two works, the minute drawing of the parts referred to is *perhaps* required from their connection with the principal figures. The question is, how far can the same character of treatment be justified for backgrounds? Careless drawing, or indefinite outlines, such as artists of high merit have allowed themselves to put forth, under the apparent notion that these had some connection with subordination to the effect of the principal part of the composition, —these there should certainly not be; and if the Pre-Raphaelites are able to promote accuracy in many accessories, they will effect great improvement where the importance has long been perceived by the architect, and in points which insensibly help or detract from the influence upon the ordinary observer. This, however, does not require the microscopic finish which, in the works of the Pre-Raphaelites, lessens the rotundity of the principal figures. If in the practice of architecture the intellect be enslaved by the work of imitating woods and marbles, surely that chief argument offered against such practice should have greater weight in the case of many Pre-Raphaelite pictures. With the house-painter you have one perhaps capable of nothing better in *art*, working at an object which *may be* the best whose appearance could contribute to the effect of a whole; in the other case you have a mind admittedly capable of deep thought, and original action, frittered away upon the hem of a robe, or the threads in a carpet. Does not this also defeat the intention? Is not the spectator led away from the human face, and the action; or rather, is he not first and most deeply impressed with the fact of the enormous labour and time which such and such accessories must have taken?

The common assertion that certain figures appear as though pasted on, affords evidence of the propriety of the rule of principal light, principal figure, and principal colour, as essential to a good composition. It is a rule which holds good in architecture, whether in general forms or in details, and seems to be consistent with the philosophy of vision. On this head there are some important questions to be considered.

In that which professes to represent facts, the Pre-Raphaelites are right that no *inaccuracy* can be tolerated. But, it is not easy to agree, even as regards what constitutes an accurate representation. Certain difficulties meet us at the outset. In perspective representation we draw on a plane; we suppose the object to be seen with one organ of vision, and that to be immovable. Are any of these consistent with the process of vision? That attempts have been made to develope a principle of "Curvilinear Perspective," is enough to show an inward conviction as to what might be the true *fac-simile* of the reflection on the *retina*. On the importance of the question of Binocular Perspective, it is enough to allude to the wide field of thought opened out in connection with the use of the stereoscope. Far from observing an object with the eye immovable, we believe that the process consists of a multitude of rapid gyrations about the field of view, and the development of a number of distinct impressions. Thus we take in the general outlines and marked divisions of an object first—if we observe with judgment,—and we fill in the details singly and separately, and it depends upon how this process is performed, whether the observer bring away a definite idea, or a confused image, or whether his memory furnish but one item of detail. Consequently, the correct representation of the interior of a building, *as we see it*, is a thing impossible by the ordinary rules, and what there is in that marked case, there is to some extent in all objects. Yet perspective, as taught, is the nearest approach that art has been able to make to correct representation. The question may be better understood when the use of the camera in photography has been perfected; but it is hardly to be expected that the conclusion will be much modified. As yet, very few views of interiors have been taken, and those from an elevated station would tend rather in favour of the reasoning than otherwise.

It would appear, that whatever might be the conclusion as to minute delineation of all objects or otherwise—whatever the impropriety and inconsistency of putting forth reproduction as a principle in *art*—at least we must make the canvass the representation as nearly as we can, of the process of vision. The attention of the observer was concentrated upon a group of figures; these formed the interest of the scene; accessories were conveyed to the mind at comparatively unfrequent intervals, and the resulting impression of these must therefore have been vague and undefined. It does not follow, however, that if we generalise and mass forms which in nature the eye could separate into details, we are justified in *making* things inaccurate and distorted, any more than that we conceive the Pre-Raphaelites to be right in the extreme course in the opposite direction. When an artist so accomplished as Mr. F. R. Pickersgill in the fine work which he contributes, Venetian in colouring, as in the story, represents a pavement under his figures somewhat uneven, we can only regret that he fell into the notion of the sleight-of-hand principle when delineating architectural forms—which, along with real carelessness, if not want of knowledge, is seen in so many of the works in the collection. The objection is not that of the shoemaker, who carped at a picture in which one of the figures had shoes which no cobbler could have made, but it touches on matters which belong not only to the requisite of power to draw with accuracy, but also to the inevitable, though perhaps involuntary and undiscovered, impression upon every beholder. No lines which should be horizontal or perpendicular, and are not so; none which should run towards a vanishing point, and which tend away from it, can be drawn without producing effects seriously obstructive to, or in some degree and most unnecessarily, acting in diminution of that for which the painter laboured. With all the power that Mr. Roberts shows in grouping objects, and in light and shade, he has often more serious faults than indifference to the value which there is in detail in even a distant and general view. The lines of his cornices run upwards, and columns and the angles of buildings have slight relation to perpendicularity. Besides, in the subjects which he paints, architecture is principal in the composition. In the "View on the Canal of the Guidecca," and in the "The Church of Santa Maria della Salute," we might fairly ask for some of the elaboration which a Pre-Raphaelite puts into the background of his pictures. For there are several distinct objects in a work of art, which become united in an architectural view. It is to erroneous apprehension of such objects that many present mistakes in the practice both of architecture and painting may be attributed.

To examine them, we should be thrown back to the questions which before offered themselves. What constitutes art, and how is it to be pursued? Accurately to apprehend the nature of the question, we ought to suppose the existence of two separate ends. The one object is to represent fact in external form; the second is to instruct, or delight, through the agency of inventive skill. The practice towards the first, we call the art of the draughtsman—the second is what alone or *par excellence* we should regard as art. Skill in both fields is indeed necessary to excellence in either, but the fundamental idea and main object of each must be kept distinct. It is the art of the draughtsman which the Pre-Raphaelite would substitute for real art, and it is the same character of "art" which has prevailed of late years in church architecture; where the objects—in the main distinct—of architectural *art* and "restoration" are confused, or substituted the one for the other. The materials, no less than the principles, to be worked into new art, are afforded by nature, and by the remains of former works of art, and the power which the pencil gives, must be one of the possessions of the true artist, as well to acquire these, as because it affords the means of expressing the ideas in the language peculiar to art.

The difficulty of laying down a rule is, that in no case are the principles really separable, as we have supposed them. It seems not to have been intended that they should be so. The ability merely to depict is not attained without the infusion of an intellectual influence,—so that a man who has been accustomed during the greater part of his life to draw ornament belonging to one style of architecture, never afterwards gains the power to represent any other style; and in like manner, we may assume that one who devotes himself without preference to all styles, will rarely reach great skill in any. The same thing will be found to hold in painting and sculpture. So that,—might the photographic camera become the best representative of objects, after all? Not so even, say many who have well considered the question. These seem to assume that nature is productive of so many different impressions, that (even leaving out the matter of colour) no mirror could receive them. And the moment you ask for the devotion of the artist's mind, the appearance of nature becomes tinged thereby; aspects and relations are modified; and the result in all, though true to nature, differs in every case. Yet the notion of art requires that the association of ideas with principles of nature, with forms and incidents of action, should be kept up—though in degree varying with the nature of the branch of art attempted. In architecture and all works of practical art, the adherence is to *principles* of nature, and to certain of the characteristics of forms, which are used not for the *imitation* of particular works, but for the production of new designs,—rather affording the impression of beauty by contrast, than reminding the spectator of what he would have seen so much better effected in the work of nature itself.

If the camera ever do, what is now done with the brush and colours,—if dimensions, colour, grouping, effects of light, and expression of countenance, be all gained by the perfection of contrivances and the tact of the operator, are we still to prefer the work of the hand simply because it is such? It would surely be unworthy of us to do so.

To such perfect results as we have supposed, the progress of photography indeed seems tending, and what is now done with it towards true portrait-art, is considerable. The photographer *may* become to all intents an artist; and the prejudices of professional painters against this, would be inconsistent with reason and principles. The power to represent by drawing should never be abandoned; for without it there would be no art,—but painting may one day be confined within those channels in which imitation has the least prevalence and invention the most. Such a result is that for which all have, in other words, expressed an anxious desire. That the art of grouping objects, of seizing the transient effects of light and shade, will become extinct in landscape painting, we have indeed no idea. The memory will still print them upon the canvass, and such expression remain as it is now, inseparable in idea from inventive skill.

ON THE OPEN SPACES OF OUR METROPOLIS.*

Stow speaks of a patent of Henry I. granting to the bishop so much of the castle wall (Castle Baynard of the present day) as should be needful to make the wall of the church (St. Paul's), and so much as should suffice to make a wall without the way on the north side; and in the time of Edward I. there appears to have been a presentment in the matter of the grant; at which time it was contended that the whole "soil between the gate called St. Augustin's-gate, near the said church, and the gate on the west part of the said church towards Ludgate, is High-street, and the king's highway, whereof a great part, by the raising of the wall at the east and the building of houses, is now enclosed, and the king's high-street much streightened, to the great damage of the whole city." Our ancestors therefore appear to have been fully alive to the importance of "open spaces," and I only regret that they were not more successful in resisting those very encroachments which are now only in part cleared away, and to which I shall presently more particularly allude.

My acquaintance with "black letter" literature is too limited to enable me to give you any further account of St. Paul's Churchyard previous to the time of Henry III. in whose reign we learn from Stow that leave was granted by letters patent to the bishop to enclose the

* See page 274 *ante*.

ichyard of the said cathedral church and the cinct, with a stone wall round about. On north side of the church was originally a at cloister, environing a plot of ground, of time called Pardon Churchyard, about which s a richly painted "Dance of Death;" and er the east side of the cloister was a rary, and in the midst of the churchyard was o a fair chapel, founded by Gilbert Becket, tgrave and principal magistrate of this city the reign of King Stephen.

"In the year 1549 the said chapel, by comndment of the Duke of Somerset, was begun be pulled down, with the whole cloister, the nce of Death, the tombs and monuments, so t nothing thereof was left but the bare plot ground, which is since converted into a garden the petty canons."

Of Paul's Cross, one of the most interesting jects in London history, Stow tells us, that was "about the midst" of the churchyard is shown in old engravings at the north-east rner): he describes it as "a pulpit cross of mber, mounted upon steps of stone, and vered with lead, in which are sermons eached by learned divines every Sunday in e forenoon; the very antiquity of which cross to me unknown."

In this part also (the north-east angle) was e campanile, clochier, or bell-house. Stow scribes it as "four-square, built of stone, and the same a strong frame of timber with four lls, the greatest I have heard: these were lled Jesus' bells, and belonged to Jesus' apel: the same had a great spire of timber vered with lead, with the image of St. Paul the top, but was pulled down by Sir Miles rtridge in the reign of Henry VIII. The mmon speech then was that he did set a ndred pounds upon a cast at dice against it, d so won the said clochiard and bells of the ng."

Our chronicler continues:—"Then was there the north side of this churchyard a large arnel-house for the bones of the dead, and er it a chapel of an old foundation:" these nes amounting to more than 1,000 cart-loads, re removed to "Finsbery field" (extra-mural cerment, therefore, was considered necessary those days) and there laid on a moorish ound, which in a short time being raised by e soilage of the city upon them, was able to ar three windmills (Windmill-street, Moorlds, is no doubt formed upon the spot). "The apel and charnel were converted into dwellinguses, warehouses, and sheds before them for ationers, in place of the tombs."

I am inclined to think the removal from the arnel-house above referred to could not have ken place till after 1552, for we find the pious atimer, on the third Sunday in Advent in that ar, complaining in his sermon:—"I do much arvel that London being so rich a city hath t a burial-place without, for no doubt it is an nwholesome thing to bury within the city, ecially at such a time when there is great kness, so that many die together. I think rily that many a man taketh his death Paul's-churchyard, and this I speak of perience, for I myself when I have been ere in some mornings to hear the sermons, ve felt such an ill-favoured unwholesome vour, that I was the worse for it a great while ter, and I think no less but it be the occasion much sickness and diseases." That Wren so strongly recommended extra-mural interents, appears from his letter to his brother mmissioner for building fifty additional churches London.

Latimer is said to have preached his sermon the Plough in "the Shrouds," which appears have been a sort of covered gallery attached the walls of the cathedral, in which probably e more distinguished portion of the congretion used commonly to be seated, and where e preacher also sometimes took his station hen the weather was coarse.

On the north-west side of the churchyard, tow describes the bishop's palace wherein divers kings have been lodged, and great ousehold hath been kept," and on the south de was the chapter-house, a beautiful piece of ork (shown in Hollar's view), built about the rign of Edward III., but in Stow's time defaced by means of licences granted first to build "low sheds," and then, "high houses."

In Pepys's time, St. Paul's-churchyard appears to have been as much famed for booksellers' shops as Paternoster-row is at the present time, and at the Great Fire the losses were considerable, "150,000*l.* worth, and all the great booksellers almost undone." Vast stores of books were consumed in the vaults of St. Faith, where, according to Evelyn, they continued to burn for a week. This is the subterranean church, to which in our early days we attach a mysterious and fabulous history, and to which the lines apply,

> "This church needs no repair at all,
> For Faith's defended by St. Paul."

From the survey taken by order of the corporation soon after the Great Fire, for the use of the commissioners of the streets, lanes, &c. (published by Vertue in 1723), we can form a very fair idea of the general state of St. Paul's-churchyard at that period.

St. Paul's school is shown on the plan with an altered "give-and-take" line of frontage, extending to the north-east angle, where, according to Treswell's plan (made as early as 1585), formerly stood St. Paul's-gate, leading to Chepe, close to which was the church of St. Michael-le-Quern, with the "little conduit" at the east end of it, and to the north, Blow Bladder-street, conducting to Newgate-market. The houses fronting east to Cheapside, were called Jackanapes-row. The north and south boundaries of the churchyard, which have been described as "the string and the bow," appear with trifling alterations to have been nearly similar to the boundaries as they existed previous to the late improvements connected with Cannon-street, the line extending in a curve from Paul's-chain up to the west-end of Watling-street, where formerly was situate "St. Austin's-gate."

The plan of old St. Paul's is very clearly laid down in the city plan, with the church of St. Gregory and the Convocation-house on the south side. I must not, however, encroach further upon your time with any account of the old or of the present St. Paul's: these buildings would of themselves afford abundant interesting matter for a separate paper, and I therefore commend them with every confidence for that purpose to the able and learned pen of the present estimable Architect Custode.

I must detain you for a few moments at Sir Christopher Wren's drawing-office, and at a building which certainly cannot be well overlooked, the colossal warehouse lately erected by our brother member, Mr. Knowles, for Messrs. Cook.

The great architect's drawing-office was on the south side: it now forms part of St. Paul's Coffee-house: there is no mistaking it: from the balcony in front there is a most superb view of the west front, of which I was delighted to see a most successful representation at the exhibition of the Royal Academy, the performance of a rising young architect, whose distinguished father has shown his profound veneration for Wren in the most elegant testimonial ever produced by kindred genius!

The colossal warehouse, I think you will agree with me, is fully entitled to that appellation, when I state that its length is 171 feet; average depth, 74 feet; height, 90 feet; and the cubical contents, are 1,100,050 feet! I was extremely glad to have the aid of steam power in lifting me to its summit, and the assistance of a guide to point out its extent; but I know not whether my astonishment at its size was not surpassed, when the architect informed me of the rapidity with which the work had been executed, *ninety days only* having elapsed from the time that the first brick was laid, to the period that Messrs. Cook were enabled to resume their business.

To refer again for a moment to "days of old," I will adopt Mr. Knowles's own account of the Runic monument discovered in the excavations for this building.

Mr. Knowles says,—"During the progress of the excavation, nothing very remarkable was discovered, with the exception of a Danish grave-stone, which was found at a depth of 20 feet below the general surface level: it bears upon one of its sides a Runic inscription, which on the authority of the Royal Society of Northern Antiquaries, may be read thus,—KINA caused this stone to be laid over, or in memory of, TUKI. The date of this relic is about A.D. 1000, and it is said to be the only Runic monument known to have been discovered in London: by the side of the stone were laid the remains of a skeleton, and in the immediate neighbourhood were found a great number of deers' horns cut into short pieces."

Having thus given you a rough outline, and I fear a very indistinct one of the former and of the present state of St. Paul's-churchyard, I will venture a few words upon a most interesting document in the Soane collection. It is a sketch plan for laying out the area round the cathedral; and as there is the handwriting of Sir Christopher at the corner of the drawing, without doubt it is by Wren himself! Sir Christopher's idea appears to have been, to make the area as nearly symmetrical as the site would admit, and to form a continuous portico in front of the houses, interrupted only by the openings to the lines of streets. At the west end, we can almost fancy that Sir Christopher had Bernini's great work in view. Sir Christopher had been introduced to Bernini at Paris, and he was so much pleased with his design for the Louvre, that he states, "Bernini's design for the Louvre, I would have given my skin for; but the old reserved Italian gave me but a few minutes' view." At the western extremity of his plan, Wren has designed a circular building of some importance, the purpose of which I cannot clearly define: it appears large enough for a chapter-house, but I have no doubt that the ingenuity of some of our numerous admirers of Wren will be able to give a satisfactory solution of the difficulty. In the catalogue of sixty-four original drawings by Wren relating to St. Paul's, now at All Souls' College, Oxford, I can find no plan which appears to resemble the one just described. To compare this most admirable plan with the wretched irregular "string and bow" space of the present churchyard, only increases our regret, that Sir Christopher in this instance, as well as in his noble plan for rebuilding London, was obliged to give way to notions of false economy, and a mistaken idea of maintaining private rights; his plan, if executed, would have rendered London the finest city in the world. I fear no such unqualified pretensions can be made by it in its present condition.

A century has now nearly elapsed since Gwynn produced his admirable work, "London and Westminster improved;" his volume has been a guide and a text-book at Whitehall as well as at Guildhall; many of his suggestions have been adopted with complete success, and I trust they may be quickly succeeded by others, for a golden opportunity, consequent upon the recently-formed opening to Cannon-street, now presents itself for crowning the successful labours of the Improvement Committee of the City of London in this direction, in a manner which will confer upon them the gratitude and admiration of the whole metropolis; indeed, I may extend it to the whole civilized world, for where in the whole territory of civilization is the individual who has not heard of this "noblest of Protestant temples?"

I am very desirous that every credit should be given to that body of gentlemen, the Improvement Committee, for the satisfactory manner in which they execute the large and important matters which are intrusted to them: what has hitherto been done by them, particularly of late, is admirable. I well know the responsibilities they have undertaken, the numerous applications they have from all parties and from all quarters; and beyond all these, I am aware of the enormous sums that are required for carrying into effect great lines of new and improved thoroughfares through dense and crowded districts. Many here present, I have no doubt, will be somewhat surprised to hear that the cost to the Corporation of London for the Cannon-street improvement, after realizing by sale the large ground-rents derivable from the new and improved frontages, will amount to more than half a million sterling!

It may be all very well for some ingenious theorist in "ways and means," to say to the Corporation, "Some time since you succeeded

in removing Crooked-lane from its former position in Eastcheap to a new situation in Gresham-street West: what now more easy than to make a communication between Vintry and Portsoken, or to carry a line from St. Andrew-in-the-Wardrobe to St. Margaret Pattens?" but, gentlemen, unless the sinews of improvement are forthcoming, all these valuable suggestions are of no avail: it is a popular fallacy to suppose that these improved lines of public thoroughfare are remunerative to their promoters, for when the sum total of the different interests, the freeholders, the leaseholders, sometimes four or five deep, the tenants in possession, the goodwills, the loss of trade, the removal, and the fixtures, with 10 per cent. addition for compulsory sale, the references, the law charges, not omitting the surveyor's charges; when, I repeat, all these items are added together, a result is produced truly astounding in its amount, and quite sufficient, I can assure you, to test the financial skill of the committee I have before referred to, whose great talent and ingenuity in the important matter of raising the supplies is not merely confined to the inhabitants of London, but is acknowledged, I regret I cannot say *gratefully* acknowledged, by every ratepayer within twenty miles' radius of the Post office.

I would venture to submit to the authorities, that there is a loftier point than a mere financial one, from which we should look upon this question. Although it may be a matter involving some fifty or sixty thousand pounds, that amount ought not to deter us from the proper completion of the most important civic improvement of modern times. Should a dry question of cost, in London, of all cities in the world, prevent its citizens from displaying the finest specimens of Italian architecture the metropolis can boast of? Shall we allow it to be handed down to posterity, that the Londoners are unable to appreciate fine works of art, and noble triumphs of genius? Are we those citizens who aspire to the title of "merchant princes," and shall we yet permit our continental allies and rivals to leave us far behind, in supplying proper encouragement and resources to those who have the talent and ability to give an appropriate and magnificent character to the architecture of their country? I would implore the authorities to put aside the paltry £ *s. d.* question, and I would appeal to them as men of taste as well as men of business. Let me urge them to this, adapting for the occasion the words of a city poet*—

> "That *they* may add to London's dignity,
> And London's dignity may add to *theirs*."

They have the advantage of being assisted by a member of this body, an architect whom we all esteem, who on several occasions has successfully entwined, to their delight, the blossoms of art with the fruits of commerce; and knowing well their praiseworthy veneration for precedents, I would recall to their recollection, that a few years since, when their emporium of commerce was rebuilt, they voluntarily sacrificed the site of Bank Buildings, a plot most singularly similar in size and form to the one whose freedom I am now unworthily advocating, and only differing from it in its *greater* local value. What they voluntarily acceded to their *Exchange*, surely, they cannot refuse to their *Cathedral!* And the honour they so worthily paid to their distinguished architect in the 19th, they cannot for one moment refuse to the memory of London's great architect of the 17th century!

As the day of the triumphal opening of the new street is shortly approaching, may I most respectfully take the liberty of suggesting, that on that auspicious occasion the authorities should allow the encumbering hoarding to be removed, and the site fairly levelled. They would then display to their applauding fellow-citizens a sight by far exceeding all the elaborate pageants from the days of Walworth to those of Sidney! [This was done.]

I have every confidence that the appeal to the Corporation of London will not be made in vain, and that that body on their part, and you, my brother members of this Institute, on yours, will generously step forward to effect the great national objects we have in view—the preservation of an open space through which the light of glorious day may shine upon the most noble Protestant temple in the world! and the dedication of a statue to testify our gratitude to its architect, that great and good man, Sir Christopher Wren!

S. ANGELL.

* George Peel. The Pageant in 1585.

THE WARMING AND VENTILATION OF ROOMS.

THERE are few persons who now require to be told that a good supply of fresh air, and the speedy removal of that which has been vitiated, are of the utmost importance to the maintenance of health and the duration of life. The means of effecting it at small cost, and without the production of other evils, is the stumbling-block. In a pamphlet on the subject recently published, Mr. Francis Lloyd, a gentleman who has been investigating it practically for himself,* describes some arrangements which deserve to be known, and are likely to be useful. He had seen numerous instances of pertinacious exclusion of fresh air where the place of supply was so situated as to cause temporary discomfort. "The annoyance attending the draught from a door, left ajar to prevent the chimney from smoking, led to the idea of carrying an air-tube from the external walls to the hearth-plate, to supply the consumption of the fire. [The idea was not novel, we need scarcely say, but the mode of carrying it out is the point at issue.] There seemed to be no great difficulty in this, and there appeared to be every probability of thus remedying a material evil. The question as to where the openings should be made then arose. Supposing the air to have egress at or about the hearth-plate, it would at once flow to the chimney, thereby preventing the withdrawal of the air of the room. On examination, an ordinary register stove showed that but a small proportion of the whole space allotted to it was occupied by the fire-grate, the frame around and above the grate forming a mere ornamental facing. There seemed to be no obstacle to substituting for this mere shell of cast iron a horizontal and two upright tubes; and if they were connected with that beneath the hearth-plate, a continuous tube would be formed around the front of the fire. Air passing through these tubes would, it was imagined, acquire some warmth. The next consideration was, how to provide for the admission of the fresh air thus warmed into the room; and here it was important to select a place where the inflowing current should not be felt. The upper part of the mantel, from its proximity to the stove, and its position relatively to the occupants of the room, seemed a suitable place for the ingress of the air. Supposing the upper horizontal tube to have an opening or slit extending along the top throughout its whole length, the stove to be set sufficiently forward to leave this slit beyond the line of the chimney-breast, and the upper mantel and mantel-shelf to be so formed as to continue the passage-way from the tube, the air would be discharged into the room at about 4 feet above the level of the floor. This idea appeared so promising, that it was determined to test it in a new stove which was arranged thus:—

First, a cast-iron hearth-plate, having two openings in it, of the form shown in fig. 1, was laid down, leaving a hollow between it and the brick trimmer.

Two hollow jambs, forming tubes of cast-iron, were next fitted to the openings in the hearth-plate, and these were connected by a head-piece of the same form and dimensions as the jambs, but having along the top side an opening extending the whole length of the head-piece, fig. 2.

Within these there was fitted an ordinary office fire-grate, consisting of a skeleton frame with front and bottom bars, the sides and back being of fire-brick. Care was taken that none of the burning fuel should be in contact with the side tubes. In fixing the stove, it was arranged that the head-piece, and consequently the side tubes, should stand forward into the room sufficiently to secure the whole of the air opening in the former being beyond the chimney breast. In fixing the mantelpiece the upper slab was kept forward from the chimney breast, leaving a space to correspond with the air opening in the head-piece. The external air being then conducted by a zinc tube to the space between the trimmer and the hearth-plate, was found to pass up the two hollow jambs, thence into the hollow head-piece, whence it passed up the back of the mantel through openings in the mantel-shelf into the room."

In another case, an ordinary Register-stove (Fig. 3.) was fitted up as follows:—

"To the cheeks and the back of the face, *a a*, of the stove were riveted two strips of sheet-iron bent in the form shown in Fig. 4. The plan then appeared as in Fig. 5. Two side chambers or tubes, *b b*, being thus obtained, the back of the upper face of the stove was fitted with a rectangular tube, also of sheet-iron, which was connected with the two side tubes, making uninterrupted communication between them. The old stove was set very far back, in the chimney shaft, and was fitted with a large marble mantel, the displacement or altering of which was, on many accounts, objectionable; it was therefore determined in this instance to admit the air into the room immediately under the mantelpiece, and afterwards to adopt means for preventing any inconvenient rush of air into horizontal line into the room. The area of a section of each of the side tubes exceeded 14 inches, while that of the horizontal tube was about 40 inches. The width of the face of the stove was 3 feet; and to furnish the means for the admission of the air into the room, an opening of 1 inch in width was left at the top of the horizontal tube, in its vertical face, extending its whole length. A hearth-plate of cast-iron was then provided with openings corresponding to the horizontal section of the side tubes, as shown in the plan. The hearth-plate was then set with a chamber beneath, extending in the middle as far back as the line of the front fire bars. From this chamber a zinc tube, 6 inches square, was carried under the marble hearth beneath the floor, through the front wall into the garden, where it was carried up to the height of 14 inches, and was furnished with a cap having sides of finely-perforated zinc. The result was quite satisfactory. It is of course necessary that the air tubes should not be subjected to the direct action of the fire.

"It is not evident that there is any obstacle to the construction of air-flues in the walls of a house adjoining the chimney stacks. Supposing a general air-flue to be carried up at the side of the smoke-flues, with branches to the several fireplaces, we have at once a ready means of connecting the latter with the external air.

Assuming an opening of 48 inches to be sufficient for the supply of ordinary rooms, the only requisite would be to construct such an air-flue at the lowest front of the house, of a width of 18 inches, and a depth of 9 inches, for the supply of three rooms on different stories, diminishing the width 6 inches as each floor is passed. The flue might be carried horizontally under the floor of the basement, with an external upward branch to any level that might be desired, to insure a pure supply. If this external duct were placed on the north side of the house, it seems likely that there would be an upward current day and night without the assistance of a fire,—as the upper part of the air-flue would probably be warmer than the external air on the north side of a house, a few feet above the ground; and if the lowest part of the external duct were formed in the same way as a drain-trap, there could scarcely be a probability of the air-current being reversed. The opening for the entrance of air to the external duct might be carried up to any height, where the air could be relied on as being uncontaminated, provided the temperature at the height selected was not higher than that of the internal air-flues."

Mr. Lloyd gives an account of an arrangement which he made in the city for obtaining a supply of air from an upper source:—"A wooden trunk was carried from a lead flat 13 feet above the floor of the office, on the north side of the house, downwards through the room which it was intended to supply, into a cellar beneath. In order to get rid of the soot with which

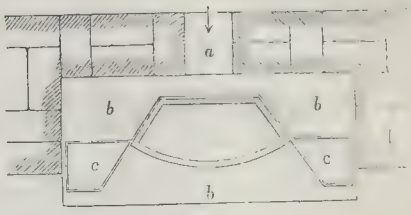

Fig. 7.

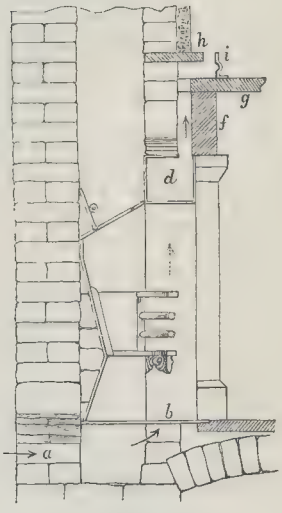

Fig. 8.

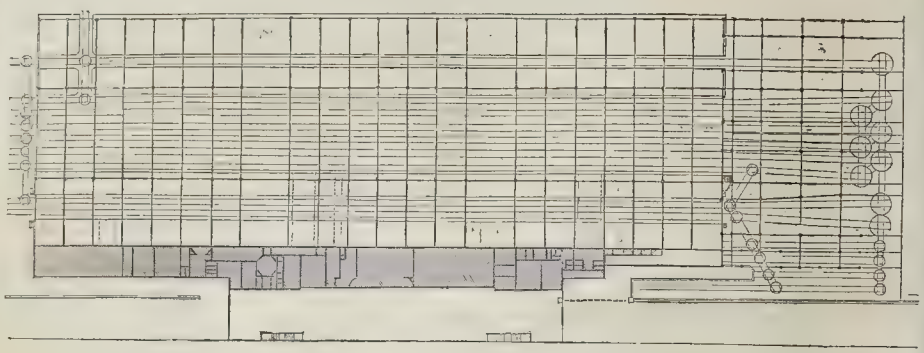
London air is loaded, there was fixed in the cellar a box 4 feet high, 2 feet wide, and 2 feet deep. This box was furnished with a sliding partition of wire-gauze. The air-supply pipe entered it at the lower part, on one side of the wire-gauze, while the tube leading to the stove led from the upper part on the other side. By this arrangement the air was sifted, and the quantity of soot and other substances deposited on the gauze was found to be so large, that the gauze required frequent cleaning. This plan was quite successful, and it was even found that the elevated trunk delivered a larger supply of air than was done by the former arrangement." Fig. 6 will serve to make the arrangement more clearly understood.

The following is a description of the Tubular Stove in its completed form: — "Fig. 7 represents a horizontal section. Fig. 8 a vertical section; *a* is a flue 6 × 9 inches, to conduct the external air from the outer wall to the under side of the hearth-plate *b*. It is here shown as formed in the back of the chimney-shaft,—but it might enter at the side, or front, where convenient for it to do so: *c c* are openings in the hearth-plate *b*, communicating with two upright tubes of a corresponding form, which conduct the air entering at *a*, upward, to the horizontal tube *d*. This tube is fitted to the two upright tubes, and has an opening extending along its whole length. Supposing the width of the stove to be 3 feet, this opening should be 1½ inch wide. The stove should be set 1¾ inch forward, from the chimney-breast; *f* is the upper mantel, which stands forward from the chimney-breast *e* 1½ inch; *g* is the mantel-shelf, which has part of the back next the chimney breast cut away to continue the air-passage; *h* is a thin slab of marble, 1½ inch deep, built into the chimney-breast, and extending to the width of the mantel; this serves as a support for a chimney-glass, and also to divert the current of air from flowing directly up the chimney-breast; *i* is a strip of metal (or marble), which may be made ornamental, and which serves to guide the air-stream upwards. By moving *i* to *h*, the supply of air may at once be diminished or stopped at pleasure, or *i* may be fixed, and the same end be attained by having between *i* and *h* a thin strip of metal fixed on centres at the extremities, and made to act like a throttle-valve. As the mantel-shelf is commonly more than a foot wider than the stove, the opening between *i* and *h* need not be greater than 1 inch, in order to obtain a total opening of 48 inches; which should be maintained throughout all the passages."



What we have said will suffice to show that Mr. Lloyd's pamphlet may be usefully studied.

A VISIT TO SWINDON NEW TOWN.

On the 24th of May, a large party left the new station of the Great Western Railway Company (illustrated in our present number) by a special train for Swindon, where, when they arrived, they found that divers other trains had already discharged their cargoes, and that the town was literally full of people: flags were flying, brass bands blowing, and every one was in a bustle. You will ask what they went there for, and we will tell you as briefly as possible.

The operative engineers employed by the Great Western Railway Company, with the clerks and resident inspectors, form a body of highly intelligent men; and the company, at an early period after the establishment of their manufacturing works at Swindon, placed a por-

BLOCK PLAN, PADDINGTON STATION.

tion of their workshops at the disposal of the men for a mechanics' institution. This was soon, by the energy of the men, formed into respectable reading-rooms, and a hall, for balls, lectures, and private theatricals. The company are now, however, by increased requirements, under the necessity of recalling their grant, and have in lieu given, on a perpetual lease, at a nominal rent, the site for a new institution, together with some annual pecuniary assistance for the maintenance of a dining-hall, and the rest of the buildings.

A new private company has been formed, and the opportunity has been taken to found a market, which has been felt to be very necessary, where the entire population, consisting of between 6,000 and 7,000 souls, is directly dependent on the railway works, and where there are not a dozen shops, or other means of obtaining the necessaries of life readily, and at a moderate price.

The new buildings, designed by Mr. Edward Roberts, comprise a market for thirty-two shops and standings for thirty stalls. Part is under cover, with an octagonal roof 40 feet diameter, with public fountain in the centre, to be supplied from the railway waterworks. On the lower floor of the main building there is a spacious reading-room, with separate book-room and coffee or retiring room attached. A council-room, large dining-hall, with hot-plates, hot and cold baths, and housekeeper's apartments, are included. There is a wide spiral staircase in an attached tower leading to the hall, which occupies the entire upper floor, with a gallery and screen at one end: at the other end is a stage for theatrical representations, over the reading-room. The style is Gothic, as are all the buildings in the new town, and Mr. Streeter, of Bath, has contracted to carry out the designs for 3,750*l*. As we intend to give a view of the building hereafter, we need not say any more about it just now.

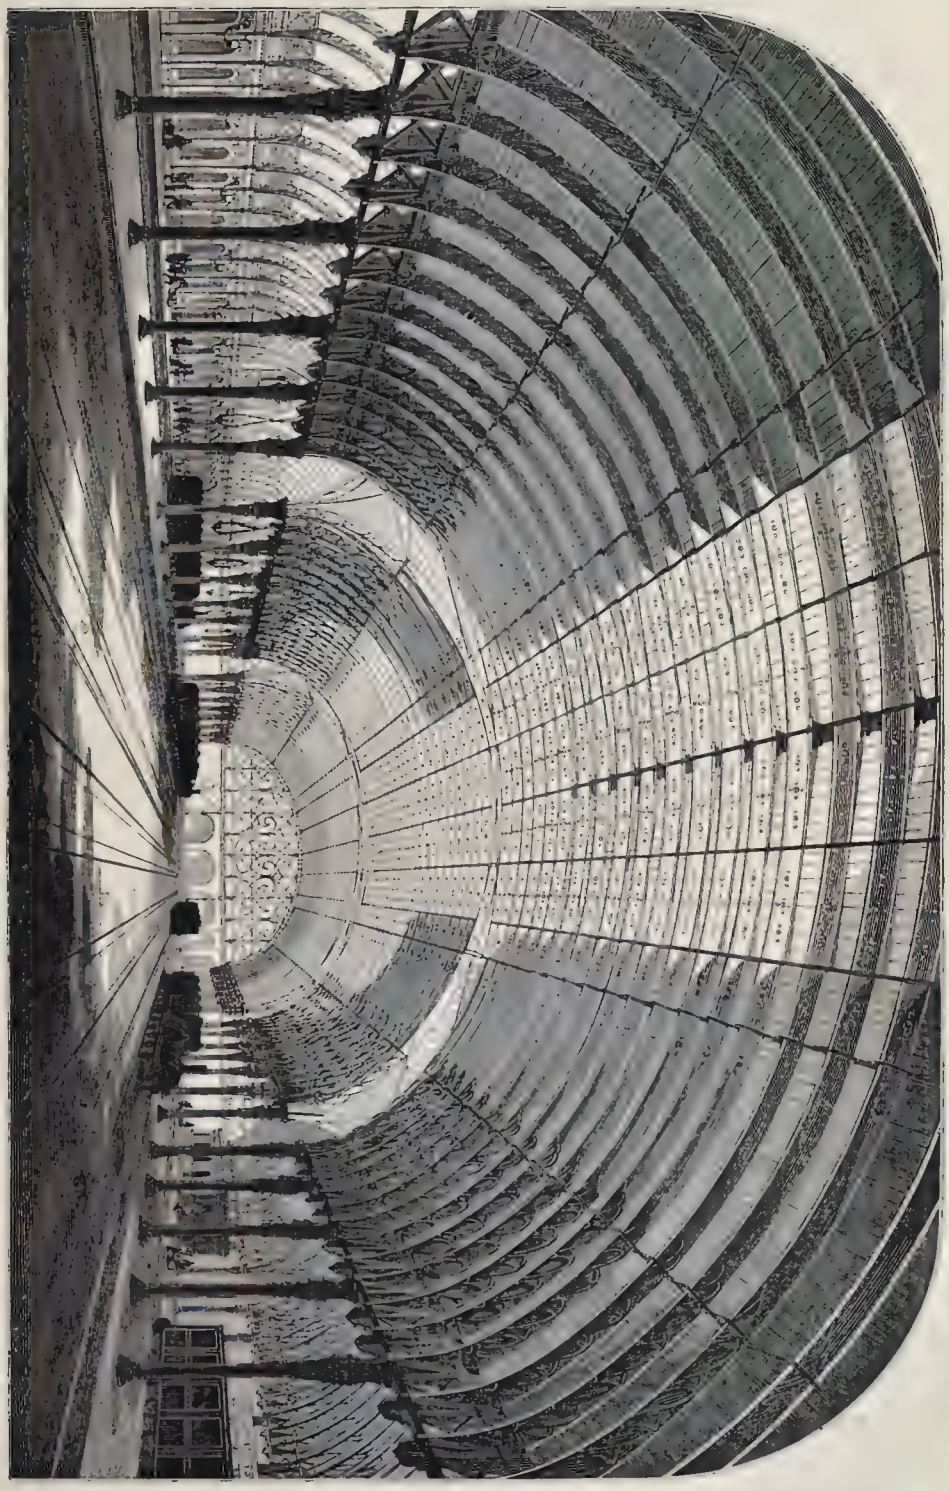
Well, it was to lay the first stone of this proposed institution and market, with Masonic rites, that the gathering had taken place; and as it had been arranged that the "Methuen" Lodge should be consecrated previously, an amazing number of Freemasons attended, and displayed aprons, blue ribands, stars, and other insignia, to a marvellous extent. Although there was at first sufficient rain now and then to induce young ladies to cluster meekly and dependently in half-dozens, around such happy swain as had presciently provided an umbrella,—sufficient to make Mr. T. sorry he "had brought his wife," and Mrs. C. rejoice in her galoches,—the day was fine, on the whole, and everything passed pleasantly. As to the school children, "Bands of Hope," Episcopalians and Wesleyans, who walked round the town, "neat, trimly dressed," their name was legion: the productiveness of the neighbourhood in this respect is not to be questioned. The prettiest effect of the day, indeed, was produced when, being dismissed to such entertainment as had been provided for them, the children spread like an inrushing sea over the field into which they had been turned. Poor little things, what is to be their future? We may all help to make it a good one:—

> "If faith, and hope, and kindness pass'd, as coin, 'twixt heart and heart,
> How, thro' the eye's tear-blindness, should the sudden soul upstart!
> The dreary, dim, and desolate, should wear a sunny bloom,
> And Love should spring from buried Hate, like flowers o'er winter's tomb."*

The Rev. Brother Campbell preached a sermon to a crowded congregation in St. Mark's (the church close to the line), where a new stained glass window, set up by Mr. Wailes, was uncovered for the first time. It is not one of his best; a stereotyped affair, without any effect of colour; and as to story—"Story, sir? Lord bless you, I have none."

The masons then formed a procession, and a very formidable one it was, to proceed to the site of the new institution. These were joined by members of the Manchester unity of Odd Fellows, and were afterwards met by some much odder fellows, called "The Ancient Order of Foresters," who, attired in velvet coats and tight leggings, with vari-coloured ostrich-feathers and painted faces, looked a compound of Widdicomb and a Zulu Kafir—a venial weakness, however, which shall not be dealt with hardly by us. *Nota bene:* the exemplary wife of one of the Freemasons would walk in the procession, and was snubbed in consequence. Brother Lord Methuen laid the stone, a multitude surrounding, and the inscription was read, and music was played; and then away went some hundreds of the visitors and others to two immense tents, where a "*Déjeuner*" (*Anglicè*, a cold dinner) was eaten with an appetite which communion with nature alone can give, and speeches were made, and thanks returned. The tent being very long, and the chairman at the end of it (the centre of the side is a better position for him in such cases), only a certain number could hear, and when some, who could not, left their places, and came up humbly to listen a-foot, those who were better off, with that magnificent complacent selfishness which distinguishes us all when we have attained a good position, shouted, "Seats, seats" ("to your tents, oh Israel!"), and drove them back with contumely and a feeling that they had done their duty.

Those who did not hear, then, may like to know that Mr. Daniel Gooch, who has done much for Swindon, was not forgotten. The architect's health, too, was drunk, and the directors of the Great Western Railway Company were thanked, as they well deserved to be, for the liberality they had displayed on the occasion. Mr. Simonds, in returning thanks for his brother directors, said they especially studied in all things the convenience and advantage of the *company* (a slip of the tongue for *public*), which was cheered for its candour. And then Lord Methuen, behind whom, we may note, swung an enormous pair of compasses, formed of flowers, when he drank "The Ladies," advised each damsel present to be sure and marry a mason within the year, at which the aforesaid damsels laughed, their willingness (uninitiated bachelors, at the same time, making up their minds to seek a lodge forthwith); and then all rushed away to find their train, perfectly well pleased with the day's proceedings. For our own part, detained by a desire to be useful in a case of marital desertion, we at last, following what seemed to be a stream of people bound for the station, and made certain that we were right by the sight of a railway official at the door, found ourselves in the *theatre*, where an amateur theatrical club were about to do "Sink or Swim," and then to try "Raising the Wind," under the patronage of the new company. There was no time for parley: the railway bell was heard faintly in the distance, so out we came again; and pushing, plunging, panting, and perspiring, contrived to reach the station just in time; and ultimately got home safely, to wish SUCCESS TO NEW SWINDON, and to write,—



> "High honour to masons the craft daily brings:
> We're brothers of princes, and fellows of kings."

* Gerald Massey.

THE PADDINGTON STATION OF THE GREAT WESTERN RAILWAY.

OUR present number contains a view of the extensive station which is now nearly completed at Paddington, for the Great Western Railway Company, together with a small plan which shows the position of the buildings and the number of the lines of rails. The centre roof is 90 feet in span, the span of the side roofs, 70 feet each. In an early number we shall give a view of the more architectural portion of the station, with some descriptive particulars. The station may be called the joint design of Mr. Brunel and Mr. M. D. Wyatt, the former having arranged the general plan and all the engineering and business part of the work, the latter the architectural details in every department. The principle on which they set out was to avoid any recurrence to existing styles, and to try the experiment of designing everything in accordance with the structural purpose, or nature of the materials employed,—iron and cement. The execution of the design has been superintended by Mr. Brunel, principally through one of his chief assistants, Mr. Charles Gainsford. The work was done by Messrs. Fox, Henderson, and Co.

ANOTHER FORM OF THE "ATMOPYRE," OR GAS HOUSEHOLD FIRE.—A patent has been taken out by Mr. W. Ashdown, of Piccadilly, for a gas stove, in which asbestos is made incandescent by the gas flame so as to assume a cheerful glow like that of the household fire. We know not the special merits of this *invention* (if we can call it so), but we need scarcely say that it is identical in principle with the atmopyre first published in our pages.

THE PADDINGTON STATION OF THE GREAT WESTERN RAILWAY.—*The Joint Design of Mr. I. K. Brunel and Mr. M. D. Wyatt.*

THE LATE MR. J. W. HIGGINS.

MANY of our readers will hear with great regret of the death of Mr. James White Higgins, who for many years has occupied a prominent position in the profession as a surveyor, valuer, and referee. Mr. Higgins commenced his professional career in the office of Mr. Bush, where he was co-pupil with Sir Robert Smirke. He bought off a portion of the term of his apprenticeship, and became at once fully employed in measuring the extensive Government buildings then erecting by Messrs. Copeland, Rolls, Holland, and others. The history of his career in life, properly written, would be most instructive, and to the hard-working most encouraging. He went to work early, and, although married before he was twenty-one, had built a house in Sloane-street—now a part of his estate—out of money saved before he was twenty-two years of age: his occupation at this time was that of a surveyor, mainly engaged in measuring, taking out quantities, and valuing.

During the last thirty years he has been chiefly engaged in conducting the purchase of property required for opening the new streets which have improved the thoroughfares of the metropolis, in valuing property for railway and dock companies, the City, the Office of Woods and Forests, the Duchy of Cornwall, and the Boards of Ordnance and Admiralty. He held, with Mr. Hosking, the first appointment of official referee under the Metropolitan Buildings Act (1844), with the salary of 1,000*l.* a year; from which, however, he retired after the first year, not liking the confinement of official life.

Everybody knows the reputation he acquired and the confidence which he commanded everywhere, from the soundness of his judgment and the sterling integrity of his conduct. Of this there can be, perhaps, no stronger evidence than the fact that the Duke of Newcastle, when Earl of Lincoln, passed by many applicants for this office in 1844, and, unsolicited by, unasked for, indeed, not only offered it to, but pressed it upon him.

No individual has been more largely employed as an arbitrator, for which office he was peculiarly fitted by the qualities just now mentioned. Few men have passed seventy-one years in this busy world, enjoying through life a higher position in the good opinion of their fellow-men. He commenced his business pursuits when practitioners were few in number, and kept the lead in his own particular department of the profession, when time had filled it with an army of competitors, and when increased facilities for its study—and extended field for its practice—and higher developments of its principles had recruited the ranks of its professors with men full of zeal and ability.

Mr. Higgins never aimed at distinction as an architect; and had honesty enough to hand over to others, any important architectural works that fell in his way. Mr. Higgins did much to raise the character of his profession by an upright and high-minded discharge of its duties, and maintained the respect as well as the regard of all who knew him. Three daughters survive him, who are severally married,—to Mr. T. E. Owen, Dover-court, Southsea; the Venerable Archdeacon Allen; and the Rev. J. B. Owen, Vicar of Bilston.

ON THE FRACTURE OF METALS.

INSTITUTION OF CIVIL ENGINEERS.

ON the 16th May, the paper read was "On the Fatigue and consequent Fracture of Metals," by Mr. F. Braithwaite.

Many accidents, the causes of which had been pronounced "mysterious," having professionally engaged the author's attention, he had carefully examined the circumstances of each, and the condition of the fractured metal, in all cases, and at length arrived at the conclusion that almost all the accidents might be ascribed to a progressive deteriorating action, which might be termed the "fatigue" of metals.

Metal in a state of rest, although sustaining a heavy pressure or strain, as in a beam or girder, and exhibiting only the deflection due to the superposed weight, would continue to bear that pressure without fracture so long as its rest was not disturbed and the same strain was not too frequently repeated; but if either of these cases occurred, a certain disturbance of the particles took place, the metal was deteriorated, and that portion subject to the reiterated strain was so far destroyed that it ultimately broke down. This might also arise from sudden concussions when the metal was under a certain strain, and those concussions might be caused by the girder being suddenly unloaded.

Several examples were given of accidents of the kind that had been alluded to; for instance, that of a vat in a London brewery, carried on cast-iron girders, by which it had been supported for some years; but suddenly, without any apparent cause, they broke and killed and wounded some workmen. In this case it was shown that the girders were not originally sufficiently strong for the load, and therefore the intermittent load of the vat, which was sometimes full and at other times only partially so, and then empty, caused a constantly recurring deflection, and a subsequent corresponding effort to regain its natural position, by which the composition of the metal was disturbed and fracture ensued.

Other examples of the same nature were given, and it was shown that the repeated buckling of the tube-plate of a locomotive, arising from the action of the pistons, had a tendency to cause fracture mechanically; and also that the side-strains and vibrations to which the suspension-rods of the ash-pans of locomotives were subjected, had produced very serious results, which it sufficed to point out forcibly to guard against the recurrence of.

The author contended that presuming adequate dimensions to have been given to girders, and the stipulated weight not to have been exceeded, the chances of accident were remote, but that any repeated deflection, either at intervals or continued for so long as to induce a permanent depression, must be productive of danger, which could only be averted by altering or replacing the parts deficient in strength, and maintaining a rigid supervision, whether of beams when loaded, or of parts of machinery, or of railway stock after working. By such means accidents would be prevented and a greater degree of confidence be established in structures in which metal was employed.

THE WORCESTER LUNATIC ASYLUM.

A VIEW of this new and extensive range of buildings, upon rather a large scale, is given in the *Worcester Herald* of 20th ult. together with a detailed account of the whole establishment, from which we glean the following particulars.

The Pauper Lunatic Asylum for the county and city of Worcester stands about four miles from Worcester, on the Malvern-road, in a pleasantly wooded country, and surrounded by its own small farm-lands. Besides the Asylum proper, there are also farm-buildings, and at the outskirts of the farm, gas-works for the whole establishment. The main building extends to a frontage-length of 560 feet, and a depth of 260. The principal building consists of a centre and wings. In the centre stands the residence of the medical superintendent and the matron, with committee-rooms, &c. This is four stories high, and is built of Worcester brick, with stone dressings, facings, and doorway, and a bold cornice running round the top. The chimneys are collected into a square stone shaft, ornamental in design, which runs up from the centre of the roof. The stone used is described as a carefully selected freestone. Double wings on either side run out from the central house: these are two stories high, and wholly of brick made on the premises, with a simple cornice and a plain stone string course running along the basement of the first floor, and stone keystones in the window headings. From the junction of the first and second wings other precisely similar ranges of building run back, at right angles to the front of the edifice, and a large square enclosure is thus left, which is divided into two by the kitchen, porter's lodge, and other offices, which run back from the centre of the building.

Besides the farm buildings and gas works, there are a row of workshops and breweries, at a convenient distance from the male wards, and laundries detached on the side for females. The farm, gardens, and building area, extend to 45 acres and upwards, all of which is to be enclosed by a wall breast high, built in a deep ha-ha, making in all a height of 9 feet.

The architect was Mr. J. Medland, of Gloucester, who had twenty-nine competitors. The late Mr. Haines, of Cheltenham, and Mr. Thomas Harrington, of Worcester, were the builders. The works necessary for warming and ventilating the buildings, were executed by Messrs. Haden, of Trowbridge, the patentees of a combination of the hot air and hot water systems. The ceilings are all fire-proof, on Fox and Barrett's patent.

The asylum was designed to be capable of accommodating 200 patients. The average number resident at one time is already almost 200. The original estimate for building amounted to 23,500*l.* exclusive of 2,123*l.* odd for building workshops, and brewhouse, yards, &c.; 958*l.* for gas works; 749*l.* odd, for soil tank; 5,442*l.* odd for extras, according to amended plans, and other items. The total sum paid to Mr. Haines and his executors, was 37,508*l.* odds; and to the architect, 1,306*l.* The cost of heating and ventilating, fittings for gas works and washhouse, and for steam-engine, &c. paid to Messrs. Haden, was 2,900*l.* The sum total expended, including purchase of land, appears to have been 54,675*l.*

METROPOLITAN IMPROVEMENTS.

MAY I be permitted to offer a few remarks in reference to this subject.

1. As regards the frightful excrescence on the arch at Constitution-hill, its removal any where would be even to its own advantage. I would place it in front of the Horse Guards, about forty paces removed from the entrance to the gardens.

2. Some years ago I ventured, but backed by the opinion of one of our most distinguished sculptors, to recommend that the vacant pedestal in Trafalgar-square should be occupied by an equestrian statue of the late lamented Princess Charlotte, in homage to her worth, and to throw, if possible, a halo of sanctity over the corresponding statue of her debased parent.

3. The statue of Sir Robert Peel, intended for the City, could certainly find no more appropriate site than the point where the lamp-post now stands at the fork of Cheapside near St. Paul's Churchyard.

4. I am utterly opposed to the removal of Temple-bar. Wren's works are not so lightly to be treated. The houses on either side should be removed, giving space for two carriage-ways.

5. The attention of Government should be drawn to the state of the Strand "water-gate," with a view to its better preservation.

C. E. L.

CHURCH BUILDING NEWS.

Faringdon.—In reference to the extensive restorations going on and contemplated, at the parish church here, Mr. Hugall, of Cheltenham, who has the direction of the works, informs us that the south aisle is to be rebuilt of Norman character, the entire church reseated with open oak benches, the chancel stalled in oak, floors paved with Minton's tiles, a hot-water apparatus put in, and the church lighted with gas from coronæ and branches from the walls. The organ will be placed upon the floor, within a chamber now erecting for it on the north side of the church not as previously stated), and the singers will occupy benches on the floor.

Bristol.—The foundation-stone of the new church of St. Clement's, in St. Paul's parish, was laid on Wednesday in last week, by the mayor. The church is tobe in the English style of thirteenth century, with clerestoried nave, chancel, and north aisle. The total length within the walls, including chancel, will be 113 feet, and the width of nave and north aisle 41 feet, with sacristy on north side of chancel. Provision is also made for a south aisle when required. The west front, towards Holton-street, will present the gable of nave, and lean-to roof of aisle, with open octangular bell-turret 65 feet high at north-west angle of nave, sur-

mounted by a lofty spirelet, and supported by flying buttresses, a deeply recessed moulded doorway forming the principal entrance, and five-light lancet trefoil-headed window over, with triplet to aisle. The north front, facing Gideon Chapel, is divided into six bays, with coupled trefoil-headed windows to aisle and clerestory porch in second bay westward, and sacristy at east end of aisle. A lofty triple trefoil-headed window, with a continuous label and quatrefoil over, is placed in the east front, and plain cusped-headed two-light windows in south front of nave. The exterior will be finished random work, of Stapleton stone, with Bath stone dressings. Interiorly the nave is divided into six bays, with alternated octangular and circular piers, and chamfered arches over. The height to apex of nave roof will be 46 feet, and chancel roof 34 feet, the timbers of stained deal, and plastered between rafters. The fittings will be of deal, stained, and of a plain character. The building is calculated to contain 300 closed, and 400 free sittings, and will cost, exclusive of site, about 2,000*l.* The architects are Messrs. Gabriel and Hirst; and the general contractors, Messrs. Foster, all of Bristol.——On Monday, in last week, the foundation-stone of Arley Chapel, Cheltenham-road, was laid. This chapel will be in the Italian style, and cruciform on plan, the clear internal length being 83 feet, and the width across transepts 67 feet. It is calculated to seat 650 persons. There will be a semicircular apsis behind the pulpit, affording accommodation for the chair. The principal entrance will be under a circular Corinthian portico. At this end of the chapel, the roof is surmounted by a turret, rising to the height of 62 feet above the ground, and containing a clock. The roof of the chapel will be open, the trusses being ornamental. It will be lighted by windows in the sides, and by a series of small circular windows in the roof, arranged after the manner of a clerestory. Galleries may hereafter be erected, so as to afford 270 additional sittings. The pews will be low, with dwarf doors and sloping backs, and all alike. A large room, capable of accommodating 200 persons, for week-night services, &c., forms part of the proposed erection. The total cost, including boundaries, heating, gas fittings, &c., is estimated at 3,400*l.* Messrs. Foster and Wood are the architects.

Llandaff.—In this diocese various works have of late been in progress, the following account of which is condensed from the *Cardiff Guardian*. To some of them we have already alluded. In Easter week, the foundation-stone of the new church for the hamlet of Canton, in the parish of Llandaff, was laid, and the building is already rising above the ground.——On the 2nd ult., the bishop reopened, with the consecration service, the parish church of Lanishen, in Monmouthshire, which has been rebuilt on an enlarged scale, at a cost of 620*l.*, under the superintendence of Messrs. Prichard and Sedden, the diocesan architects.——On the 9th, the chapel of St. James, Pontypool, which has been considerably enlarged, so as to afford 150 additional sittings at an outlay of 620*l.*, was again reopened for public worship.——On the following Thursday, the parish church of Coedkernew, which had been rebuilt and enlarged at a cost of 595*l.*, from the designs of Mr. Habershon, was also reopened with the consecration service. ——On the 16th, the new church of Cwm Rhondda, in the parish of Lanwonno, was consecrated by the bishop.——On the 18th, a similar scene was witnessed in one of the secluded valleys of Monmouthshire; for another consecration took place at Abertillery, in the parish of Aberystwith. Messrs. Brown, Conway, and Pearce have contributed largely towards the erection of this church. On the same day, the foundation-stone was laid by Mr. Brown, the senior partner of a school for religious as well as secular instruction. The church was erected from a design by Mr. Norton, and its estimated cost is 880*l.*——Two more churches are now ready for consecration; one at Aberdare, built at the sole cost of the late Hon. R. Clive, of St. Fagan's; the other at Nantyglo, built by subscriptions and contributions from the different societies; while several more are in various stages of progress.

Longton.—The new district church at Edensor was consecrated on Tuesday in last week. The edifice is plain and simple in design. It is dedicated to St. Paul. The style is decorated Gothic. The material is the local red sandstone, and the whole of the timber work is of deal stained. The chancel is paved with encaustic tiles, the gift of Mr. H. Minton. All the roofs and seats are open. The structure consists of a nave, 69 feet long and 23 feet wide; north and south aisles, the same length and 12½ feet wide each; a chancel being under the same roof as a continuation of the nave, and being without the usual arch dividing them. The steeple at east end of north aisle is appropriated on the lower story as a vestry and organ-room, and a south porch. A gallery for the children runs across the west end of the church, approached by a staircase from the outside, which forms a feature in the external appearance of the church. The first stage of the steeple only is at present carried up. It is open inside to the north aisle and chancel by large arches. The windows have all tracery, varied in each window. The gables outside are all surmounted with stone crosses, and each part of the church has buttresses. The building will be heated by an apparatus. The church will accommodate about 800 persons, including children. Its cost will be under 2,000*l.*

Tranmere.—The foundation-stone of a new church, to be called St. Paul's, was laid at the south end of Tranmere on Tuesday in last week, in presence of a large concourse of spectators. The site of the new church and parsonage-house, an acre of land, has been given by Major Orred, lord of the manor, and his brother, Mr. John Orred, has given the endowment of 3,000*l.* by which a large portion of the building will be free. Towards the erection of the new church, about 2,000*l.* have been collected. About 1,500*l.* are still wanting to complete the building in its integrity. The church is to be cruciform in plan, seated for 700, and consist of nave 75 by 37 feet, and 48 feet high, with north porch; also, north and south transepts, 27 feet wide, and 69 feet from north to south; chancel, 30 feet deep by 21 feet 9 inches wide, with steeple, 140 feet high, in north-east angle of transept and chancel, and vestry on south side of chancel. The style is Middle Pointed, to be built with red freestone. The carpenter and joiner's work is to be executed with fine Baltic timber, varnished. Galleries may subsequently be introduced in the transepts. The architects are Messrs. J. and W. Hay. The contract has been taken by Mr. Routledge, of Tranmere, who undertakes to complete the work for 3,246*l.* Mr. Hogarth will execute the joiner's work, which is embraced in this sum. A glass bottle with "some coins" and a parchment, &c. is reported in the local papers to have been deposited under the stone, which was laid by Major Orred with a silver trowel, described to be "of original design and unusually beautiful." The coins appear to have been regarded as a very desirable plunder by some scamp, who next night abstracted the bottle from the stone and the coins from the bottle, which he might at least have replaced, but finding only "a two-shilling piece, a shilling, and a fourpenny-piece," he smashed the bottle and scattered the records,—indignant, we suppose, at the shabbiness of the "Building Committee" of recorded "Esquires," who had grudged to chuck down even half a sovereign quietly to posterity as a specimen of the gold coinage of the nineteenth century.

Worksop.—The parishioners have resolved to restore the Abbey Church by voluntary subscription to the extent of about 1,000*l.* and under the care of Mr. Scott. The Duke of Newcastle has offered to restore the altar-piece, and give 100*l.* towards the other restorations. Various other sums have already been subscribed. The edifice underwent some repairs a few years ago, but much still remains to be done in the interior.

Retford.— A committee of the town-council here have resolved that the Church Restoration Committee furnish the committee of the town-council with plans, specifications, and estimates, showing how they propose to enclose the churchyard, and that, on satisfactory tenders being obtained, the committee recommend the council to raise a sum of money, not exceeding 200*l.* towards carrying out the works.

SIGHTS AND SCENERY.

The Haymarket Theatre.—The principal scene for Mr. Planché's new drama, "The Knights of the Round Table," produced most successfully at this house, is the last, a view of London from the Hampstead-fields, the work of Mr. W. Callcott. It is an excellent piece of green painting, fresh and airy; and with the gate, hedgerows, and parts of the landscape coming right up to the front of the stage, makes a whole which is not merely unexceptionable, but beautiful. It is seen best when Captain Cozens, the chief scoundrel of the piece, exceedingly well represented by Mr. George Vandenhoff, leans over the gate: his red coat has then great value. There is a very complete interior, too—the "coffee-room at Lockets" (by Mr. Morris); and all the other scenes, with the exception of a vehement would-be *Louis Quatorze* "apartment at D'Arcy's," are appropriate and pleasing. We heard some one ask, "where was Locket's?" One Adam Locket opened an Ordinary in the middle of the seventeenth century, at Charing-cross, where Drummond's Banking-house now stands, and under his name, long after his death, it continued to be the resort of the sparks and courtiers of the time:—

"The fate of things lies always in the dark,
What cavalier would know St. James's-park?
For Locket's stands where gardens once did spring,
And wild-ducks quack where grasshoppers did sing."

The period to which the piece belongs is 1740, and the character of the time is completely preserved. If it be true, as the judicious Hooker writes (judicious in all things but the choice of a wife), that "the most certaine token of evident goodnesse is, if the generall perswasion of all men doe so account it," there is little occasion to say anything about the piece itself. The plot is most ingenious, the characters marked and distinct, the language terse and pointed. Mr. Buckstone has a capital part, to which he does the fullest justice, and the same may be said of Mrs. Fitzwilliam. The character of D'Arcy has yet to be played: we say it without disparagement of Mr. Howe's general ability. The piece has been called "from the French," and to a certain extent this is correct; but if those who desire to judge what praise is really due to the English dramatist will take the trouble to look through the eight or ten acts of immorality called the *Chevaliers de Lansquenet*, which have suggested the plot and furnished some of the "situations," they will see at once that a very different meaning is to be attached to the expression from what it ordinarily conveys.

DECISIONS UNDER THE BUILDINGS ACT.

ENFORCEMENT OF REFEREES' AWARD.

BAKER *versus* DREW, in the Marylebone Police Court. This was a summons under the 18th section of the Buildings Act, for the removal of works done contrary to the rules of the Act in the buildings Nos. 8 and 9, Hampstead-road, in the district of St. Pancras. It appeared that these two buildings, the ground-floor stories of which are used as shops, have been in the same occupation; and have been united by means of openings in the wall separating them. Recently alterations have been made upon them, and in order to erect a continuous shop-front to both the buildings, a portion of the wall separating them has been cut away in its front part, and a wooden story-post has been placed to support the superincumbent structure; and the ends of the brestsummers have been placed in the wall, and the woodwork of the shop front has been fixed within four inches from the centre of the wall. Mr. Baker, the district surveyor, considering these works to be irregular, laid an information under the Act against Mr. Drew, the builder, the result of which we reported, p. 270. Upon this information, it will be remembered, the official referees awarded and certified that the wall was a party wall, and that the space where it had been cut away was not an opening within the meaning of the Act; and that it had been cut away and the story post, brestsummers, and woodwork, had been fixed and placed contrary to the rules. Mr. Baker now summoned Mr. Drew to have the certificate enforced.

The counsel for Mr. Baker (Mr. W. Pearson), having stated the case, put in as evidence the award and certificate of the official referees. The learned counsel, who appeared for the defendant, then stated that his defence was that he should show that the wall was not a party-wall, and that the award and certificate were otherwise contrary to law upon their merits. Mr. Pearson objected, however, to these

matters being gone into; and contended, that although he felt that the award and certificate would bear the fullest investigation, yet that the magistrate had no jurisdiction to try the case afresh; that the official referees were judges, having exclusive jurisdiction to try and determine questions under the Act; that their award was final and conclusive on all parties; and that the functions of the magistrate were restricted to enforcing their certificate as the 18th section directed. Counsel having been heard on both sides upon this question, Mr. Long, the magistrate, at length determined that he was bound by the award and certificate of the official referees, and could not enter upon the question whether these gentlemen had put a right construction upon the Act or not.

The case was then adjourned for a week, in order to enable the defendant in the meantime to abate the irregularities, so that there might be no necessity for putting the compulsory measures provided by the Act into execution. A learned counsel appeared to watch the case for the owner of the buildings, but did not take an active part in the proceedings.

THE BUILDERS' BENEVOLENT INSTITUTION.

On Thursday, the 25th May, a special general meeting of the subscribers to this charitable institution, founded for giving relief to aged and decayed members of the building profession, and their widows, was held at the London Tavern, for the purpose of electing three pensioners from a long list of candidates. Mr. G. Bird, the treasurer, in the absence of the president, S. M. Peto, Esq. M.P. took the chair. The report congratulated the supporters of the institution on its increasing prosperity, and the corresponding benefits the directors have been enabled to confer by adding to the number of pensioners. The subscriptions and donations received during the past year amounted to 1,404*l.* 5s. 6d. and the amount now invested is 4,050*l.* divided as follows,—3,050*l.* to the relief, and 1,000*l.* to the building fund. After alluding to the success which had attended the late ball, held at Willis's Rooms, at which the sum of 136*l.* 5s. 6d. was realised, the report stated that the total number of pensioners now receiving the bounty of the institution, is thirteen males and eight females, and concluded by earnestly calling upon the friends of the charity not to relax in their generous efforts to extend its benefits. The chairman, in opening the proceedings, stated that this was the seventh election of pensioners, and that they had met together for the purpose of electing three from a list of twelve candidates, one male and two females. He trusted that there would shortly be another election, seeing that so many would go away disappointed: in fact, he should not rest satisfied until they had two elections each year. Having called attention to the state of the funds of the institution, the chairman concluded by making an energetic appeal on its behalf. The election having been proceeded with, a vote of thanks was passed to the chairman, and the meeting broke up.

Notices of Books.

VARIORUM.

In Routledge's new cheap series has been issued an important shilling volume on "The Industry of the United States, in Machinery, Manufactures, and Arts, Useful and Ornamental," compiled from the official reports of Messrs. Whitworth and Wallis, from which we have already occasionally quoted.——Collins, of Paternoster-row has timeously published a series of pretty large maps, at a shilling each, of the Baltic, the Black Sea, and the Danube, and of Russia and Turkey, on a somewhat smaller scale. They are very cheap, but one or two of them do not give very numerous indications, and are more like small maps seen through a magnifying medium than maps made on a larger scale that they might give all the more intelligence. We wish, too, that some of them did not show those tremendous dislocating paper-quakes, which split up Turkey and Austria, for instance, in a most ominous manner, and astonish the railway traveller from Breslau to Cracow by leading him to a point "Widawa" indeed, and far out of his reckoning, as well as stopping him abruptly quite as far short of his proper destination. Considering the price, however, really one cannot much complain, especially as the maps are even coloured for the money, and contain plans or maps of Constantinople and other places, interesting especially at the present moment.——The Architectural and Archæological Society for the county of Buckingham have published No. 1 of the first part of the "Records of Buckinghamshire," comprising papers and notes on the history, antiquities, and architecture of the county, with the society's transactions. Parker is the London publisher. ——In "Selections from the Writings of the Rev. Sydney Smith," in two parts, we have, for a couple of shillings, in Messrs. Longman's Traveller's Library, the substance of various essays and lectures which otherwise could not be had for as many sovereigns—nay some of it not at all, unless by the purchase of such works or parts of them as the *Edinburgh Review*, as far back as 1806. Amongst the lectures given is one on "Wit and Humour," by this prince of wit and humour, another on "Taste," and a third on the "Conduct of the Understanding." There are four essays on education, and others besides.

Miscellanea.

Royal Institute of British Architects.—An intermediate meeting will be held on Monday next, the 5th, when a paper by Mr. Burnell, "on the effect of some external agents on building materials," will be read.

Architectural Exhibition.—A meeting of all those interested in this undertaking will be held at the Institute of Architects, 16, Lower Grosvenor-street, on Wednesday evening next, at eight o'clock, when a proposition will be brought forward for obtaining a gallery in a desirable situation, which the committee have now the opportunity of doing, and only require the subscription list to be sufficiently increased to guarantee their freedom from an unnecessary responsibility.

Earl de Grey's Conversazione to the Institute of Architects, on the evening of the 31st ult., passed off brilliantly, as it always has done.

Conversazione at the Institution of Civil Engineers.—An immense crowd enjoyed the pleasant evening prepared for them on the 30th ult. by the president of this Institution, Mr. Simpson. We may have another opportunity to speak of what was seen.

Architectural Societies of Lincoln and Northampton.—The first of the announced meetings of these societies at Leicester was held at the New-hall there, on Wednesday in last week. Sir F. G. Fowke, bart. was called upon to preside. The Rev. G. A. Poole read the first paper "On the Churches of Leicester," which was followed by one on "Roman Leicester," by Mr. J. F. Hollings. The greater portion of the audience, ladies as well as gentlemen, then accompanied the Rev. G. A. Poole to the churches and other principal remains of antiquity in Leicester. On concluding this tour of inspection, the archæologists found their way to the Bell Hotel, where dinner was awaiting them, and to which about sixty gentlemen sat down, under the presidency of the Rev. Lord Alwyne Compton. The company then adjourned to the New-hall, where a numerous audience had assembled. The Rev. Lord A. Compton was called upon to preside. A paper on "Monumental Sculpture" was then read by Sir C. Anderson, bart.; and one on "Leicester Abbey," by Mr. Thompson. On Thursday, an excursion was made into the country, and visits were paid to several churches and objects of interest, the beauties and defects of which were explained by Mr. T. L. Walker, and Mr. G. Place, of Nottingham, architect. When the party returned, they sat down to dinner at the Bell Hotel, under the presidency of Sir H. Dryden, bart. An adjournment then took place to the New-hall, when Sir Charles Anderson was voted to the chair, and a paper was read by Sir Henry Dryden, on the "Rebuilding and Refitting of Ancient Churches." We may next week give some notes of the papers.

New Method of rolling Metals.—Mr. John Clare, jun. of Liverpool, has patented a method of rolling metals, either with single or double flanges, tapered or otherwise, grooves, &c., so that by changing the rollers or dies he can produce metals it is said in the form of staves for casks, or sheets, with flanges for masts, spars, &c. almost instantaneously.

Bequest to the British Museum.—A provincial paper mentions that the will of the late Colonel Jolliffe, proved on the 17th ult. contains some valuable bequests to public institutions. The chimney-piece in the dining-room at Ammerdown Park, Somersetshire, is bequeathed, after the decease of his two nearest surviving relations, to the British Museum. The subject is a bust of the youthful Bacchus, crowned with the fruit and foliage of the vine. The compartments on either side are representations of the cornucopia, and the pilasters present, in *alto relievo*, an image of the thyrsus.

Electro-telegraphic Progress: Great Britain and America.—A private letter from New York announces the formation of the directory for accomplishing the long talked of undertaking of a submarine telegraph between this country and America. It includes Professor Morse the telegraphist, Lieutenant Maury, R.N., of the U. S. Observatory, some New York capitalists, and Mr. T. P. Shaffner, of Washington, president of several telegraph companies. The exact terminus on the America side has not been decided on, but the work, it is positively declared, will be carried into effect almost immediately. The Mediterranean line should have been at work first.

The Railway Bridge at Saltash.—The cylinder, of which we lately spoke as having been just launched, is in shape something like a porter-bottle, only the smaller end is not so narrow in proportion to the body. It has a chamber at the bottom divided by a concave partition from the rest of the cylinder, except for a certain space in the centre. It is not of an equal depth—one side being 90 feet, and the other 84 feet long. This deficiency is at the smaller end of the tube, which is formed with a slanting orifice, so that when sunk it may fit what has been ascertained to be the natural fall of the rock in the bed of the river. At this end it is 35 feet in diameter, and so continues nearly one-third up, when the tube is enlarged to 37 feet in diameter, and so continues to the top. The mouth was closed with iron, except a space in the centre, 10 feet in diameter, and corresponding with the space referred to before at the other end. In fact, throughout its length, there is a cylinder of 10 feet in diameter, and the concentric area, between the outer cylinder and the smaller one, is entirely closed, presenting a vast chamber, with valves. This chamber, being filled with air, floated the whole machine at an angle. When afloat, by the aid of valves, water was to be admitted, and the great iron frame floated vertically at any desirable depth. The weight of the whole mass is about 300 tons. When in place, the masonry will be commenced. It is proposed to raise in this tube, from the bottom of the river, a granite pier about 90 feet high, and reaching above high-water mark, from which to the foundation there is about 83 feet of water.

St. Mark's Church, Tollington-park, Holloway, has been consecrated. A stained glass window, by Gibbs, has been put up at the east end. It is a three-light window, the style Early English. The glass in one of the openings was given by Thomas Mr. Chauntler, of Tollington-park, and that in the two other openings were presented to the church by the congregation: thirteen small windows are also filled with stained glass. Mr. Gough was the architect. Messrs. Dove were the builders.

Perth Statue of Burns, the Scottish Poet.—A statue of Burns, by a Scottish sculptor—Mr. Anderson,—has been erected in Perth. The statue is above life-size, and of "manly make," enveloped in the homely folds of a Scottish plaid. The right hand holds a scroll upon the breast, while the left hangs by the side, holding a bonnet very considerably beyond the modern dimensions of that article,—an old "Kilmarnock," doubtless, flat and broad, and more like a mere disc or nimbus than like the "Scottish bonnet" of Cockaigne.

Sanitary State of Devonport.—One of those searching and important records against our nineteenth century state and habits, which the Central Board of Health is rapidly accumulating for behoof of the future as well as the present generation, has just been issued in the shape of a sanitary report, by Mr. Rawlinson, on the state of Devonport, from which it appears that the annual mortality from preventible diseases is very great, a circumstance but too sufficiently explained by the grossly defective sanitary state of the borough. The sanitary works most required are sewers and drains of transmission, street cleansing, and good water supply. Baths and washhouses are prominently recommended. The application of the Public Health Act to the borough is advised, the corporation to be their own local board of health under the Act.

The Whittington Club, Strand.—The committee do not relax in their endeavours to provide entertainment as well as instruction and accommodation for the members. Miss Rainforth has been giving two musical entertainments here, which were well received.

Gas Puddling Furnace.—For several months past, according to the *Berg und. Huttenm. Zeitung*, a gas puddling furnace, on the principle of Thomas's, has been at work in the celebrated smelting works at Ilsenburg, in the Harts. The gas is produced from wood, turf, brown coal, but especially from pine cones. The bar-iron produced is of first quality, and 36s. a ton cheaper than ordinary. More recently still, a furnace has been erected at Mandelholz, near Rothehutte in Hanover, fired by gases obtained from turf alone, and is proving very successful.

THE OUTWORKS AND FORTS OF PESTILENCE.—The communication under the above title in your number of the 6th May, is deserving of the most serious consideration. An instance of the manner in which the *heedless* government of this country allows these companies to pollute not only the air, but the very *soil and water* of the capital of the civilized world, came under my immediate notice a few years ago. An old-established manufactory adjoining one of these nuisances, had employed a condensing steam-engine for many years The engine pumped its own water from a well about twenty feet deep, and the water had always been remarked for its purity and softness. Soon after the erection of the gas works, the working parts of the steam-engine were found to be so corroded and destroyed as to require renewal: the metal peeled off in black scales from the sides, valves, and other parts exposed to the action of the steam or condensing water. The water of the well was examined and found highly offensive to both taste and smell: it was analysed and found to contain ammoniacal and other impurities. Inquiries were made and it was ascertained that the waste liquors from the gas works were allowed to run into an old dry well on the premises, and thus to penetrate the soil in all directions, and pollute the previously pure and plentiful supply of water in the neighbouring wells Of course, the Gas Company were called upon to make good the injury done to machinery and delay to business in this instance, and to supply pipe water at their own expense, and I believe they behaved liberally on the occasion But who can estimate, and still less compensate, for the permanent and disastrous evil thus inflicted on the neighbourhood? Other wells, less deep than the one in question, have since been rendered useless, and still are so.—A CHEMIST.

DRAINAGE INTO A COALPIT.—A correspondent, an M.D. is anxious to know whether there would be any impropriety, in a sanitary point of view, in draining the refuse of a water-closet into an old coal-pit, which has not been worked for a century or more, and which appears to be hermetically closed: also what sort of chemical action or changes, if any, there would probably be in such a case; and, lastly, how near the closet should be to the receiving tank—the pit we presume. These queries we insert more for the purpose of calling forth replies from others than from ourselves: all we shall say in the meantime is, that if the pit *be* hermetically closed, the gases which it contains of itself, as well as those likely to be generated from the refuse, would require careful trapping to exclude them from the closet; — that as to chemical changes, very little—far too little—is known of the real nature of the refuse in question, and of its reactions under circumstances such as those it would probably meet with in this instance, where there is risk of its contact with great volumes of hydrocarbonaceous gases, the action of which on such materials might be very noxious; — and as to nearness or distance, that we should like to keep such a tank as far as possible from the closet. At same time, the existence of a receptacle like this is both convenient and tempting But what if the pit were reopened either in itself or by workings from other pits, at some future period, after twenty to fifty years' use as a cesspool, and perhaps in ignorance of such a fact altogether? Lives we fear would be sacrificed.

COMBINATION OF INDIA-RUBBER WITH METALS.—Mr. Charles Goodyear, of St. John's-wood, has patented an invention which has for its object the manufacture of articles of a hard compound, made of India-rubber and sulphur (with or without other matters), subjected to heat. The invention consists in combining with such hard compound, in the manufacture of articles therefrom, thin surfaces of gold, silver, or other metal, exterior to, or interior of, the article of the hard compound The gold or silver is by preference to be shaped in dies or moulds, and the prepared India-rubber is then to be introduced into such dies or moulds, and thereby moulded in contact with the gold, silver, or other metal; and, in the moulded state, the articles are to be subjected to heat, in order to produce the hardening effect to the India-rubber compound. The forms of the articles which may be manufactured are said to be very various; and each article may be coated either wholly or partially with metal. It is stated that the object of the invention is to obtain the light, strong, and tough properties of the hardened compounds of India-rubber together with the ornamental and other properties of metal, combined in the making of one article.

CAMBRIDGE ARCHITECTURAL SOCIETY The last meeting for this term was held on Wednesday in last week, when after some other proceedings Mr. S. Gould read a paper on the arrangement of colour, principally with reference to stained glass and painted roofs; and Rev. F. Metcalfe, M.A. gave a short account of the repairs now being effected in the church of Little Shelford. A subscription was commenced for filling the eastern triplet of St. Andrew's with stained glass, to the memory of the late president.

MR. W. LAXTON, the originator and proprietor of the *Civil Engineer's Journal*, died, we regret to hear, on the 31st ult. We are unable to do more at this moment than record the fact.

ANCIENT RELIC IN ST. MARTIN'S WORKHOUSE.—At a recent meeting of the British Archæological Association, Mr. Griffiths exhibited a very interesting piece of ancient sculpture which had been lying in the vaults of the workhouse of St. Martin's parish for many years. It is a sepulchral ornament, and represents three figures. Time has much injured its surface, but it presents a specimen of good art, and was considered to be Greek by Mr. Calder Marshall. The annual congress is to be held at Chepstow.

NATURAL OBJECTS IN ORNAMENTATION. Sir, I am much pleased to see that the most interesting part (so say the papers) of the students' drawings at Gore House, consists of two equilateral triangles filled geometrically with the wood anemone. In 'Ancient Gothic Churches," Part II. p. 30, 1848, I ventured to assert that "no Government schools of design, or any other schools, will ever advance until the supervisers direct the attention of the pupils to this subject;" and in 1852, the Marlborough House School of Design persisted in stating that "Flowers, or other natural objects, should not be used as ornament;" and again, "all ornamentation in direct imitation of nature, should be avoided,—direct imitation of nature in a material not her own, can never give lasting satisfaction." "All direct representations of natural objects in paper-hangings should be avoided." "Strawberries do not grow on walls," &c. And now in 1854 the scene is shifted, and the directors of the schools have credit given to them for suggesting that which never emanated from them.—W. P. G.

TRANSFERENCE OF THE FORMS OF LEAVES, &c. TO PAPER.—A student, E. G. L. desirous of following out the suggestion he often sees in our columns, to study the natural forms of objects, says he would be glad to learn of an effectual process by which the forms of leaves, &c. may be transferred to paper Perhaps some other reader may be able to supply this desideratum; meantime, all we can ourselves remember of such processes in our own student-era is, that by means of oiled paper and colours in fine powder, whether black merely, or green, red, &c., we prepared transference sheets, from which, when the backs of leaves were gently and carefully rubbed on them, the colour was transferred to every vein and prominence of the leaf, so that when next taken and laid in the desired position, colour downwards, on the drawing-paper, and covered with a second piece of paper, and again gently rubbed, it imprinted its own form distinctly, and often very beautifully, on the drawing-paper. We may also refer our correspondent to what was said some time since—perhaps nearly a twelvemonth ago in our columns, as to the Austrian mode of "nature-printing," whereby leaves and flowers, insects, &c. are made to engrave their own forms by pressure, so as to enable copies to be taken from the engravings. Perhaps gutta percha, softened a little on the surface, by heat, and leaves, &c. gently pressed on it, might be made use of readily for a like purpose.

ASSYRIAN EXCAVATIONS.—The Excavation Fund Committee announce that a new palace has been found at Nineveh, in the mound of Kouyunjik, of which Colonel Rawlinson reports as follows: — "A most beautiful palace has been recently discovered at Nineveh, belonging to the son of Esar-Haddon. The sculptures are infinitely superior in variety of subject, in artistic treatment, and in skill and delicacy of execution, to everything which has been before found. The palace, also, is of great extent, containing perhaps five hundred sculptured slabs, and the marbles are generally in a good state of preservation." One slab, with a palace or temple, it is said, "represents very minutely the exterior architecture. The second story is built with pillars, which have their bases on the backs of lions and human-headed bulls, with their heads turned like those found at Khorsabad." The representation of a bridge with three pointed arches, and other particulars illustrative of the architecture of the period are also mentioned. The fund is all but exhausted

"THE MAN THAT MEDDLES WITH COLD IRON." By a slip of the pen, last week, we wrote Byron for Butler, in making this quotation. It occurs in canto 3, part 1, of "Hudibras."

ELECTRO-MAGNETIC "BITE" OF LOCOMOTIVE DRIVING-WHEELS.—M. Nicklès who is still working at his experiments in magnetising the driving-wheels of loc motives, has made some trials on the Paris and Lyons railway; and now thinks certain difficulties may be overcome. The object aimed at is to increase the "bite" of the wheels upon the rails. "I shall not rest satisfied," he says, "until it has become easy to use gradients of more than two millimetres to the metre, and until it shall become no longer necessary to construct tunnels at great expense, or to build extensive earthworks, or make curves of large radius."

BUILDERS' PRICE-BOOKS.—I would beg once more for a small space in reference to T. J. P.'s communication: he seems to misunderstand me. In regard to calculation of profits, &c. I still maintain that the tables in Thorne's work are unnecessarily intricate, and more numerous than there is any occasion for. All that is required for the materials of joiners' work in a price-book, is a few examples showing the method of ascertaining the value of 1-*inch boards*, with a proper allowance for profit, carriage, &c. which every person would have to vary according to his locality; but the price of 1-inch stuff being ascertained, all other thicknesses may be found in the same proportion, from the tables published in 1851 by "Wale" of Derby, which are the most accurate, and on the best principle of any that have yet appeared. "Weale's Student's Guide" is an instructive work for young practitioners, but too limited in extent, and the constants of labour far from being correct. The value of nails, glue, &c. being included in constants of labour in joiners' work, is very objectionable. The method of measuring and pricing stone work is not good. I quite agree with T. J. P. as to the *disproportion* in painters' prices, and could point out examples in other branches equally bad; and for greater accuracy, the decimal constants or decimal prices ought to be given, as a fraction more or less on a small sum makes a good deal of difference in a number of small items, or a large number of running feet at a small price; and in the event of a decimal currency, it would make it doubly useful Z.

THE ARCHÆOLOGICAL INSTITUTE will meet at Cambridge.

STANFIELD'S PICTURE OF THE "VICTORY" entering the harbour of Gibraltar, after the battle of Trafalgar, with the body of Nelson on board, is now exhibiting at Messrs. Agnew's, in Cockspur-street, and will be viewed with pleasure. Were Government patronage given to the fine arts in England, as it is in foreign countries, Mr. Stanfield before this would have received a commission to paint a series of views of our ports and harbours, to be placed in Greenwich Hospital. Visitors to Paris are gratified by a fine series of the ports of France, by Joseph Vernet.

Another Severe Test of CHUBB'S FIRE-PROOF SAFES in Manchester.—All the Books, Bank-notes, and Policies saved.

"Store-street Mills, Manchester.
May 16th, 1854.

"Messrs. Chubb and Son,—

"Gentlemen,—We have the satisfaction of informing you, that the 'Fire-proof Safe' we purchased from you about three years ago, for our premises in Store-street (the counting-house and blowing-room of which were completely destroyed by fire last evening), has secured the entire of our books contained therein, together with cash, notes, policies, &c. to our astonishment, considering the intense heat the Safe was exposed to from being built in the chimney flue.

"You are at liberty to refer parties to us, should any further particulars be required.

"We are, Gentlemen, yours respectfully,

WM. JONES and SONS."

CHUBB and SON, Patent Lock and Fire-proof Safe Makers, 57, St. Paul's-churchyard.

ADVERTISEMENTS.

Valuable Freehold Building Land, and Two capital Houses with Shops, situate within ten minutes' walk of the Crystal Palace, and the Sydenham Railway Station

MR. MARSH has received instructions to OFFER for SALE by AUCTION, at the MART, opposite the Bank of England, on THURSDAY, JUNE the 12th at TWELVE o'clock, in Seventeen Lots, FIFTEEN very eligible PLOTS of FREEHOLD BUILDING LAND, and TWO capital newly erected Brick-built HOUSES, with double fronted shops, most advantageously situate in Willes-road, Upper Sydenham, within a few minutes' walk of the Crystal Palace and the Sydenham Railway Station, and a short distance from the Church. The whole is eligibly adapted for the erection of neat cottage residences or shops, which are in great demand in this rapidly improving locality. Briefs may be obtained within a few hundred yards. Each lot will confer a vote for the county. The land-tax is redeemed. May be viewed, and particulars, with counterpans of sale, and plans, obtained on the Premises; at the Mart; of Messrs. Barker and Sons, Solicitors, Lewisham; and at Mr. Marsh's Offices, 2, Chancery-lane, Mansion-house.

FOOTSCRAY, PAULS-CRAY, ORPINGTON, DARTFORD, WILLINGTON, and ERITH, KENT.—To Timber merchants, Builders, Wheelwrights, and Others.—Valuable Oak, Ash, Elm, Walnut, Chestnut and other Timber, &c

MR. ROBERT ALLEN is instructed to SELL by AUCTION, on THURSDAY, JUNE the 5th, 1851, at TWO o'clock, at the TIGER'S-HEAD INN, Footscray, Kent, upwards of 300 fine Oak TREES, 150 Ash, 100 Elm, 20 Walnut, a large quantity of Chestnut, Poplar, Beech, Birch, Alder, Acacia, Plane, Fir, and other Timber, Poles, Spokes, 10,000 Oak Posts and Rails, Barrows, &c.—N.B. The Timber is of excellent quality and of good dimensions, and deserves the attention of Timber-merchants, shipbuilders, Coachbuilders, and others, and will be sold in convenient lots. For particulars and to view apply to Tuns House, Footscray place, George Salter, Paul's-cray-hill; or to the Auctioneer, Ruxley, Foot's-cray. Catalogues may also be had at the inns in the neighbourhood, and place of sale.

MEMEL TIMBER.

MESSRS. CRUSO and SON are favoured with instructions to SELL by AUCTION at the Harbour Branch of the East-Anglian Railways, King's Lynn, on WEDNESDAY, the 7th day of JUNE, 1851, commencing at ELEVEN o'clock precisely, 350 LOADS of MEMEL TIMBER, 400 3-inch Planks, a quantity of Contractors' Rails, and about 5 tons of Wrought-iron Bolts, lately forming the temporary railway across the middle level drain. Also several lots of Gas Fittings and Piping. The Auctioneers beg to call the attention of contractors and builders to this important Sale of Timber, the greater part of which, is in pieces suitable for the Bridges. Three months' credit will be given upon approved security. Catalogues may be obtained at the Office of the Auctioneers, King's Lynn, one week prior to the Sale

PLAISTOW. Votes for the Southern Division of the County of Essex.

MR. J. T. FISHER is instructed to SELL by PUBLIC AUCTION, at the ABBEY ARMS INN, PLAISTOW on TUESDAY, JUNE 6, at 4, at TWO o'clock precisely, FIFTY PLOTS of eligible FREEHOLD BUILDING GROUND, Land-tax redeemed; most desirably situate in the main road from Stratford to Plaistow, on gravelly subsoil, and on the highest part of the parish of West Ham, comprise about 2,500 feet frontage to suitable depths, with safe substantial roads and sewers, and having the advantage of gas and water supplied. The property is to Messrs. Mare and Co.'s museum ship-building works; the new Victoria Docks; Eastern Counties Railway Company's works and station; and other large factories, render this property most desirable for safe and profitable investment, the supply of houses in that locality being totally inadequate to the demand, and the rentals highly remunerative. Plans and particulars may be obtained at the George, Barking; Crown and Anchor, Woolwich; George, Commercial-road; Globe, Mile-end; Messrs. Scrr and Grimes, Solicitors, 30, Lombard-street, City; and of the Auctioneers, Rokeby-house, Stratford, and Plaistow, Essex.

FREEHOLD BUILDING LAND AND VILLA RESIDENCES, EPSOM, SURREY, near the Railway Terminus.

MR. ORPWOOD will SELL by AUCTION, at the MART, on THURSDAY, JUNE 5, at TWELVE, in thirteen lots, several VALUABLE FREEHOLD ESTATES, occupying the most important positions in the proverbially healthful town of Epsom, including three genteel Villa Residences, nearly opposite the station. Building Ground for villas and cottages, and a corner plot of about 300 feet frontage, adapted for commercial establishments. Printed particulars, with plans, may be had at the Railway Tavern, Epsom, and principal inns there; also in London, of Messrs Gamble, Clarke, Solicitors, 28, Finsbury-place; the Auctioneer, Mr. Orpwood, Artille yplace, Finsbury-square; and at the Mart.

TO ARCHITECTS.

HARTLEY'S PATENT ROUGH PLATE GLASS

1-8th thick, or 2 lbs. to the foot; 3-16ths, or 3 lbs.; and 1-4th, or 4 lbs. to the foot, for

RIDGE AND FURROW ROOFS, GREENHOUSES, RAILWAY STATIONS, ENGINE SHEDS, MILLS, MARKET HALLS, AND PUBLIC BUILDINGS GENERALLY.

It being universally admitted that Glass in Roofs of a permanent character should not be less than one-eighth of an inch thick, weighing two pounds to the foot, Messrs. JAMES HARTLEY and CO. have directed their attention to the manufacture of a description of

ROUGH PLATE GLASS, THAT COMBINES SIZE AND STRENGTH WITH ECONOMY OF COST.

The PATENT ROUGH PLATE is manufactured in sizes expressly for Ridge and Furrow Roofs, giving a span of from 4 to 12 feet, at a price not exceeding weight for weight that of common Crown Glass. Not being transparent, this is are unnecessary, and when used in Greenhouses no scorching occurs; its NON-TRANSPARENCY and strength render it eminently suitable for the Glazing of Conservatories and Roofs of all kinds; also Factories, Workshops, &c. for which purposes it is supplied in squares of all sizes, from 8 by 8 inches and upwards.

For further information apply to Messrs. JAMES HARTLEY and CO. Wear Glass Works, Sunderland.

N.B.—The Patent Rough Plate is supplied at a much lower cost than the common Rough Plate.—May 1, 1851.

GLASS.—HARTLEY AND CO.'S GLASS TARIFF NEWSPAPER

Will be forwarded Gratis, on application, "post-paid," to

Messrs. JAMES HARTLEY and CO. Wear Glass-works, Sunderland; or Purfleet Wharf, Earl-street, Blackfriars, London.

BOWDEN'S BRILLIANT-CUT ORNAMENTAL WINDOW-GLASS.

MANUFACTURED BY MARK BOWDEN AND COMPANY.

WORKS, NELSON-STREET, BRISTOL. OFFICE, 60, ALDERMANBURY, LONDON.

THE BRILLIANT-CUT MAY BE OBTAINED THROUGH ALL WINDOW-GLASS MANUFACTURERS AND MERCHANTS IN THE KINGDOM.

Prices, and every information, forwarded on application to the Works.—MARK BOWDEN and CO. Bristol.

TO ARCHITECTS, BUILDERS, &c.

AN Assistant, who is a good Draughtsman and fully competent to undertake the general business of an office and the superintendence of works, is OPEN to an ENGAGEMENT, at a very moderate salary.—Address, E. J. F. Office of "The Builder."

AN active and experienced Clerk of Works, aged 36, having seven years' reference from his late employers, is in want of an ENGAGEMENT; fully competent to manage extensive works.—Address, ALPHA, Byron-villa, Battersea, Surrey.

TO ARCHITECTS, SURVEYORS, &c.

A RESPECTABLE, MIDDLE-AGED MAN, of great experience as a builder, surveyor, and contractor, wishes for an APPOINTMENT as CLERK of WORKS, or Superintendent in the Building Department, either in town or country. Unexceptional reference will be given.—Address, post-paid, to T. S. No. 8, Manchester-street, Gray's-inn road.

TO LAND SURVEYORS, ARCHITECTS, AND ENGINEERS.

A YOUNG MAN, of some experience in the profession, and a good draughtsman, is desirous of an ENGAGEMENT. Satisfactory references can be given. Address to A. B. 29, Weymouth-street, Portland place.

TO CARPENTERS AND BUILDERS.

A BUILDER in London is desirous of PLACING his SON, aged 16, who has been at the bench for two years, to a respectable BUILDER in the country (in-door), until he is 21. All his tools will be found him, and a small premium will be given.—Apply to H. R. at the Office of "The Builder."

TO ARCHITECTS, &c.

AN ASSISTANT who is a neat and expeditious Draughtsman, accustomed to the general routine of an Architect's office, is open to an ENGAGEMENT. References unexceptionable. Salary moderate. Address to A. B. 4, Alfred-place, Blackfriars-road.

PURE WATER, for manufacturing purposes, may be obtained at very moderate cost by RANSOME'S FILTERING STONE. Estimates given for large or small quantities. Builders and Plumbers supplied with the ascension and other Filters at trade prices. These filters, at one, two, three, and four guineas each, yielding 50, 100, 150, and 200 gallons per diem, will be found sufficient for ordinary domestic requirements; are self-acting, and not liable to get out of order. References to parties satisfactorily supplied with quantities up to 30,000 gallons per diem, may be obtained on application at the depôt, 71, Baker-street, Portman square, London.

REVOLVING SAFETY WOOD and IRON SHUTTERS SNOXELL, Patentee, 96, Regent-street, and at his Steam-works, 135, Old-street. These shutters have fully borne out their superiority over other revolving shutters for security, durability, and simplicity. References can be given to noblemen whose mansions are fitted herewith, and numerous large establishments, where some are fixed measuring upwards of 400 square feet in one shutter, and which are opened and closed in a few moments with the greatest possible ease, without the use of machinery. The Patentee manufactures Brass Sash Bars, Stall Board Plates, &c.

H. FARMER, Sash, Door, and Staircase Manufacturers.—Counting house Fittings, Shop and Public-house Fronts on the shortest notice. Estimates given for contracts of any description. By enclosing a postage stamp, a list of prices will be returned for any kind of joiners' work, &c.—125, St. John-street-road, and No. 1, Edward street, Pentonville-street, Pentonville.

SASH and DOOR MANUFACTORY, 59, GRANGE-ROAD, BERMONDSEY.—L. SUGDEN respectfully invites builders and the trade in general to an inspection of his stock of manufactured joiners' work, prepared from the best material, at the lowest possible price.

P.S. A full list of prices on application.

WINDOW BLINDS.—TYLOR & PACE, Window Blind Manufacturers, 1c., New Bond street, and 3, Queen-street, Cheapside, London, submit the following PRICES of WINDOW BLINDS, which they can recommend as being made in the best manner:—Venetian blinds, per square foot, 9d.; best holland blinds on rollers, 6d.; best ditto, on spring rollers, 9d.; gauze wire blinds, in mahogany frames, 2s.; perforated zinc blinds, in ditto, 1s. 10d.; outside blinds of striped cloth, 2s. Transparent blinds in great variety. Estimates, with prices and discounts to builders and the trade, forwarded on application, post free.

TO BE SOLD cheap, a nearly new well-made 24 inch MAHOGANY Moulded Panel inner Glass DOOR, with fanlight over. Size of door, 7 feet 2 by 3 feet 4, glazed with one square of plain, ornamented embossed plate glass, patent lock, and three keys, &c. Fanlight, 3 feet 4 by 2 feet 9, glazed in one square of clear plate glass.—For particulars, apply to T. R. NASH, No. 1, Leigh-street, Burton-crescent.

E. and W. H. JACKSON beg to call the attention of Builders and the Trade to the LOW PRICES of their PATENT PLATE GLASS, BRITISH PLATE, silvered and for glazing, of unrivalled quality and finish; ROUGH PLATE, CROWN, SHEET, COLOURED, and ORNAMENTAL GLASS, in every variety, of the best manufacture, at the lowest terms. Designs and estimates furnished for ornamental windows, either for house or church decoration.—All applications for estimates and lists of prices to be made at their warehouse, 313, OXFORD-STREET.

THOMAS MILLINGTON

Begs to inform ARCHITECTS, BUILDERS, and the Trade, that he supplies the following articles of the best quality and at the same time upon the lowest terms:—

ENGLISH AND FOREIGN SHEET GLASS, PLATE, PATENT PLATE, PATENT ROUGH AND FLUTED PLATE, MILLED SHEET LEAD,

PATENT PIPE, LEAD, IRON, AND BRASS PUMPS, AND WATER-CLOSETS,

Genuine White Lead, Colours, Varnish, Brushes, and every article in the Trade.

FOR PRICE SEE ADVERTISEMENT FIRST SATURDAY IN EVERY MONTH, OR UPON APPLICATION AT THE WAREHOUSE.

87, BISHOPSGATE-STREET WITHOUT, LONDON.

SEYSSEL ASPHALTE COMPANY,

STANGATE, NEAR WESTMINSTER-BRIDGE, LONDON.

ESTABLISHED 1838

CLARIDGE'S PATENT.—Frequent complaints having been made by ARCHITECTS and others of the failure of certain works supposed to have been done by this Company (but which in fact were executed with spurious materials), a list of works executed with the

GENUINE SEYSSEL ASPHALTE

is kept at the Office, that it may be at any time ascertained whether any work in which a failure has taken place was executed by this Company.

J. FARRELL, Secretary.

N.B. THE EXCLUSIVE SUPPLY OF ASPHALTE from the Mines of Pyrimont Seyssel being conceded to this Company, the Directors particularly recommend Architects, Builders, and others (for the purpose of assuring the use of the genuine article) to insert in their specifications

"PYRIMONT SEYSSEL ASPHALTE, CLARIDGE'S PATENT,"

and not merely "Asphalte," or "Bitumen," as in many cases where these terms have been used, gas-tar, and other worthless and offensive compositions have been introduced.

1853.

GENUINE SEYSSEL ASPHALTE.

ORSI AND ARMANI.

THE EXCLUSIVE SUPPLY OF SEYSSEL ASPHALTE (FRANGY)

DIRECT FROM THE MINES.

REDUCTION IN THE PRICE FOR VARIOUS WORKS FIFTEEN PER CENT.

AND THE

WORK GUARANTEED FOR THREE YEARS.

Offices, No. 6, Guildhall Chambers, Basinghall-street, City.

PATENT METALLIC LAVA.

A printed List of the important Works for Flooring, Roofing, Covering of Arches, &c. &c. executed from 1848 to 1852, with this Material, may be obtained at the Office of

ORSI AND ARMANI.

THEIR PATENT METALLIC LAVA IS FIFTEEN PER CENT. CHEAPER

THAN THE GENUINE SEYSSEL ASPHALTE OF MESSRS. O. AND A.

OR THIRTY PER CENT. LOWER THAN ANY OTHER MATERIAL CALLED BITUMEN OR ASPHALTE.

Offices, No. 6, Guildhall Chambers, Basinghall-street, City.

FOREIGN SHEET-GLASS packed in cases of 200 feet, from 38s. to 42s. per case.

GLASS TILES 1 of an inch thick, 7s. 6d. per case, containing fifty tiles.

HARTLEY'S PATENT ROUGH PLATE-GLASS, packed in boxes of 12 feet, from 1s. 6d. per box.

SASHES GLAZED with good Crown glass at 3d. per foot, outside measure.

JAMES PHILLIPS, and CO. 116, Bishopsgate-street Without.

GOOD 3rds 16 oz. FOREIGN GLASS, in cases of 200 feet each, average size, 40 by 30, 44-42s. per case; 4th ditto, 34s. Also 16 oz. ground do. do. 4d. per foot; Crown and 16 oz. Sheet Glass, in 100 feet boxes, various, from 14 by 14 inwards 24 per foot; Enamel Tiles, 12s. per dozen. Also Crown and Sheet Glass in crates, British and Patent Plate, Flinted and Stained Glass, Glass Slates, &c. Sheet Lead, Pipe, White Lead, Oils, Turpentine, Colours, &c. G. FARMILOE and SON, 118, St. John street, West Smithfield, London.

MOORE'S PATENT MOVABLE GLASS VENTILATOR, for Windows, Partitions, Factories, Workshops, Warehouses, Greenhouses, Cottages, Stables, Granaries, and other Buildings, Railway and Private Carriages, &c. For Farms, Barns, Outbuildings, &c. the Ventilator can be made to form a complete window, iron frames and rough plate glass, &c. Ventilators made to any size, and to most forms—facades; also for sky, or fan lights, and other purposes. A considerable saving and additional safety by having fixed wind w sashes.

MOORE'S PATENT "LEVER VENTILATOR," forming a regular current of air, is calculated to effect all that is required for improving animal and vegetable health. The vitiated air is emitted at the opening left for that purpose. To shopkeepers they are particularly recommended, as from their capabilities of removing the foul air caused by the gas in the shop and windows they effectually preserve the stock in good condition, and prevent explosion of gas.

Church and Hospital sashes having fixed wind w sashes.

The Russian Government, and the Emperor of China.

Manufactory, Sekford-works, St. James's-walk, Clerkenwell, London.

BELGIAN SHEET-GLASS.—WILLIAM HICKSON, 46, Long-acre, begs to inform builders, &c. they can be supplied with the above in various sizes up to 60 by 34 inches and 32 oz. and also the sizes depend upon having the original marks and cases at the following prices for cash only: thirds, 38s. and 40s.; fourths, 30s. and 33s.; 16 oz.—Established 1840.

SOHO CROWN, SHEET, ORNAMENTAL, PATENT PLATE, AND PLATE-GLASS WAREHOUSE, 28, SOHO-SQUARE.

ALFRED GOSLETT begs to inform Builders, &c. that he is prepared to Tender for the supply of EVERY DESCRIPTION of Glass, now manufactured at WHOLESALE PRICES.

ASPHALTE PAVEMENT.—HENRY WRIGHT is prepared to lay down his Asphalte Pavement, which is particularly adapted for railway platforms, footpaths, garden-paths, court-yards, and school-yards 2½ in. to 3 in. thick, from 1s. 6d. to 2s. per square yard.—Address, 32, Bucklersbury, City.

ASPHALTE.—GERVASE FOOTTIT, Trinidad Asphalte Works, Rotherhithe; established 1834. Every description of Flooring laid with the above durable material in the best manner. Asphalte for Railway Arches, 35s. per ton. Importer of Trinidad Asphalte.

Shipping Depôt, Devon Haytor Wharf, Rotherhithe.

G. H. CLARK, Agent.

PAVING, 2s. 9d. per SQUARE YARD.—Basements, Foot-walks, Malt-houses, Corn Stores, Floors of Warehouses, and every description of Pavement laid down at the above low price, and the work guaranteed.—Apply to JOHN PILKINGTON, POLONCEAU'S BITUMEN PAVEMENT OFFICE, MONUMENT CHAMBERS, 14, FISH-STREET-HILL, N.B. Country Agents, and Railway Engineers and Contractors, supplied with the best Bitumen for covering Bridges and Arches.

TODD'S PATENT METALLIC PROTOXIDE PAINT.

THE PATENT METALLIC PROTOXIDE PAINT now offered has been found, after the most severe trials, to be peculiarly efficacious in preserving Iron from Oxidation, Wood from Decay, and Masonry and Brickwork from Dampness. Applied to Iron, it unites with it most intimately, forming a complete coating; so that thus protected, it will be found equal to the best galvanized iron. Hence its great value to all Engineers and Iron Founders as an application to iron vessels, iron roofs, steam and water pipes, &c. &c. It adheres firmly to iron, even at a red heat. For stuccoed buildings it will be found to be effectual in preventing the discolorations formed by vegetation, and keeping out all dampness.

For terms, application to be made at the Offices of the Company, 12, Bishopsgate-street Within; or to the following Agents:—
Messrs. PITCHFORD, Island Lead Works, Limehouse, } LONDON. | Messrs. D. and G. BRYMNER ..... GREENOCK.
Messrs. G. and T. WALLIS, 64, Long-acre, ...

HUBBUCK'S PATENT WHITE ZINC PAINT. The PERMANENT WHITE of the Ancients, previously confined by its cost to the use of the artist, is now, by Hubbuck's Patent, reduced to the price of White Lead.

The principal characteristics of HUBBUCK'S ZINC PAINT are—Economy, Health, Beauty, and Durability.

Builders and Contractors find Hubbuck's Paint the only one adapted to all their purposes; possessing the great desideratum of economy, combined with its high excellence as a paint, it ranks alone. Contractors effect a saving of 20 per cent. by using HUBBUCK'S ZINC PAINT.

HUBBUCK and SON feel it necessary a caution should be circulated against imitations of their Paint. These manufactures, containing frequently pernicious ingredients, are baneful to health and worthless in use, whilst the incompetence of these imitators in the production of pigments is evidenced, not alone by the coarse grainy appearance, but also by the deficiency of that body in their produce, which is known to the painter to be all-essential. That an imposition be not practised, therefore, notice that the cask is marked with the name of the original manufacturer, thus—

HUBBUCK LONDON PATENT.

If not so marked, the reason may be inferred.

Every information in the circular to be had of THOMAS HUBBUCK and SON, Paint and Varnish Manufacturers, Upper East Smithfield (opposite the London Docks), London.

THE VIEILLE MONTAGNE ZINC MINING COMPANY'S PURE PATENT WHITE ZINC PAINT is unequalled for permanency of colour, hardness, and brilliancy of surface; it is unaffected by sulphureous or any other vapours or emanations. Being completely innocuous and free from the pernicious effects of whitelead, it may be employed in all apartments whilst in use without any inconvenience to the inmates.

The greatest caution is recommended to avoid any spurious compounds that might be sold at cheap rates as Pure Oxide of Zinc. If any adulteration has taken place in the oxide, either in consequence of impurity in the material originally made use of to produce it, an imperfect mode of production, or by mixing with the oxide certain substances calculated to give it increased weight, it then produces a very inferior instead of a very superior paint, and the economy realized by the purchasers of such oxides becomes a very expensive result to the owner of the premises painted with them.

The VIEILLE MONTAGNE'S ZINC OXIDES, dry or ground in oil, are sold with the VM mark—in Hull, by Messrs. HUNDELL, SPENCE, and CO.; when ground and dry, by Messrs. T. B MORLEY and CO.; and by the Company's Grinding Agents. In London, Messrs. CHARLES DEVAUX and CO. wholesale agents, 82, King William-street, City; JACK and BRABY, wholesale and retail agents, 8, Tottenham-court, New-road, and 86, Upper Thames-street, City. In Manchester and Liverpool, by Messrs. LAWFORD and CO. of 47, Norfolk-st., Liverpool, who are also acknowledged Painters to the Company for Zinc Paints, and undertake painting ships, warehouses, dwelling houses, &c. In Leith, by Messrs. K. ANDERSON and CO. Timber-bush. Dry OXIDES and PAINTS, in kegs of 14, 21, and 28 lbs and upwards, to be had of the Company's Agents in Birmingham, Newcastle, Glasgow, Bristol, Plymouth, Falmouth, Ipswich, Yarmouth, Poole, and the Isles of Jersey, Guernsey, Man, and Wight; also in Dublin, Cork, and Belfast.

The Company also employ an acknowledged painter in London, who will undertake any description of painting with Zinc Paint by contract.

For further particulars, apply to the Company's General Agent in London, Mr. SCHMOLL, 12, Manchester-buildings, Westminster.

THE VIEILLE MONTAGNE ZINC MINING COMPANY beg to inform the public that they have appointed Messrs. T and S. KNIGHT, of Great Suffolk-street, Southwark, as their painters, who will be ready to execute any description of painting and decorating with the Pure White Zinc Paint.

PATENT LIQUID CEMENT for Fronts of Houses, &c.—This valuable and economic material is always ready for use, simple in application, and only one-fifth the cost of oil paint. It will not decompose or wash off For beauty it stands pre-eminent, giving the appearance of fine cut stone, and 1 cwt. will cover 400 to 500 square feet. Sold in casks of 1, 2, and 3 cwt. at 8s. 15s and 21s. each, casks exclusive.

PATENT PERMANENT COLOUR is particularly suited for halls, kitchens, schoolrooms, railway stations, &c as a substitute for oil paint: is without smell, dries in an hour, and may be applied over wood, oil paint, stucco, or any other surface. Sold in casks of 1 cwt. at 15s 6d. each.

PATENT ZINC PAINTS. These paints are ready mixed for use, economical, unchangeable in colour, greatly superior to, and will last much longer than common oil paints, and will cover a much larger surface than the same quantity of white lead paint. Price 6s. per gallon, ordinary colours; Mineral chocolate brown, 5s.

Permanent Brilliant Black, for all kinds of outside work, bridges, park railing, &c. 8s. per gallon.

PATENT INDIA-RUBBER PUTTY, which never shrinks, but remains in a tough plastic state, and is permanently waterproof. Price 4s. per stone.

DAMP WALLS.—PATENT ELASTIC PAINT, an effectual remedy, by which they are rendered fit for papering or finishing in oil colours. Price 10s. per gallon, which will cover and finish about 150 square feet.

PATENTEES, GEORGE BELL and CO. Steam Mills, 2, Wellington-street, Goswell-street, London.

WHITE OXIDE of ZINC and ZINC PAINT. (Langston Scott's Patent.)

CROWLEY, WHITE, and CROWLEY. Sole Manufacturers, now supply this innocuous substitute for White Lead to shippers and the trade, either in powder or paint, of genuine purity, wholesale under brand, of unrivalled colour and texture, direct from the Works, Grand Surrey Docks, Rotherhithe.

Zinc Paint is below the price of white lead, possesses equal body, and perfectly unchangeable in colour.

Price list and prospectus of its superior properties for interior, exterior, and marine purposes, forwarded in answer to letters addressed to Messrs. CROWLEY, WHITE, and CROWLEY, 10, Lombard-street, London.

KEENE'S and PARIAN CEMENTS and FRENCH PLASTER for internal uses.—These well known hard cements dry quickly, and can be painted upon within a few days.—Made and sold by JOHN BAZLEY WHITE and BROTHERS, Millbank-street, Westminster.

PORTLAND CEMENT.—CHARLES RICHARDSON, 6, South Wharf, Paddington.

CHARLES RICHARDSON has the greatest confidence in introducing to the Trade the above superior CEMENT, being of uniform colour and quality (a desideratum never before attained in Portland Cements). It possesses extraordinary cementitious qualities, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, turn green, or crack; combined with which its eminent hydraulic properties stamp it at once as the first cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle by those who have hitherto had the monopoly.—Manufactured by R. GREAVES, Esq. at his Works, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

TO BOARDS OF HEALTH, COMMISSIONERS OF SEWERS, ENGINEERS, ARCHITECTS, DISTRICT AND ROAD SURVEYORS.

W. AUSTIN'S PATENTED INVENTIONS, for sanitary and other purposes, are open for inspection, at Asphalt and Oil's Wharf, Abingdon street, Westminster. Trials are requested to prove the merits of the various articles. Communications, address W. AUSTIN, 27, Holywell-street, Westminster.

PORTLAND CEMENT.—ASPDIN'S PATENT.

Messrs. ASPDIN, ORD, and CO. have much pleasure in informing consumers of this valuable Cement, that they have, by means of a recent discovery (patented by Mr. ASPDIN) much improved the quality of this Cement with out any increase in price.

Engineers and architects are recommended to specify "Aspdin's Patent," as there are numerous imitations sold as Portland Cement, resembling it only in colour.

ASPDIN, ORD, and CO. beg to call attention to their SECOND QUALITY, which is equal, if not superior, to most of the Cements sold as Portland, and is considerably cheaper.

A report of experiments made to prove the extraordinary strength of their Patent Portland Cement, may be had at their Office, New Wharf, Westminster, London; at their Works, Gateshead-on-Tyne; or from their Agent, Mr. HENRY ROBINSON, 31, King-street, Liverpool.

PORTLAND CEMENT.—JAMES WESTON having enlarged that portion of his CEMENT WORKS on Mill-wall, Poplar, for Manufacturing the above CEMENT, begs to inform the Trade in general that they can be supplied with any quantity they may require, either at his Works, St. Andrew's Wharf, Earl street, Blackfriars, or Middle Wharf, Scotland yard, Westminster. Manufacturer of Roman, Lias, and Mastic Cements, English and French Plaster, &c.

PORTLAND CEMENT WORKS, NORTHFLEET, KENT.—Messrs. ROBINS and CO. with much pleasure announce to their Friends and the Public, that they have completed the enlargement of their works, in order to meet the great increasing demand for their Cement; and are now prepared to supply any quantity of the very best PORTLAND CEMENT, manufactured by them for all the purposes Cement is applicable. Orders received at Great Scotland-yard, and at the Works.

PORTLAND CEMENT WORKS, Northfleet, and Belvedere-road, Lambeth.
KNIGHT, BEVAN, and STURGE, Manufacturers.
For town, country, and exportation.

PARIAN CEMENT, for internal use, to be painted in a few hours, and papered within a couple of days. CHARLES FRANCIS and SONS, Manufacturers of Roman, Parian (under patent), and all other Cements in use for building purposes. Nine Elms, London.

ROMAN and OTHER CEMENTS, Manufactured by J. M. BLASHFIELD, successor to the Patentees, PARKER and WYATT, who, in 1796, first introduced PARKER'S ROMAN CEMENT; also Tarras and Portland Cements, English and French Plaster, Terra Cotta Chimney Pots, Trusses, &c.
Manufactory, Mill Wall, Poplar; Depôts, Commercial-road, Lambeth; and Paddington-basin.

ATKINSON'S CEMENT, so long known and esteemed in London, for plastering purposes, is a quick-setting Cement, that requires no colouring.—Sold exclusively by JOHN BAZLEY WHITE and BROTHERS, Millbank street, Westminster; and Seel-street, Liverpool.

ARTIFICIAL HYDRAULIC or PORTLAND CEMENT combines the valuable qualities of the natural Cements with the additional advantage that it greatly excels them in its cementitious properties; that it is not affected by frost, and does not vegetate in damp situations. Account of COMPARATIVE EXPERIMENTS on the strength of this and other Cements (read at the Institute of Civil Engineers), to be obtained from the makers, JOHN BAZLEY WHITE and BROTHERS, Millbank-street, Westminster, who prepare one quality only of Portland Cement.

GEO. & THOS. EARLE, CEMENT MANUFACTURERS, HULL.—Light and Dark, equal to any made. Manufacturers also, and dealers in Plaster, Paris White, Mastic, Hair, Lias lime, Laths, Slates, and Slate Slabs, Fire-bricks, Grindstones, Cement Chimney-tops, ditto Vases, Ridging, &c. Paints, Stucco, &c. Marble Merchants and Importers of Porzolano.

BLUE LIAS LIME.—NELSON and CO. beg most respectfully to call the attention of Engineers, Architects, Contractors, Builders, and others connected with the building trade, to the superior quality of their BLUE LIAS LIME, the natural hydraulic properties of which, and the great estimation in which this kind of Lime is held for buildings in wet and damp situations, such as wharf-walls, docks, &c and for concrete foundations, is a sufficient recommendation for the adoption of it in all works of the above description. It is also peculiarly adapted for stucco. Orders received by—London Agents, BLYTH, BROTHERS, 16, South Wharf, Paddington; and at the Works, Stockton-fields, near Southam, Warwickshire.

GREAVES'S BLUE LIAS LIME.—The superior manner in which the above is ground renders it cheaper for concrete or stucco than any other lime or cement. The shell lime for mortar is burnt on an improved principle, leaving scarcely any core. The satisfaction constantly expressed by Engineers, Architects, and Contractors, of the above, is its best recommendation.

Gibbs, Canning, and Co.'s Blue Vitrified Bricks, Pipes, Junctions, Bends, and Fire Goods.

ROMAN, PORTLAND, PARIAN, ANSTON, and LIAS Cements of the best quality.

SECONDS, PAVIORS', STOCKS, and other Bricks.
CHARLES RICHARDSON, 6, South Wharf, Paddington.

GROUND ABERTHAW LIME (for Hydraulic Works), Blue Lias Cement, Cambrian Plaster, Caustic Flour of Lime (for Agricultural and Gardening purposes), and Portland Cement, shipped at Cardiff, in barrels, to all parts of the world, or forwarded by railway direct out of the works, in casks or barrels, to any part of the kingdom. JAMES BIRD and CO. Cambrian Cement Works, Cardiff.

LEEDS TERRA-COTTA and SANITARY TUBE WORKS.—Show-rooms, Great George's street, near the Town Hall, Leeds.—WILKS and PERKINS, Manufacturers of every description of Ornamental Terra-cotta and Sanitary Wares, Trusses, Pots, Flower Vases and Pots, Chimney Tops, Ridge Tiles, Waterclose Pans, Fire-grate Backs, Fire-bricks, Quarries, &c.

HAND-IN-HAND FIRE and LIFE INSURANCE SOCIETY, 1, New Bridge-street, Blackfriars, London.—Instituted in 1696. Extended to Life Insurance 1836. Immediate, Deferred, and Survivorship Annuities granted

DIRECTORS.

The Hon. William Ashley.	John Gurney Hoare, esq.
The Hon. Sir Edward Cust.	E. Fuller Maitland, esq.
Arthur Eden, esq.	William Scott, esq.
John Letheam Elliot, esq.	John Sperling, esq.
James Pattle, esq.	Henry Wilson, esq.
Harris M. Farquhar, esq.	W. Leaside Winter, esq.

LIFE DEPARTMENT.—Insurances effected before the 24th June next, will participate in profits one year earlier than if effected after that date.

In the years 1840, 1850, 1851, 1852, 1853, and 1854, the Premiums on all policies entitled to participate WERE ABATED 5s per Cent. that is to say, a PREMIUM of 100l. WAS REDUCED to 47 10s. No charge for stamps.

FIRE DEPARTMENT. Insurances are effected on every description of property, at the usual rates. By or cr.
RICHARD RAY, Secretary.

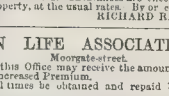
BRITON LIFE ASSOCIATION, 36A, Moorgate-street.

Assurers in this Office may receive the amount assured during Life, with annual increased Premium.

Loans can all times be obtained and repaid by small instalments

Investment Policies secure a payment of the amount assured in 13, 10, or 7 years, or at death if it should previously occur, on which advances can be obtained

Persons about to subscribe to Building Societies, will find the Building Policies issued by this Office combine the Assurance of Life with all the advantages derived from a Building Society.



Medical Gentlemen remunerated in all cases for their reports.

Annuities granted. All descriptions of Life Assurance transacted.

Policies indisputable. Office hours from 10 a.m. to 4 p.m.
EDWARD PARSONS, Secretary.

VENTILATION.—PURE AIR.

Sheringham's Ventilator for the admission of pure air through an

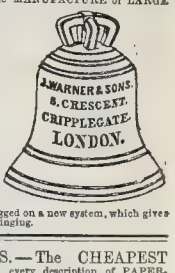
EXTERNAL WALL.

With single pulley, from 6s. each; with leading pulley, from 8s. 6d. These Ventilators insure that the requisite quantity of air may be admitted for the due ventilation of an apartment without the slightest draught being felt by the occupants; and as they are placed in the external wall, their action is not impeded when the house is closed for the evening, at which time a constant supply of fresh air is most required.—HAYWARD, BROTHERS, sole Manufacturers, 195, Blackfriars road, and 127, Union-street, Borough; and of all respectable ironmongers, builders, &c.

SUCCESSFUL VENTILATION.—WATSON'S PATENT SELF-ACTING DOUBLE-CURRENT VENTILATORS have been successfully applied to Churches, Chapels, Public Halls, Stables, and almost every kind of Building, as well as to withdraw Steam, Smoke, Dust, and Heat. Testimonials and other information forwarded on receipt of a postage stamp. Instructions sent for fixing.—Apply at the Manufactory to CHARLES WATSON, King Cross-lane, Halifax, Yorkshire, who is the patentee and sole maker.

JOHN WARNER and SONS, Patentees of IMPROVEMENTS in the MANUFACTURE of LARGE BELLS.

J. W. & SONS having of late years devoted much time and study to the long neglected art of Bell Casting, have recently invented and patented a new process connected therewith, by which they are enabled to manufacture Bells of any size, note, or weight, of superior tone, truer in form, and at less cost than has heretofore been accomplished.



Bells for Churches, Chapels, Colleges, Schools, Turret Clocks, &c. cast for any size, note, or weight, singly or in peals

TUNED BY MACHINERY.

Stocked and wheeled ready for fixing. Old Bells recast or taken in exchange.

MUSICAL HAND-BELLS tuned to the Chromatic Scale.

With improved Clappers, and pegged on a new system, which gives a superior tone and facility for ringing.

PAPER-HANGINGS.—The CHEAPEST HOUSE in London for every description of PAPER-HANGINGS is CROSS'S WHOLESALE WAREHOUSE, 23, GREAT PORTLAND-STREET, Oxford-street, where you can select from the LARGEST and MOST EXTENSIVE Assortment in the Kingdom, THIRTY PER CENT. CHEAPER than any other house in the trade. Builders, Decorators, Dealers, and large consumers will do well to visit this establishment.

PAPER-HANGINGS.—JEFFREY, ALLEN and CO. Paper Stainers, beg to call the attention of the trade to their patterns of Paper-hangings for the present season, which comprise every description of style and quality, from the most elaborate decoration to the cheapest paper that can be produced, and which they are prepared to offer at very low prices. J. A. and CO. also respectfully inform the trade that they have OPENED a WAREHOUSE at No. 500, OXFORD-STREET, where all goods can be obtained on the same terms as at the Factory.

GUTTA PERCHA PAPER FOR DAMP WALLS. J. A. and CO. are the sole vendors of this well-known remedy for Damp Walls.

115, Whitechapel, near the Obelisk, and 500, Oxford-street.

ARTESIAN WELLS, Boring for Water, Sinking Shafts, &c.—The Nobility, Gentry, Water Companies, Towns, Baths, Brewers, and Manufacturers of every description, may be supplied with any quantity, by DAVID GREENLEY, Civil Engineer and Patentee of Boring Tools, 16, Cumming-street, Pentonville. Pumps and machinery for raising water from deep wells, boring tools, and well-pipes, for exportation. Men and tools supplied to bore for railroads, minerals, &c.

FARM AND COTTAGE PUMPS.

WARNER'S PATENT
CAST IRON PUMPS, for the use of FARMS, COTTAGES, MANURE TANKS, AND SHALLOW WELLS.

Patent Pump.....£1 15 0
Patent Pump, with 15 feet of lead pipe attached, and bolts and nuts ready for fixing..... 3 0 0
Larger sizes if required

The smaller sizes are also much used for supplying Bed, Pleasure, and Plant Houses, from underground Water Tanks, and can be readily fixed in any situation.

May be obtained of any Ironmonger or Plumber in town or country, or of the Patentees and Manufacturers,

JOHN WARNER AND SONS,
6, CRESCENT, JEWIN-STREET, LONDON.

Every description of Machinery for raising Water, Fire Engines, &c.

The usual allowance to the Trade

FOWLER'S IMPROVED FARM and COTTAGE PUMPS.

To be had of any Ironmonger or Plumber, in Town or Country.

The usual allowance to the trade.

PUMPS of SUPERIOR CONSTRUCTION bored perfectly true by improved machinery, in various plain and ornamental patterns, for squares and market-places, yards, conservatories, liquid manure, ships, barge, brickmakers, contractors, gold diggers, brewers, chemical works, and in wrought and cast-iron, copper, or brass, for hot or cold liquors, &c. &c. Lifting barrel and hydraulic lift-pumps, with handles on planks; and engines of various powers, for wells of any depth.

PUMPS on HIRE!—The largest stock in England of single and double pumps, from 4 in. to double 18in. barrels, prepared for hand or horse power, ready for use on reasonable terms, at

BENJ. FOWLER'S, Hydraulic Engineer,
Hot-water, Steam and Gas Apparatus Manufacturer, New Factory, Whitefriars-street, Fleet-street

M. A. RICHARDS and SON, PUMP MANUFACTURERS and ENGINEERS

Pumps in Wrought and Cast Iron and Brass, for use in machinery, and the most the best possible manner, suitable for excavators, roads, breweries, farms, gardens, stables, liquid manure, ships, barges, well-sinking, &c. adapted for any depth. Hydraulic Pumps for deep wells.

PUMPS ON HIRE.

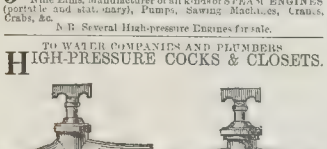
Pumps of any size, single or double barrel, up to double 12in. diameter, kept ready for use at reduced prices.

N.B. The above can be worked either by Hand, horse or engine power.

Iron Pails 7s. per doz. painted.
Ditto ... 8s. per doz. galvanized.

Upper Ground-street, Blackfriars Bridge, Surrey Side

TO CONTRACTORS



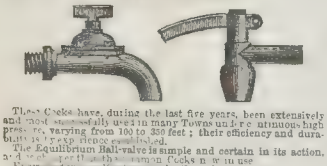
PATENT PORTABLE PUMPING ENGINES, mounted on strong waggon-wheels, with chimney horse shafts complete. Strong, simple, for immediate use. Several are ready for delivery, from six-horse power to twenty-five-horse power and upwards, adapted to contractors' work generally. May be hired at a rental, or purchased, and can be seen at work at Messrs. MUFFEY and HALLS, Engineers and Portable Engine Makers, &c. Hindley, Lancashire. These engines have been successfully employed for years.

JAMES MICHIE, Engineer, Battersea-park, Nine Elms, Manufacturer of all kinds of STEAM ENGINES (portable and stationary), Pumps, Sawing Machines, Cranes, Crabs, &c.

N.B. Several High-pressure Engines for sale.

TO WATER COMPANIES AND PLUMBERS

HIGH-PRESSURE COCKS & CLOSETS.



The Health of Towns Commissioners having recommended the application of high pressure principle in all cases, WARNER'S HIGH-PRESSURE COCK is recommended as a Cock free from leakage, and applicable for all purposes and situations. Patent Closets and Brass Cocks with supply valve for attaching direct to main pipes without a cistern, cocks, or wire.

LEAD, IRON, and TIN PIPE.

JOHN WARNER and SONS, Manufacturers, 6, Crescent, Jewin-street, London.

PRIZE MEDAL, CLASS 29.

HIGH-PRESSURE VALVE COCKS.—
LAMBERT'S PATENT.

These Cocks have, during the last five years, been extensively and most successfully used in many Towns under enormous high pressure, varying from 100 to 300 feet; their efficiency and durability is fully proved and established.

The Equilibrium Ball-valve is simple and certain in its action, and never fails to shut off the water when required.

Lavatory and other Basin Cocks in use and recommended by eminent architects, and other closets, upon economic principles, valuable improvements in ball valves, gauges, &c. &c.

Manufactured by THOMAS LAMBERT and SON,
No. 24, Great Dover-street, Newington-causeway, Surrey, and 101, Great Dover-street, New-cut, Lambeth.

STEAM-ENGINES, BOILERS, and various MACHINERY for SALE. Also several Low-pressure and Second-hand Steam-engines, viz. four, and three-horse; also a Steam Portable Pumping-engine, a Set of Timber Shapers, a Pair of Iodia-rubber Grinding Mills, about Two-horse power, a Water-wheel, &c. at the SPA WORKS, Spa-road, Bermondsey

STEAM BOILERS of every description, Wrought-iron Girder Bridges, Gas Holders, and General Castings, Chain Cables, and Contractors' Iron Work, manufactured by MELROSE and RUSSELL, Phœnix Works, Tividale, near Dudley. London Office 78, Hatton-garden.

BLUE TILES and BRICKS, DORDON, BY ARTHUR ONE J. SCARRETT, Manufacturer of Fire Bricks, Blue Roofing Tiles, and Red Quarries, Square Pipes, Fire-backs, &c. of all kinds. Fine Brick Materials for Building, Kiln Tiles, Coping Bricks, Ridge Tiles, &c. &c. The above works are one mile from the Coventry Canal, and two and a half from the Trent Valley Railway Station at Atherstone.

PEAKE'S TERRO-METALLIC TILES, PIPES, &c.—Notice is hereby most respectfully given, that the LONDON DEPOT for the above WARE is REMOVED to No. 91, WHARF, Middle field (next North) Pimlico Basin. Secondly, that the trade term, "TERRO-METALLIC," is the exclusive right of the Proprietor; and, thirdly, that the "Terraces or Tin Tiles," page 581, of the Great Exhibition, rank the Manufactories known as Nos. 28 "The Tiberias," Tunstall, Staffordshire as the first of the kind in the world.

MAW'S ENCAUSTIC TILE PAVEMENTS.

MAW and CO. send free, on application, their NEW BOOK OF DESIGNS,

with prices, adapted to the most durable, economical, and decorative production of pavements for entrance-halls, passages, conservatories, verandahs, and every description of modern and ancient building.

BENTHALL WORKS, near Broseley, Shropshire.
Specimens at 11, Aldersgate-street.

GREAT REDUCTION.—Pantiles 60s. per thousand, Plain 35s. Corby Stocks 35s. at MARTINDALE'S OLD-ESTABLISHED HONDURAS WHARF, BANKSIDE, London. Railway Engineers, Gas Companies, and others, supplied with every sort of Country Brick and Tile goods, Fire Bricks, Lumps, Tiles and Clays. Paint Mullers and Grinding perforated Tiles, real Dutch Clinkers, River Sand, Concrete Gravel, Founders Loam, White and Red House Sand &c. &c. at the cheapest rate.—Chief Office, 87, Regent-street.

A LARGE QUANTITY of NEW and OLD BRICKS and BATS FOR SALE, at a reasonable rate. Large PREMISES TO BE LET with stabling, fit for a builder's yard. Forge to be apply at the Marquis of Salisbury, Freel ne-street, Caledonian road

STONE-COLOUR BRICKS, moulded to any pattern, for cornices, cooling-boards, &c. at about one-third the cost of stone; also ornamental ridge and other tiles may be had to order of Messrs. HOOPER and CO. 2, Portland-street, Southampton.—Illustrated list of prices or samples forwarded on application

LONDON and BRIGHTON RAILWAY.— 1,000,000 BRICKS 1500 tons of HARD STOCK BRICKS for IMMEDIATE SALE, and many millions more at Haywards Heath or any station on Brighton Railway. Also several useful LARCH FIR TIMBERS, well sorted for house building. Apply to Mr. BEST, Cuckfield; or Mr. HOLLOWAY, Surveyor, Cuckfield.

BAKER'S PATENT PERFORATED BRICKS enable the Land to be Patent Moulded, and can be worked at table-moulding, and also superseding about 25 per cent in fuel clay, and ventilating the Brick. Particulars, &c. apply to MARY WEDLAKE and CO. 15, Fenchurch-street, &c. CHAS. BAKER, Patentee, Southampton.

BRICKS from COWLEY and KENT. Also WHITE, YELLOW, and RED FACING BRICKS. BLUE VITRIFIED BRICKS; Fire Bricks, Lumps, and Tiles.
CHARLES RICHARDSON, 6 SOUTH WHARF, PADDINGTON.

GREAT EXHIBITION 1851, Class 27, No. 111—JAMES LUFF, Manufacturer of all kinds of Ornamental Bricks, Tiles, Relief and White of the best quality, suitable for chimney-shafts, judge-seats, copings, and mouldings of every description, TUDDENHAM, IPSWICH.

N.B. Builders furnishing detailed drawings can have all sorts of ornamental designs executed; a small additional charge made for the moulds.

BRICKS, PANTILES, &c.—J. R. ANDREWS, Wisbech, Cambridgeshire, beg to offer BRICKS and Tiles for Home, PANTILES, at 25s. per 1000; FLOOR TILES and 6-inch PAVINGS, at low cash prices. Delivered at Bishopsgate Station, London. All kinds of DRAIN-PIPES.

BRICKS.—Malm Cutters, Yellow and Pale Seconds, Paviors, and Pickings, of good and sound quality, constantly on sale at H. DODD'S Brick-fields, which are only a quarter of an hour's walk from the City. H. D. earnestly requests purchasers to favour him with a visit, in order to inspect his stock, and to judge for themselves.

Malm Place, half washed Stocks, and Place Bricks also on sale. These Bricks are sound, well burnt, and unusually free from defects; a very large proportion of the Stock being suitable for external facing.

Apply at HENRY DODD and CO. at the Counting-house, Hoxton Brick-fields, orange walk, near the Rosemary Branch, Hoxton.

N.B. Light-coloured Pit Sand of approved quality constantly on sale upon reasonable terms. This Sand, from its not containing any saline matter, is acknowledged to be preferable to river sand.

NEW BRICKS.—MR. BENJAMIN GOUGH is now prepared to execute orders for New Bricks to any extent. Apply at No. 37, Newington-crescent, Newington Butts

FIRE-BRICKS, FIRE-LUMPS, and TILES, FIRE CLAY, &c. — In addition to their usual stock of ALL-A FIRE BRICKS, TRAQUAIR and MORGAN have now got to hand a most extensive assortment of FIRE LUMPS and TILES of the same unequalled quality, to which they respectfully invite the attention of Engineers, Furnace Builders, and consumers generally.

N.B. TRAQUAIR and MORGAN, 9, Bankside, Southwark close to Southwark-bridge.

BRICKS! BRICKS! BRICKS!—PARK ESTATE BRICKFIELDS, near the Royal Arsenal, Woolwich. Price for the present Month, and until further notice:—Stocks, 24s.; Place, 28s. per thousand. Ready money on the field.
February 20, 1854. L. DAVIS, Proprietor.

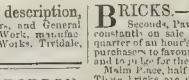
BURNT BALLAST FOR SALE.—A large quantity of well-burnt BALLAST (SCREENED, TO BE SOLD, at 9s. 6d. a yard, on the ground.—Inquire of H. DAWSON, 1, Arthur-terrace, Caledonian-road, Islington, where the ballast is.

ELECTRIC COLOURS.—The ELECTRIC POWER LIGHT and COLOUR COMPANY is prepared to supply the trade generally with their Colours, which for purity and fineness of price are unequalled. Samples of the Colours may be seen at the Offices of the Company, No. 91, Pall-mall. All Orders to be addressed to Mr. W. PROSSER, Esq. Commercial Manager, Frogmore Lane, Wandsworth, Surrey.

NORRIS'S PATENT RAILWAY CHAIR COMPANY beg to draw the attention of Railway Companies and Engineers to NORRIS'S PATENT RAILWAY JOINT CHAIRS. This patent has received the unqualified approbation of some of the most eminent engineers of the day, as the most effective and economical perfect joint in use at the present time. The completion of the contracts in such as will allow of its application to any line of railway, without causing the slightest hindrance to the ordinary traffic during the time that it is being laid down. The saving in the preservation of the permanent way and rolling stock, by the application of Norris's Patent, is incalculable; and wherever adopted it must very considerably decrease working expenses. On railway companies having old and bad roads, the principle especially advantageous as its application will not only restore the road to a perfectly safe and serviceable state for many years, but at the same time bring into efficient use all the old and broken chairs. To the railway world it needs not, as to the greatest value, as it admits of the easiest locomotion, and is made simple and economical in construction. Every information will be given, and models forwarded for inspection on application to the Manager, at the Offices of the Company, Wolverhampton

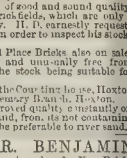
LADDERS, BARROWS, &c. for SALE or HIRE.—G. ELL invites the attention of builders, decorators, and the trade generally, to the Large Stock of Ladders; excavators', bricklayers', and other Barrows; Painters' Machines; Trestles, Steps, &c. he has always on hand, at a very low scale of charges.—Manufactory, 3, TOTTENHAM-COURT, NEW-ROAD, opposite Hampstead road.

TO STONE POTTERS



TO BE DISPOSED OF, a RECEIPT for WHITE ENAMEL GLAZE for insides of closet-pans, baths, and all kinds of ironmongery and stoneware.—For particulars apply to J. W. & S. Nearle-street, Vauxhall, Lambeth, London.

FINDON'S PATENT WATER-CLOSETS.— J. BLACK, having succeeded to the business of the patentee, begs to call the attention of architects, & builders, and the trade to the many advantages of these closets over all others as economy, durability, and simplicity, only require one size pipe from cistern, main or tank, which pipe may be branched from for any other purpose. May be seen at the Manufactory, 193, Highholborn.



HENRY MILLICHAMP, Son-in-Law and Successor to THOMAS BULLOCH,
MANUFACTURER OF
GLAZED STONE-WARE DRAIN-PIPES, BENDS, JUNCTIONS, TRAPS, &c.
65, PRINCES-STREET, LAMBETH, and BRUNTON'S WHARF POTTERY, COMMERCIAL-ROAD EAST.

Watercloset Pan with Syphon-Trap, 7s. 6d. each.

Watercloset Pan with Syphon-Trap connected, price 7s. 6d. each.

A LARGE ASSORTMENT OF STRAIGHT TUBES, IN SOCKET LENGTHS.
Bends, Elbows, Urinals, Gully-Traps, Flap-Traps, Syphon-Traps, &c. always kept in Stock.

DRAWINGS and LIST of PRICES FORWARDED FREE ON APPLICATION.

JAMES STIFF, MANUFACTURER of GLAZED STONE-WARE DRAIN PIPES,
BENDS, JUNCTIONS TRAPS, &c. 38, HIGH-STREET, LAMBETH, LONDON. Established 1751.
Water-Closet Pans, with Syphon Traps, 7s. 6d. each.
STRAIGHT TUBES, in Socket Joints, in Two Feet Lengths.

The great advantages attending the use of these articles are now so generally understood, as to render any enumeration of them almost superfluous. The cheapness, efficiency, and durability, universally admitted; while the rapidity and economy in fixing them proves the estimated superiority over every other kind hitherto before the public for similar purposes.

Inspection is invited to an assortment of Drain Tubes, of every form and size, adapted to the various situations in which they may be required; as also to the WATER-CLOSET PANS OF IMPROVED CONSTRUCTION, and terra-cotta, far surpassing any other manufactured of Brown Stone Ware.

N.B. These are made without the discharge-hole to be trimmed downwards.

May be had also at Messrs. GLADSTONE'S LIME WHARFS, Durham-yard, Westminster-bridge, City-road Wharf, City Basin, Docklead, Horse-ferry, Dean-street Wharf, foot of Battersea-bridge, Chelsea; Pratt Wharf, King's-road, Camden New Town; and at COLWILL Brothers, 42, Bridges-street Covent Garden.

J. TURNER, 3, South Wharf, Praed-street, Paddington; and at COLWILL Brothers, 42, Bridges-street Covent Garden.

Drawings and List of Prices will be forwarded free on application.

JENNINGS'S IMPROVEMENTS IN DRAIN-PIPES, AND IN CONNECTIONS TO DRAIN-PIPES.

Fig. 1. Fig. 2. Fig. 3. Fig 4.

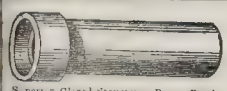
It is proposed by the Patentee to make Drain-Pipes in future (externally) like a Corinthian Column, except that the flutes, instead of being STRAIGHT, shall pass in a SPIRAL FORM ROUND THE DRAIN-PIPE; in other words Pipes of large size shall be made so that each, Flute, and ONE-THIRD of the clay removed in the formation of the spiral flutes. The fluting gives a RIGIDITY to THE PIPES when first made, causes them to DRY QUICKER, BURN BETTER, and WITHOUT DISTORTION, it also renders them much stronger than a pipe of one uniform thickness, and more capable of RESISTING PRESSURE. As these pipes are plain at both ends, they are not likely to be put out of shape by handling, as pipes are having socket ends.

The Patentee, GEORGE JENNINGS, further proposes to fix these Pipes in retated chairs, keeping the pipes so many inches apart according to their diameters. The chairs being laid to a proper fall and distance, the Pipes have only to be bedded and jointed in the chairs, the joint being struck, or made fair, FROM THE INSIDE, as at figure 3. A plain saddle, as at figure 4, making the drain complete.

In case of Stoppage, the removal of the plain saddle from figure 4 would make at once bare the appearance of figure 3: this would enable a workman at once to examine the state of the drain, and pass a line or other instrument up or down to remove the obstruction, WITHOUT IN ANY WAY DISTURBING THE INVERT.

FOR THE INTRODUCTION OF JUNCTIONS.—A PLAIN SADDLE could be taken from any part of the pipes, and exchanged for a saddle having a junction of the required size, as shown at figures 1 and 2. Or if figure 2 was objectionable, figure 1 could be turned round to any angle.

The present system of pipe-drainage precludes the possibility of an engineer or superintendent ascertaining if the pipes are properly laid and jointed. By leaving off all the saddles, as shown at figure 3, the person in charge can see if all the pipes are laid to the right inclinations, and properly jointed. If found correct, the saddles can then be fixed in a short time.



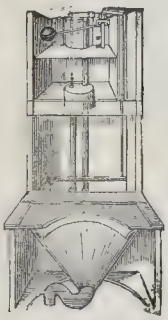
Architects and Engineers are respectfully informed that Licenses will be shortly granted for the manufacture of these pipes, chairs, and saddle pieces, plain and with junctions, TO THE GENERAL TRADE, and large works are about to be established for their manufacture, which will insure a supply of every size up to 24 inches.

A book, containing illustrations, prices, and particulars of GEORGE JENNINGS'S other inventions can be had on application, or by two postage-stamps inclosed to

GEORGE JENNINGS,
ENGINEER AND GENERAL BRASSFOUNDER,
No. 29, Great Charlotte-street, Blackfriars-road, London.

*** A Sample Closet, with Stool Cock complete, packed and sent to any part, on receipt of a Post-office Order for 30s.

STEPHEN GREEN'S IMPERIAL POTTERIES, LAMBETH.



Superior Glazed Stoneware Pipes, Bends, Junctions, Traps, &c. Hopper and other Pans, with best White Glaze inside.

Syphon Pan with or without STEPHEN GREEN'S Patent Air-tight Valve.

Registered Flushing Basin,—the most effective Syphon-trap yet offered to the public.

This effective article has not any Crank or Wire to get out of order, and is all complete and ready for use, and may be seen in operation at STEPHEN GREEN'S Manufactory, Lambeth.

IMPORTANT TESTIMONIALS

TO THE EFFICIENT WORKING OF

STEPHEN GREEN'S

PATENT SYPHON FLUSHING BASIN,

AND

SELF-ACTING CLOSET CONNECTIONS.

Oxford November, 1849.

GENTLEMEN,—Sixteen of your Closets having been put into operation at Christ Church College, I have great pleasure in giving you my testimony as to their efficiency and simplicity.

HENRY J. UNDERWOOD, Architect.
R. S. HOGGAR, Engineer.

Royal Arsenal, Woolwich, June 24, 1852.

GENTLEMEN,—I have much pleasure in giving my testimony in favour of your Patent Syphon Flushing Basin, with Self-acting Closet Connections. There are several fixed here, which have been in use for upwards of twelve months, giving perfect satisfaction.

I am, Gentlemen,
Your obedient Servant,
WILLIAM CARTWRIGHT.

DOULTON AND WATTS'S

REGISTERED CLOSET PANS IN

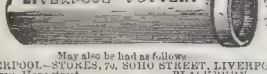
ENAMELLED STONE WARE,

LAMBETH POTTERY, LONDON.

These Closet Pans are manufactured in a new kind of stone-ware, HIGHLY GLAZED, vitreous, of a white colour, are much improved in form, and are used and recommended by the engineers connected with the General Board of Health.

The Traps are smaller at the inlet, gradually enlarging towards the outlet, as a security against the introduction of improper substances into the drain.

They may also be had turned down.



PRICE 7s. 6d. each,

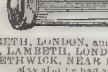
The same as for ordinary stone-ware, and may be had fitted with copper fans of the best construction at 1s. 3d. each extra.

JOHN DOULTON, BROTHERS, AND CO. LIVERPOOL POTTERY, ST. HELEN'S.

STONE WARE PIPES, BENDS, JUNCTIONS TRAPS, &c.

TERRA COTTA VASES, CHIMNEY-TOPS, &c. FIRE-CLAY FLUE PIPES.

May also be had as follows:



LIVERPOOL.—STORES, 70, SOHO STREET, LIVERPOOL.

GLASGOW	J. A. Mathieson, Hope street.	BLACKBURN	W. Hopwood, Clayton-street.

PIPES AND TUBES WITH SOCKET JOINTS from 1 inch to 9 inches in diameter. BENDS, JUNCTIONS, TRAPS, &c. OF EVERY DESCRIPTION. Drawings, with prices, &c., will be forwarded free on application as above.

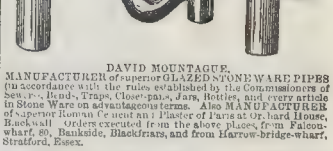
BOURNE VALLEY POTTERY,

NEAR POOLE, DORSET.

Manufactory of Salt Glazed Stoneware, Pipes, Bends, Junctions, &c. from clays of the finest quality the produce of the estate on which the goods are manufactured, all inferior clay being at once rejected.

MILL WALL POTTERY (near Scott Russell's).

Messrs. WILLCOX and CO invite the attention of Contractors, Builders, and Wholesale Dealers to their extensive assortment of articles in WHITE EARTHENWARE for sanitary purposes. The only manufactory of the kind in the neighbourhood of London. Particulars forwarded on application.



TO LOCAL BOARDS OF HEALTH, WATER COMPANIES, &c.

A DESIDERATUM in SLUICE-VALVES.

FIREMAN ROE'S Patent Sluice-valve, can be repaired without being removed from the main. All sizes, from 2 inch to 36 inch. Patent Hydrants, self-closing Cocks, fire and other Pumps, Hot water Apparatus, Baths, &c. Surveys made, and estimates given by FIREMAN ROE, Hydraulic, sanitary, and Gas Engineer, 70, Strand, and Upper Marsh, Lambeth.

VICTORIA POTTERY, LEIGH,

NEAR SOUTHEND, ESSEX.

DAVID MOUNTAGUE,

MANUFACTURER of superior GLAZED STONEWARE PIPES (in accordance with the rules established by the Commissioners of Sewers), Bends, Traps, Closet-pans, Jars, Bottles, and every article in Stone Ware on advantageous terms. Also MANUFACTURER of superior Roman Cement and Plaster of Paris at Or. hard House, Backwall. Orders executed from the above places, from Falcon-wharf, 80, Bankside, Blackfriars, and from Harrow-bridge-wharf, Stratford, Essex.

REDUCTION of PRICE in UNGLAZED DRAIN PIPES,

Manufactured by CHAS. FRANCIS and SONS, NINE ELMS.

The price in future will be,

6s. 3d.	per foot for the	3	inch bore.
6s. 3d.	"	4	"
9s. 6d.	"	6	"
6s. 8d.	"	9	"
1s. 9d.	"	12	"
2s. 3d.	"	15	"

These pipes are made under steam pressure, and burnt to great hardness, and are capable of bearing nearly double the hydraulic pressure of ordinary glazed pipes. The equal to glazed red ware is overcome by this manufacture. And it is well known that glazed earthenware, UNGLAZED, is the old st material discovered in a perfect state in Rome, Babylon, Nineveh, &c. &c.

Agent for Southampton, R. L. FLUDER, American Wharf.

SUPERIOR GLAZED STONEWARE

DRAIN PIPES, invented and manufactured by
WILLIAM NORTHEN, UNION POTTERY, No. 14,
VAUXHALL WALK, LAMBETH.

W. NORTHEN begs to inform surveyors, contractors, builders, water companies, &c. that he has completed "Spencer's" new patent machinery for making GLAZED STONEWARE DRAIN PIPES, JUNCTIONS, BENDS, ELBOWS, SYPHON TRAPS, &c. &c. Amongst the many advantages of pipes made by this machinery over all others may be mentioned, that it ensures perfect uniformity in form and size, both of pipe and sockets, the dies being of a different and better construction than any others now in use; and the pipes and sockets being made by one process are secure from separation.

W. N. invites particular attention to the superior quality of the glaze used in manufacture, which is equal to glass, and rendering stoppage in the drains impossible.

W. NORTHEN'S PIPES MAY BE INSPECTED AT THE FOLLOWING PLACES, WHERE ORDERS ARE RECEIVED:

Rosier and Co.'s Wharf, Kingsland, Blackfriars, and Mill bank. Marsland and Wood's Market Wharf, Regent's-park Basin.—J. C. Hilton's, Crown and Horse-shoe Wharf, No. 6, Upper Thames-street.—W. Peters's, North Wharf, Paddington.—Richardson's, South Wharf, Little Ormond-yard, Bloomsbury.—Smith's, Cambridge Heath Wharf, Hackney.—Millwood and Co.'s Wharfs, Kensington Basin, and Creek Wharf, Hammersmith.—J. Corbett's Depôt, Britten-street, Chelsea; and at the Pottery.

SALES BY AUCTION.

June 8th, 1854.

COMPETITIONS.

TO ARCHITECTS, LANDSCAPE GARDENERS, AND OTHERS.

£10 PRIZE.—DESIGNS, SPECIFICATIONS, and ESTIMATES required for LAYING OUT, PLANTING, FENCING, and DECORATING FOUR ACRES of LAND at Sutton, in the county of Surrey, and erecting thereon a gentleman's house, brick stuccoed, of plain classical exterior, with lodge and large entrance-hall, drawing and dining room, library and morning room, conservatory from drawing-room, opening on to lawn. The rooms to be so arranged as to communicate with each other, to form a suite at pleasure, or to be separately entered from the hall. Above must be a large, airy, day nursery, also one to communicate for the night, two best bed and dressing rooms, bath-room, three servants' rooms, front and back staircase, kitchen, scullery, larder, pantry, and all domestic conveniences, stable, and laundry. The 10*l.* prize offered by the proprietor of the land will be given to the candidate of whose plan, specification, and estimate, he approves; but the unsuccessful competitors will not receive any remuneration, but their designs will be returned to them.—Plans, specifications, and designs must be sent in to C. H. E. care of "The Metropolitan Brewery Company," 8, Moorgate-street, City, London, on or before the 15th JULY, 1854, where may be seen the proprietor's own design of ground-plan, also the plan of the land.

TO ARCHITECTS.

A DELEGACY having been appointed for the purpose of obtaining designs and estimates from Architects for a NEW MUSEUM in the University of Oxford, together with Lecture Rooms and apartments for the use of professors and students, of examining and selecting from them, and of reporting thereon, for the approval of convocation: Architects are invited to send in plans and elevations, with estimates for the abovementioned building, in conformity with certain general instructions, copies of which may be obtained on application to the Registrar of the University. A premium of 150*l.* will be awarded for the most approved plan; 100*l.* for the second; and 50*l.* for the third.—The plans, elevations, and estimates are to be sent under cover to E. W. ROWDEN, Esq. the Registrar, on or before OCTOBER 14, 1854.

TO ARCHITECTS.

KINGSTON-UPON-THAMES BURIAL GROUND.—DESIGNS and ESTIMATES are required for LAYING OUT as a BURIAL GROUND, and planting, decorating, and fencing, a Plot of Ground of Ten Acres, or thereabouts situate on Bonner-hill, within one mile of the town of Kingston-upon-Thames, and for erecting thereon two chapels either under one roof or otherwise, and an entrance-lodge and entrance-gates from the road. The fence must be an effectual one of at least 6 feet in height. The designs must be economical in all respects. A plan of the land may be seen at Mr. W. PHILLIPS, Solicitor, Kingston, but a personal inspection of the site is particularly recommended. The party whose plan is selected will have the superintendence of the works, and will receive five per cent upon the money actually expended for his plan, working drawings, specifications, and such superintendence. No payment will be made to unsuccessful candidates for their designs. The design and estimate must be sent on or before the 30th day of JUNE next to Mr. W. PHILLIPS, Clerk to the Burial Board, Kingston-upon-Thames, of whom any further particulars may be obtained.—Dated 7th June, 1854.

COMPETITIONS.

TO ARCHITECTS.

CEMETERY CHAPELS, &c. at Holbeach, Lincolnshire.—The Burial Board for this parish, finding that 600*l.* is a sum inadequate to the construction of two suitable cemetery chapels adjoining each other, hereby give Notice that they have resolved to expend not more than 800*l.* for that purpose, and that they are prepared to receive FRESH DESIGNS and PLANS for the erection of the same, with short particular explanatory of construction and material, and an approximating estimate of the expense. Also, Plans to be furnished for the erection of a suitable Lodge, the cost whereof is not to exceed 200*l.* The chapels are to be alike in size and construction, with vestry to each, also access to the bell from each. The Lodge to contain a waiting-room for mourners, besides suitable apartments for keeper. A premium of 5*l.* will be awarded to the gentleman whose plans are most approved of; he will also be employed to overlook the execution of the works, at the usual commission of 5*l.* per cent. A premium of 3*l.* will be awarded to the second best; and 2*l.* to the third best. The plans to be delivered, under motto, and without the author's name, at the Clerk's Office, in Holbeach, Before THREE o'clock, p.m. on SATURDAY, the 24th day of JUNE inst. By order of the Board,

EDWARD GEORGE AYLIFF, Clerk.

Holbeach, 7th June, 1854.

TO BUILDERS.

CATHORPE LODGE, near RUGBY.—The Plans, &c. for the House and Stabling, &c. to be erected at Cathorpe Lodge, near Rugby, for J. W. Morrice, Esq. will be ready in a few days. Builders who are desirous of TENDERING for the EXECUTION of the WORKS are requested to communicate with the Architect, A. B. FREND, Esq. 44, Bedford-row, Bloomsbury.

And every material required in the building, bell hanging, upholstery, and brass-foundry trades on the most reasonable terms.

List of Prices had on application at the Warehouse, or by letter prepaid.

VALUABLE PATENT MACHINES FOR WORKING IN WOOD

PRIZE MEDALS have been awarded to these celebrated Machines, both by the Great Exhibition in London, and many scientific Institutions.

They are extensively used in the Arsenals of the Royal Dockyards, by Builders, contractors, coach and railway builders, cabinet & waggon makers, millwrights, engineers, agricultural implement makers, shipbuilders, and many others throughout the British and Foreign Dominions, and are universally admitted to be the most perfect and valuable machines ever introduced for working up timber, being capable of performing, in a superior manner, more work, and with less power, than any other machines of the same description. They are also the most economical, as one man can attend to two machines, and do more work than four men can do by hand, and will perform in one hour more than a week's work by hand. The above machines may be seen in operation at the Works, and at a greatly reduced cost.

Sold only by WILLIAM FURNESS, Patentee, 20, Lawton-street, Liverpool, from whom full particulars may be obtained.

REDUCED PRICES.—EDWARD SIMMS (late William Cleave), of Wilton-road, Pimlico Basin, beg to acquaint Builders and the Trade that he has now on hand at his Manufactory (the first of its kind ever established), a very large Assortment of Dry and Well-seasoned OAK and DEAL PREPARED FLOORING BOARDS and MATCH BOARDING of all sorts, from ¼ inch to 1¼ inch thick, planed to a parallel width and thickness, and at greatly Reduced Prices. Also, Timber Deals, Oak Planks, Scantlings, Sash Sills, Mouldings prepared by Machinery, Laths, &c.—Apply at E SIMMS'S (late W. Cleave's) Flooring Manufactory, Wilton-road, Pimlico Basin.

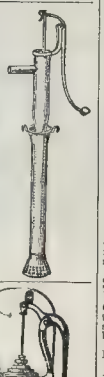
TO WATER COMPANIES AND PLUMBERS.
HIGH-PRESSURE COCKS & CLOSETS.

The Health of Towns Commissioners having recommended the adoption of the high pressure principle in all towns, WARNER'S HIGH-PRESSURE COCK is recommended as a cock free from leakage, and applicable for all purposes and situations. Patent Closets and Basins with supply valve for attaching direct to main pipes without a cistern, cock, or wire.
LEAD, IRON, and TIN PIPE.
JOHN WARNER and SONS, Manufacturers, 8, Crescent, Jewin-street, London.



TO CONTRACTORS.
PATENT PORTABLE PUMPING ENGINES, mounted on strong waggon-wheels, iron chimney horse shafts complete. Strong, simple, for immediate use. Several are ready for delivery, from six-horse power to twenty-five-horse power and upwards, adapted to contractors' work generally. May be hired at a rental, or purchased, and can be seen at work at Messrs. HEDWIN and HALES, Engineers and Portable Engine Makers, 92, Blackfriars-road These engines have been successfully employed for years.

M. A. RICHARDS and SON, PUMP MANUFACTURERS and ENGINEERS
Pumps in Wrought and Cast Iron and Brass, bored by machinery, and fitted in the best possible manner, suitable for excavators, roads, brickmakers, farms, gardens, stables, liquid manure, ships, barges, well-sinking, &c. adapted for any depth. Hydraulic Pumps for deep wells.
PUMPS ON HIRE.
Pumps of any size, single or double barrel, up to double 12-in. diameter, kept ready for use at reduced prices.

N.B. The above can be worked either by hand, horse, or engine power.
Iron Pails 38s. per doz. painted.
Ditto . . . 48s. per doz. galvanized.
Upper Ground-street, Blackfriars Bridge, Surrey Side.

FOWLER'S IMPROVED WROUGHT PUMPS for CONTRACTORS, BRICKMAKERS, EXCAVATORS, and OTHERS.
The attention of this house for more than fifty years past having been almost exclusively paid to the manufacture of every description of pump-work for every variety of purpose, attention is respectfully requested to their very superior Wrought Pumps, with plain or sliding telescope suction, galvanized and ungalvanized. A large stock of all sizes is kept ready to finish off to order, according to length required, at the shortest notice.
This description of Pump-work varying in almost every case, it is impossible to quote a general price, but the fullest particulars will be given on application.
A large stock of Wrought Pumps, from 3-inch single to double 15-inch barrel, is also kept on hire prepared for hand or steam power, on reasonable terms, as

BENJAMIN FOWLER'S
ENGINE-PUMP MANUFACTORY,
4, Whitefriars-street, Fleet-street, London.

TO BUILDERS AND PLUMBERS.
The attention of the Trade is called to JOHN WARNER & SONS' PATENT VIBRATING STANDARD PUMP,

which is recommended for the simplicity of its construction, and the ease with which it works.
By the introduction of the vibrating standard, the cumbrous carriage and expensive slings and guides are unnecessary, rendering the price considerably less than pumps made on the old plan.
Beer and Water Engines for raising fluids from a depth not exceeding 28 feet; also, Garden Engines constructed on the same principle.
JOHN WARNER & SONS,
8, Crescent, Jewin-street, London,
Manufacturers and Patentees.

PAPER-HANGINGS.—The CHEAPEST HOUSE in London for every description of PAPER-HANGINGS is CROSSE'S WHOLESALE WAREHOUSE, 29, GREAT PORTLAND-STREET, Oxford-street, where you can select from the LARGEST and MOST EXTENSIVE Assortment in the Kingdom, THIRTY PER CENT. CHEAPER than any other House in the trade. Builders, Decorators, Dealers, and large consumers will do well to visit this establishment.

PAPER-HANGINGS.—JEFFREY, ALLEN and CO. Paper Stainers, beg to call the attention of the trade to their patterns of Paper-hangings for the present season, which comprise every description of style and quality, from the most elaborate decoration to the cheapest paper that can be produced, and which they are prepared to offer at very low prices. J. A. and CO. also respectfully inform the trade that they have OPENED a WAREHOUSE at No. 500, OXFORD-STREET where all goods can be obtained on the same terms as at the Factory.
GUTTA PERCHA PAPER FOR DAMP WALLS. J. A. and CO. are the sole vendors of this well-known remedy for Damp Walls.
115, Whitechapel, near the Obelisk, and 500, Oxford-street.

TO BELL-HANGERS, GAS-FITTERS, IRONMONGERS, &c. &c. The Trade supplied on the best terms with Hour e Bells, Zinc, Tube, and Copper Wire. Gas Pendants, Brackets, and Rings of all descriptions for Gas-fitting, in Brass and Iron; Tin, Composition, Iron and Brass Plating, Cornice-poles, Rings and Lacquered Case Tube for Picture Rods, Desk Rails, &c. &c.
Superior Rolled Brass for Engravers, Castings in Fine and Common Brass, Gun Metal, &c. at
RICHARD EVERARDS, Brass and Bell Foundry and Metal Warehouses, Nos 10 11, and 12, Charles-street, Long-acre, London.

THE STATUE FOUNDRY and BRONZE WORKS, Lower Belgrave place, Pimlico.—All works of art in the various metals executed at the above foundry.

DR. ARNOTT'S NEW SMOKELESS FIRE GRATE.—F. EDWARDS and SON, beg to inform Architects and the Public that the above new stove is to be seen in daily operation at the manufactory, and that they are prepared to supply less, and to alter old grates to the same principle, 81, Oxford-street, and 42, Old-street.

THE SMOKE-CONSUMING STOVE invented by Dr. ARNOTT, and explained by him at the Society of Arts on Wednesday, MAY the 10th, insures perfect combustion, economises fuel, improves ventilation, and requires much less attention than the register-stoves in general use, was manufactured by D. and E. BAILY, 271 and 272, Holborn, who are prepared to supply new, or to adapt old stoves to the principle.

IRON TANK FOR SALE, at the Isle of Thanet Gasworks, Ramsgate, 25 feet diameter, 12 feet deep, as good as new. Price 100l. The purchaser to take it to pieces and remove it at his own expense.—Apply at the gasworks.

STEAM-ENGINES, BOILERS, and various MACHINERY for SALE. The above new and second-hand Lathes, Drills, Punches, Planing, and three-horse; also a Steam Portable Engine, nearly new, a Set of Emery Stampers, a Pair of India-rubber cleaning Rollers, and a Two horse-power overshot Waterwheel.—Apply at the SPA WORKS, Spa-road, Bermondsey.

WARMING by HOT WATER.—J. WEEKS and CO. KING'S-ROAD, CHELSEA, HOT WATER APPARATUS MANUFACTORY, whilst respectfully soliciting the attention of architects, builders, &c. to their superior apparatus for warming churches, mansions, halls, offices, and public buildings, by the circulation of hot water in pipes, beg to call particular attention to the scientific statement in the "Builder" of Jan. 14, 1854, which fully bears out the able address of the Rev. H. J. Bigge's, delivered at a meeting of the Architectural Society, wherein Mr. Bigge shows that heating by hot water is truly the only effective system applicable to warming churches and other large buildings. It is free from all objections, is economical in its working, and produces perfect ventilation with a uniform comfortable warmth throughout the largest buildings.—Messrs. JOHN WEEKS and CO. will guarantee their Hot Water Apparatus for thirty years at 5 per cent.

HEATING by HOT WATER.—J. JONES, Iron Merchant, has always a great variety of CONICAL and SADDLE BOILERS in STOCK: also fire and furnace bars, ornamental and plain supply cisterns, double doors and frames, furnace grates, oven doors for the same, hot-water pipes, elbows, tees, syphons, throttle valves, stop cocks, flange and socket elbows, &c.; also, trough pipes. Drawings and prices of the above, on application to J. JONES, Iron-bridge wharf, No. 6, Bankside, London, near the Southwark-iron bridge.

HOT WATER APPARATUS, adapted for Horticultural and every other description of Buildings; improved Boilers, requiring no brickwork; Warm Air Apparatus, &c. Apply to EPILLER and TAYLER, Engineers, Battersea.

NEW HOUSES OF PARLIAMENT.—DEFRIE'S GAS STOVES, RANGES, and BATHS, in action for two years at the Public Building. A great variety in stock upon the same principle. Gas Baths from 7l. by which a warm bath may be obtained for three halfpence Gas Cooking and Heating Stoves for all classes, from 1l. DEFRIE'S celebrated DRY GAS METERS, upwards of 60,000 in use.—See testimonies at the Office, 145, Regent street, or at the Manufactory, New-road, St. Pancras, near Fitzroy-square

CHUBBS' LOCKS, FIRE-PROOF SAFES, AND CASH BOXES.
CHUBBS' PATENT DETECTOR LOCKS give perfect security from false keys and picklocks, and also detect any attempt to open them. They are made of all sizes, and for every purpose to which locks are applied, and are strong, secure, simple, and durable.
CHUBBS' PATENT LATCH, for front doors, counting house doors, &c. is similar in construction, low in price, and quite secure. The keys are particularly neat and portable.
CHUBBS' PATENT FIRE-PROOF SAFES, BOOKCASES, CHESTS, &c. made entirely of strong wrought-iron, so as effectually to resist the failing of brickwork, timber, &c. in case of fire, and are also perfectly secure from the attacks of the most skilful burglars.
CHUBBS' CASH and DEED BOXES fitted with the Detector Locks.
CHUBB and SON, 57, St. Paul's Churchyard, London.

PARNELL'S PATENT DEFIANCE and NATIONAL LOCKS, WHICH CANNOT BE PICKED.—These Locks are recommended to the public for their simplicity, durability, and security. Parnell's Improved Mortice Locks, Box-staples and Striking Plates. Fire-proof Safes. Deed and Cash-boxes, Copying and Lever Presses.—Descriptions and lists of prices may be had at the Depôt, 59, Strand, gratis.
STREET-DOOR LATCHES, WITH TWO SMALL NEAT KEYS, WARRANTED SAFE FROM PICKLOCKS, FIFTEEN SHILLINGS EACH.

A PRIZE MEDAL for SUPERIOR LOCKS was awarded to J. H. BOODBYER at the Great Exhibition of 1851, who invites the attention of Builders, &c. to his Stock of Ironmongery, Brass Foundry, Nails (wrought and cut), Copper and Zinc; Patent Locks of all descriptions; China, Glass, and Wood Furnitures of all kinds, with Patent shifting Spindles; Dr. Arnott's Ventil ator; and the new registered Venetian Ventilator, so much admired, &c. &c. 6d. each.
J. H. BOODBYER (late STURCH and BOODBYER), established nearly 200 years, for the supply of Goods from the best Manufactories, at the lowest prices.
14, Stanhope-street, Clare-market, London.

FIRE—ROBBERY—VIOLENCE—PILLAGE.—MILNER'S HOLDFAST and FIRE-RESISTING SAFES, the strongest safeguards in the world against.
EXTENSIVE FIRE IN GLASGOW.
MESSRS. DAVID HOYD AND CO.
Gentlemen.—At the serious fire in Union-street yesterday, by which my counting-house was destroyed, I owed the preservation of my books to the MILNER'S SAFE in which they were kept. The contents of a wall safe were totally destroyed at the same time. You will please send me immediately another "Milner" of the same size as the one I had, being thoroughly satisfied of their safety, after the test I have just seen.
I am, Gentlemen, your obedient servant,
(Signed) JOHN DODDS.
27, Union-street, Glasgow, Feb. 23, 1854.
MILNER'S PHŒNIX SAFE WORKS, Liverpool; London Depôt, 47A, Moorgate-street, City.

FIRE-PROOF CONSTRUCTION.—FOX and BARRETT'S PATENT.
This improved system of fire-proof construction has been most extensively adopted, and its application has been extended to nearly EVERY DESCRIPTION of BUILDING, whether public or private.
The system combines ECONOMY, with great simplicity of construction, perfect security from fire, increased durability, and many other important advantages.
The floors and roofs are formed by a combination of joists of wrought or rolled iron with concrete, so constructed that each floor becomes in effect a beam of artificial stone, with ribs of iron; the structure possessing great strength and rigidity, and forming a fire-proof foundation adapted to receive a finished surface, either of the ordinary flooring-boards, or of cement, asphalte, tiles, slate, or other material.
Some of the largest and most important buildings in the kingdom are now in course of erection upon this principle, which is recommended to the notice of all who are interested in building, both as superseding the necessity for cast iron girders and brick arches, and as bringing the great desideratum of fire-proof construction, even for ordinary dwelling-houses and domestic buildings, within the reach of every one.
Further information may be obtained of the Proprietor of the patent,—Mr. BARRETT, 19, York-buildings, Adelphi.

THOMAS EDINGTON, IRON MERCHANT AND CONTRACTOR, Inspector of Railway Bars and Castings, 17, GORDON-STREET, GLASGOW.

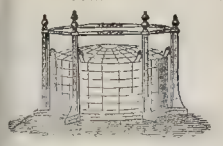
SAW-MILL MANUFACTORY, Chelsea, London.—WORSSAM and CO. invite the attention of all concerned in sawing, planing, and moulding wood to the simplicity and compactness of their machines over those now in use, which are both cumbersome and expensive. Drawings and prices sent on application. Estimates given for complete saw-mills for exportation or otherwise.

STEVENS AND SON,

ENGINEERS,

IRON AND BRASS FOUNDERS AND MANUFACTURERS;

CONTRACTORS



FOR THE

ERECTION OR ALTERATION OF GAS-WORKS FROM TWENTY LIGHTS UPWARDS,

With Buildings, Mains, Meters, Service-Pipes, Lamp-Posts, Lamps, and Gasfittings

WATERWORKS FOR THE SUPPLY OF TOWNS,

Gas Cooking Stoves and Ranges on the most improved principles.

GAS-FITTING IN ALL ITS BRANCHES.

GAS CHANDELIERS OF ALL SIZES, IN BRASS OR IRON, FROM TWO TO TWO HUNDRED LIGHTS.
DEVICES FOR GAS ILLUMINATION.

IMPROVED REGISTERING TURNSTILES FOR TOLL-BRIDGES, EXHIBITIONS, PUBLIC GARDENS, BATHS AND WASHHOUSES, &c.

These Turnstiles have been selected for the Entrances of the Great Exhibition, New York.

PATENTEES OF THE SEMAPHORE RAILWAY SIGNAL.

Signals for communication between Guard and Engine Driver. Railway Stores and Lamps of every description.

DARLINGTON WORKS, 16 to 19, SOUTHWARK-BRIDGE ROAD, LONDON.

MOREWOOD & ROGERS'S PATENT PLUMBIC ZINC,

A SUBSTITUTE FOR SHEET-LEAD FOR

ROOFING, RIDGES, GUTTERS, FLOORING,

AND ALL OTHER PURPOSES TO WHICH SHEET-LEAD IS APPLICABLE.

This Metal consists of distinct layers of Lead and Zinc, perfectly united in the process of Manufacture, one side of each sheet being pure Lead, and the other pure Zinc; it therefore combines the Stiffness of Zinc with the Durable Qualities of Lead. The Lead side of the sheet being laid outward, effectually protects the Zinc below from those atmospheric influences which so rapidly cause its decay, whilst the Zinc so stiffens and supports the Lead as to make a sheet of Plumbic Zinc equal in strength to one of Lead of several times its thickness and weight.

Plumbic Zinc not requiring to be more than one-fourth or one-fifth as thick as Sheet-Lead, is consequently much cheaper than that material.

For covering Terraces, Flats, Floors, Stairs, Passages, &c. it is well suited, being like Lead to the tread, whilst the Zinc on the under side of the sheet prevents it from treading out of shape.

The Size of the Sheets is 7 feet by 2 feet 8 inches.

No. 11 Gauge weighs about	18 oz.	per foot super.		
No. 12	"	"	20 oz.	do. do.
No. 13	"	"	21 oz.	do. do.
No. 14	"	"	26 oz.	do. do.

For further particulars apply to

MOREWOOD AND ROGERS, GALVANIZED TINNED IRON WAREHOUSE,

DOWGATE DOCK, UPPER THAMES STREET, LONDON.

IRONMONGERY, NAILS, STOVES, RANGES, &c.

AT WALMSLEY'S,

126, 127, and 128, LONDON-ROAD, SOUTHWARK.

FOR THE SUPPLY OF BUILDERS, CARPENTERS, UPHOLDERS, CABINET-MAKERS, SMITHS, WHEELWRIGHTS, AND OTHERS, AT WHOLESALE PRICES.

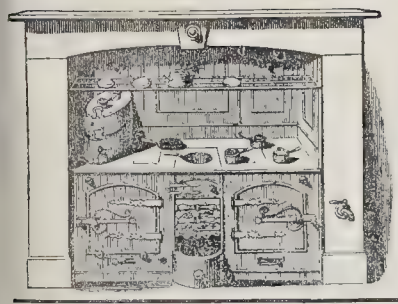
Best Sheet Floor-brads, 15s. 6d.

Best fine Cut Clasp and Rose { 18s. 6d. 18s. 6d. 17s. 6d. 17s. 16s. 6d.
{ ¼ ½ ¾ 1 1¼ 1½ and 3 inch.

Sash Weights. Air Bricks, 3s. per doz. Hooping for bond, 12s. per cwt. Cast Lark, 11s. 6d. per cwt. Sash Pullies, 2s. 6d. per gross.
Arnott's Ventilators, 4s. each. Elliptic Stoves, with double backs, 21d. per inch.
Register Stoves from 5d. per inch.

Improved Self-acting Ranges with oven and boiler { 30 32 34 36 inch.
{ 28s. 30s. 32s. 34s. each.

Best Self-acting Ranges, with oven and boiler, wrought bars and bright fittings { 36 38 40 inch.
{ 56s. 58s. 60s. each



An extensive stock of bright and black Register Stoves in every variety of design, at remarkably low prices. A large assortment of Rim, Drawback, Mortise, Iron Gate, and every other kind of Locks and Latches. Finger-plates, Levers, and Bell-pulls, en suite.

BAR, HOOP, SHEET, AND ROD IRON. RAIN-WATER PIPES AND GUTTERS, ALL SIZES.

The Stock of this Establishment is too extensive to be described in the limits of an advertisement, and the most correct idea that can be given of it is by saying that every trade consuming ironmongery can here select whatever they require at WHOLESALE PRICES.

WALMSLEY'S new Show-rooms are now open with a Modern and Choice Stock of General Furnishing Ironmongery unequalled in variety, and all at unprecedented low prices.

FLAVEL'S PRIZE KITCHENER.

These Ranges are strongly recommended for their simplicity of construction and their economy and cleanliness in use.

The top forms a Hot-plate, and the open fire removes many of the objections which are felt to close Ranges.

They are made in all sizes, from 3 feet to 18 feet in width, suitable for large or small establishments.

They are admirably adapted for the Cure of Smoky Chimneys.

LONDON AGENCY REMOVED TO WIGMORE-STREET, FROM 92, JERMYN-STREET, PICCADILLY.

BENHAM AND SONS,
19, Wigmore-street, London.

TO GAS-FITTERS, ENGINEERS, BUILDERS, DECORATORS, &c.

F. P. M'CARTHY, 7, Beech-street, Barbican, begs to inform the above and other trades, that he is now SELLING, wholesale, all requisite FITTINGS for GASWORK—pendants, brackets, chandeliers, &c.; compo, tin, and iron gas piping, and bitumen in general; sheet zinc, galvanized iron, tin plates, iron wire, &c.; best lacquer, 1s. per gill. Old metals bought or taken in exchange. List of prices sent on receipt of stamp.—Observe, 7, Beech-street, Barbican.

TO BUILDERS, CARPENTERS, UPHOLSTERERS, SMITHS, BELLHANGERS, and the Trade in general.

IRONMONGERY WAREHOUSE, established for the exclusive supply of the above trades, at wholesale prices. JOHN YOUNG, Birmingham and Wolverhampton Agent and Factor, to Blandford-street, Manchester-square, London, running out of Baker-street, Portman-square.

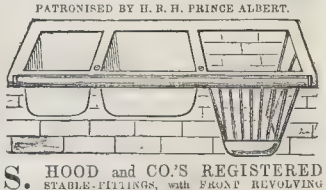
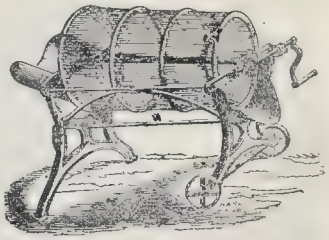
Roofs fixed complete.

BARTON'S PATENT STABLE
FITTINGS and ENAMELLED MANGERS.



These Fittings have all the newest improvements, and are the only Patented invention of this description. Also improved Stable Fittings, with Rack, Manger, and Water-trough attached. New Pattern Manger and Water-trough combined. Corner and Straight Mangers. Plain, Enamelled, and Galvanized Stable Furniture of every description. Iron Gates, Railing, Hurdles, Sheep and Game Wire Netting, &c. JAMES BARTON, Ironfounder, Smith, &c. 270, Oxford street, a few doors East of the Pantheon.

COTTAM'S ENAMELLED MANGERS.—These Mangers are universally approved of, they obtained the Great Exhibition Prize Medal, are constructed in the best possible manner, and have all the latest improvements. Registered and Patented. Every article in Stable Furniture on show. COTTAM & HALLEN, 2, Winsley street, Oxford street, London.



PATRONISED BY H. R. H. PRINCE ALBERT.

S. HOOD and CO.'S REGISTERED STABLE FITTINGS, with FRONT REVOLVING ROLLER, plain or enamelled.
Castings Warehouse, 81, Upper Thames-street.

TO ARCHITECTS, SURVEYORS, PLUMBERS, BUILDERS, &c.

HAYWARD TYLER and CO. No. 85, Upper Whitecross-street, St. Luke's, ENGINEERS, PLUMBERS' BRASSFOUNDERS, and Sole Manufacturers of "M'Gumble's Registered Model Water-closet." This Water-closet is the most simple in its principle, the most improved for high services, and for flushing without the usual service-box, cistern, valves, &c. From its construction all possibility of external leakage is prevented.—A diagram of the above may be had on application, or the closet inspected at the Manufactory, as above.

FRANCIS ARDING, Engineer and Iron Founder, Albert Iron Works, Uxbridge, Middlesex, begs to draw the attention of Builders, Contractors, and others to the above useful Machine, manufactured by him, for sifting sand, gravel, lime, ashes, &c. by the use of which one man and a boy can do the same amount of work as six men using the common sieve.
Price, delivered in London,—

BRADBURY and EVANS, Printers and Publishers to the Crystal Palace Company, 11, Bouverie-street, Fleet-street.

THE MOST CORRECT AND CONVENIENT.

By her Majesty's  Royal Letters Patent.

(Sealed, the 6th day of December, 1853.)

J. MOLD, for Improvements in Apparatus, Tools, or Instruments required to adjust different species of works in operation, to raise, structures, edifices, or frames, and other mechanical purposes, suitable to all species, for greater facility and adjustment, from a surveyor to the meanest capacity. Also, a Model of a Double Spiral Staircase, &c. suitable where required. The meeting of persons, &c. in ascending and descending are entirely obviated, with other advantages. Every particular may be known, the whole inspected, &c. for sale.

The Patentee, Mr. Mold, Model Manufacturer, confidently recommends the above to the notice of all persons connected with mechanics & operations. The Model is to be seen, & will be presented by the Patentee to any gentleman, if required, by none.

Address, J. MOLD, No. 9, Portland-terrace, Westmoreland-road, Walworth, near Camberwell Gate, Surrey.

N.B. A small fee will be required, in proportion to distance.

TO DRAUGHTSMEN AND CIVIL ENGINEERS.

LOANS GRANTED.

LONDON EXCHANGE ADVANCE FUND, 2, Adelphi-terrace, Strand, facing the river.

TRUSTEES.

The Right Hon. Lord Erskine. Sir Edward Graham, bart.

£5 to £50 advanced on personal security. Bills of Exchange discounted. Five per cent. interest on deposits payable in January and July. Forms forwarded on receipt of twelve postage stamps.

The Builder.

SATURDAY, JUNE 10, 1854.

ON the date which heads this notice our energetic and much reverenced Queen will formally open the Crystal Palace at Sydenham, surrounded by, we hope, a mighty crowd of her faithful and loving subjects. This visit must be regarded as a graceful homage to private enterprise directed towards the improvement and elevation of the people. In no other country in the world could such a structure have been raised in such a way; and we doubt whether, even scientifically and artistically viewed, such an effect could have been produced elsewhere in the same space of time.

The building itself is a marvel,—a triumph of engineering skill,—and demands for all who have been concerned in producing it the warmest praise. Standing beneath the centre transept, and gazing up to the arched roof, 170 feet above you, spanning a width of 120 feet, the effect is overwhelmingly striking, and the difficulties which had to be overcome rise before the mind, and add the feeling of wonder to that of admiration.*

We shall not be suspected of unduly flattering Sir Joseph Paxton, Messrs. Fox, Henderson, and Co., or Mr. Fuller and the other directors: we have not scrupled to make such observations on occurrences during the progress of the works as our duty seemed to render necessary, without reference to the way in which such observations might be received by these gentlemen. They themselves, at all events, will give us credit for sincerity when we offer them our heartiest congratulation on the completion of their giant work thus far, and point to the building as an achievement, in the main, which must always redound to their fame.

We need scarcely say that much still remains to be done, and that the future of the undertaking will depend on decisions yet to be come to and steps yet to be taken. The directors will have to give no ordinary amount of thought, ability, and application to the matter, in order to obtain actual success. A large proportion of the general public will, probably, be disappointed when they first visit the Exhibition, and will have to be taught to appreciate what is there. The manufacturers must be led to co-operate more warmly than they have yet done: and the educated portion of the public must bear in mind that this may be made the most powerful educational institution in the world, and is entitled to their best support and attention.

The general appearance of the interior is very charming. As we expected would be the case, now that the green foliage is introduced, the red colour of the pillars is seen to be very agreeable, and the eye greedily wanders on refreshed and invigorated. The building has scarcely such an effect of length as the old structure in Hyde-park, even with due allowance for the actual difference, and we are disposed to ascribe this partly to the fact that from the form of the roof and the close occurrence of the ribs, slight as they are, no glass is seen in the roof of one half of the building, looking at it from the other, and the result of course is that the end is in appearance brought up closer to the eye. The collection of sculpture will demand from all students many examinations. Never before, and in no other place, has such a *ramassement* of the works of all periods and of all nations been seen; and the architectural courts must be studied one by one with guide-books and correlative aid of all sorts. We hope, by the way, it is the intention of the directors to affix name, date, and even history, to each statue, and model, and tree. Unless this be done, a great power of instruction will be given up.

The manufacturing courts will scarcely be in a complete condition for exhibition on Saturday, but they will be nearly all in shape,—one or two of them, by the way, very ugly shape. The fountains in the nave will doubtless be in playing order, but the great water-works outside must be postponed for a future gala. The models of extinct monsters of time gone by will probably be seen basking in their proper element, and will be considered, we have no doubt, one of the most extraordinary features of the establishment. The Icthyosaurus, the Plesiosaurus, the Megalosaurus, and the Iguanodon follow each other in proper succession, some of them recalling to mind the American compound, half-alligator and half-earthquake. To get some notion of the size of these, you may be reminded that the Iguanodon consists of four iron columns 9 feet long by 7 inches diameter, 600 bricks, 650 5-inch half-round drain-tiles, 900 plain tiles, 38 casks of cement, 90 casks of broken stone, making a total of 640 bushels of artificial stone, kept together by 100 feet of iron hooping, and 20 feet of cube inch bar! All will doubtless agree with the King of the Belgians, who, when viewing these gentle animals with the Queen, congratulated her Majesty with great earnestness on no longer having such subjects in her dominions!

But we must leave generalities. In our present number (p. 307) will be found a view of part of the nave looking towards the north from a point a little to the south of the centre transept. On the left hand, or west side of this half of the nave, are formed the courts of ancient architecture,—Egyptian already commented on; Greek, Roman, the Alhambra, &c. due to Mr. Owen Jones, to be referred to hereafter, and the Assyrian; while on the right hand side, still looking north, will be found the illustrations of modern architecture—Norman, Byzantine, Gothic, Renaissance, and Italian. On the left hand side of the central transept the dais has been erected for her Majesty, and behind this rises a mighty amphitheatre of seats for the band and singers, who will speak for the nation when they say, with their thousand voices,—

God save the Queen.

We give also a view of the two Egyptian sitting figures, previously described, p. 262, with part of the avenue of Andro-Sphinxes leading to them in the western half of the north transept, one of the most striking portions of the collection, whereon Mr. Bonomi has brought all his knowledge to bear; and then, first noticing the extraordinary beauty and power of the face of the Sphinxes as painted (fixed as Fate, calm as the Eternal), and offering our best wishes for the success of this most important undertaking, we step into the ASSYRIAN COURT, and continue those more special observations which we have proposed to ourselves to make.

It is not our purpose to combine a history of architecture, with the short notices which we can now give of the architectural courts at the Crystal Palace. All that we hope to do is to present them to our readers as aids, towards the solution of questions in æsthetics which we regarded as amongst the most important of the time, and to direct a larger share of public attention, as well to the interest which would be found in the study of art in architecture, and the knowledge of its history, as more closely, to the fact of the real vast extent of the field in each group of styles, of which the best of the courts is but the slight indication. In the article on Egyptian art, we showed sufficiently, that particular systems are to be viewed as embodied in numerous structures, many of them of vast size, designed for opposite uses, raised at intervals of time, and situated often at long distances from each other. Considering the importance to professional architects, which we think even the popular branch of our subject has, we might well ask to be allowed to set down at greater length, what has still been insufficiently pointed out through other channels. Not only are there important styles, to which no space could be given, as the ancient Indian, the modern Indian, and the Chinese, with many which it would be interesting to inquire into, but of which we know little,—but, some of the best known general divisions include several opposite, though contemporaneous forms of treatment. The change of site, new materials, the particular form of municipal government, may produce those differences which are presented by the cities of Northern Italy; and the individual taste, or even humour of an architect, not only will be seen to give different characteristics to every work, but positively should do so for the attainment of breathing expression in art.

Much of the accurate information which we contemplate will, we hope, be diffused by the Handbooks—being issued whilst this comes before the eye of our readers; and we hope that the competent men whose names are appended to them, have had sufficient time to achieve this one of their multifarious duties,—for it is second to no other in importance. The public has, however, to be made to know, that attention, study, and thought are simply required—to appreciate art, and to understand its history,—just as they are in other fields of interest. As it is, many of those even who are considered able to appreciate an old picture, have, as regards a work of architecture, to be taught *to see*.

Further, it is our duty to point out, that although the architectural courts have been entrusted to no unskilful hands, the chosen expression of style or character is not always in unison with the opinion of authorities, also not incompetent. The difficulties of the modern railroad principle of imparting knowledge—whether through the medium of book illustration or model—are plainly these,—that, if only certain examples can be given, the impression is necessarily partial, and therefore wrong,—if something be *designed* to stand as the type of a class, the teacher is open to the accusation of giving his own impressions rather than facts. In some of the Sydenham courts, the one principle has been adopted, and in some the other; and what the public should understand at the outset, is in what particular courts each system has prevailed, and also that there are disadvantages in both.

The want of a uniform vehicle of representation,—that is to say, the choice of imitative material universally, or that of the material of the original reproduced, seems also to involve a few points for question.

After what we have remarked heretofore, we need not say, that these difficulties of illustration should especially be considered in the case of the courts which call next for notice. Those who have had the direction of them, had to choose between a form of expression manifestly incomplete, and that which was to some extent conjectural. Thus they have been attacked by writers who were not aware of the documentary evidence for the commencement of the course chosen, if not for the exact conclusion which has for the present been adopted. Our opinion on several of these points, as well as the inquiry into the evidence, we must reserve for a more convenient opportunity. But there are some questions which we must not leave altogether untouched.

So far from there being any want of judgment in the disconnection of the Assyrian Court with the chronological series, the outlying position was perhaps the best that could have been

* Some of our readers may wish to be reminded of the other dimensions of the Crystal Palace. The entire length is 1,608 feet; the length of centre transept, 408 feet; length of end transepts, 312 feet; the width of nave is 72 feet; the width of centre transept, 120 feet; the width of end transepts, 72 feet; and the projection of the bays is 8 feet. These dimensions, it will be seen, are all multiples, or parts, of 24 feet, the distance from column to column throughout. The height of the first story, including the girder, which is 3 feet, is 22 feet; the height of the second story (including girder), third story, fourth story in centre transept, and fifth story in transept, 20 feet in each case. The ribs of the roof spring at 8 feet above the upper galleries in nave and transepts. The height from the floor to the centre of the roof of the nave, and of end transepts, is 106 feet; and the height from the floor to the centre of the roof of the centre transept (as already mentioned), 170 feet. The diameter of the octagon columns is 7½ inches.

selected,—considering that no definite opinion can yet be arrived at, as to the date of the original remains. Mr. Fergusson has, indeed, concluded that the oldest Assyrian buildings yet discovered, which he says are the north-west and central palaces at Nimroud, and the palace of Kalah Sherghat, were built by the dynasty which immediately succeeded Nimrod, and consequently, he says, were contemporary with Abraham and the shepherd kings of Egypt, and that the date was about twenty-one or twenty-two centuries before our era, or at the supposed time of the building of the great pyramid.

The palace of Khorsabad, Mr. Fergusson believes, was built by Ninus, B.C. 1341, and that at Koyunjik by his successor; whilst the buildings at Persepolis were the work of princes of the Achæmenian dynasty,—probably Darius and Xerxes—about eight centuries later. Surprise has therefore been expressed by some, that the remains should have been referred, all to the same architectural type. There are, however, very striking points of resemblance, as in the sculpture of the winged animals at Persepolis, shown in Sir Robert Ker Porter's account, and those of which there are specimens in the British Museum. The positions, attitudes, and especially the treatment of the curled hair, are the same. On other grounds, there are strong arguments in favour of the structural principle of restoration adopted by Mr. Fergusson. But as to the high antiquity of the Nineveh sculpture, and the precise connection of the Assyrian and Persian styles with those of other countries, there are difficulties which may long wait to be removed. It by no means follows that the monument of an individual, or the commemoration of a great event, is of a date approximate to the life of the person or the incident recorded. There are many who unthinkingly set down the monument erected to Chaucer by Nicholas Brigham, as one of the oldest in Westminster Abbey. The different dates of the architecture of Nineveh and Persepolis may be as widely apart as is supposed, and the style of architecture may have endured as it did in Egypt, though this we think should scarcely be assumed without historic evidence. But it should be understood that greatness of conjecture is not so much involved in the union of works such as those of Nineveh and Persepolis, as in such combination, consistently with regarding them of opposite dates. There is no doubt of the connection, in some way or other, of Assyrian, Egyptian, and Greek art. Which way the course of progress flowed, and what reflexes of influence there were occasioning the identity, or the derivation of ornaments, has yet to be established. Everything may have happened as Mr. Fergusson supposes; though he speaks positively on some points, like most enthusiasts. Without better evidence than history now affords, it is certainly difficult to understand how Nineveh can have been the site of extensive new palaces during the time of the Persian sovereigns. The duration of all manners and fashions in the East is very remarkable. There are things sculptured on the marbles which would stand for illustrations of peculiar customs of the present day.

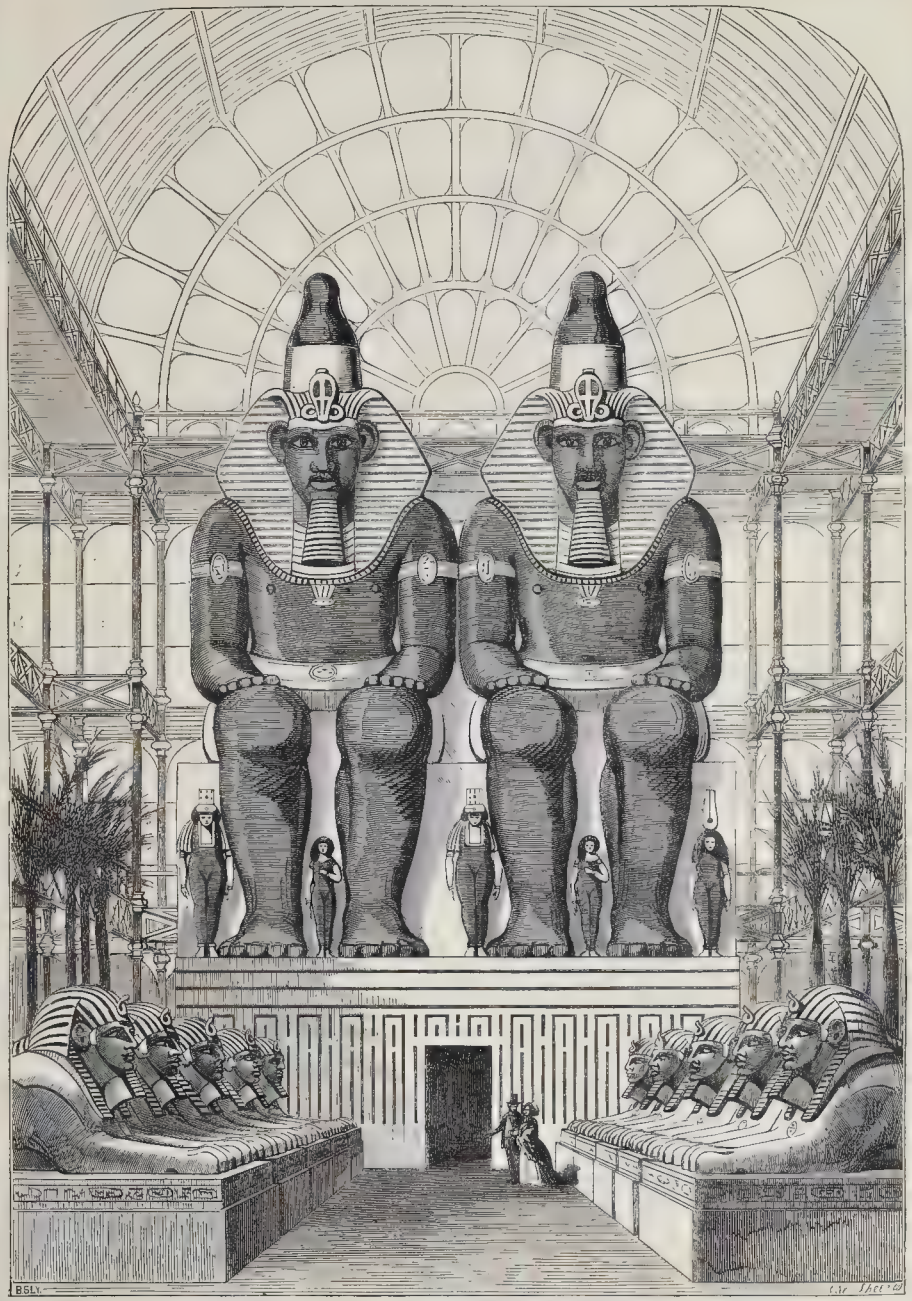
We may say that Sir J. Gardner Wilkinson has expressed a decided opinion against the extreme antiquity of the sculptures, and we have before alluded to that of a very competent authority, who regards the Greek temple at Ægina as older—by perhaps seventy years—than the Nineveh marbles.* Diodorus Siculus records that a colony of Egyptians followed Cambyses from Egypt, and the question is whether the style and the character of ornament do not indicate a date at least not earlier than such an event. Among the most prominent forms and ornaments, the arch, the zigzag, the rosette, the guilloche, the anthemion or antefixa, the echinus ornament, the astragal ornament, dentils, and battlemented parapets will be seen—either identical with such forms as we found in Egyptian art, or obviously connected with them. Speaking of the winged globe of Egypt, to which the common Assyrian emblem has too direct resemblance for the connection to be mistaken, the author of the "Account of the Ancient Egyptians" says:—"This fact would suffice to disprove the early date of the marbles hitherto discovered, which are in fact of a period comparatively modern in the history of Egypt; and recent discoveries have fully justified the opinion I ventured to express, when they were first brought to this country: 1st. That they are not of archaic style, and that original Assyrian art is still to be looked for. 2nd. That they give evidences of the decadence, not the rise of art; and 3rd. That they have borrowed much from Egypt, long the dominant country in power and art, and will be found to date within 1000 B.C." On the other hand, we observe, the same writer argues that "Man *attempted* sculpture long before he *studied* architecture," and that bas-relief may be considered the earliest style of sculpture,—views with which those of Mr. Fergusson as to the superiority of the sculpture as compared with the architecture in that which he regards as the early period are consistent.

It will be seen, that much of the difficulty of the question would be removed, by the ascertainment of a late date for the destruction of the Assyrian empire under Sardanapalus. This event has been placed as late as 606 B.C.; but it has also been given as early as 900 B.C.

After all, can we come to any certain conclusion as to the origin of any of our best known forms? The more we inquire into these questions, the more dangerous does it appear to say, —"Here, and at such time, arose such an idea." Germinating from invisible atoms, there accumulates a power of thought which seems to leap over impassable oceans and trackless deserts, and sets at naught the established *cordons* of despotism and priestcraft. A nation is conquered, but subjects its rulers by its arts. Greek and Persian, Christian and Crusader, meet but for deadly strife, yet interchange the while the ideas which make up the progression of art, and help the work of civilization. Therefore, why should we inquire into features of resemblance between the architecture of Egypt, Assyria, and Greece, except to show how many points beyond those generally mentioned, should be taken into consideration?

Whether the architecture of Nineveh be of early date, may have been doubted; but, few have hesitated to receive the opinion that the architecture of Greece, and especially the Ionic order, was in great degree derived from Nineveh, or at least Persepolis. There are volutes in the capital of the column—four on each face as generally represented,—and even two on each face, in one fragment drawn by Sir R. K. Porter. There are flutes to the shaft, with fillets; the doorway to the temple of Darius resembles that of the Erectheion; some of the Greek ornaments of which we have spoken, found indeed, though long unsuspected, in Egypt, are the constant ornaments here; and the very marked feature of Grecian architecture, the pediment, is seen in the tomb of Cyrus, at Passargadæ. But what of that? the volute exists there as it does in all styles, and in the works of nature. It is seen, indeed, attached to a fan-like object, near to the head of an Assyrian deity in the British Museum, where, moreover, the two volutes are joined by the descending hem, as in the Erectheion capital. It is also seen on the rail of a chair, and in many of the decorations at Sydenham. The master-stroke of mind was to apply the form as we see it in the Greek building, not as a mere appendage to the capital.

However, it must be allowed that one of Mr. Fergusson's chief illustrations, a bas-relief from Khorsabad, showing a small building with true voluted capitals, evinces the same application as that of the Greeks.



In the column at Persepolis there is in the capital, much more that resembles the Egyptian, than the Greek. One portion of it in the centre, with a slight addition to the length, would have the exact form of section of some of the Egyptian capitals, and the whole has that fragmentary appearance, characteristic of certain works of late date, such as Sir J. Gardner Wilkinson calls Composite. Two of them we mentioned in our last, as reproduced in the Egyptian Court. The base, which, nevertheless, has a form which might be highly suggestive, is not at all unlike an Egyptian capital inverted. Such caprices seem to have been indulged in, in Egypt occasionally, as they were in modern Rome.

But the question as to the origin of the Grecian Ionic has still to be stated. The earliest period to which we could ascribe the Persepolitan architecture would be the time of Darius, about 520 B.C. Whereas the temple of Artemis, or Diana, at Ephesus, said to have been the first building in which the Ionic order was used, had its columns erected by Chersiphron and Metagenes, about forty years *earlier* than the date last mentioned. It is therefore argued by some, not only that the architectural works of Nineveh and Persepolis are of comparatively approximate dates, as well as of the same type, but that the whole Eastern style is just as likely to have derived details from the Ionian Greeks, as the Greeks to have adapted from it,—and we do not know that there is anything further than these conjectures for our readers to take the balance of. Bull-headed capitals are found in the temple of Apollo, in the island of Delos. The most striking resemblance in a matter of detail, is seen in the ornament like the Greek honeysuckle and lotus. Sometimes, this ornament is arranged as in the capital of the Erectheion; sometimes, as on the bronzes, we find a row of anthemions as decided as those above the cornice of the Choragic monument of Lysicrates.

The visitor to the Crystal Palace, with Mr. Fergusson's book to refer to, before and after his visit, or with the notice and illustrations which were given in our ninth volume, will have no difficulty in understanding that which it has been intended to show. The clever mode of solving the problem of the existence of partition walls 16 to 21 feet thick, has not, however, had full justice done to it at Sydenham; for so great a loss of space could not have been afforded. The great hall of the palace of Khorsabad, reproduced, 70 feet by 30 feet, therefore, is separated from the nave by rooms, in place of masses of wall, and which have to receive light from above. From below, however, the discordance is not perceived. The great hall has two principal entrances, and winged lions and bulls 12 feet and 14 feet in height, and figures of giants strangling lions, supposed to represent Nimrod, and holding the weapon considered to resemble the Australian boomerang, are placed at these and the other entrances. The two smaller rooms are for sculptures from Koyunjik and Khorsabad, but are at present empty; and another room at the north end contains miscellaneous sculptures. The great hall contains sculptures from Nimroud. The roof is supported by columns, with capitals partly in the form of bulls, and partly of the voluted character, thought to have formed the suggestion for the Greek Ionic. The columns are principally supported by the wall of the substructure; but in the wider space of the great hall there are taller columns from the floor. The ceiling is divided into compartments, after a manner which may be correct here, but which was adopted in countries far from Assyria many centuries later, and the compartments are filled in with painted figures and devices. A very elaborate system of ornament and polychromy prevails throughout, and the propriety of it will no doubt be questioned by many. Few, however, have taken the trouble to observe how completely the forms of ornament are authorised by the remains, or the Persepolitan structures which have been associated with them. There are ivories and bronzes enough to show that the arts of Assyria had no contemptible position; and bricks painted with figures and devices have been found in great numbers. Painted architecture is characteristic of the East. But the colours chosen will strike many as very dark; and at least they are more so than those on the bricks. The artistic character of the sculpture, we may remark, is, to our mind, much interfered with.

As the readers of the *Builder* know, Mr. Fergusson sought to restore the Assyrian architecture by adding to the walls, sculptures and ornaments which were the sole remains in the one case, and to the pillars, doorways, and windows in the other, what each happened to want, and what the other appeared able to supply.

* We would take this opportunity of expressing our opinion of the value of Mr. Wornum's lectures, which we should be glad to see as well attended as they appear to be by others. They contain the result of much patient research and afford some new and important views which should not be disregarded. The reports in a former volume are, we believe, the only ones that have appeared.

THE SITTING FIGURES IN THE CRYSTAL PALACE.

The arrangement of columns, and the admission of light through them in an upper story, so novel to English eyes, appeared to be the only one which could be reconciled with the existing remains, and was supported by the analogy of other Eastern buildings. But it is more to the purpose to draw attention to a paragraph in our last number, in which Colonel Rawlinson reports the discovery of further remains, one of which represents the character of the architecture. The second story is here shown to be built with pillars which have their bases on the backs of lions and human-headed bulls. A bridge with three pointed arches is also said to be represented. With reference to the use of the arch, one example has been found, and we may remark that one of the slabs drawn in Mr. Layard's last work shows something like a building with several domes varying in character.

The curious speculations which would arise out of the study of the bronzes might be numerous. A head like that of the Egyptian Isis, a head-dress like the crown of Upper and Lower Egypt, cartouches, sphinxes winged like the Greek, but crowned with a circular emblem like that appropriated to Egyptian deities, and

having the addition of what are like the sacred asps, and more decided imitations of the asp emblem—all are open to much learned argument.

The use of Mosaic—recently discovered—is to be illustrated. The fir-cone ornament, and its resemblance to the thyrsus of Bacchus, the sacred tree, and the meaning of the winged lions and bulls, are full of matter for speculation.

The practical architect, too, may wonder how mounds of earth, judged to be artificial from the representation of the process of raising them, can have been made to support durably the heavy superstructures.

The lever, the wedge, the saw, the hatchet, and other tools, were in common use. When Mr. Layard moved the great bulls and lions from their sites, the plan adopted differed but little from that followed in the original erection; and the visitor to the works at Sydenham Palace, who has seen the statues moved easily along by placing a number of pieces of greased lath for the pedestal to pass over, will have seen done much in the same way, what is represented in the bas-reliefs of the Nineveh marbles, as also in the tombs of Egypt.

THE ENTITY OF THE IONIC ORDER AND VITALITY OF ALL THE ORDERS.*

NOT only may each new edifice have capitals of a new composition, but it would touch, I apprehend, no essential attribute of the style, or render less clear the pure Attic note, if in a portico every capital was made of a slightly different design.

There is sufficient scope for this, at least in the Corinthian: when the capital, as in the Doric, is to give the fullest and clearest expression of its office, we are limited in its decorative development; but when, as in the foliaged order, matter is added for ornament sake, then the degree of possible diversity is almost infinite, as may be well conceived, if we consider the diversity within the circle of beauty that is produced by a few similar features in the human face, and take into account the ten thousand suggestions for arrangement and composition that nature supplies to the designer in the richness and brightness of her forms and variety of her phenomena.

And what is said in reference to the column or capital applies, with some qualification, to the entire order. It is true that in the works of the Greeks we find but a few elementary forms employed in decoration, as the wave-scroll, the fret, the astragal, the anthemion, the guilloche, &c. and that its structural lines are expressive either of gravitation or support, and cannot be applied arbitrarily as decoration, or with reference to artistic effect only. In the architecture of the Greeks beauty was the offshoot of a stern wisdom which breathes from all their works: they weighed the exact value of each architectural word they used, to the minutest shade of distinction: the ovolo or echinus, for example, was a conic sectional curve, indicative of great energy of support, and every other line bore part in expressing some structural function, with more or less intensity, according to its position.

Structural fitness, however, is not destructive of variety, for which there is still great scope,—variety of form and proportion, and of effect of chiaroscuro; which will look the more beautiful in the radiance of truth,—truth itself the highest poetry, and that sheds a brilliancy, glow from where it will, that nothing else can give: the new in architecture may be struck out by the man—truly original and individual—who has penetrated to the core of the old, and whose mind is filled with the enchanting imagery and luxuriant fretwork of nature, and inspired with its teeming floral and vegetable life.

Let our architects free themselves from all prejudice and prepossessions, both national and religious, and avail themselves of all the vast and legitimate resources of their art, and they will find scope for vigour of thought as well as mastery of hand, and be enabled to exhibit their own emotions, and stamp the impress of their individuality on their works as distinctly as on their handwriting. As to decoration proper, what is there in post-and-beam architecture to forbid the architect, in the extending of such a system to the multifarious purposes of modern English life, to gather the ever new and eternal that blooms in forest and field, and introducing into its ornamentation all the generic forms of nature, more or less conventionally or abstractly treated? That trabeated architecture is necessarily monotonous and inflexible in its forms, and its adaptability to different purposes, as some have asserted, merely a mechanical possibility of joining in various ways a number of cold, inconsistent, and unrelated parts, is disproved by the endless variety of detail and proportion that was exhibited by a kindred system, the epistylar architecture of the Nile, to which the Greeks themselves were so deeply indebted, and which, moreover, largely and successfully employed natural objects in its embellishments; flower and foliage decoration growing round the bases of the columns, and clinging to the various features like living plants. Though the Athenian temple was the only pure and perfect expression of the epistylar spirit, and in that form alone has the Greek architecture been given to the world in its simple integrity, yet as its component features and elements are objects of genuine beauty, and as such destined, in some way or another, in some modification of their forms, to be "joys for ever," and as the laws of their combination—those of gravitation and support—are immutable laws of the universe, —no vicissitude in the condition and circumstances of society can render it obsolete. Its correctness, which, strange to say, has been urged against it—all the correctness essential to it—it possesses in obedience to natural laws,—to laws which have their basis in truth, in the principles of the nature within us, and in a right perception of the beauty of the nature without; and such correctness may not only consist with the highest life and progression of which any architecture is capable, but it is conducive to its life and vigour and to every excellence.

From the slumber of ages, at the talismanic touch of art-power and *occasion*, it will start into life ready for the highest and the humblest uses, germinate anew, and put forth branches to meet every requirement of our present state of development. The Romans, when they introduced the arch and dome, and their modern successors, when they invented and added the balustrade and other features, so far proved its germinating power—its capacity for growth and amplification, and of being applied to new purposes. Like the seed of a tree which is capable of retaining its principle of life for centuries and is ready to germinate whenever the suitable conditions shall be offered, the architecture of the ancients, brought under the vital power of art-genius, may spread out its shoots anew, and increase in ramification, till every institution and purpose required by our complex civilization finds under its branches a fitting character and expression. Supposing, however, there was anything essentially inflexible in the structural constitution of this architecture—and its inherent, progressive, and advancing power was found to be but feeble as regards the orders themselves—we are surely sufficiently unconfined in what is superadded as adventitious ornament, in which all the vast resources of nature are as freely opened to the Classic as to the Gothic architect, and not only organic beauty, or beauty of organisms, but pure beauty of abstract form. And though this must be all employed in strict subordination to, and sympathy with, what may be called the organic life of the building, the beauties of sculptural decoration breaking forth where constructive principle points out the place, and has prepared the soil, yet it is evident that here is a field that is absolutely infinite for beauty and variety, for episodal visions on frieze and pediment, pier and niche.

It is vain to urge against the Greco-Roman architecture, that it is not the natural growth, and that it must, therefore, be unsuited to the climate, of our country: for what was man's intelligence—his faculties of adaptation, his powers of synthesis and analysis;—what were these given him for, if he is to be content with what springs beneath his feet, and may not possess himself of the inventions of other times and nations? The artistic mind is a mirror to reflect not only the realm of nature, but that of extant art-production; and what is brought through this into the light of life, is true architecture, from whatever source it emanates. To deny this is to ignore a power that has ever been exercised in our art, for it is a fact in its history that every nation took the germ of its architecture from some people preceding it in the race of civilization, and transplanted it into their own soil; and that no style has spontaneously sprung up among the people that practised it. The Greek and Roman architecture thus grew from the Egyptian and preceding architectures. The English, French, and German Gothic thus grew out of the architecture of Rome, like the French, Italian, and Spanish languages from the Latin. Moreover, a common style, of one common origin, has more than once prevailed in widely different climates of modern Europe. I refer to the Romanesque and Gothic, if which styles were capable of receiving climatal adaptation, it may be asked why may not others be brought under the same influence? If the Pointed was adapted to the south, why may not the Horizontal be moulded to the influence of the north? Certainly the advocate of Venetian Gothic, a style which would require northernizing as much as Classic, as the style of this day and country, can make no objection to the post-and-beam system, on the ground of its southern origin.

But climate, it must be noted, is only one of the influences by which our architecture is to be moulded. There is a voice within that must be heard by the architect, and have influence on his choice of style,—a voice arising from his peculiar bent of mind, his natural predilections, his instinctive love for certain forms and combinations, or from his acquired and cultivated taste, refined by communion with universal nature, and by genius living and dead; and this may lead him, though born in Finland, to be a classic architect, and to prefer the horizontal and columnar principle to the perpendicular. For architecture is the material interpreter of the soul of man, which has affinity with all things; with the extant products of art, as well as with the surrounding objects of nature. It is the expression in stone and wood of the tastes and sentiments, refinements and elegancies, the intellectual as well as the physical wants of the age—wherein the innermost life of a nation, its religious sentiments, its loftiest poetry should find utterance. To say, as Mr. Ruskin has said, that the savageness of the north should be reflected in its architecture, and that the hyperborean architect is only acting naturally when he upheaves the rugged wall, and gives us "creations of ungainly shape and rigid limb, full of wolfish life," is to ignore the capability possessed by man in most climates, if not in all climates, of civilisation and refinement. The Gothic arch has its constructive and expressional advantages, and Gothic tracery its beauty, in one climate as well as in another; and classic forms, though they lose something of their charms by the absence of a southern sky, are abstractedly, I should suppose, as delightful to the cultivated mind in Stockholm as in Palermo or Rome.

From nature's bosom, it is true, generally speaking, all real architecture springs,

> "To soar and shine another, yet the same."

But diversity of climate and aspect of nature do not call so much for diversity of style as for certain other modifications which Classic and Gothic are alike capable of receiving; and the gradations of European architecture corresponding to "the zoned iris of the earth,"—"the variegated mosaic of the world's surface," should be in the ornamentation chiefly, and general character of composition, and need not touch those constructive principles on which style depend, and which the nature of our materials and scientific status of each country must be allowed to suggest. And those who declaim against its application to ecclesiastical purposes on the ground of its being a creation of paganism, and expatiate on the Christian associations and symbolism of the Gothic, should be reminded of what this Christian architecture, both in England and on the continent, owes of beauty and of power to Mahommedan influence.

I am not unmindful of the difference between

* See page 163, *ante*.

ancient and modern civilization,* and the consequent difference between the architectural problem to be solved by the moderns, and that which fell to the lot of the ancients. While the latter had to perfect a style in the construction of one—or chiefly one—kind of edifice, we have to take as a central essence a style already formed for us, and apply it to a hundred different kinds of edifices, like producing so many new styles. While Christianity breathes a new and higher life into our temples, which are more important objects to us than they ever could be to Greek or Roman, and call for the highest ministrations of architecture, the arts of design are required in other regions, and must not be confined to the service of religion; nor, as the tide of progress sets in our day from the few towards the many, can palaces, as in Italy, be monopolizers of architecture, which, participating in the revolutions by which life and the world change their aspects, is to assume, Proteus-like, a variety of shapes analogous to our present complex civilization; reflecting the hue of different orders, professions, pursuits, interests, and embodying the wants, wishes, feelings, and ideas, of every class or coterie of society.

This extension and application of architecture to the diverse purposes of modern life, similar, yet unlike, it must be admitted, is not yet accomplished: it is the great desideratum in architecture, the ability to supply which is to be the test of its potent and boundless truth. When I say it is not accomplished, I mean it is not rightly accomplished; for the many purposes for which architecture has to provide are of different classes or kinds, and each of a different degree of importance in the moral and intellectual scale, and must be treated accordingly, not, as at present, all alike, with columns and other of the sublimest features and embellishments indiscriminately used,—to markets and hotels as lavishly as to temples and palaces. For different functions there must be different organs, and while, like objects of nature, each edifice is arrayed in the unfading beauty of truth, artistic treatment must be modulated in strict conformity to its destination. Through the works of a town or city an affinity should reign, which would be secured by the pervading spirit of the style; but their beauty—the beauty which constitutes their architecture—should be of various kinds, and of different degrees.

This, the task of the future, I believe, however, the architecture I am advocating has the inexhaustible fertility of resource to enable it to accomplish. I believe that the architecture which we derive from the Greeks, possessing in its beauty and its truth the germ of the successive developments of the architectures of the world and of all time, and the capacity of embodying and rightly using in its decoration all forms of beauty suggested by geometric science, and all organic life from the leaves and flowers of the field, through all the various tribes of animals, including the divine form of man, can accommodate itself, without violation of structural consistency, to all the various requirements of modern life, and will expand along with our civilization, literature, science, and other arts, and extend in ramifications analogous to our varied social developments, and intellectual and moral institutions, proving itself as eminently adapted to a practical as to a poetical and monumental architecture.

I believe, also, that the broader it extends, and the deeper it is rooted in human need, and planted in truth, the higher it will rise, and the richer will its graces unfold; and that the more completely it is made responsive to the physical and social and other calls of the age, the more touchingly it will address the heart and brighten in the rays of the imagination.

Thus becoming a petrifaction, a crystallization, so to image it, of the life of the nation, we shall have in this architecture a truly national style, one that is not Roman nor Greek, but British. In reference to its origin, we may indeed, as I remarked in a former paper, call it Anglo-classic, as the same original elements similarly treated on the Continent may be termed Gallo-classic, Italo-classic, Tedesco-classic, and so forth; but it would be in the proper sense of the word our own, and an architecture that may run a career to rival any of the old styles of the world. For with the vast treasures of the past at our command with the new materials and methods bestowed by science—with our increased insight into the geometry and æsthetics of ancient art,—and above all, our successful researches into the principles of the Supreme Architect, we should be able to strike out forms and effects of beauty undreamt of in the architecture of the old time.

Let me not be misunderstood: I am but vindicating a style from misrepresentation—not prescribing it as a panacea for all the evils of the day. It is not the adoption of this or that style, nor the prevalence of a universal style that is to redeem our architecture from its present thraldom, or upraise it from its debasement. Pure, and truthful, and noble architecture must come, not from Athens or Venice, but from the earnest soul, the large heart and penetrative mind of the artist. The regenerating influence and vital agency that are to give life to its mechanism must arise from individual practice, individual energy, directed by individual truthfulness and sincerity, enlightened by improved insight into the nature of art. Architecture is like the human frame, which is but the mechanism for the revealings of thought and emotion; and no system, be it Gothic, or be it Greek, has life in itself, however perfect its organization. Like natural organization, it is merely a disposition of parts through which force may be transmitted, and in which no effect can ensue till it is filled and animated by some energy from without. This energy, the energy that is to inform and animate, to live and breathe, and burn in our works, is the unfettered thought of the architect, warmed with the Promethean fire of the imagination and the soul, and refined by purity of taste. As in the moral and religious economy reformation must come from within rather than from without, from the centre to the circumference, from the soul to the body, so the germ of a nobler system of architecture than at present prevails must be sought in an agency internal and spiritual. With this life-giving principle in operation, abundant unity and congruity will exist in our national works without a universal style,—a unity and congruity arising from the divine relations of the spiritual in man, and by which the offshoots of many minds, in the view of the susceptible and philosophical observer, will melt, as it were, into one, and manifest the truest consistency and harmony.

It is not, as some suppose, from the vastness and diversity of our materials that our present discordancy arises, but from our not, in using these materials, holding up the mirror of our art to its one true antitype, the great spectacle of nature and life. The latter affects us too feebly and finds too little response in our works, which if made, not specimens, as at present, of past styles, but the real vestments of the ideas and purposes of the age—true organs and embodiments of its spirit, they would harmonise with each other, as they would also with nature, and be worthy to take place as a supplement and "sequel to her original beauty."

SAMUEL HUGGINS.

* It would be well if this difference were kept in view in reference to other matters, through forgetfulness of it we go back even for emblems of institutions and arts to where we owe not a spark of inspiration; as, for instance, in a music-hall we elevate the lyre of Greece as an ornament typical of the science of sweet sounds. We must amend this: in a sculpture-gallery let the emblems and ornaments be derived from Greece if you will, in a law court, let the genius of Rome be honoured; but what has a modern concert-hall to do with the science of harmony as practised by classical antiquity? What inspiration in music do we owe to the lyre of Greece so long since, in the rapid and upward flight of music, sunk into oblivion and disuetude? The sources of our musical inspiration must be sought in the storm-swept chords of the heroic symphony, and wild surging melodies of modern masters; and if we wish to realise these in visible form, sculpture or painting can give the burly manliness of Handel, the quaint and graceful quietude of Haydn, the pensive youth of Mozart, and that union of man's energy and woman's tenderness that glows from the face of Mendelssohn: these are our art-symbols, our talismans of inspiration for music, and not the antiquated form that, as it now stands in some of our music-halls, suggests no other idea than that of a misplaced scraper or foolishly-constructed gridiron.—S. H.

BIRMINGHAM ART-EXHIBITION.—The Committee of the Fine Arts Prize Fund have decided on offering a prize of sixty guineas to the painter of the most meritorious picture in the forthcoming exhibition of the Birmingham Society of Artists. The Society of Artists have voted a donation of twenty guineas towards the prize fund.

THE VALUE AND IMPORTANCE OF ARCHÆOLOGY, AND ITS INFLUENCE ON ORNAMENTAL AND DECORATIVE ART.*

INTO the depths of archæology as a science my paper does not propose to inquire, but rather to consider the probable results and value of the fruits which have been, and which may be, laid bare by the energy and research of its professors. We propose to inquire by what means they can be best used for our benefit, and to what extent we shall become enriched by the wealth of the mine they have sprung.

The progress now making in this most interesting study is, indeed, gratifying to all who take any interest in the history of art; yet that much study and research is still necessary cannot be denied; and that systematic and popular explanations of its utility and probable results must be extensively published before we can prove to the world in general the importance and value of the science to themselves; and ere it can perform its allotted task, societies like this must be established in every town of importance, in union with, and having a systematic correspondence with, a central head, through which the researches and opinions of individual members may be arranged, digested, and classified for the instruction of their fellows and the public.

It is, then, at periodical meetings, where each member, however humble, may add his mite of information to the common stock, or by the workings of his mind, throw some glimmering ray upon our path, that we may build ourselves a name as earnest rational workers, that shall ultimately gain for the science the popular acknowledgment of its value. We may then hope archæology and its teachings will receive the gratitude and favour of persons in high places, and that, civilizing and moralizing as are its results, it shall cease to be contemned as *beneath* the study of those persons whose minds are really too narrow to grasp its subtle beauty. We may hope, then, if ever this desirable state of things shall arrive, that the masses of building which, mushroom-like, spring up round all flourishing towns, will begin to show some taste, and their proprietors be brought to recognise the extent of their duty to the public, and seek to recompense them for the loss of light and air, by their attempts to add to the beauty of the spot, and prove that their consideration is not alone confined to the amount of per-centage, the expenditure of their money will return.

The regret in this town at the loss of its finest remnant of antiquity† is so general, and the affection which exists for the miserable pile erected in its stead so small, as to lead us to hope that the inhabitants here are become, by the revulsion of feeling which such wholesale destruction engendered, good conservative archæologists without their knowledge. But if the inhabitants of this place have intuitively acknowledged the value of archæology, in its principles of conservatism, they have yet to learn its value as a teacher of correct principles of taste, and the manner in which it can be applied to our service.

And here let me observe, that though I strongly and earnestly deprecate copyism of any kind, I am as positively of opinion that it is only by an earnest study of the valuable remnants of antiquity we can hope to establish for ourselves such approach to perfection as shall hereafter give us a title to mark a period in the history of art.

To assume that the experience of ages is to be recklessly disregarded, and the principles which their practice must have developed, are unworthy of research, argues an amount of self-sufficiency in the promulgation of such sentiments as ought to render us extremely cautious of the amount of reliance we place in them. Yet the *study* of the principles and combinations of design to be found in the works of these past ages should content us: they are not fitted for reproduction—they constitute the language of art, and the student may as easily calculate upon producing a fine poem or essay in a tongue with

* Read at the North Oxfordshire Archæological Society, April 4, 1851.

† The original church of Banbury.

which he is but imperfectly acquainted, as a design worthy the appreciation of the world without a knowledge of them. In all civilized countries, for the preservation and exposition of the beauties and essentials of their tongue, its principles are analyzed, classified, and arranged under such rules as have been deduced from the finest examples of its employment, into a code or grammar of the language; a knowledge of which has to be attained by any person who undertakes composition in such language with any reasonable prospect of success.

Are not, I ask, the glorious piles of architecture and wonderful works of art, a tongue in which our fathers spoke to posterity?—with what eloquence I will leave our cathedrals and abbey churches to tell,—a tongue which may be called the language of art—a tongue so fine that we cannot choose but exclaim, "There were indeed giants in those days;" and I ask, is not the language in which they clothed their sublime and beautiful ideas worthy of our examination and study? and are not its principles worthy of research? and before we can hope to discourse elegantly in such a language, must we not study the grammar of its tongue? Where, then, are we to turn for the production of such a grammar, but to societies and unions of societies like this, where each individul glimmer of light collected and bound together, becomes (like the bundle of sticks) strong in the assistance they collectively contribute.

The discovery, then, of the principles which governed the creation of these works, and which parvaded every thought down to the smallest ornament, must be an earnest yet welcome task: this would enable us, not to walk like children in the footsteps of those worthies who designed them, but, like men, to take up the study where they were driven to abandon it, and prove that Art,—with the principles which governed the production of these works, and the appliances of modern science,—would make gigantic strides towards perfection.

That the good folks of Banbury have given much study towards the development of this question does not appear: at least in this room,* they have given no practical proof that they recognise a principle which has been deduced from the study of earlier works, — *That ornament should be organic, amd not violate the constructional parts of an edifice, or represent what does not exist.* I allude to the cornice. columns, &c. here attempted to be formed, which certainly practically refute that principle.

I know no modern practice has been more general than that here illustrated; but I hope we may now partially, and soon wholly, speak of this in the past tense. We have had in stained paper, imitations of oak, of mouldings, of flowers and figures, of marbles and granites, and have become so accustomed to these imitations, that we have expressed surprise at those instances where more correct taste has been employed. Yet, general as these things have been, few persons are in the least deceived by them: who, I ask, believes those lines of shadow are real columns, or that a cornice they apparently support? The intention is evidently a desire to convey that feeling. Look at the shadow they seem to throw; though even in this they defeat their own object, as the shadows often appear on that side which, looking at the position of the windows, ought to be in the highest light. And though no one believes in them, how often do we see such miserable attempts at decoration employed? To take no higher ground, there is an attempt to deceive us in these things, and shey become an abomination and a fraud! But surely our loss does not stop here: who shall say if we clothe our walls with such a deception, and delight ourselves in believing -however fallacious the idea may be, —we are giving them a character they do not deserve,—that truth itself is not practically injured by the attempt; and while such a loose system of morality prevails, we are likely to become deeply enamoured of the virtue *there* despised.

There is, too, a positive loss to art, in all cases where such deception is practised; for I unhesitatingly affirm, that a very much more pleasing and satisfactory result would have been attained had the walls been treated in a truthful and rational manner.

* The Mechanics' Institute.

The imitative style of ornament, which—with a faint conception of what was required—has been showered upon all objects, textile and fragile, is equally a mistake, and only more plainly shows the barrenness of the age in matters of design.

The manufacturers state that they have no call for works which have any pretensions to art! They are themselves to blame, to some extent, for this, though the public, I think, are the most culpable: the manufacturer invariably puts an exorbitant price upon anything really worth having; but if the public made a demand for such a class of goods, the trade would soon find means of supplying them.

What can be more absurd than the decoration of our chamber ware with landscapes, which, from the shape of the vessel, must inevitably be distorted, or only seen through an atmosphere, if I may be allowed the word, of soap and water?

And then, too, we have leaves, singly and in groups, twisted into impossible shapes, to form some vessel for domestic service, the neck of which is perhaps so narrow that no hand, save that of the most diminutive infant, will bear insertion. Or we may sip our Bohea (instead of nectar) from a China potrifaction of a lily, have our butter served in a magnified cowslip, and the candle which lights our evening meal adroitly poised on the tail of a dolphin.

It is needless to multiply this misapplication of natural forms: numberless examples will occur to all of you; but I cannot refrain from mentioning "a *design*," as the writer in the *Art Journal* called it, which appeared in the pages of that periodical as a hint to manufacturers: the article in question was a soup-tureen, and a literal copy—the leaves being regularly disposed—of that graceful plant, the *cabbage!*

If we desire to escape denunciation for the employment of these things, we must cease to allow their use, and neither cover our walls with all the tints and forms of the conservatory, our carpets with natural or architectural forms, nor our ottomans and table-covers with groups of exotics, in all their endless variety of form and colour. These things may be as beautifully ornamented and as highly coloured, but we are to remember that they are flat surfaces, and to be treated as such; and see that our walls have upright patterns, and those objects which cover horizontal surfaces be such as cannot be seen upside down, or, in other words, have an "all-over pattern, or a pattern running to a centre."

Such things as I have described are really undeserving the name of art; and their manufacture and toleration can only be accounted for by assuming that the purchaser and the artist are equally anxious to escape that severest of all labour, the labour of thought. Both are culpable, as it requires the exercise of nearly as much labour of thought and knowledge of art (and more discrimination) in the patron to enable him to exercise proper taste, as is requisite in the artist.

We inquire, what is the remedy for this? Yet if we look backwards some centuries, we shall find we have yet something to learn, even from those ages we have been accustomed to call dark; for of all the charges which can be brought against them—that of attempting to make the substance they employed appear like other and more costly materials can be least sustained. It matters little whether we examine the remains of Greek, Roman, Etruscan, or Gothic art, in their architecture, or in the decoration of their bronzes or their pottery, we find the ornamentation eminently fitted for the object it adorns, and truth always respected: the object—whatever the purpose it was intended to serve—received the form best adapted for its use, and then its surface was made by decoration as pleasing as the material and its purposes required: and this decoration always grew—like an object which could not be dispensed with—out of the construction; and was never placed, like an afterthought, or ornament which could be removed without injury to the design, upon the surface; and was frequently, for general or historic purposes, and always when for sacred use, symbolical of the service in which it was intended to be employed.

In some periods we find this ornament closely assimilating its original type, which was, I believe, invariably the product of nature, not copies of any part, but refined ideas, obtained by the healthful employment of the artist's mind, purified by the study of nature, and fitted above all things for the object he had to design.

In answer to the inquiry, then, I say,—we must turn to art and archæological societies, which, possessing facilities for the examination of rare works of ancient art, carefully preserved in museums, both public and private, are most capable of restoring the principles we have lost, and by the deduction of general laws for the government of art, may prevent the repetition of such incongruous productions as now disgrace the term. EDWARD G. BRUTON.

THE COMPASSES IN THE EYE.

BUONAROTTI used to tell his pupils to *keep the compasses in the eye*. We wish this and other expressions of this great man were more familiar to us all. The advice is excellent. It should be written on every artist's studio, in every architect's office, and forgotten by none who would learn *how* to see. Only those who keep the compasses in each ball of sight can, with any profit to themselves,

> "Roam where leafage green and glimmering streams
> Suggest a landscape for the artist's dreams."

Only such can really examine works in architecture, which should be, as Vasari says,* "massive, grand, severe and simple, beautified by the grace of their design, but guarded as respects the composition, which must be varied as the occasion demands, so that the harmony of the arrangements shall not be disturbed by too many, nor impoverished by too few decorations, regard being always had to the general effect." This indefatigable biographer, describing the clever manner in which Cronaco adapted his cornice to the Palazzo Strozzi—the mouldings, projections, and proportion of which have been so much admired—remarks, "that a sound judgment and correct eye availed more in this case than would have the mere admeasurement of the work with the compass," for Cronaco's genius enabled him to avail himself of the works of others, and even to make them almost as his own by knowing how to use them—not copying the exact proportions of the antique example, but bringing them in harmony with that to which they were applied, so that they conduced to the beauty of, and became a suitable finish to, the palazzo.

What a lesson there is for the education of the architect's eye in those well-formed and elaborate roofs that span some of the noblest and proudest edifices of England. View the best specimens. Take Eltham, King's College Chapel, and Henry VII.'s Chapel. Mark how every line in them has its correct bearing, its particular duty to perform in the solid support of the whole, and that no error in calculation has entered into the fabric, either in distance or direction, dangerous to its solidity.

A painting may admirably tell its story, adequately convey the thought, the sentiment intended: the expression of this attitude or that passion may be well conceived and well rendered; the drawing, perspective, *chiar'oscuro*, grouping, and colour very correct, full of feeling and fascination; yet all these appeal in vain to him who knows not what distinguished the imagination and the hand of a master—who has heeded not the advice of Michelangelo. Without meaning and without interest, to such a one, a work of antiquity would be, though it needs no stronger argument in proof of its claim to consideration than that it attracts the attention and admiration of some of the most learned men of the age in which it is discovered. To a Caylus, a Denon, or a Champollion, the perhaps rude but emblematical figures and inscriptions are precious art-treasures, valued for the sake of history, and from being the relics of a period of time which a writer says "it fatigues even the imagination to reach." To the ignorant they would signify nothing. But the genuine and earnest antiquary knows what teaching is hid beneath those carved and hieroglyphical monuments; what a rich field of investigation they offer to those who can decipher

* Lives. Translated by Mrs. Foster Bohn.

them; and when the veil falls from them, what a sublime picture of the past they present to the inquiring mind of man! For Egypt, the wise parent of Grecian learning and religion, instituted nothing, says Plutarch,* without a reason; nothing merely fabulous, but her religious rites and ceremonies had either a respect to morals or to something useful in life; and many of them bore an allusion to some part of the physical economy of the universe, or consecrated the memory of some fact in history. So, in the interesting account of his "Discoveries at Nineveh," Layard exclaims—"What more noble forms could have ushered the people into the temple of their gods? What more sublime images could have been borrowed from nature by men who sought, unaided by the light of revealed religion, to borrow their conception of the wisdom, power, and ubiquity of a Supreme Being? They would find no better type of intellect and knowledge than the head of the man; of strength, than the body of the lion; of rapidity of motion, than the wing of the bird. The winged, human-headed lions were not idle creations, the offspring of mere fancy; their meaning was written upon them." It is not surprising that in ancient times to go forth and report upon the marvels of the then known world was for the privileged few, for it is clear that to understand what one sees, to select, to discern, and to view things with any profitable pleasure, a considerable amount of knowledge must be acquired previous to travel—some acquaintance with that diversity of objects which one goes to observe. "It is not given to all to go to Corinth" was a phrase, and it applies now. Whatever the force of that which is conveyed, it depends upon the power of the recipient.

"It's mind that lights the man."

To the undiscerning eye of the unintelligent the book of nature is open in vain,—lost to it is all that is admired by the enlightened. There is often much in nature and art the intention and merits of which are not perceived by a hasty glance; where a cultivated mind sees more than meets common eyes. "An uninformed spectator," writes Hazlitt,* "may like an ordinary drawing better than the ablest connoisseur, but for that very reason he cannot like the highest specimens of art so well. The refinements not only of execution, but of truth and nature, are inaccessible to unpractised eyes. The exquisite gradations in a sky of Claude's are not perceived by such persons, and consequently the harmony cannot be felt." There needs, indeed—for ability to appreciate and judge in these matters—*the eye of art and discipline*. There needs an improved taste, a mind that habitually thinks and invents nobly from the continual sights of the best productions. There needs a superior insight into the latent beauties of art and nature—the power derived from a knowledge of them from their comparison and mutual illustration; the power

"To catch the evanescent clue of form
That lends its charm to forest, aisle, or storm;"

the power of detecting every circumstance and change which affects the phenomena of vision; the power of investing criticism, when applied to works of the first class, with something of their own high-art character.

Fred. Lush.

* Quoted by Bp. Burgess. "Study of Antiquities."
† "On the Pleasure of Painting."

ON THE DRAINAGE OF BUILDINGS AND STREETS IN THE METROPOLIS.

ROYAL INSTITUTE OF BRITISH ARCHITECTS.

The discussion of this subject was concluded on the 15th ult. when the question of outfall was chiefly considered.

Mr. Fowler, fellow, observed that the removal of sewage from the houses and conveying it under the streets had given rise to much interesting discussion at the former meetings, and although opinions might differ as to the best modes of doing so, there existed much greater activity and efficiency in house and street drainage than at any former period. But what was the result? The more that filth was drawn off from houses and streets, the more it was thrown into the Thames to pollute the stream and render it a source of annoyance and pestilence to the inhabitants along its banks. The offensive state of the river and its shores was a matter of notoriety. It had been urged that the body of water in the river was so large as compared with the sewage flowing into it, that the latter was so diluted as to be inoffensive, but the experience of their senses was sufficient to refute this assertion. In fact, the offensive matter being lighter than the main body of the water floated upon the surface, and as it was not conducted into the main stream, it remained near the banks, where the velocity of the current was much less, and with the ebb of the tide it was deposited upon the shore. This matter, so offensive to the senses and so injurious to the health, was in itself valuable, and if it could be applied to the land as a fertilising agent, its value would be incalculable. Various schemes had been proposed for accomplishing this object, especially one which in a commercial sense had been a failure, although it had so far succeeded as to show that the sewage water might be dealt with in the above manner if the proper means were applied, and if the matter were taken up as a public measure rather than as a private speculation. Other modes had been suggested, and sewage manure had been manufactured in a solid form, but these had all been failures. At the present time Mr. Wicksteed, the engineer of the East London Waterworks, was engaged in a very large speculation of this kind at Leicester, by which he hoped to obtain the offensive but valuable matter from the sewage when collected in reservoirs, and leave the water pure. He, Mr. Fowler, looked with much anxiety and interest to the result of this experiment, especially with reference to the possibility of its application to the metropolis, but he had some misgivings as to its success. Another plan which had been proposed was that of conveying the sewer water direct by main pipes into the country, and then distributing it over the land; and in many instances liquid manure had been so applied with most beneficial and profitable results. With respect to the views of the Government, to whom the decision of the question must eventually come, Lord Palmerston had declared that they would consider no general plan for the drainage of London effective which did not provide for saving the river from pollution, and at the same time preserving the products of the sewage for fertilizing the country. If this were the right principle, it was obvious that the sewage should be carried by the shortest and most easy courses into the country direct, and therefore the majority of the plans proposed, suggesting as they did the concentration of the sewage at a spot some distance down the river, had a tendency to obstruct that principle, and were therefore unadvisable. These plans, too, still made the Thames the receptacle of the sewage, and he believed that even from below Greenwich it would be carried upwards by the flow of the tide as far as Hammersmith. It would, in fact, be kept floating up and down with each tide, and would only get half a mile lower down at each ebb. Thus both the principles laid down by Lord Palmerston would be violated. The subject was one of great importance, and it had not escaped the attention of the Government. He had great apprehensions that the plans hitherto proposed, although emanating from gentlemen of great talent and authority, would hardly fulfil the objects intended; and he was therefore anxious that the subject should be fully discussed, in order that some plan likely to insure satisfactory results should be adopted.

Mr. Morewood, representing the Great London Drainage Company, after commenting on the Board of Health plan, said,—The recognition of that which the metropolis requires, a lower outfall than the Thames, is to be found in a pamphlet in 1839, emanating from an architect, who, after showing the existing levels in Westminster, states that it is quite impossible for the Commissioners of Sewers to remedy the evils complained of. They had for years past endeavoured to palliate the mischief: all the sewers in Westminster for twelve hours out of the twenty-four were merely cesspools or reservoirs, the mouths being closed by sluice-gates: indeed, were it not for these gates, every house in Westminster, even those in Park-street and James-street, would at high tides be inundated with the filthiest of floods. In 1846 Mr. Donaldson gave very decided evidence in reference to the inefficiency of the present outfall into the Thames, and showed how readily the Westminster Commissioners of Sewers were availing themselves of the temporary lower outfall caused by the removal of old London-bridge; and in 1847 Mr. Wm. Hosking, in a postscript to his work, strongly warned the Government against further clogging the sewers and the Thames, "unless the refuse can be certainly hurried on through the sewers, and in a diluted state, to an *effective outfall*." Mr. Simpson, when asked in 1851, "If water be not drawn for domestic purposes below Hammersmith-bridge, do you see any objection to the Thames continuing the means of drainage to the metropolis," replied, "Yes, I do. I think it would be the greatest gift to the metropolis if we could convey the sewage lower down." This lower "outfall," this removal of the sewage, Mr. Morewood considered could alone be effected by the drainage plan with which he was connected, commonly known by the name of the Great London Drainage, which consisted of two tunnel sewers extending on each side of the Thames respectively, from Chelsea and Vauxhall to the marshes east of London, the sewers running under the streets and roads, as the Strand, Fleet-street, &c. to be made by tunnelling, and to be laid with an artificial or additional fall, so that the sewage might be passed away from the metropolis, and pumped up at the terminal works, there to be formed into a dry manure, the refuse water being thrown on the top of the tide. The point of difference with the Commissioners was the guarantee of a contingent interest of 3 per cent. for twenty-five years; and also the Commissioners not having taken into their calculation that the tunnel sewers were never intended for Richmond and Croydon; that evaporation amounted to thirty-two inches when the rainfall was twenty-seven inches; that absorption materially reduced the quantity of rain water to be provided for by tunnel sewers; and that immense storage-room was already in existence for storm waters, which would pass through the present channels into the Thames, when the quantity of ordinary sewage, ten or twelve million cubic feet, exceeded the thirty-seven millions for which the two tunnel sewers provided.

Mr. Burnell considered the general question to be purely of an engineering nature, and that the Home Secretary was travelling out of his path in deciding that an uniform system should prevail, when, in fact, nothing was clearly known upon the subject, and scientific men declared that the sewage of small towns was fit to be profitably used, whilst that of large towns was not.

Mr. Fowler believed that the Government merely asserted a general principle which did not involve any engineering question. It was simply a question of economy, and one that might be properly taken up by the Government. They had not gone so far as to dictate any particular mode of carrying out their principle.

Mr. Haywood, C.E. observed that the question of outfall hinged entirely upon the question of the value of the sewer water. If it could be proved that manipulating the latter would pay five or six per cent. small manufactories might be established at the mouth of every sewer; but unless it could be made to pay it would not be so dealt with. If the drainage was not to flow into the Thames, intercepting sewers were necessary; and if though flowing into the Thames its reflux was to be prevented, then it should of course be carried sufficiently low down to prevent its returning with the tide. With regard to irrigation with sewer water, he had no doubt of its advantages; but he much questioned whether it could be made to pay. The mode of draining towns should be regulated by natural and local features. In country towns it was natural to attempt the distribution of the sewage in a liquid form; and where a town was drained into a beautiful trout stream, it should be a *sine quâ non* that something should be done to get rid of the sewage before it polluted the water, whether the means adopted paid or not. The magnitude of the drainage of London

(amounting, as it did, without a drop of rain, to twelve millions of cubic feet of water every twenty-four hours) was a serious obstacle to any purifying scheme; but even that would be surmounted if it would pay 5 per cent. The late John Martin was the first to originate the idea of intercepting sewers: he was followed by Mr. Foster, Sir William Cubitt, and many others, and lastly by Mr. Bazalgette and himself. Their plan had no particular novelty, but they believed it was the best that had been laid down. They considered that the great fault in the plan of the Great London Drainage Company was, that it was not sufficiently comprehensive, and did not allow for the extraordinary influx of storm waters. A scheme of this kind should be available for the next thirty years at least, and not be liable to require reconstruction in every ten years: they also objected to the pumping on Mr. Morewood's plan, preferring drainage by the natural force of gravitation as a cheaper system, and one not so liable to accidental interruption. Mr. Fowler was in error as to the effect of the tide upon the sewage, if admitted into the Thames some distance below London. The plan of Mr. Bazalgette and himself was, that the sewage should be discharged, say at Woolwich, only with the first two or three hours of the ebb tide; and in that case none of it would return so high as the point at which it was discharged. He did not believe that the Thames was polluted to the extent that was generally supposed, but as the population was so rapidly increasing, and would probably amount to five millions in thirty years, the river would certainly not be improved in that time. The sewage was an infinitesimal quantity compared with the water of the river, and was far less injurious than the public imagined: four minutes of ebb tide at London-bridge would suffice to carry down all the real fecal matter of the twenty-four hours, if collected together; and much of the effluvium which arose at low water was in consequence of the sewers discharging their contents upon the shore, instead of being conveyed by culverts to parts below low-water mark. Mr. Haywood repeated that the whole subject turned upon the value of the animal matter contained in the sewage, and he should consider 50,000*l.* well spent in determining the value of this matter when relieved of 700 times its bulk of water. All the illustrations of its value had been drawn from places where its dilution was not one-third or one-sixth so much as in London. Thus at Edinburgh the valuable matter was so highly concentrated, that its distribution over the surrounding meadows had become a fearful nuisance, but it had been argued that in London all the smell would be lost in two minutes and a half.

Some other speakers having addressed the meeting, Mr. Boulnois begged to make a few observations by way of general reply, not limiting his remarks to outfall only. He had stated in the paper which had led to this discussion, that all the plans proposed were so expensive in their nature as to preclude the possibility of their being carried out. Of all the plans that of Mr. M'Lean was, perhaps, the most feasible. It appeared that all parties were agreed that the outfall should be at some point low down the river, that the expense should be modified as much as possible, and that the details must be left to those engineers who were capable of carrying them out. On the question which had been first raised, namely, the merits of pipe sewers and brick sewers, it was remarkable that, with the exception of a pipe manufacturer, not a single advocate for pipe sewers had come forward. Some gentlemen had said that they adopted them for cheapness only; but not one had said that a pipe was better than a brick sewer. As the advocates for brick sewers had thus thrown down the gauntlet, which had not been accepted, it must be taken that they were all agreed that when the cost was the same the brick sewers were to be preferred.

Mr. Rawlinson, C.E. expressed his dissent. He had been absent from London at the time of the former discussion, but if another evening could be devoted to the subject, he pledged himself to meet the objections to pipe sewers. In reference to outfall, it was a question for practical engineers. He begged to caution the public against tunnel sewers for conveying sewage at a great depth, perhaps twenty or thirty yards below the surface, and then pump it up again, a plan which he considered most objectionable. Its cost, moreover, could not be estimated; and it might be ten, fifteen, or twenty millions. The Victoria sewer was estimated to cost 150,000*l.* but he believed it had cost double or treble that sum. With regard to pipes, he could not fully enter upon that point; but would say that he had sewered entire towns on the pipe system, which had since been in use twelve or eighteen months, and he would stake his professional character upon these works. Four years ago he was sent for by Lord Grey to remedy the defects of a brick sewer, 5 feet high and 3 feet wide, which ramified under his house in Northumberland. He substituted for this earthenware pipes 6 inches in diameter (with asphalted canvass wrapped round the joints), and these pipes had effectually carried off the soil refuse, roof refuse, yard refuse, &c. ever since, without the slightest annoyance, stoppage, or breakage. He was now, in conjunction with the Duke of Northumberland's architect, revising the drainage of Alnwick, which town, as well as Morpeth, was entirely drained by pipes.

ECCE ITERUM! OR, RUSKIN AGAIN!

HOWEVER it may be received by the public, Mr. Ruskin's volume of the Lectures delivered by him at Edinburgh last November, will hardly help to make his peace with architects, for he scruples not to say, "In modern days we have no architects!" which sweeping 'Sir Oracle' dictum he pronounces in the most unqualified manner, and without any exception whatever. That such should be the case is deplorable enough, yet not at all surprising, if we can bring ourselves to agree with the lecturer's startling opinion that "no person who is not a great sculptor or painter can be an architect!!" Now, *great* painters or sculptors do not spring up every day, and they who prove such have no leisure or inducement to turn from their own particular branch of art to another and so totally distinct a one as architecture is. In Italy, architecture has frequently been practised by painters, and with the result that might have been expected, some of the worst productions of what Mr. Ruskin meekly styles the "accursed *Renaissance*," were designed by painters.

In confirmation of his opinion upon the point just referred to, the oracular Ruskin instances Phidias, Giotto, and Michelangelo, as the greatest architects hitherto known. Well, Giotto's campanile is a pretty piece of cabinet-work and veneering on a large scale. But that our author should quote Phidias and Michelangelo as making up the trio of greatest architects, quite *flabbergasters* me; the one being an "impious" Pagan, and the other a promoter of the style which Mr. Ruskin pronounces, in a very conveniently off-hand way, to be the "accursed *Renaissance*."

In favour of Michelangelo, as architect, I have nothing to say; and it may fairly be suspected that his reputation as architect is to be attributed mainly to the magnitude of St. Peter's, and to his celebrity as painter and sculptor. That a very great painter may be a very small architect is proved by the instance of Raffaelle.

According to Mr Ruskin's reasoning, or rather consistently with his avowed contempt for logic, we must now believe either that there were many transcendentally great, though now utterly unknown, painters and sculptors, to whom we are indebted for those monuments of mediæval architecture which he admires with such bigoted exclusiveness; or that the style itself was self-formed without the intervention of architects at all. So far from excellence in architecture being dependent upon and subsequent to that in the other two arts, it actually precedes the latter. If we put our trust in history rather than Mr. Ruskin—all infallible as he is—styles of architecture have been developed and matured long before the other arts have advanced beyond their first infancy. It has flourished in countries where painting and sculpture never made any progress at all, as in Egypt; and also in those where they have been positively interdicted by the precepts of Mahommedanism.

Nevertheless, Mr. Ruskin's ingenuity will enable him to explain what his marvellous "*eloquence*," coupled with his passion for dealing in oracular dicta, has considerably mystified. Ordinary mortals do not always understand the Pythian inspirations which he delivers from his tripod. That he can occasionally unbend from his dignity, and condescend even to be funny, to say nothing of being coarsely abusive also, is very evident. His attempts at facetiousness are, however, generally more clumsy than clever. A very *mal-à-propos* sneer at Greek architecture it certainly is on his part, to speak of "the triangular thing called a pediment," when he himself professes such intense admiration of the other "triangular thing" called a *gable*. Facetiousness is not his *forte:* on the contrary, he succeeds better in making us laugh—at what or whom needs not be said, when he seats himself gravely upon his tripod, and gives vent to such a precious utterance as the following:—"The man who, without copying, and by his own true and original power, can arrange a cluster of rose-leaves nobly, can design anything!" Indeed! most marvellous, then, is the virtue of rose-leaves! They must be greatly more efficacious, as well as, beyond all comparison, cheaper than academies of art and schools of design. Even rose-bushes, however, have awkward thorns; and perhaps Mr. Ruskin will find that in handling them he has unwarily scratched his own fingers.

Z.

"WOODS AND FORESTS."

A GREAT reform in the management of these Crown estates and national domains has for the last two or three years been shown forth by the exhibit of a largely increased annual rental. Much ingenuity has been exercised to attain such a result, and returns have been made, to immensely disproportionate amounts, of timber fallen and sold, of copyholds enfranchised, of quit-rents disposed of, and even of Crown lands conveyed away in fee simple! Thus the

Expenses of the Office of Woods, &c. being per ann.	£28,468	12	6
Law charges	5,218	3	7
Salaries, expenses, and percentage of receivers and stewards	6,858	16	11
Fixed charges, pensions, stipends, &c.	9,825	12	11
Making altogether the moderate sum of	£50,371	5	11

appear to be, if not trifling, at least comparatively moderate.

Appended to the account returned for the year ended 31st March, 1852, the following significant "*memorandum*" implies perhaps more than any inquisitorial *critique*, as expressed by an accountant not in confidence with the functionaries, viz.:—

	Gross income.			Gross expen. (1852).		
Land revenue	£297,405	19	6	£87,715	15	10
Royal forests	61,437	0	5	38,926	14	7
Royal parks and gardens	8,646	17	2	24,255	19	9
	£367,489	17	1	£150,898	10	2

the total receipts being little more than double the expenditure!

Conducted on this principle the agency of private estates would very soon reduce the landed aristocracy to a bankrupt condition.

Under such circumstances measures lately taken by the Legislature for the disafforestment and sale of Crown lands would appear to be of great national importance, and in the present exigency for increased taxes, most provident, as an example of economy on the part of Government, whence reform most decorously comes, and whither taxes flow.

It has long been a theme of reproach to a country so thickly peopled as this, that immense tracts of land, for the most part of good quality, and situated in the most desirable positions, should lie wholly waste In the New Forest, Hampshire, there are 100,000 acres; in Dean Forest, Gloucester, 23,000 acres; which, with the other forests of England, amount to nearly 300,000 acres; and of this vast extent, not one-fourth part is dedicated to the growth of timber for the royal navy, while another fourth part is good land, and all of it convertible. This is not only a prodigal waste, but a crime.

In many articles on this subject, published in the *Builder*, it was shown that the retention in royal chase of such extensive domains, entailed a heavy charge in salaried officers, such as surveyors, verderers, warreners, "*et hoc genus omne*," whilst by the sale thereof, an average might be realised of at least 50*l.* per acre. Supposing that only one-third of the wastes were thus rescued from sterility, and devoted to the sustentation and employment of the multitude, *five millions sterling* could be at once realised for the exchequer. Such sales ought not to be made privately by Government agents

but by public auction, so that the residents of each district might have full opportunity to acquire, by fair competition, lands which, from propinquity, or other causes, should be the more desirable, and so, in especial, that no imputation of jobbery could be inferred as to official *employés*.

An advertisement, inserted in the *Times* some three months back, inviting tenders to *rent, on lease*, the Crown lands of Hainhault Forest, seems to indicate a wish to still retain both the domains and the establishments; but it is not so plain that there is any wish to lease any more than to sell, for the charge demanded for wild unreclaimed land, as an annual rental, is set out at 1*l.* per acre!

Were this land at or near a railway station, and that the whole country could be allotted as building ground, there might be some show of reason in the proposition. Since, however, good farming land, *with homesteads*, can be had at 1*l.* or 25s. per acre, it does not look semblable or serious. The waste has to be grubbed and reclaimed, tenements built, roads made, and, lastly, a thoroughfare for general access to so large a scope as that of forest lands; therefore, the heads of office no doubt contemplate a railroad of their own if they mean to make forest towns and villages.

It may be that the schemes of model Scotch farming, and of growing larch, and fire and faggot wood on the wastes, have been given up; or that a hope of gaining high prices (such as 500*l.* an acre), from competing Freehold Land Societies, creates an emulous desire amongst the commissioners to realise by infinitesimal sections of standing room—thus resolved, not "that the wilderness shall blossom as a rose," but that the waste shall teem as a city. Is all England to be parcelled out in allotments, 15 feet by 50 feet? Not yet—nor is it safe to halloo till *out of the woods*.

To call these wastes crown lands, is an abuse of language: they ceased to be royal dominions two centuries back, when the charges of the civil list were imposed on the national revenue. There are still parks and chases appendant to the Crown: Windsor, Hampton, and Bushy, are the principal enclosures. These are, to some extent, private; Hyde, St. James's, and Regent's parks, being in name only appanages of State.

Had the whole free estates of the Crown continued to be under the royal prerogative, the enormous encroachments, mal-appropriations, and plunder, that have occurred within the last two centuries, could not have been allowed to contract, as they now palpably do, these extensive ranges.

Under the cloak of royal ownership, vulgarly considered a species of divine right, all abuses have been perpetrated by sanction or connivance of officials, and while every day the scope becomes less, so the lands left open grow more and more into waste.

In the New Forest in the year 1850, no less than 4,051 acres, which had been timber enclosure, were thrown into waste, and in substitution, only 898 acres were planted anew. It is thus with others of the forests, in which timber has been cut away by wholesale to make a show of income, as against the expense of official establishments and patronage founded most certainly on a scale of royal munificence.

The continuance of such charges is a prodigality, but the perpetuation of the delusion that the woods and forests are Crown lands, or in anywise the estates of the sovereign, is worse, and can only salve over private peculation, whilst the forests dwindle, and the very throne incurs unmerited censure.

That such a breadth of land should be a total loss of rental, as it has been for several years, is more than a misfortune, it is a calamity; for the sterile tracts being useless even for game or venison, are productive of miasmata. Many portions of them for quality of soil are valuable, as are others for situation; and although there must be in such an extent ranges not worth 25*l.* an acre, yet positions near railway stations, towns, villages, or *private demesnes*, would touch 150*l.* or more, per acre; 50*l.* being a fair average throughout.

Near all towns, particularly in Epping and Hainhault forests, large reserves should be made for public uses. All the ship-timber enclosures, together with thriving young plantations, ought also to be reserved, fenced, and effectually bounded; and even then, with one-fourth part more retained for the purposes of new plantations in suitable places, between 100,000 and 200,000 acres might be sold for the benefit of the nation. If there were any presumptive right to the Crown or to private individuals, if there could be any ultimate good derivable from the continuance of open wastes, then the legislature might have a just repugnance to sale and alienation; but no rights exist which could not be recompensed by fair valuation, or by appropriation or enclosure. At present the forests are *no man's land*, nor has the brute creation much interest in their sterility. QUONDAM.

NEWS FROM IRELAND.

THE new Hevey College, at Mullingar, will have a frontage of 150 feet, with wings, which will form three sides of a quadrangle. The centre portion between the wings will contain an entrance-hall 11 feet wide, reception-rooms and library 16 feet by 15 feet, refectory and community-room 18 feet by 15 feet, with a range of cells on the upper floor, and kitchen offices in the basement; also a grand staircase, with corridors, and a belfry 72 feet high surmounting part of same. This portion of the building is intended for a community of Christian brothers, under whose superintendence four schools, 40 feet by 24 feet each, contained in one of the wings, will be conducted. The corresponding wing is to comprehend a lecture-hall, 40 feet by 24 feet, for classical students (ten of whom will be selected, according to merit, and supported by the establishment); also an oratory, 16 feet by 24 feet; infirmary, 24 feet by 18 feet; lavatory, 24 feet by 8 feet; dormitory and dwelling-apartments for classical teachers, averaging 18 feet by 12 feet 6 inches), with all necessary appurtenances. The style selected is Italian. Limestone will be the material used, with dressings of cut stone or Portland cement. It is estimated that the expenditure will vary from 4,000*l.* to 5,000*l.* Mr. John Bourke is the architect.

The churches of Clondalkin, county Dublin, and Delgany, county Wicklow, are to be enlarged; and that at Kilbryan, county Roscommon, is to be rebuilt, from designs by Mr. Welland.

Alterations and additions are to be made to Drogheda Prison, and we hear that the work has been intrusted to Mr. J. Neville, of Dundalk.

The site for the new Model Agricultural School, decided to be built at Belfast, is stated to be near the meeting-house, on the Lisburn-road, and about a mile and a half from the town. It is expected that a building for the accommodation of teachers will shortly be opened on the Falls-road.

New buildings are to be erected in connection with St. Mary's Convent, Cabra, and will comprise an enlargement of the female department of the Deaf and Dumb Institution, with schools and dormitories for 100 children, together with thirty cells for nuns, with chapter room and noviciates, each 32 by 20 feet. The style of the building will be of a plain character, with a new campanile, 70 feet high, to correspond with the present one. The north elevation will have a frontage of about 300 feet, the campaniles being about 60 feet apart. Mr. J. Bourke, architect. The expenditure will be about 2,500*l.*

Generally speaking, the building trade in Ireland is dull, owing to the increase in price of materials and scarcity of workmen. Our correspondent tells us several contemplated works are suspended from the above reasons. We hear that at Terenure, county Dublin, it is projected to subdivide portions of the demesne lately held by Mr. Bourne into a number of building lots with pleasure grounds *pro bono publico* attached, and that plans have been prepared for the model of 100 contemplated houses.

A tower and broach spire are to be built in connection with Ballinakill (R. C.) Church, Queen's county; style, Early English; height, 125 feet; expenditure, about 1,000*l.* The material used will be limestone of the neighbourhood. Mr. M'Carthy, M.R.I.A. architect.

A new Catholic church is to be erected by the same architect at Cookstown, county Tyrone, comprising nave, aisles, chancel, and chapels of the Blessed Sacrament and Blessed Virgin, south porch and north sacristy; length in clear, 125 feet; width, 53 feet; tower and spire at west end of nave, 190 feet high; style, Decorated; roofs of open timber work, stained and varnished; walls of rubble, with sandstone dressings. Probable expenditure, 5,000*l.*

CHURCHES AND SCHOOLS.

Beyton.—On Thursday in last week, the church here, which has been entirely rebuilt, with the exception of the tower, was opened for Divine service. The reconstruction has been carried out under the direction of Mr. J. Johnson, of Bury, architect. The style and plan of the former edifice have been adhered to as closely as possible, with the addition of an aisle on the north side, where the Norman doorway has been replaced. The walls are of substantial thickness, the windows being deeply recessed from the interior. The materials are flint, with dressings, and gables of chancel, nave, and south porch, of Caen stone, the old materials being worked up as far as they would extend. The windows of the nave and aisle and east end are of the Perpendicular those of the south side of the chancel of the Decorated style. The construction of the roof (which is of stained deal), is of the Decorated period, with cross braces, &c. covered with plain tiles, and cross tiles perforated with crosses. The aisle is separated from the nave by three stone arches. The floor is laid with Peake's terro-metallic tiles, diagonally, those of the chancel being raised one step from the nave. The benches are plain and low, in style harmonizing with the church, of stained deal, those of the aisle and chancel being open. The number of sittings, which in the old church was 200, including a gallery at the west end, is now 230, without a gallery. The total outlay up to this time has been about 650*l.* The works were executed by Mr. Reed, of Bury. A new window is being placed in the tower, which requires reparation, and the upper part much needs restoration to its original style and height, for which purpose, and for the completion of the interior fittings, further assistance, according to our authority, the *Bury Post*, will be very acceptable.

Eton.—The new church at Eton was consecrated by the bishop of the diocese on Thursday in last week. The church, which is dedicated to St. John the Evangelist, will afford accommodation for 1,100 persons, and the whole of the sittings are free. The cost is about 8,000*l.*, which sum has been raised by contributions from her Majesty and Prince Albert, by grants from the Diocesan and Incorporated Societies for Building Churches, donations from the college authorities, and from old Etonians, aided by voluntary subscriptions from the inhabitants of Eton and its vicinity.

Adderbury.—The ceremony of laying a memorial stone above the entrance of a new school for infants in course of erection here, took place last week. Mr. Buckler, of Oxford, architect, designed the building, which is in the early English style, and consists of two rooms, the principal one of which will be 35 feet long by 20 broad, and a class-room 14 feet by 14. The roof will be open. It is calculated to hold 80 children. The site is within a short distance of the parish church. The contractor is Mr. Wilkins, of Banbury. The cost, exclusive of site, will be about 400*l.* and the contract is to be completed by the 1st of September next.

Willenhall.—The foundation-stone of the new parish church of Holy Trinity, at Lanehead, was laid on Monday in last week, by Mr. Charles Bagnall, son of Mr. Thomas Bagnall, of Great Barr. The style of the edifice will be early English. It is to be built of Brewood white and red stone. The ground plan comprises a chancel, 22 ft. by 18 ft.; a nave of five bays, with aisles, 76 ft. long by 48 ft. wide; with a height to the ridge of nave of 44 feet. The pillars of the nave will be circular. The chancel arch is lofty, springing from figured corbels. The chancel is to be fitted up with longitudinal stalls, like benches. All the seats are to be open, and will accommodate 699 persons; 587 free. The architect is Mr. Wm. Horton, of Wednesbury. The contract for

erection has been taken by Mr. Job Wilkes, of Darlaston, builder, for 2,880*l.* exclusive of boundary walls and architect's commission. The parsonage-house, which will cost 1,150*l.* is to be commenced forthwith. Schools will be erected after the consecration of the church, at an expense of about 700*l.* or 800*l.*

Southam.—By voluntary subscriptions the parishioners of Southam have contributed between 500*l.* and 600*l.* towards the beautifying and restoration of their parish church. The population of the town is only about 1,700, this sum must therefore be considered of a liberal character. Mr. D. G. Squirhill, of Leamington, has been appointed architect by the committee. The works, which are progressing, have been entrusted to Messrs. Taft and Reynolds, of Southam, for completion.

North Petherton.—It has been proposed to provide a new school-house at North Moor Green, in this parish, which contains a population of 700. A subscription is being raised.

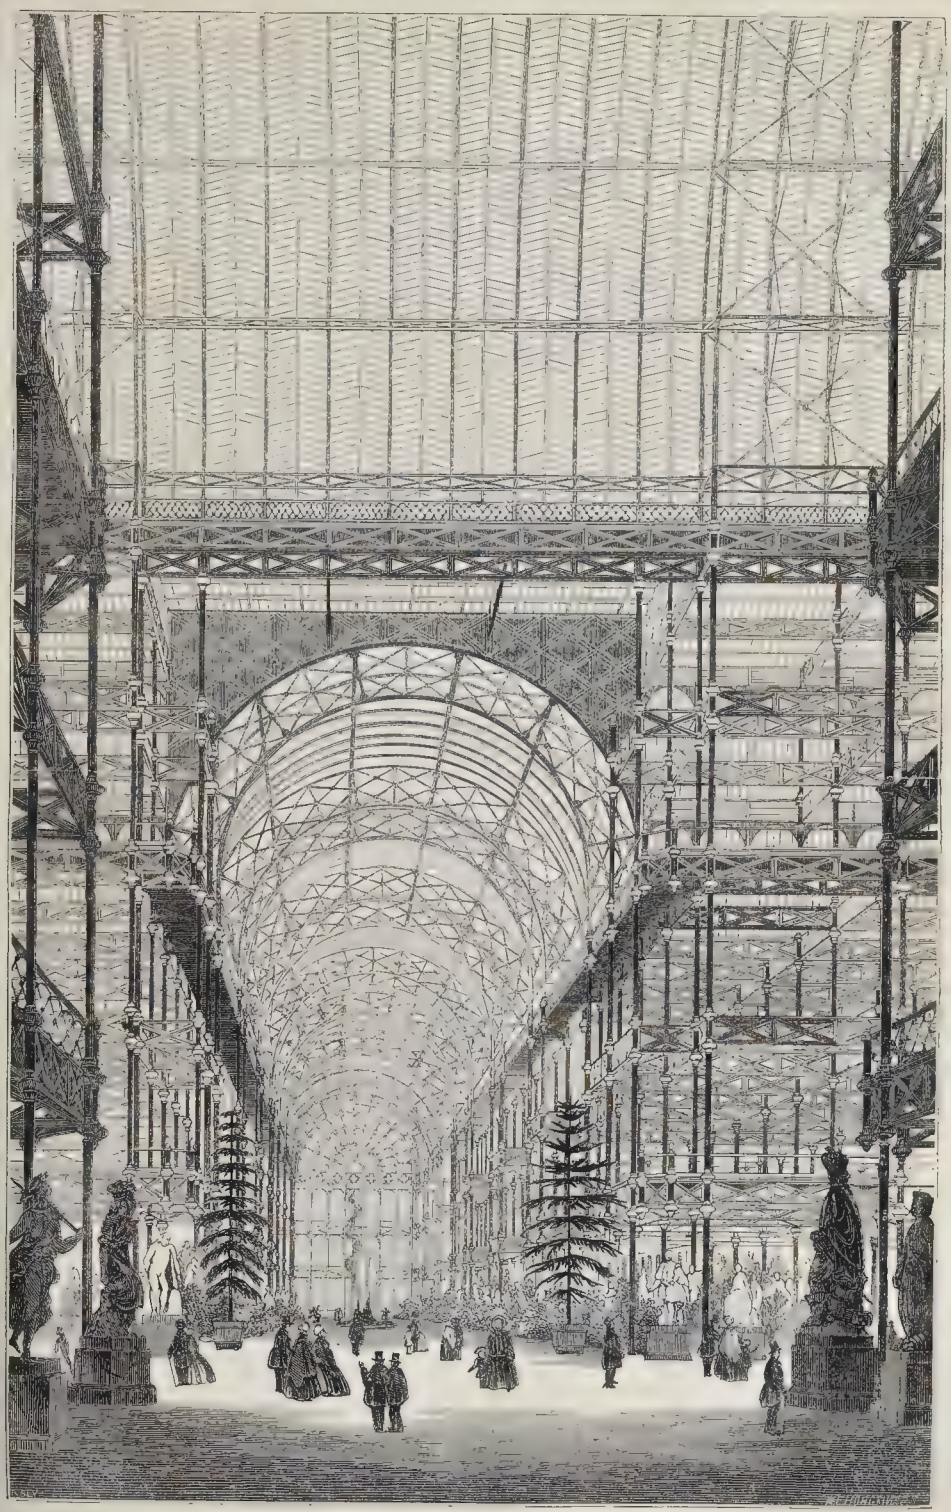
Chester.—Upton church was consecrated on 31st ult. The design is by Mr. James Harrison, of this city, who, according to the local *Chronicle*, took for his model the only village church still remaining near to Chester of a pure period of architecture. The tower and spire are accurately copied, while the rest of the building is rather what Aldford may be judged to have been, from the few fragmentary portions of the original still traceable in its present debased condition. The solid tower and plain parapet, chosen in this example of the reign of Edward III. by the architect, is more likely, remarks our authority, to be accordant with the rest of the design, which strictly avoids all needless enrichment of detail, and will appear less naked as trees grow up around it. The exterior walls are low and of rubble sandstone, the quoins, plinths, copings, &c. being alone dressed. The jambs and bases are all simple chamfers, with neither moulding nor buttress, except where actually required. The whole, it is added, furnishes a proof that the decorative style may be as inexpensively adapted to quiet country churches as the Early English order, so generally chosen for the purpose. The chancel is 30 feet by 20 feet; the nave 24 feet wide, and, with the western tower (which lies open to it), 66 feet long, forming a vista of nearly 100 feet, the building being calculated to hold 300 sittings. The benches are all of solid oak, with tracery on the panelled ends. A low screen crosses the chancel arch, beyond which stalls, with poppy-heads, are arranged in parallel rows. The chancel floor is laid with Minton's encaustic tiles, the bearings of the Palatinate (three garbs or wheat sheaves) forming a border to the pattern. The church, including all contingent expenses, will have cost 2,000*l.* 1,000*l.* of which was given by the patron, the Marquis of Westminster. The site was presented by Sir Philip Egerton, M.P. The masonry was contracted for by Mr. Miller, and the woodwork, wrought by parishioners of St. Mary's—the roof by Mr. Onslow, and the fittings by journeymen employed on day wages by the committee. The name of the church is taken from the nearest festival, that of "The Ascension," which is also represented in the east window; the Saviour occupying the centre light, with hands upraised in the act of blessing, and an angel in white on either side bearing scrolls inscribed, "This same Jesus shall so come in like manner as ye have seen him go into heaven;" while seraphim above, with flaming swords, guard the approach to heaven and the tree of life beyond. This window is by Wailes. The west window is in Powell's stamped glass, with simple floriation. For these windows a special subscription was raised.

Manchester.—The corner-stone of new schools for the district of St. Matthew's, was laid on Wednesday in last week, by the Bishop of Manchester. The site of the new building fronts Byrom-street and Tonman-street, and is exactly opposite the Free Library, Camp-field. The building will be two stories high; and the school-room, which will be over the ground floor, will be 27 feet wide by 54 feet long, and 16 feet high. It will be built of brick, with stone corners, and the estimated cost is from 1,500*l.* to 1,600*l.* The building will be in the Elizabethan style. It will accommodate 500 children. The builder is Mr. Henry Warburton, of Harpurhey. About 150*l.* of the cost remains to be made up.

Ulverston. — The foundation-stone of the Ulverston Infant-school was laid on Wednesday in last week, by Master H. H. Askew, of Conishead Priory. The site is a plot of ground in the church-walk. The architects for the building are Messrs. Thompson and Webster, of Kendal. It will be erected principally of the limestone of the neighbourhood. The length of the school-room will be 40 feet. The contractors are Messrs. Tyson and Wearing, of Ulverston. The cost is estimated at 760*l.*

"REDEMPTION OF GROUND-RENTS."

FREEHOLD land, since the establishment of Land Societies, has become part of the worldly goods of the working man. But a few years since it was a known fact that the number of freeholders was annually so rapidly diminishing as almost to encourage the belief that the entire kingdom would ultimately be in the hands of a few men, who would hereafter possess the most powerful engines of good or evil, and might become as despotic kings, throwing indiscriminately their favour or ruin as whim might dictate. The abstract value of land a few years since was of no consequence, but now the intelligence of the people has led to the poorest man aspiring to make a something that would remain a memorial of his past industry, and a provision, in case of death, against his family being driven to a workhouse education. To even the smallest class a want, has arisen, viz. increase of *house accommodation*, which has been responded to by a class of tradesmen called builders. We do not mean the old-fashioned tradesman, as John Jones, Plasterer, &c. Oh, no!



In former times the building a house indeed was an undertaking: then was the bricklayer, the carpenter, and other branches of the trade, each represented by its master, and each performing his own quota, and paid by the quantity of work and the market value thereof (known as *measure* and *value*): such a proceeding naturally led to the actual amount a house would cost, being uncertain and unsatisfactory; and without entering into the detail, it will be readily understood, that when the sum "*tottle*" of the accounts was known, the amount originally intended as the outlay was always exceeded; and it is not marvellous that the trite saying arose, which has still its host of believers, "Fools build: wise men buy."

The builder of the present age is a new man altogether: what matter if he served his time as a bricklayer or a carpenter? When he commences business on his own account he fearlessly grapples at all the other trades. He waits not for customers to bring orders, knowing that even the trade of building, if pursued legitimately, requires a connection which would take years to develope: he therefore speculates by taking a plot of land: his small capital at once prohibits all thoughts of securing the freehold; and, in consequence, he submits to richly *manure* another man's land, and readily signs his name to papers which he means to transfer as quickly as he secures a customer. He furnishes the example of—*How to sell a house for less than it cost.* In explanation of this, attention must be given to the amount of ground-rent as the main feature in the value of house property: thus, A. B. in his wanderings round the metropolis discovers a pair of semi-detached houses that C. D. the builder (being "hard up), will sell for 1,000*l.*, subject to 1*l.* ground-rent: he inquires, and is satisfied that the house cost that sum, he therefore readily agrees to purchase; but when the papers come into the hands of the solicitor, the discovery is made that the ground-rent chargeable by freeholder is only 3*l.* per house, and to secure a lease direct, he must enter into a fresh negotiation with the builder to buy the improved ground-rent, or be content to receive a lease from the builder, who, on its completion, takes the improved ground-rent into the market, and then A. B. in a manner of speaking, has not so good a title for a re-sale, and has, in a like manner of speaking, two ground-landlords. This *improved rent* made by the builder, then, furnishes the *profit* to the builder. Indeed, the plan is carried on to a greater extent than imagined by the public: oftentimes builders take to carcasses of houses, the property of the freeholder, and do not pay money for same, but compensate the outlay by burdening the ground with a large rent. It is not, therefore, a question of the value of materials and labour that settles the price a builder can afford to sell at: the question cannot be too well sifted and understood by the wise men *who buy*. Let it be clearly known that if a builder asked one party 1,000*l.* he can sell the same house for one-half the amount to another party, if they will but submit to an extra ground-rent. Again, there is also the fact, in nine cases out of ten, that if a purchaser were to take a surveyor to a pair of houses,—say, "I approve of these in all respects as to size, height, &c.—draw up plans, and contract for a similar pair," the surveyor does so. Then it is submitted to the builder who has the pair ready built for sale. Will he take the contract at the price he can sell his own houses at? I do not hesitate to say, No, and not even at an increase of twenty per cent. How is this? In the case of a ready-built house, has not the builder to submit to inconveniences of raising money and waiting for a customer, and are not these reasons that ought to make them the most expensive, contrasted with building to order and drawing money on account as the works proceed? The surveyor, in explanation, may say he will not pass inferior work. The builder will perhaps say that Mr. Surveyor describes a great deal of unnecessary work, and that, besides, he does not approve of being interfered with by a surveyor putting his nose into a job to see that the timbers, &c. are of the size specified. Which argument is right some of the public can *now* judge, but the majority have yet to buy experience before they are competent to answer.

The very success of land societies is injurious, as, owing to their number and conflicting interests, they outrival each other in securing land. But it is near railway stations and towns that prices are given out of all character with the investment; and then, perhaps, land is purchased with some local fault that can only be found out when too late, as in some estates where water can only be obtained by sinking some 200 feet below the surface. Land, especially to suit members of land societies, must, beyond having good drainage and roads, have a plentiful supply of water. This fact will be shortly found as the hinge on which these societies must succeed or fail.

Something yet remains to benefit all would-be owners of house property, beyond what either land or building societies can accomplish. Purchasers of houses have become mere lease-holders, paying a sum which, at a future day, is to revert in a lump, and benefit a party who all along has been receiving an extravagant rent for his ground beyond its mere abstract value. It will of course require time yet to see the great result produced by the reversionary rental that is to be derived from the fortunate freeholder, but it will be felt by the leaseholder as rather hard to find his income suddenly cease altogether; and in addition to giving up the house, to pay a sum of money for dilapidations, rendering the last few years of a grandfather's bequest a source of annoyance and no profit. A bargain, of course, is a bargain, but it cannot be denied this is completely on the side of the freeholder; and as all abuses are now discouraged, why should this escape? Even that long-endured badge of serfdom, copyhold tenure, is now redeemable, voluntary or not. So let it be with ground-rents: let it be compulsory on the freeholder to sell the freehold to the lessee upon fair and equitable terms. The freeholder is no longer sacred, as he cannot prevent the railway director from spoiling his ancestral hall and shady groves. An Act of Parliament determines his compensation, but lets the spoliation take place. Let an Act of Parliament settle this question too. FRANCIS CROSS.

LITERARY INSTITUTIONS.—In the House of Commons leave has been given, on a motion by Mr. Hutt, to bring in a Bill to afford greater facilities for the establishment of institutions for the promotion of literature, science, and the fine arts, and to provide for their better regulation.

INTERIOR OF THE CRYSTAL PALACE, LOOKING NORTH.

[See p 307, *ante*.

STAINED GLASS.

Present to the King of Denmark.—Mr. James Ballantine, of Edinburgh, has recently executed a stained-glass window, from a design of Mr. John Thomas, which is intended as a present to the king of Denmark, from Mr. Peto, M.P. and will be placed in the Chapel Royal, at Fredericksburg. According to the description which has reached us, the upper portion of the window has fifteen upright compartments. The central light contains the figure of our Saviour as the Good Shepherd, the figure, drapery, accessories, and background, kept light. In the upper central compartment is the dove, while the lower central and the dexter and sinister lights contain medallion heads of St. Mark, St. Luke, and St. John the Baptist, with backgrounds of deep blue, surmounted by their emblems, and surrounded with diapered and ornamental work in green, gold, and purple. The remaining six compartments contain the twelve apostles; of subdued tones of the secondary and tertiary colours. The central light contains a medallion likeness of the king of Denmark in white enamel, on a ruby ground, surrounded with a laurel wreath. Our informant speaks very well of its effect.

The Somers' Memorial, Eastnor.—Messrs. Wilmshurst and Oliphant have completed a window (designed by Mr. F. W. Oliphant) which is to be placed in the east end of the Mortuary Chapel at Eastnor Church, Herefordshire, in memory of the late Earl Somers, by his three daughters. The upper part of the central light, the stone work of which, designed for the purpose, is cruciform, contains the Crucifixion, while below is a representation, on a smaller scale, of the "Lying in State" of the late earl. In two side lights are representations of the earl laying the first stone for the restoration of Eastnor Church, and the procession to open the church. In the first, figures of the three ladies are introduced. As a piece of colour the window promises to be satisfactory *in situ* (Powell's new glass is used, and the whites are very sparkling), but the mingled incidents and styles did not produce upon us a pleasing effect.

For *St. Andrew's*, at *Plymouth*, the same artists are executing a window 21 feet high, and 13 feet 6 inches wide: the subject is the Ascension; the style late perpendicular.

THE WATER-GATE, YORK-STAIRS.

IN a late number of the *Builder* (p. 225), a correspondent, "A. W. H." called attention to the present very dilapidated state of the "York-stairs Water-gate," and inquired "To whom does it belong?" These remarks have been the cause of a very interesting discovery respecting the designer of that erection (as given at p. 252, in the communication signed "G. B."); it appears to have entirely and satisfactorily given the credit to Nicholas Stone, a name already celebrated in conjunction with works of greater magnitude. As "G. B." adds, it will be curious to discover on what authority this gate was originally attributed to Inigo Jones. I will not trespass any further on this part, but proceed to the other half of the question, "To whom does it belong?"

I find amongst the papers of the late Mr. John B. Papworth, an Act of Parliament, passed in the 29th of George II. 1756, p. 1251, entitled "An Act to enable the proprietors and inhabitants of houses in York-buildings, in the parish of St. Martin-in-the-fields, in the county of Middlesex, to make and levy a rate on themselves, sufficient to answer the expense of rebuilding or repairing of the terrace-walk and water-gate, and such other part of the premises adjoining to the river Thames, and belonging to the said buildings, as shall be judged necessary, and for keeping the same in repair for the future."

In the preamble it is stated that these buildings are "belonging to the proprietors and inhabitants of York-buildings," and it seems that at that period they were "so greatly gone to ruin and decay, that it will require a considerable sum of money to rebuild or repair the same." Could this gate itself have been *rebuilt* at this period? or was the term only used in conjunction with that of *repair*, for any portion of the buildings which might require one or the other? "And whereas the proprietors and inhabitants of the said buildings are very willing and desirous, by an adequate tax to be levied amongst themselves, to raise money for that purpose, and also for the supporting and keeping the same in repair for the future," &c. &c.

"York-buildings" comprises "George-street, George-alley, Villars-street, Duke-street, Of-alley, Buckingham-street, and such houses in the Strand which were formerly the estate of George Villars, Duke of Buckingham."

Trustees are appointed by the Act, and a keeper of the terrace is named therein.

I have only to add that Mr. Papworth was commissioned in 1823 to direct the necessary works for the repair of the terrace, gate, &c. at which period the gate appears to have been partly covered with copper and partly with tiles: the whole of the stonework was repaired, the ironwork renewed and painted, and the steps, walling, &c. of the platform were put into a complete state of repair, at a cost of about 300*l.*

Could the trustees be called upon to carry out the provisions of this Act? J. W. P.

THE inquiry of "A. W. H." as "to whom belongs this beautiful water-gate," seems likely to remain unanswered, for it has no legitimate guardian. This gem is an heir-loom derived from the former princely owners of York House to the tenants of the York Buildings Estate with The Terrace of which it is, in spite of its sooty coat, the lustrous centre.

The trustees have died out, and cannot be replaced but by Act of Parliament. A vigorous attempt was made some few years back and fit trustees were elected by the tenants, who expended some hundreds of pounds in repairing the enclosures of the terrace, and in building a lodge for a keeper! and would doubtless have proceeded to the conservation of this deservedly-honoured little pile of architecture, but that an evil genius of a solicitor on the spot (since dead) declared battle against the trustees and defeated them in an action which has cost them 700*l.* out of their own pockets.

My offices have been for ten years close to this gate, and I have long lamented its forlorn state, which, alas! is too truly described by "A. W. H." and *utter ruin is now impending*: the tide flows up and over it, the basement and plinths are loose and getting washed out, and I expect to see the whole settle down into the river; but this is not from indifference, but inability to do anything.

I can suggest nothing but this,—the extension of the new Act for the supervision of public monuments by her Majesty's Office of Works and the police. Let the Government at once take possession and protect it, as it is certain that no attempt will be made by the inhabitants to obtain an Act for the purpose.

J. C. C.

THE ARCHITECTURAL CLASS IN THE GOVERNMENT DEPARTMENT OF ART.

WE have received the following note, purporting, though it has but one signature, and is not a very formal document, to come from the students as a body:—

Sir,—We are sorry to trespass upon your valuable columns, but in answer to your article of the 27th May respecting the Gore-house exhibition, we, the students, feel bound in gratitude to do justice to Professor Semper, to explain to you the mistake you have made when you say the drawings of the architectural class are very unsatisfactory. You must not judge them as you would if they came from architects, as we are not in the profession yet, but only students; and the whole of our class understood nothing about architecture before they came here; and in the small space of time, averaging only six months, we have been taught perspective, shadow—construction, tinting, and the principal laws of architecture. We hope by the next exhibition that we may please you better.

THE STUDENTS.

Marlborough House.

To show that we have "made a mistake" will need some stronger evidence than "The Students" give. If they have done all they speak of in six months they have not done amiss. But the exhibition purports to be "of the *advanced* works of students," and we are not permitted to forget the time during which the school has been in existence.

PUBLIC STATUES BILL.—This Bill has been read a third time in the Commons and passed.

THE QUARTER OF SQUARES IN LONDON.

Now that there seems to be so great a desire to remove to the west-end of the metropolis, either to Belgravia or Tyburnia, it may be advisable to inform her Majesty's subjects that there is no healthier part of this great town than the space contained within the following boundaries, viz. Holborn and New Oxford-street on the south, the New-road on the north, Gray's-inn on the east, and Tottenham-court-road on the west, which space contains within it the twenty-one squares or open spaces following:—1. Gray's-inn. 2. Its Squares. 3. Its Gardens. 4. Foundling Hospital. 5. Its Gardens. 6. Burial-ground. 7. Mecklenburg-square. 8. Regent-square. 9. Argyle-square. 10. Red Lion-square. 11. Queen-square. 12. Bloomsbury-square. 13. Bedford-square. 14. Russell-square. 15. Torrington-square. 16. Woburn-square. 17. Gordon-square. 18. Tavistock-square. 19. Euston-square. 20. Burton-crescent. 21. University College-grounds.

If this were in Paris it would be called *Le Quartier des Carrés*. The streets generally run at right angles to each other. It is a gravelly soil and the spring water excellent. J. P.

PROVINCIAL NEWS.

Lincoln.—The new Masonic-hall, in Grantham-street, of this city, was formally dedicated to its Masonic uses, on Thursday in last week, when a lodge was held, and a sermon preached on the highly Masonic text, "Walk as children of the light," by the Rev. E. R. Larken, M.A. chaplain to the Witham Lodge.

Ipswich.—It has been generally determined upon that the proposed cemetery shall consist of 50 acres. Two sites were proposed, the first near Foxhall-road, the other known as Hungerdown-hill, near Tuddenham-road. The terms for the former are, for the first 15 acres, 50*l.* per acre; beyond these 60*l.* per acre, with 5*l.* per acre, for tithe commutation, the trees and plantations to be taken by valuation. The terms for the Hungerdown-hill are 1,200*l.* for the first 13 acres, and 70*l.* per acre for any further land required. The representatives of seven parishes decided, against the remaining five, in favour of Hungerdown-hill. But a strong objection was taken to it on the ground that the drainage from it runs into the town, and it was agreed to send a memorial to the Home Secretary as to its eligibility. It is expected that an engineer will be sent down to inspect and report.

Banbury.—The authority of the Central Board of Health to the local board, to raise 3,775*l.* on mortgage of the rates, for main sewers, has now been received, the plans approved, and steps are to be immediately taken to obtain contracts, and to commence the works.

Oxford.—The delegacy appointed on the subject of the new museum has advertised for plans and tenders. The amount of the estimate is not to exceed 30,000*l.* All offers must be sent in on or before October 16.

Epsom.—Two workmen have been killed by the falling in of a sewer at Epsom.

Portland.—At the breakwater a steam-crane has been erected on the "jetty" for unloading vessels, by which as much work is effected in two or three hours as took eight men a day to accomplish.

Ventnor.—The gas company here have announced a reduction of 10d. per thousand feet in the price of gas, thus making the price 7s. 1d. instead of 7s. 11d. per thousand, "and there is not the remotest doubt," says the *Hampshire Advertiser*, "that the increased consumption will more than compensate for the loss in price, as has invariably been found the case with all gas companies, and ours will form no exception." The company, we think, might have dispensed with the odd penny, to retain which was but humbug on pretence of close calculation.

Wells.—The new county gaol, in course of erection, will contain forty cells, together with other offices, capable of accommodating, if required, more than double that number of prisoners. It is to be completed for the reception of prisoners before the August assize.

Evesham.—Besides 9,000*l.* already in hand for the erection of a new bridge here, the

raising of an additional sum of 4,000*l.* has recently been sanctioned by the inhabitants at a public meeting. The present estimate for the bridge itself is 10,000*l.* For approaches, &c. 3,000*l.* more are calculated on.

Bridgenorth.—It is intended to erect a new town-hall and market on the site of the theatre buildings, &c. in this town. Plans proposed by Mr. Griffiths, of Quatford, comprise accommodation for shambles, vegetable-market, &c. on the ground-floor, with shops on each side of the entrance, and a hall or large room over, about 100 feet in length. The mayor proposes that the corporation undertake the project, in preference to private speculation.

Leominster.—The design of Mr. Cranstoun, of Birmingham, architect, for the proposed new markets here, has been selected by the town-council. Application is to be made to the Treasury for authority to borrow 8,000*l.* on lands, tolls, &c. and other preliminaries are in progress.

Carmarthen.—The town council and local board of health are bestirring themselves here this summer. A new cattle market and abattoir have been commenced. The first contract for the town drainage, consisting chiefly of brick main sewers, is proceeding rapidly. A reservoir and new main for improving the water supply are in course of construction. There is also a handsome building, nearly completed, intended as a "public assembly-room." On the whole, Carmarthen is not behind-hand in sanitary and useful measures.

Pontypool.—On the 15th ult. the foundation-stone of a new town-hall, at Pontypool, was laid by Mrs. Hanbury Leigh, the wife of Mr. C. H. Leigh, the lord-lieutenant of Monmouthshire, at whose cost the building will be erected, in commemoration of the birth of a son and heir. Triumphal arches spanned the streets, and evergreens and flowers everywhere met the eye. The timbers of the triangles that supported the foundation-stone were completely hidden by shrubs and bays. Hundreds of workmen, with banners and music, conducted Mr. and Mrs. Leigh to the site. The style of the building is Italian, and the material, stone of the neighbourhood. Above the plinth will be a bold rusticated basement, pierced by the arch of the arcade, and one window on each side of a recessed porch, divided by a double string course from the upper part, which is plain, with quoined angles, and penetrated with three windows, of simple character. The whole is to be surmounted by a bold consoled cornice, and iron-panelled balustrade: from the centre will rise a small pediment, containing the armorial bearings of the lord-lieutenant, carved in stone. The wing to the left will be carried up square, to about a height of 14 feet above the main cornice, and will be used as a clock turret. The architects are Messrs. Bidlake and Lovatt, of Wolverhampton; and the builder, Mr. W. Prosser, of Abergavenny.

Feckenham.—The Cape-Hill new schools, in the parish of Smethwick, according to the *Birmingham Journal*, were opened on 14th ult. The building is pointed in style, and is surmounted by a cupola. The interior walls are unplastered and of red brick, with stone decorations. The roof consists of polished oak panellings, and the entire cost will be about 2,000*l.* These schools, which have been erected at the sole expense of Mr. Henderson, of the firm of Fox, Henderson, and Co. at an expense of about 2,000*l.* are intended for the use of the Presbyterian congregation at Smethwick.

Burslem.—The ceremony of laying the corner-stone of the new town-hall took place on 24th inst. A tinted lithographic view of the new hall and the market-place has been issued by Mr. Ralph Hales, the town surveyor.

Birmingham.—A joint-stock company has been formed for the erection of a moderate-sized hall for musical and other purposes, and plans prepared. It is intended, according to the local *Journal*, to erect the "Mendelssohn Hall" on an eligible site fronting Broad-street and adjoining the Bingley Carriage Works. According to the present designs, the exterior front will present a rustic basement, in which are three entrances, and from which rise four Corinthian pillars supporting a decorated entablature. On the basement story, and under the hall, are to be ten extensive rooms, suitable for offices. Above these is the floor of the hall. It is proposed to fit it up so as to afford comfortable sitting room for 1,000 persons. The seats are to be moveable. At the back of the hall it is intended to erect the orchestra, 31 feet deep, and extending the whole width of the building. There are to be three tiers of galleries, supported by iron pillars, and running entirely round the building, except the orchestra end. These are to be devoted to a dress circle, upper boxes, and gallery. Each tier will accommodate 400 persons seated; so that the building will hold comfortably 2,200 persons. It is proposed to light the hall from the roof. The amount required for the completion of the building, including organ, fittings, &c. it is estimated will not exceed 8,000*l.*; and this sum it is proposed to raise by 10*l.* shares, the holders entitled to certain privileges. A considerable portion of the capital has already been raised. Mr. Naden is the architect.——There are rumours of a permanent second theatre for this town being contemplated.

Nantwich.—The Local Board of Health had a meeting on Friday in last week, Mr. William Lee, consulting engineer, present, to decide on the tenders sent in for executing the proposed works of drainage and water supply. The contractors are said to be bound to complete the works within six months, and the following are the persons whose tenders were accepted, viz.: Messrs. Cochrane and Co. Dudley, for cast-iron piping for water supply; Mr. Edward Brookes, Huddersfield, glazed pipes for ditto; Mr. W. Smart, Nottingham, for public sewerage, house drainage, and private improvement works, and also for filter-beds, reservoir, and other works at Baddiley, connected with water supply. It was resolved to advertise for candidates to fill the joint offices of collector of rates and inspector of nuisances, at a salary of 40*l.* per annum.

Liverpool.—Staitc's electric light is now, it appears, being adapted for the tower at the north end of the Huskisson and Sandon Docks, with the object of lighting the basin and approaches to both, for which purpose it was tried on Sunday and Tuesday evenings in last week.

Manchester.—On Wednesday in last week the foundation-stone of new day-schools for the district of St. Matthew, was laid. The cost will be about 1,600*l.* The schools will accommodate 500 children.

Bradford.—The building erected on the old Piece Hall is opened by Messrs. Lumsden, Tindal, and Co. as a "Hall of Commerce." The hall is upwards of 100 feet in length, and a gallery runs round the greater part of the building, to which access is obtained by a staircase.

Bury and Radcliffe, in Lancashire.—The first sod on the site of the new waterworks for the supply of this important manufacturing district, was turned on 18th inst. by the deputy-chairman, Mr. Thomas Aitken, under the direction of the engineer, Mr. Mawson, of Manchester. These works are on the gravitation principle, and will supply, we are told, between 70,000 and 80,000 persons with water.

Middlesborough.—The plans and sections of the new cemetery drainage for Middlesborough have been adopted by the Local Burial Board. The works are now let, and progressing rapidly under the direction of Mr. J. S. Whitlock, of Middlesborough, C.E. Other works will have to be constructed previous to the ground being ready for interments, which it is not likely to be before the expiration of six months.

Sunderland.—In reply to the advertisement of the poor-law guardians of Sunderland, for the erection of the new workhouse, twenty-nine tenders were forwarded. Of these, only five were for the complete undertaking. The highest tender for the whole was 20,000*l.*; the second 15,721*l.*; the third, 14,339*l.*; the fourth 13,225*l.* 10s.; the fifth, 11,450*l.*—the last, by Mr. A. Neill, of Bradford, a large contractor, it is said, and engaged at present in erecting some large works in different parts of the country. It was agreed that, in the event of inquiries being found satisfactory, Mr. Neill's contract be accepted. The architect is Mr. John Edward Oates.

PICTURES PURCHASED BY PRIZE-HOLDERS IN THE ART UNION OF LONDON.

THE following are amongst the selections which have been made since the last statement:—

From the Royal Academy.

150*l.* Fishing Village on the Coast of Normandy, W. Wilson, jun.; 73*l.* 10s. Chiavara on the Riviere di Lepante, G. E. Hering; 75*l.* Jetty on the Dutch Coast, A. Montague; 42*l.* Dr. Johnson at Cave, the publisher's, H. Wallis; 52*l.* 10s. Antwerp Cathedral, S. Read; 50*l.* The Corner of the Studio, J. D. Wingfield; 45*l.* The Shadow on the Wall, E. Cockburn; 40*l.* The Fern-burners and Castle Craig, near Keswick, W. Havil; 31*l.* 10s. Cribbage, J. W. Haines; 30*l.* Cattle and Landscape, A. J. Stark; 25*l.* Buckhurst Park, J. Stark; 26*l.* 5s. The Bird's Nest, E. J. Cobbett; 25*l.* The Mother's Prayer, C. Wright; 21*l.* Interior, Lower Brittany, J. V. De Fleury; 20*l.* Bible-class in Scotch Parish-school, J. Stirling; 20*l.* The Stepping-stones, A. Bouvier; 20*l.* Evening on the Machno, J. Dearle; 84*l.* The Siesta, C. Landseer, R.A.; 63*l.* The New Suit, H. Emerson; 70*l.* Decline of Day, A. Gilbert; 60*l.* Scene on the Dart, S. Hodges; 60*l.* The Road through the Park, G. Chester; 40*l.* Pirates, W. Welby.

From the British Institution.

100*l.* The Rocky Path of a Mountain Burn, Henry Jutsum; 80*l.* A Blowing Day in the Downs, W. A. Knell; 60*l.* The Entrance of Dover Harbour, J. Wilson, jun.; 50*l.* The Rehearsal of the Village Choir, F. Underhill; 50*l.* The Fall of the Sallenches in the Valais, G. Stanfield; 40*l.* After Service, F. Underhill; 36*l.* 15s. The Watering-place, A. Collins; 30*l.* Scarborough from the Sea, John Wilson; 25*l.* The Halfway House, G. A. Williams; 25*l.* Rustic Figures, J. J. Hill.

From the Society of British Artists.

60*l.* On the Sands at Barmouth, A. Clint; 60*l.* Fishing-boats off Shakspere's Cliff, J. Wilson, jun.; 50*l.* The Harvest Field, G. A. Williams; 40*l.* Clovelley Pier, North Devon, W. Shayer; 40*l.* Cricketh, A. Clint; 30*l.* View of Pont Aberglaslyn, C. Varley; 20*l.* "On Giles and such as Giles the Labour falls," C. Richards; 20*l.* On the Thames near Putney, A. F. Rolfe; 20*l.* Etretat, Coast of Normandy, J. Wilson, jun.; 80*l.* The Ross Trappe, J. Zeitter; 50*l.* Llyn Gwernen, H. J. Boddington; 40*l.* Gausta Field, W. West; 40*l.* The Angler's Haunt, G. A. Williams.

From the National Institution.

100*l.* A Pleasant Nook in North Wales, H. B. Willis 100*l.* The Lazy Herd—a Scene on the Conway, F. W. Hulme and H. B. Willis; 100*l.* Game and Fruit, W. Duffield; 80*l.* The Thames near Pangbourne, S. R. Percy; 50*l.* River Scene, North Wales, F. W. Hulme; 40*l.* Muslin Workers, C. J. Cobbett; 40*l.* The Bay of Swansea from Newton, A. F. Rolfe; 52*l.* 10s. On the Conway near Bettws-y-coed, H. Brittain Willis; 40*l.* A Quiet Retreat on the Thames, G. A. Williams; 25*l.* Rhinog Fawr, from Cumbyean, North Wales, W. Williams; 20*l.* What shall I Sing? A. Russell; 20*l.* Water-mill at Trefrew, North Wales, H. B. Gray; 25*l.* The Low Shed—a Scene in Surrey, E. C. Williams; 25*l.* Newark Abbey, F. W. Hulme; 25*l.* Little Nell, F. Underhill; 20*l.* The Woodman's Repast, E. Williams, sen.; 30*l.* The Quay, Rouen, J. Henshall.

From the Water-Colour Society.

52*l.* A Roman Monk—Study of a Head, Carl Haag; 40*l.* Hastings from the Sea, C. Bentley.

From the New Water-Colour Society.

SYMBOLISM.

OXFORD ARCHITECTURAL SOCIETY.

AT a meeting of this society on the 31st May, Mr. Thornton read a paper on "Symbolism," in which he said,—Symbolism is of two kinds, direct and indirect. Direct symbolism is where, as in painting and sculpture, the primary end is to produce from a certain object or action a representation of something else. Symbolism indirect (called symbolism *par excellence*) is where, in using an object or action for one end, we also employ it *secondarily* to teach or admonish. Thus, in architecture, the piers are primarily intended to support the building, but secondarily symbolize *apostles and doctors*. Symbolism of this kind may be *intentional* or *unintentional*. The latter is the result of the unperceived principles or workings of the artist's mind: it is this which renders the works of great masters such a subject for study. Intentional symbolism, though derided by the practical, he considered a valuable engine for teaching, whether applied to church architecture, embellishment, or ritual. The writer urged that in employing symbolism we must carefully observe three rules—1. That the symbolism be *true;* that is, that there be a real connection or similitude between the symbol and the thing symbolized; 2. That it be *intelligible*, not far-fetched or over-strained, but easy of comprehension, so as to be profitably employed to teach; 3. That it be *worthy*, or, in other words, that we do not employ it to set forth things trifling or doubtful, but really use it as a means of edification, not as a mere piece of theory or an ecclesiastical toy.

We take the opportunity of mentioning a pamphlet by Mr. William White, "Is Sym-

bolism suited to the Spirit of the Age?" wherein the arguments in favour of the affirmative view of the question are cleverly set forth.* "But notwithstanding all this," as Mr. White himself says, "it must not be forgotten that God is more worthily worshipped and more truly honoured by the sincere service of the pure and lowly in a humble cot, than by the sumptuous ritual of a mere formal or indevout worshipper in the most noble building."

Notices of Books.

Handbook for Travellers in Greece. New Edition. London: John Murray. 1854.

Although the aspect of affairs in the East just at this moment may not be such as to lead a larger number than usual of pilgrims in search of the beautiful to visit Greece this year, these same circumstances may induce a desire in many who have no intention of visiting the country to get some knowledge of its contents and aspect. This they will find admirably set forth in the new edition of the *Handbook*, and then, when peace once more returns to the world, many will be impelled by what they have learnt as to the comparative fewness of difficulties, to go to the hotel at the corner of Eolus-street and to investigate for themselves

> "Athens, the eye of Greece, mother of arts
> And eloquence."

The journey now is, in truth, nothing. You may go easily from London to Athens in ten days, and for about 20*l.* first-class fare, including all expenses. The way to do this is by railroad to Ostend to Trieste, through Cologne, Dresden, Prague, and Vienna:—of course, on, on, on; and then proceeding from Trieste to Athens in the Austrian Lloyd's steamers, by the Adriatic and Gulf of Corinth.

The subject of the new handbook is *Classical and Historical Greece*, that is to say, the Ionian Islands, the kingdom of Greece, the islands of the Ægean Sea, and the provinces of Macedonia, Thessaly, and Albania, not yet re-united to Christendom. It contains a very full account of the ancient monuments of Athens by one who knows them well, and is in all respects excellent. Not the least valuable part of the book is the chapter of "Requisites and Hints before Starting," to which those of our readers who intend on the first convenient opportunity to act on our suggestion will pay attention, if they are wise.

Catalogue of the Museum of London Antiquities, collected by and the property of Mr. Charles Roach Smith. Printed for the Subcribers only. 1854.

This catalogue forms a goodly volume, with numerous engravings. It is strictly limited to the London antiquities of Mr. Smith's more extensive museum, collected incidentally during excavations made of late for City improvements, sewers, &c. But for Mr. Smith's exertions we should not have had even the nucleus of (it is to be hoped) a really national or British museum. At all events, it constitutes the nucleus of a museum of London antiquities, which, once collected as it now is, we trust will never be again scattered as others have been, but, on the contrary, be adopted by the authorities, who have much to answer for already by neglecting to take those measures which might have ere this time put them in possession of a collection at least ten times as great as that which they have now in their power to begin with. In consequence of their apathy many important remains are for ever lost, and others will cost in their re-collection it may be a hundred times the sum for which they might have originally been had from their own workmen. In making the cofferdams for new London-bridge a jet of water actually threw up a large quantity of angels of Henry VII. and VIII. and half-sovereigns of the latter, which were seized upon directly, ostensibly and avowedly for the corporation, but where they are nobody can tell. At this moment buildings have been found in Cheapside, at the corner of Bucklersbury; but what they are nobody seems to be able to tell either. So it is in hundreds of instances. There has been almost a total neglect of those antiquities which, carefully collected, would shed great light on the history of London and of the nation at large. This it is earnestly to be hoped will no longer be allowed; and meantime the citizens are deeply indebted to Mr. Smith for his strenuous exertions and endeavours to make up for the shortcomings of those who ought to have left literally nothing in this direction for him to perform.

* Published by Bosworth, Regent-street. 1854.

Miscellanea.

Improvement of Dwellings at Dudley.—The Dudley people have formed a branch of the Metropolitan Association for the Improvement of the Dwellings of the Industrial Classes, and the branch association held a public meeting on Tuesday in last week, at the local School of Art, in Upper King-street there, in order to bring the objects and merits of the association into local notice, and so promote its interests. Lord Ingestre was present, together with other influential persons, and various appropriate resolutions were passed. The necessity for improvement in the dwellings of the poorer classes at Dudley, as we lately noted, is but too clearly shown by the fact that, bad as we are in London with an average life of only twenty-nine years, matters are vastly worse at Dudley, where the average length of life is actually only sixteen years. It is to be earnestly hoped, then, that this local association will be strongly and promptly supported.

The Carlton Club.—With reference to the *fracas* at the Carlton Club respecting their building, we may state that on Thursday in last week there was a special general meeting of the club, when a very unwonted number of members assembled, and settled *once for all*, by a good majority, that the architect's original plan should be carried out, which gives the entrance in the centre, and which leaves the west wing, already built, undisturbed. The club is to be in occupation of the new building by this time next year.

The Memorial of the Great Exhibition.—A subscription having been collected, and H.R.H. the Prince Consort having, as was to be expected, very properly ignored the erection of a statue of himself, so soon as the subject came fairly before him, various suggestions, besides that of the prince, for the disposal of the money, have been made. Amongst these, Mr. C. B. Allen suggests that a high Order of intellectual merit be founded, with a large gold medal and star, to be conferred on men of distinguished ability in science, art, or literature, and also in trade, the number to be regulated of course by the means provided, and the Order to be conferred, by H.R.H. the Prince himself, as the head of the Order, on such only as may have within the year previous made some important discovery, or otherwise distinguished himself so as to merit such a mark of public esteem.

Leicester Literary and Philosophical Society.—The last meeting of the present session of this society was held on Monday evening before last, Mr. J. F. Hollings, president, in the chair. The president informed the meeting that the lecturer of the evening, Dr. Noble, was prevented reading his paper, and he had undertaken to fill Dr. Noble's place by an extempore address on Sepulchral Antiquities, illustrated by the contents of their museum. The president then entered on and delivered a very interesting lecture, in which he reviewed the sepulchral antiquities and practices of the Druids, the Etrurians, the Romans, and the Anglo-Saxons. In speaking of the lamps so frequently discovered in Roman sepulchres, the lecturer dwelt at some length on the popular idea that the ancients were possessed of the secret of preparing a kind of oil which would burn for an almost unlimited length of time, and offered an explanation, or rather a correction of the idea, similar to what we long since suggested in the *Builder*, namely, that these lamps (it may have been designedly) were only in reality lit at the moment of *opening* tombs, which may have been full of inflammable air, and examined with torches, or which perhaps were till then hermetically sealed on purpose to prevent waste of inflammable material. The president concluded by apologising, which he needed not to do, for the defects of a lecture prepared on two or three hours' notice.

The Cheltenham Exhibition.—The new building of iron and glass was opened on Thursday in last week, with an exhibition of horticultural and other products of manufacturing industry, and also of art, which seem to fill not only the new building, which is 400 feet long, but adjoining buildings, and tents put up for the purpose. The opening ceremonial included music, by a band of 100 performers, and the attendance was larger even than anticipated.

Effigy, Aldermaston Church.—I have heard that you are glad to be told of any architectural or monumental antiquities not generally known; if that is so, I beg to point out to your notice a very fine old *alabaster* recumbent figure of Sir George Forster, in Aldermaston Church, Berks, A.D. 1526: there is also the figure of his wife by his side. They are in good preservation on the whole, and the tomb itself, though some of the small figures in the niches are mutilated, is exceedingly beautiful and interesting. I am not aware that they have been engraved. Aldermaston is on the Great Western Railway, a short way beyond Reading, in a pretty but retired situation. The fine old mansion of the Forsters has been recently pulled down, and a handsome Elizabethan edifice erected in its stead.—D. F. S.

Opening of the Oxford Public Library.—On Thursday in last week the Public Library at Oxford was formally opened to the public, in the presence of the mayor and various aldermen, and about fifty other inhabitants. Mr. Alderman Sadler, as chairman of the library committee, presided. The mayor Mr. (R.J. Spiers) also addressed the meeting, and took upon himself and for his successors the charge of the institution. He confessed that he was disappointed that more persons had not contributed to the library, but hoped they would be induced to do so, and that this might become a neutral ground on which men of all parties and creeds might meet in unity. Mr Alderman Sadler stated that it was intended to take in eight morning and two evening papers, the cost of which would be defrayed by voluntary subscriptions. Mr. Alderman Sadler having acknowledged a vote of thanks for his exertions on behalf of the library, the ceremony of the opening was brought to a conclusion.

Railway Matters.—The new central station of the London and North-Western Company, in New-street, Birmingham, was opened on Thursday in last week for passenger traffic, and the Curzon-street station finally closed. All the trains of the North-Western, Midland, Stour Valley, Shrewsbury and Birmingham and Stour Valley are thus brought together in the centre of Birmingham. The station occupies an area of 7 acres, and the roof 4½, 2¼ of which are constructed of glass. There are four platforms, the longest of which, when completed, will be upwards of a quarter of a mile in length. Attached to the station is a first-rate hotel. We some time since gave fuller details as to the construction of this great station.——The Great Northern Railway Directors have accepted the tender of Messrs. Lister and Son, of Doncaster, builders, for the erection of schools there, for the children connected with those employed in the railway works. The building is from a design by Mr. H. Goddard, of Lincoln. They are to be of brick with stone windows and high-pitched roof, and calculated to accommodate five hundred children. The boys' will be 50 ft. by 20 ft.; and the girls' 46 ft. by 21 ft., within the walls. The site is at the front of St. James's buildings. The foundation-stone was to be laid on Monday. The entire cost will be upwards of 1,000*l.*——The Egyptian Railroad is now said to be in good working order, and answering exceedingly well. The trains do not run on it at present at any stated periods. It is chiefly used when European or Indian passengers arrive in Egypt. English engine-drivers are employed on it. The speed is about twenty miles an hour.——Mr. H. Smith, of New York, an engineer, has patented an invention, which he calls an Elevated Iron Railway for Suspended Carriages, and considers "destined to open a new era in the history of railroads." Mr. Smith describes his plan as "obviating the necessity of fencing, excavating, and filling in valleys, and decreasing the danger of railroad travelling: being composed entirely of iron, it is not subject to decay; and being elevated, it passes highways, so that vehicles can pass beneath it. It can be built cheaper than the other kind of road, as it will only take from 1,000 to 1,200 tons of iron to the mile, and no digging or filling in is required, because the pillars can be lengthened to meet any inequality; and by a mechanical arrangement very heavy grades can be ascended."

The Iron Trade.—There is still a determination to force prices, but no rise has yet taken place, nor is it likely the speculators for a rise will gain their point, at least before the next quarterly meetings, although 2s. 6d. to 5s. a ton are said to have been got on bars. A speculative business in pig iron, however, has begun again at Glasgow, with an asserted advance of 1s. to 2s. a ton, market price, 86s. 6d. net cash, free on board. Shipments have been diminishing accordingly.

State of Drainage in England.—The Commissioners of Inquiry report that out of fifty towns that came under their notice, "in scarcely one could the drainage be pronounced good; whilst in seven it was indifferent, and in forty-two decidedly bad, particularly as regards districts inhabited by the poorer classes."

PAINTINGS IN BACTON CHURCH.—Workmen employed in cleaning the church of Bacton, Suffolk, have discovered evidences of colour below the accumulated whitewash, which in many places was more than half an inch thick; and a careful scraping of the walls has since shown that the whole of the interior had at one time been decorated with representations of scriptural and legendary incidents. Among these the most conspicuous is a huge St. Christopher, with the infant Saviour seated on the giant's shoulder; and the Day of Judgment, in the accustomed place over the chancel arch. Examples of diaper-work have also been disclosed both in nave and chancel.

NELSON COLUMN.—Permit me again, through the medium of your journal, to suggest, as a finish for the column (until the lions are caught, and made docile enough to occupy the allotted place), that four mounted guns be placed at the four angles, particularly now that *metal* sufficient has been found to finish the vacant panel with its *basso-relievo*.—H. B.

SALE OF THE PRESTON WATER-WORKS TO THE TOWN.—Sir John Rennie, the umpire appointed for the purpose, has given his award, fixing 135,225*l.* as the price to be paid for the Preston Water-works by the local Board of Health. The estimates of the witnesses differed very widely, one valuing the works at 95,000*l.* and another at 216,000*l.* The purchase-money includes liabilities, amounting to about 30,000*l.* About a year ago, the local board made an offer equivalent to 142,500*l.* but this was refused.

FALL OF CHIMNEYS AND LOSS OF LIFE.—A sad accident occurred at Malvern, last week, at a new building in course of erection near the Graham-road. A stack of chimneys, which it seems was particularly heavy in the upper part, gave way, and fell upon the rafters of the unfinished roof and the scaffolding outside. A carpenter, who was at work, jumped from the roof to the ground, two high stories, or a depth of upwards of 30 feet, and died on the spot. Another carpenter, who was upon the scaffold, about 16 feet from the ground, went down amongst the falling timber, and was severely injured.

TYNE PIERS.—In consequence of an intimation from the Lords of the Admiralty, Mr. Walker, C.E. has been authorised to appoint a resident engineer to superintend the erection of the pier at the mouth of the Tyne, at a salary of 400*l.* per annum. A commencement of this undertaking has been made at the north side, by cutting the rocks at Tynemouth.

MELTON MOWBRAY COMPETITION.—In the architectural competition for the intended new town-hall, corn exchange, savings bank, library, and reading-room, &c. at Melton Mowbray, Leicestershire, the committee had twenty designs sent in, and after examination, the design found afterwards to be by Messrs. T. Mallinson and Son, architects, Nottingham, was adopted. The premium offered for the second best design was awarded to Messrs. Bidlake and Lovatt, Wolverhampton.

HOWCHURCH SCHOOL COMPETITION.—We have received some strong statements reflecting on the conduct of the committee in this matter, but are forced to postpone further reference to them.

SAFFRON-HILL DISTRICT.—Mr. F. W. Porter has been elected district surveyor for the Saffron-hill Liberty, &c. Mr. James Thomson was next on the list.

IRON GRANARIES.—A patent has been taken out by Mr. W. Bridges Adams for substituting grain reservoirs for the present system of storing. As ordinarily constructed, great uncertainty exists, from damp and mildew, weevils, rats, mice, and other vermin, and the floors are only half or three-parts filled, to enable men to go in, turn over the corn, and ventilate it. The patentee proposes to construct tanks of various sizes, either of cast or wrought-iron, manufactured in parts, so as to be easily and cheaply conveyed, and set up in any locality, as a remedy for these evils. The tanks may be made to hold from 100 to 2,000 quarters of corn, and may be placed above ground, or in bricked excavations or cellars, and other places of little value. They would have an opening at top for filling them, and a discharge-pipe at bottom, with a valve acting similarly to a water-cistern. In case of wheat or other grain being damp when charged, a current of warm air may be injected by an air-pump to carry off the moisture, and carbonic acid or other gas may be injected to kill vermin.

SESSIONS HOUSE, NEWINGTON.—I send you the tenders delivered for the painting of the Sessions House, Newington:—

Piper	£487	0	0
Mog	347	0	0
Cobbett	308	0	0
Taylor	286	0	0
Goldsworthy	273	0	0

We who are uninitiated cannot understand these things. Mr. Taylor did the same job in 1847: his tender then was 281*l.*—Bo.

LANDING PIER, WESTMINSTER BRIDGE.—In your interesting description of the proposed new bridge at Westminster, I regret not to have observed any plan for a pier for the embarkation or disembarkation of passengers by boats. Surely a contrivance, somewhat similar to that at Hungerford, could scarcely have escaped the notice of the projectors. Has this matter been overlooked? If so, you will be doing a great service to the public by bringing it to the notice of the proper authorities.—A. B. C.

SIMILITUDE OF A TEMPLE IN INDIA TO THE JEWISH TEMPLE.—A missionary who lately visited the great heathen temple at Conjeverrm, in India, thus writes of the similitude in structure and rites to the ancient Jewish temple. "The fact is unquestionable," he says, "that there is a striking resemblance between the arrangements here and those of the ancient Jewish temple: first, we entered the outer court, then the court of the people, and then the holy place, raised considerably above a splendidly paved outer court, within which, as if in awful mockery of the ancient dwelling-place of Jehovah, was the holy of holies. At the entrance of the holy place we were suddenly stopped, and told we could go no further: the opening was nearly as large as the first gateway we had entered: we had got in a few yards, and stood on some steps which led up to the raised court within. That scene made an impression never to be effaced.—*Jewish Chronicle.*

LIGHT AND SHADE.—It cannot but be remarked that most young ladies of the present day do not present that mixture of the rose and lily in their complexion that their mothers were remarkable for, and which always elicited the astonishment and approbation of all foreigners visiting our country. Is not this to be attributed in a great measure to the increasing habit of keeping all sunshine out of our apartments? One would think that people of the present day thought that to be *too* charming were dangerous, and consequently treated their young ladies like the gardeners do celery, to render what would be noxious, innocent by keeping it from the light. It is to be hoped that the appearance of health will never be thought *ungenteel*, and in the words of Sir Walter Scott, "that we shall never consider that to be vulgar which ought to be common." Let us plead against etiolation, and never mind the expense of new carpets and window-curtains. W. H. B.

TENDERS

For the erection of dwellings for non-commissioned officers of the 3rd regiment of Royal Middlesex Militia, at Turnham green. Mr. F. H. Fownall, architect.

Messrs. Todd	£2,698	0	0
Messrs. King and Son	2,584	0	0
Mr. Higgs	2,456	0	0
Messrs. Pollock and M'Lennan	2,420	0	0
Messrs. Adamson and Son	2,409	0	0
Mr. Wilson	2,399	0	0
Mr. Nye	2,286	0	0

For eight houses, of six rooms each, at Limehouse.

Wills	£2,200	0	0
Chapman	2,020	0	0
Watts	1,900	0	0
Warren	1,880	0	0

For a house in the Holloway-road, for Mr. S. E. Barnes. Mr. Joseph James, architect. Quantities supplied by Mr. Poland.

Pollock and M'Lenan	£1,393	0	0
Parker	1,380	0	0
Turner and Sons	1,365	0	0
Macey	1,346	0	0
Newby (accepted)	1,125	14	6

For building a house, at Tulse-hill, for Mr. Edward Grove. Mr. George Porter, architect.

Elston, City	£7,293	0	0
Carter	7,050	0	0
Higgs	6,989	0	0
Rowland and Evans	6,985	0	0
Thompson and Son	6,800	0	0
Sissons and Robinson	6,800	0	0
Farrant	6,774	0	0
Harmer	6,763	0	0
Brown	6,548	0	0

For carcassing ten houses, in Maiden-lane, Holloway. Mr. G. Briand, architect.

Harmer	£3,209	0	0
Wilson	3,188	0	0

A HANDBOOK OF ARCHITECTURE FOR THE UNLEARNED.

ADVERTISEMENTS.

WALDEN and ASHDON, ESSEX.—TO BE SOLD BY AUCTION, by

MESSRS. NOCKOLDS and KING, upon the PREMISES, on TUESDAY, the 27th day of JUNE, 1854, about 18 OAK TIMBER TREES, lodged ASHDON ELM ditto, also a quantity of Ash Seconds and Oak Sawings, in lots. The above timber is now lying in Pounce, Great Hales, and Grimswich Woods, all close to hard roads. Many of the trees are of good dimensions, long length, and excellent quality, and well suited for coopers, builders, and others. Six months' credit will be given subject to the usual conditions. May be viewed by applying to JOHN BARKER, the woodward, of whom catalogues may be had, also at the inns in the neighbourhood. Sale to commence in Great Hales Wood, a short distance from Ashdon, at TEN o'clock.

TO WELL-BORERS, MACHINISTS, ENGINEERS, AND OTHERS

MR. JOHN. F. FISHER is instructed to SELL by AUCTION, on the PREMISES, Rhodeswell Wharf, near the Commercial Gas Works, Stepney, on FRIDAY and SATURDAY, JUNE 16 and 17, 1854, at ELEVEN for TWELVE o'clock each day, the valuable TOOLS, IMPLEMENTS, and EFFECTS, comprising several sets of boring tools, fifty augers of various sizes, thread cutters, boring sheils, 1½ boring tools, six cast-iron pumps, four double action ditto, pump rods with brass bosses, couplings, and joints, capital double lever horse-mill, two very powerful brass-mounted lifting-jacks, with square threaded screws, 24 inches diameter, four cranks, well buckets, lifting dogs, kedge anchors, chain, blocks, falls, copper pipes, &c. Also about forty tons large banded bore pipes, with turned joints, mortise pinion five and drum wheels, diving apparatus complete, with air pumps, a few sets of blacksmith's and wheelwright's shops, bar-iron, and about 6 cwt. of superior steel, broad-wheel waggon, two spring carts, two tumbril do useful timber, planks, posts, stone, malm pumps, and numerous items. May be viewed the day preceding and morning of sale, and Catalogues had at the Globe, Mile-end; George, Commercial-road; Britannia, Limehouse; Victoria, Stepney; and of the Auctioneer, Rokeby-house, Stratford and Plaistow, Essex.

Building Materials, Guy's Hospital.

PULLEN and SON are favoured with instructions from the Governors of Guy's Hospital to SELL by AUCTION, on the PREMISES, on MONDAY, JUNE 12, at TWELVE, all the excellent MATERIALS of a large building, lately used as wards and dormitories, and several tenements adjoining the Hospital in Little Queen street, King-street, Borough, comprising useful oak timber, sashes, doors, and fittings, floor-boards, slates and tiles, iron columns, stone coping, lead gutters and pipes, large zinc dial, together with the capital sound timbered May be viewed on Saturday, and catalogues had of PULLEN and SON, 8, Fore-street, Cripplegate

FARRINGDON-STREET EXTENSION Building Materials of Thirty Houses.

PULLEN and SON have the honour to announce that they will SELL by AUCTION, on the PREMISES, on MONDAY, JUNE 19, and following day, at TWELVE, by order of the Improvements Committee of the Corporation of the City of London, the whole of the valuable BUILDING MATERIALS of about thirty houses, shops, factories, and premises, in Turnmill-street, Great saffron-hill, Haystreet, and Coppice row, Clerkenwell, comprising about 600,000 capital bricks several tons of lead, plain and pan tiles, prime timber, and a great variety of useful materials and fittings. May be viewed two days previous, and Catalogues had at the Architect's office, Guildhall; and of PULLEN and SON, 8, Fore-street, Cripplegate

QUEEN-SQUARE. Building Materials of a large Residence.

PULLEN and SON have received instructions TO SELL by AUCTION, on the PREMISES, on FRIDAY, JUNE 16th, at TWELVE, in lots, all the valuable BUILDING MATERIALS, Fixtures, and fittings up of the spacious residence, 37, Queen-square, Bloomsbury, the corner of Great Ormond-street, comprising excellent sound brickwork, prime oak and fir timber to 36, glazed sashes and shutters, useful doors, partitions, wainscoting, marble chimney-pieces and internal fittings, 8 squares of Yorkshire landing and upper floors, a large quantity of pan tiles, 12½ feet of iron railing and stone curb, stone paving, lead gutters, cisterns, and pipes, stoves, ranges, and useful fixtures and fittings up. May be viewed the day previous. Catalogues had of EDWARD HABERSHON, Esq. Architect, 38, Bloomsbury-square; and of PULLEN and SON, 80, Fore street, Cripplegate

TO SURVEYORS AND BUILDERS' CLERKS.

A CLERK WANTED, in the Office of a BUILDER in London, who has been accustomed to take out quantities and measure up extra works.—Apply to J. Office of "The Builder"

TO SHOP FOREMEN.

A FOREMAN WANTED, to take charge of a Joiner's Shop in London, containing forty men.—Apply to W. Office of "The Builder"

TO ARCHITECTURAL STUDENTS.

A LONDON ARCHITECT has a Vacancy for a TURNOVER PUPIL, or an IMPROVER. No salary will be given. Address to ARCHITECTURUS, Post-office, 73, Farringdon-street, City.

CIVIL ENGINEERING.—PUPIL WANTED.—The Borough Surveyor for a large town in the Midland Counties, where extensive sewerage works are now being carried out, has a VACANCY for a PUPIL, who would have an opportunity of obtaining a thorough knowledge of civil engineering, including town drainage, the formation, paving, &c. of roads and streets, general surveying, plain architecture, &c.—Address, S. L. E. Office of "The Builder."

TO PARENTS AND GUARDIANS.

SURVEYING and ARCHITECTURAL PUPIL.—The Town Surveyor of Great Yarmouth has a VACANCY in his Office for a respectable Youth as ARTICLED PUPIL, at a moderate premium, one with a taste for drawing preferred.—Apply to Mr. LAING, Town Surveyor, Great Yarmouth.

SOUTH WALES RAILWAY.—TRUCK INSPECTOR WANTED.—The Directors of this Company require the services of an intelligent person practically acquainted with the construction and repair of trucks.—Applications, with testimonials, to be addressed, on or before the 13th instant, to the undersigned. FREDERICK G. SAUNDERS, Secretary. 19, Eastbourne-terrace, Paddington, June 6, 1854.

TO CLERKS OF WORKS.

THE Services of an experienced, active, and fully-qualified Person are required for the superintendence of a large public building. Those only need apply whose testimonials and references will bear the strictest inquiry.—Address, stating terms, to Mr. JOHN BROWN, Architect, Upper Kingstreet, Norwich.

WANTED, in one of the Metropolitan Railways, a Person to SUPERINTEND the REPAIRS, &c. of the BUILDINGS at the various Stations. The salary will not exceed three guineas per week.—Applications, with testimonials, may be addressed to W. W., care of Messrs. Smith and Son, 136, Strand, not later than the 14th inst.

TO BUILDERS AND OTHERS.

WANTED, a SITUATION as FOREMAN or CLERK of WORKS, by a Practical Man (Carpenter and Joiner). Is a good draughtsman, and writes a good hand. Would make himself useful in office if required. Good testimonials from prior engagements.—Address M. A. Mr. Smith's, Bookseller, 3, Graham-street, City-road Basin, Islington.

WANTED, a SITUATION as CLERK of WORKS; is a good draughtsman, and competent to prepare fair working drawings; is well experienced in all the branches of building, and has first-rate testimonials. Address, A. Z. 3, Bloomsbury-terrace, Vauxhall-road, Pimlico.

TO ARCHITECTS AND BUILDERS.

WANTED, by an experienced practical Man, a RE-ENGAGEMENT as Clerk of Works or General Foreman. Unexceptionable references.—Apply to W. H. K. Office of "The Builder."

TO BUILDERS.

WANTED, by a Young Man, a Situation in a Builder's office, and to work a portion of his time at the bench. He has a good knowledge of the routine of a Builder's office, as also of drawing, measuring, &c. Will have no objection to engage for twelve months certain.—Address, stating salary, to X. Y. Z. Mr. Hewett, Post-office, Upper Berkeley-street West, Connaught-square, Paddington. No objection to the country.

TO GENTLEMEN, CONTRACTORS, BUILDERS, AND OTHERS CONNECTED WITH HOUSE PROPERTY.

WANTED, a SITUATION as FOREMAN, PLASTERER, or GENERAL MANAGER, by one who has had twenty years' experience in the above line (both plain and ornamental), also well acquainted with all kinds of cements, both for inside and outside decorations, and all other purposes in the repairing, constructing, and beautifying of houses, tanks, fountains, reservoirs, &c. &c. Would have no objection to enter into a contract with respectable parties for plastering, cementing, &c. &c. in town or country, active employment, where the writer could make himself useful, being his principal object.—Address, J. L. care of Mr. Jas. Rogers, 95, Holborn, London.

TO BUILDERS

WANTED, by the Advertiser, aged 35, a carpenter and joiner by trade, a RE-ENGAGEMENT as GENERAL FOREMAN, or as SHOP FOREMAN. Understands the measurement of work, construction of roads and sewers, &c. No objection to the country. Satisfactory testimonials as to ability, &c. can be given.—Address, A. Z. No. 5, Paulton terrace, Church-street, Chelsea.

TO BUILDERS, PAINTERS, &c.

WANTED, a CONSTANT SITUATION as a good PLUMBER.—Address, G. P. 11, Snow hill, Bath.

TO ARCHITECTS, SURVEYORS, &c.

AS ASSISTANT in an office, or to superintend works, the advertiser offers his services.—Address to A. B. Mrs. Phillips, 6, Artesian-place, Richmond-road, Bayswater.

TO ARCHITECTS AND BUILDERS.

A YOUNG MAN, who has for some time past been engaged in an eminent Architect's Office in London, wishes a RE-ENGAGEMENT. Understands making contract, working and perspective drawings, Roman and Greek ornament, details, also Gothic, and is a good colourist.—Address, B. Q. Office of "The Builder."

AN active and experienced Clerk of Works, aged 36, having seven years' reference from his late employers, is in want of an ENGAGEMENT; fully competent to manage extensive works. Address, ALPHA, Byron-villa, Battersea, Surrey.

A BUILDER'S CLERK, accustomed to the general routine of the office, measuring of work, &c. is desirous of a RE-ENGAGEMENT. No objection to the country. —Address E. W. R. Office of "The Builder."

TO MASTER PAINTERS AND OTHERS.

A YOUNG MAN wishes to meet with a CONSTANT SITUATION, who understands the GRAINING, WRITING, PAINTING, GLAZING, &c., and can make himself generally useful. Address M. R. 4, Brewer street, Victoria-road, Pimlico.

TO BUILDERS, TIMBER-MERCHANTS, AND OTHERS.

A CLERK, well versed in Builders' accounts, prices of material, measurements, and the general principles of bookkeeping, desires a RE-ENGAGEMENT.—Address, X. Y. Z. 13, Charlwood-place, Belgrave-road, Pimlico.

TO ENGINEERS, SURVEYORS, AND CONTRACTORS.

A DRAUGHTSMAN and SURVEYOR, of fourteen years' practice, capable of writing, tinting, and finishing plans in accordance with the specimen plans of the Board of Health, is desirous of an ENGAGEMENT. Terms moderate.—Letters addressed KORAX, Royal Breakwater Hotel, Portland Island.

AS WORKING FOREMAN of MASONS, a YOUNG MAN, aged 31. A good draughtsman, carver, and letter-cutter. Practically acquainted with lobbing and public work. Unexceptionable reference. No objection to the country. —Direct, D. V. Office of "The Builder."

TO PLUMBERS, &c.

A YOUNG MAN, who has served his time to the plumbing, painting, and glazing, wishes to IMPROVE himself in the Plumbing.—Direct, W. H. No. 3, Arthur-terrace, Queen's-road, Holloway.

TO BUILDERS.

A RESPECTABLE, sober, married Man, wants a SITUATION as PAINTER, GLAZIER, PAPER-HANGER, &c. The country preferred; constant employment being the advertiser's wish.—Letters, prepaid, with all particulars, to J. HARTLEY, 84 Paradise row, Queen's-road, Chelsea.

TO ARCHITECTS.

A GOOD and expeditious DRAUGHTSMAN, who is perfectly capable of getting up working and finished drawings, perspectives, &c. is a good colourist, and understands the routine of an office, is desirous of meeting with an ENGAGEMENT. Salary moderate.—Address C. R. 5, Caledonian-road.

TO ENGINEERS AND MANUFACTURING FIRMS.

CLERKSHIP WANTED.—A Gentleman, aged 30, fully qualified to take the entire charge of the Counting-house, wishes for a permanent ENGAGEMENT in town or country. His last situation, which he filled for upwards of eight years, was that of bookkeeper and collector to an eminent engineering firm in town. This will be found a desirable opportunity for any parties requiring the services of a trustworthy and confidential man. References of the first class.—Address to F. L. 18, College-place, Camden-town.

TO CIVIL ENGINEERS.

FROM 200 to 400 guineas will be paid to APPRENTICE a YOUTH to a CIVIL ENGINEER in railway or drainage practice. Architect, Land-valuer, or Accountant. Has a knowledge of drawing and mathematics.—Direct, with a list of works on hand and terms, to H. 91, Piccadilly.

PLASTERING.—Wanted, by an experienced Workman, either the MANAGEMENT of, or to take a JOB, in town or country. Good references.—Address, PARIAN, Office of "The Builder."

TO ENGINEERS, BUILDERS, AND OTHERS.

THE Advertiser, a Middle-aged Man of experience is in want of a SITUATION as FOREMAN of PATTEN-MAKERS, having filled a similar capacity for several years. Good testimonials and references can be given. Liberal wages expected.—Address by letter, prepaid, to L. C. Mr. Bridgen's, 14, George-street, Blackfriars-road, London.

THE Advertiser (a middle-aged Man) is desirous of obtaining EMPLOYMENT in connection with the BUILDING BUSINESS, or otherwise; can make plain drawings, and has some knowledge of accounts. Salary not so much an object as the probability of permanent employment. No objection to the country.—Address, A. B. care of J. Roe, 10, Parkroad, Clapham.

BUILDING LAND TO BE LET, at ACTON, HOMERTON, WIMBLEDON, at NORTH WOOLWICH, near the Victoria Docks, CHERTSEY (close to the Station), SUDBURY (near Harrow), at CROYDON (within a mile of the Station), and at NORWOOD (within three minutes' walk of the Station), and LOWER NORWOOD, near Tulse Hill, admirably situate for building purposes.—For particulars, apply to Mr. W. F. LOW, Solicitor, 67, Wimpole-street, Cavendish-square. Leases direct from the Freeholder. Money advanced if required.

GROUND TO LET, for Building, in the parish of SHOREDITCH, at the rear of Messrs. Bellingham's Distillery, Queen's-road, Dalston, in Plots, which will be pointed out by Mr. HARRIS, at the Counting-house on the Estate; and in the parish of ISLINGTON, at Grove-road, near the Cock, Upper Holloway, in Plots, which will be pointed out by Mr. GREEN, at the Counting-house on the Estate. Apply for particulars as above, or to D. HUGHES, Solicitor, 13, Gresham-street, Guildhall.

NORWOOD.—BUILDING LAND TO BE LET, within three minutes' walk of the Norwood Station in Wimpole (hereafter to be called Lincoln) Road, South-hill, with a full view of the Crystal Palace and Grounds, an only one mile distant, southern aspect, with some of the most magnificent views in the county of Surrey, on which building has commenced, and houses nearly completed for occupation, close to a church. The roads are substantially made, and the water of the South Lambeth Company, from Thurnes Ditton, laid on to the houses erected. Builders and gentlemen desirous of a first-rate site will find lands kept strictly their attention, and advances will be made if required.—For further particulars and plans of the Estate, apply to Mr. W. F. LOW, Solicitor, 67, Wimpole-street, Cavendish-square. Upwards of forty trains stop at the Norwood Station during the day. Leases direct from the freeholder.

TO SCULPTORS, MODELLERS, ORNAMENTAL SLATE MERCHANTS, and OTHERS requiring good Show Rooms or Workshops.

TO BE LET, with immediate possession, first-rate PREMISES at the water-side, within one mile of Westminster-bridge, an extensive range of WORKSHOPS or SHOW-ROOMS, COUNTING HOUSE, &c.; stabling may be had for eight horses if required. Also a capital DWELLING-HOUSE adjoining, containing seven bed-rooms, drawing-room, dining-room, library, kitchen, scullery, and all domestic conveniences, pleasantly situate and commanding a view of the River Thames. The house may be had separately if required. May be viewed by cards only, and further particulars obtained at Mr MARSH'S Offices, 8, Charlotte row, Mansion house.

FREEHOLD LAND, NORTH WOOLWICH.—A capital Plot of FREEHOLD LAND FOR SALE, opposite the Royal Pavilion Gardens, North Woolwich, being the corner of one of the new roads, having a frontage of 31 feet 6 inches by a depth of 75 feet. Price, including conveyance, 100 guineas, half of which may remain on mortgage at 5 per cent. interest.—Apply to Mr. JAS. ROBINS, 31, Camden-street, Islington.

WHARF TO BE LET, at WANDSWORTH.—To Brick, Stone, Lime, Timber, and Coal Merchants, Drain-pipe Manufacturers, &c.—Within two minutes' walk from the Wandsworth Station, a very compact WHARF, with a capital roomy residence, yard, and back premises. The house is in the immediate vicinity of a rapidly increasing neighbourhood. For terms and particulars, apply at the Office of Mr. JOHN TURNER, Architect, 8, Arabella-row, Grosvenor-place.

DOWGATE-HILL.—BUILDING LEASE.

TO BE LET, all that desirable Piece of freehold GROUND on the East side of Dowgate-hill, opposite Tallow-chandlers' Hall, with a Frontage of Eighty feet.—Apply to Mr. FISHER, the Clerk at the Hall; or at No. 50, Fenchurch-street, where a Plan can be seen.

PECKHAM-RYE.—LAND TO BE LET, on BUILDING LEASE, for ninety years; frontage, 230 feet; depth 180 feet; £21 per annum. Any person wishing to build a villa residence in this delightful situation, may be accommodated with a third part of the land.—Apply to Mrs. HOWARD, Builder, Peckham; or to Mr. MARSH, opposite the Deaf and Dumb Asylum, Kent-road. Peculiar circumstances induce the proprietor to offer the land at so low a rate.

TO CARPENTERS, BUILDERS, &c.

TO BE SOLD or LET, on Ground-rent, FOUR CARCASSES, partly finished, on a long lease. Immediate possession will be given, and money advanced if required.—Apply to Mr. CHAS. MARSHALL, Prince Albert Tavern, Weedington-street, Kentish town.

BUILDING LAND TO BE SOLD or LET, on long building lease, in plots, at EALING, WOOD GREEN, near HORNSEY, ENFIELD, PUTNEY, BROCKLEY HILL, near FOREST HILL, WARE ROAD, HERTFORD, CASTLE HILL, READING, and ROUND HILL PARK, BRIGHTON. Apply at the Offices of GEORGE MORGAN, Esq. 6, Chancery-lane.

ASH, SURREY, adjoining the new Military Camp.—FOR SALE, FREEHOLD LAND, tithe free, from HALF an ACRE to SEVEN ACRES, eligibly situate for building, having a frontage to the high road, where houses are much in request; thirty-four miles from London, and six miles from Guildford; two railway stations within one mile; gravel soil, and pure water. The title is simple, and the cost of conveyance trifling. Apply by letter only, to W. W. care of Mr. Vincent Brooks, 49, King-street, Covent-garden.

TO WHARFINGERS, BUILDERS, ENGINEERS, MANUFACTURERS RAILWAY CARRIERS, &c.

TO BE SOLD, FREEHOLD and part LEASEHOLD, BRUNSWICK WHARF and DRAW DOCK, VAUXHALL, many years established in the Brick, Tile, Slate, and Lime Trade, &c. Excellent residence, offices, dwellings, and warehouses in sub-tantial repair. Area near 1½ acre adjoining the South-Western Railway, with 135 feet frontage to the River Thames, and 150 feet next the Dock, enabling vessels to lie afloat.

Apply on the Premises, or to Mr T. M. NELSON, Architect, Regent Chambers, No. 33, Regent Circus, Piccadilly.

SANDWELL PARK ESTATE.—BUILDING LAND and proposed Parks for Birmingham and the South Staffordshire Coal Districts, situate in the parishes of Handsworth and West Bromwich. The first division of the above valuable property, containing 1,000 acres, is now completed, and is thus arranged:—

SANDWELL PARK 250 acres of this is proposed to be kept as an open Park. 300 acres, surrounding this, and forming some of the most beautiful spots of Sandwell, will be appropriated for the erection of first-class villa residences, thus giving an opportunity to the lessee of adding to the comforts of his house, by attaching to it any extent of land, great or small, whether for pleasure-ground, or small farm, as he may desire.

SANDWELL FRONTAGES.—adjoining for nearly a mile and a half the Birmingham and Wolverhampton turnpike road. These will be let in lots of any frontage, by a depth of 300 feet, for the erection of dwelling-houses of an annual value of 20l. and upwards.

SANDWELL BEECHES. This portion of the estate comprises between fifty and sixty acres of land in the most eligible part of West Bromwich, and will be appropriated for shops, Warehouses, Offices, Inns, and other commercial purposes. The sub-division roads have been planned with much care, and every attention given for the thorough drainage of the premises.

The estate thus divided will be let on Building Leases for twenty-one years, by which means the lessee is enabled to prevent the injury to property, and annoyance to neighbours which so often occurs where good buildings are erected contiguous to small freeholds. The wealthy manufacturers and iron-masters will be enabled to enjoy a suitable and gentlemanly residence on a healthy soil, in a beautiful country, most conveniently situated for the business of the large and populous towns adjacent. The managers and clerks of the numerous large establishments may unite with a profitable investment of their money a pleasant dwelling for their families, on the frontages adjoining the turnpike-road, with the fine timber and wood of Sandwell coppices at the back, whilst good roads, good drainage, and good ventilation will be secured to those who become the inhabitants of that part of the estate called Sandwell Beeches. Lithographic plans are now ready, and will be sent, with any other information that may be desired, on application to Mr. NICHOLLS, Architect and Surveyor, West Bromwich; Mr. MOUSLEY, of Sandwell, near Birmingham; and at the Offices of Mr. THYNNE, 11, Great George-street, Westminster.

TO FREEHOLD LAND SOCIETIES AND OTHERS.

LORDSHIP-LANE, TOTTENHAM. — From THIRTY to FORTY ACRES of FREEHOLD BUILDING LAND FOR SALE having a good frontage to Lordship-lane, and within a few minutes' walk of the Hornsey Railway Station, and will be shortly connected with the North London Railway. Good brick earth. Excellent drainage For particulars apply by letter (prepaid) to J. T. R. care of Mr. Noah, No. 34 Lombard-street, City

ST. JOHN'S, HORSELYDOWN. — HOUSES and PREMISES TO BE LET, by TENDER, by the Governors of St. Olave's Free Grammar School of Saint Mark on twenty-one years' repairing leases, from Midsummer next Christmas days upon next ensuing, that is to say:— All those Four Messuages and Premises situate and being No. 5 and 6, on the south side of Fore-hill-street and Nos. 48 and 49 on the north side of Fair-street; the leases of which for twenty-one years will commence from Midsummer-day next. Also all those Six Tenements situate and being Nos. 1, 2, 3, 4, 5, and 6, on the north side of Brandon-street; the leases of which for twenty-one years will commence from Christmas-day next. Also all those Two Messuages and Premises, situate and being on the north side of Goodstreet, and immediately in the rear of the Messuages, Nos. 9 and 10, on the south side of Broad-street; the leases for which for twenty-one years will commence from Christmas-day next. All of which are situate in the parish of St. John's, Horselydown, in the county of Surrey; together with the appurtenances thereunto respectively belonging. The particulars and conditions, plans of the premises, and specifications of the repairs to be performed, may be seen at the office of Mr. HENRY STOCK, the Surveyor, No. 6, Duke-street, Southwark, (two doors out of TENAND FOUR) o'clock any day, Sundays excepted; and Tenders (in writing only) are to be delivered at the Office of Mr. MINSHULL JONES, No. 130, Tooley-street, Southwark, by or before ELEVEN o'clock, on TUESDAY, 20th of JUNE next, (unavailing after which a Court of Governors will be held at the School, in Mint-yard, for the purpose of taking the same into consideration, and where persons making such Tenders are to attend punctually at TWELVE o'clock of the same day) but the governors do not bind themselves to accept the highest or any offer or offers.

June 2nd 1854.

MAGNUS'S ENAMELLED SLATE. — MR. MAGNUS having, at great expense and hazard, and by dint of unwearied perseverance during a period of FOURTEEN YEARS, succeeded in obtaining from his invention of Enamelling Slate to imitate Marble the PATRONAGE of HER MAJESTY, PRINCE ALBERT, the chief of our nobility, and almost every Architect, Builder, and Decorator of any note, a distinction never before by the MEDAL of the SOCIETY OF ARTS and the PRIZE MEDAL of the GREAT EXHIBITION, finds that his success has given rise to a number of petty imitators, who, though they may not affect him in a pecuniary light, inflict vast injury by their wretched imitations of his productions, which are, in most cases, passed off as "MAGNUS'S ENAMELLED SLATE." He therefore respectfully requests those who are disposed to patronize his establishment, to assure themselves that they are supplied from his manufactory, as (UNFORTUNATELY) LESS THAN HALF THE COST AND LABOUR NECESSARY TO SECURE PERMANENCY, a counterfeit can be made which will not endure, and damages the reputation of his Enamelled Slate This caution is particularly necessary in regard to the mitres of the retreat places at railway stations, and wherever there is much wear. N.B The Tariff for 1854 is now ready

Premises and Works, Strand 46, Upper Belgrave-place

REVOLVING SHUTTERS AND BRASS SASHES.

CLARK AND CO.'S

NEW PATENT RECTILINEAR IRON REVOLVING SHUTTERS,

With Headed Edges and Solid Hinges, are the strongest extant.

PATENT COMBINED IRON AND WOOD REVOLVING SHUTTERS, AND PATENT REVOLVING WOOD DITTO,

At very low Prices.

BRASS SASH-BARS, STALL-BOARD PLATES, &c. DRAWN BY MACHINERY.

The new Patent Self-acting Hydraulic Revolving Shutter can be seen in constant operation at the Works. Prospectuses and Engravings forwarded.

15, GATE-STREET, LINCOLN'S-INN-FIELDS, LONDON.

AGENTS FOR GLASGOW: MESSRS. H. FIELD AND SON, 68, BUCHANAN-STREET.

BUNNETT AND CO.

ENGINEERS AND FOUNDERS,

ORIGINAL PATENTEES OF REVOLVING IRON SHUTTERS AND OF THE

NEW PATENT CURVILINEAR REVOLVING IRON SHUTTER,

Which obtained the Prize Medal of the Great Exhibition, 1851.

The immense patronage this very superior Shutter receives has naturally induced inferior imitations; but B. and Co. are enabled, by considerable additions and improvements in their machinery, to effectually compete with them in price.

The removal of several Revolving Shutters in consequence of the failure of a new patented principle for raising and lowering them, having in several instances led persons (who were not aware there are other makers) to infer that they were manufactured by BUNNETT and CO.; they therefore feel it necessary to state, that they have never applied the principle of Pumps, Hydraulic Pressure, or any other such unsuitable and uncertain methods for raising and lowering their PATENT IRON SHUTTERS. Nearly twenty years' practical experience in the manufacture and fixing many thousands without a single failure, proves beyond a doubt that BUNNETT'S PATENT WORM and WHEEL GEARING is the most efficient, safe, and durable means yet known for the purpose of raising and lowering revolving shutters.

Parties about to adopt Iron Shutters are recommended to make full inquiry, and have good references, before deciding.

Architects intending to use any of BUNNETT and CO.'S works are respectfully requested to see their names properly inserted in the specification.

BUNNETT and CO. are also PATENTEES of BRASS and OTHER METAL SASH-BARS and MOULDINGS for SHOP-FRONTS, SKYLIGHTS, &c.

OFFICE: 26, LOMBARD-STREET, LONDON. WORKS: DEPTFORD, KENT.

LIGHTNING CONDUCTORS.—E. S. NEWALL and CO. Patentees of the Copper Rope Lightning Conductor, beg to inform the nobility, clergy, &c. that they supply Lightning Conductors, with the point and all staples complete for fixing, at one shilling the foot.

E. S. NEWALL and CO.'s Patent Copper Rope Conductor is being used by architects, engineers, and scientific men in all parts of the world.

OFFICES.—Gateshead-on-Tyne.
139, Strand, London.
67, Hyde-park-street, Glasgow.
27, Dale-street, Manchester.

TO ARCHITECTS

COMPETITION and other DRAWINGS.—Mr. THOMAS S. BOYS, Member of the New Society of Painters in Water Colours, and author of "The Picturesque Architecture of Paris, Ghent, Rouen," &c. and of "London as it is," offers his services in Tinting Backgrounds, Landscapes, Perspective Views, Interiors, &c. From the long experience he has had in such subjects, he is fully aware of the points essentially necessary to be attended to. Drawings and designs lithographed in a superior manner.—Address, Mr. BOYS, 32, Albany-street, Regent's-park.

LITHOGRAPHY.—Plans of Estates, Maps, Bills of Quantities, Isometrical Views, and every description of Lithography executed in the best style of the art. Engineering and Mechanical Drawings correctly detailed by experienced Hands. Artists and amateurs supplied with every requisite for Lithography. Crayon Drawing and Oil and Water-colour Painting; Presses, Stones, Chalks, &c. Specimens of every class of work for inspection. Estimates given. Instructions afforded.
CHARLES MOODY, 357, High Holborn.

C. LEFTWICH, VARNISH MANUFACTURER, LEAD, GLASS, and COLOUR WAREHOUSE, 21, Munster-street, Regent's-park. C. L. begs to call the attention of the Trade, Builders, &c. to his stock of plumbers' closet-basins, plug ditto, brass-work, &c. &c. sheet-lead, and patent pipe, plate, patent plate, sheet and crown glass, white-lead, oils, colours, &c. &c. PER CWT GIVEN for OLD LEAD; GLASS ILLUMINATORS for FLOORS, AREA VAULTS, &c.

GENTLEMEN finding their own Material in the building trade, can meet with a practical Man to CONTRACT for the LABOUR of the BRICKWORK, CARPENTER'S WORK, and JOINER'S WORK.—Apply by letter, postpaid, to A. B. 94, Star-street, Edgware-road.

TO PLASTERERS.

A GOOD SUBSTITUTE for HAIR.—SHORT COCOA-NUT FIBRE is not injured by hot lime or mortar more than hair; is not one-third the price, and is ready for use without such a loss of time and labour as there is in beating and cleaning hair.—For samples and particulars, apply to the PATENT COCOA FIBRE COMPANY, Kingston-upon-Thames.

LADDERS, BARROWS, &c. for SALE or HIRE.—G. ELL invites the attention of builders, decorators, and the trade generally, to the Large Stock of Ladders; excavators, brickmakers', and other Barrows; Painters' Machines, Trestles, Steps, &c. he has always on hand, at a very low scale of charges.—Manufactory, 3, TOTTENHAM-COURT, NEW-ROAD, opposite Hampstead-road.

PURE GAS.—TO GAS COMPANIES, ENGINEERS, MANUFACTURERS, and OTHERS.

PATENT CLAY PURIFICATION.—No cheap process has yet been discovered for freeing gas from ammonia, and the removal of the bi-sulphuret of carbon (the monster nuisance of gas-burning) has been given up in despair. Clay removes both these impurities, and when taken from the purifiers the bi-sulphuret of carbon is visible, completely blackening the clay. The light of the gas is increased in proportion to its thorough purification. The proprietors of this patent are now ready to grant licenses for its use.—Terms, and directions for the employment of clay, may be obtained from Mr. JOHN WHITTAKER, Agent to the Patentees, Gas Works, Wakefield.

SHOP FRONTS and OFFICE FITTINGS with the greatest despatch.—J. FISHER, 70, York-road, Lambeth (late Shop Foreman to Messrs. Lawrence and Sons). Door and Staircase Manufacturer, with well-seasoned materials and superior workmanship, at the lowest possible prices. Glazed and polished goods securely packed for the country and for exportation.

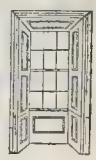
P.S. A full list of prices sent on application.

CHARLES WM. WATERLOW AND CO.

MANUFACTURING JOINERS,

121, BUNHILL-ROW, FINSBURY, AND BOW, MIDDLESEX.

N.B.—ORDERS RECEIVED AT THE COUNTING-HOUSE, 121, BUNHILL-ROW, ONLY.



SANDS AND EMERY,

CURSITOR-STREET, CHANCERY-LANE.

MANUFACTURED JOINERS' WORK AND MOULDINGS OF EVERY DESCRIPTION ON THE SHORTEST NOTICE, AND AT THE LOWEST PRICES, PACKED AND FORWARDED TO ALL PARTS OF THE COUNTRY.

Lists of Prices and Estimates forwarded on application.

JAMES RHODES,

No. 6, MACCLESFIELD-STREET NORTH, CITY-ROAD, LONDON.

MANUFACTURER OF SASHES AND FRAMES, DOORS, &c. AND EVERY DESCRIPTION OF HOUSE JOINERY.

Glazed goods securely packed for the country. Prices on application at the Counting-house, as above.

WINDOW BLINDS.—TYLOR & PACE, Window Blind Manufacturers, 104, New Bond-street, and 3, Queen-street, Cheapside, London, submit the following PRICES of WINDOW BLINDS, which they can recommend as being made in the best manner:—Venetian blinds, per square foot, 8d.; best holland blinds, on rollers, 6d.; best ditto, on spring rollers, 9d.; gauze wire blinds, in mahogany frames, 8s.; perforated zinc blinds, in ditto, 1s. 10d.; outside blinds of striped cloth, 2s. Transparent blinds in great variety. Engravings, with prices and discounts to builders and the trade, forwarded on application, post free.

WINDOW-BLINDS FOR THE TRADE ONLY.—The only Blind-maker in London working exclusively for the Trade is WILLIAMS, 1, Rutland-street, Brompton. Manufacturer of every description of inside and outside BLINDS, conservatory blinds, outside shop-blinds, horizontal blinds and awning blinds, executed on the most approved principles, lower than any other house. The trade supplied with springs. A list of prices forwarded post free, on application to any house in the trade. Orders by post from all parts of the country punctually attended to, and executed with despatch.
An Out-door Apprentice Wanted.

HENRY PASK (late Johnson and Pask), BAKER-STREET, Clerkenwell, Sash, Shop Front and Door Maker to the Trade, begs to inform his customers and the public generally that he intends carrying on the business as usual, and solicits a continuance of their favours, which shall meet with his prompt attention.

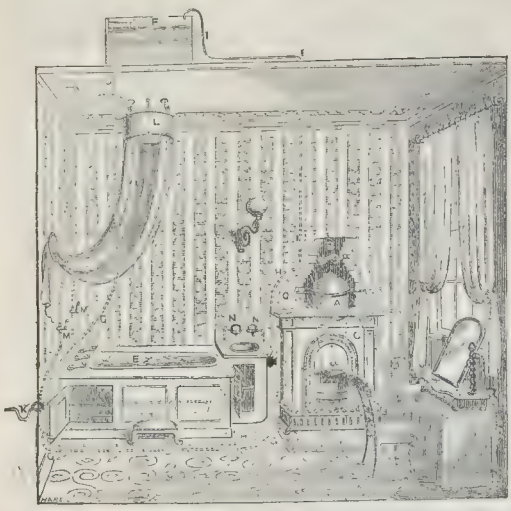
N.B. By inclosing a postage stamp a full list of prices may be had by return of post.

H. FARMER, Sash, Door, and Staircase Manufacturers.—Counting-house Fittings, Shop and Public-house Fronts on the shortest notice. Estimates given for contracts of any description. By enclosing a postage stamp, a list of prices will be returned for any kind of joiners' work, &c.—135, St. John-street-road, and No. 1, Edward street, Pentonville.

SASH and DOOR MANUFACTORY, 59, GRANGE-ROAD, BERMONDSEY.—L. SUGDEN respectfully invites builders and the trade in general, to an inspection of his stock of manufactured joiners' work, prepared from the best material, at the lowest possible price.
P.S. A full list of prices on application.

ROYAL ACADEMY of ARTS, Trafalgar square. The Exhibition of the Royal Academy is NOW OPEN. Admission (from Eight o'clock till Seven), One Shilling. Catalogue, One Shilling.
JOHN PRESCOTT KNIGHT, R.A. Secretary.

SOCIETY of PAINTERS in WATER-COLOURS.—The Fiftieth Annual Exhibition is NOW OPEN at their Gallery, 5, Pall-mall East, from Nine till Dusk. Admittance, 1s. Catalogue, 6d.
JOSEPH J. JENKINS, Secretary.



ATTRACTIVE NOVELTIES

ROYAL POLYTECHNIC INSTITUTION. Patron:—H. R. H. Prince Albert.—Four important Illustrations just added to the Views of the Seat of War on the Danube, and in the Baltic. The Baltic Fleet in the Downs. Castle of Kronberg, Forts Alexander and Peter, at Kronstadt. Crown Quay, St. Petersburg, Kalafat, Widdin, Sebastopol. Entrance to the Black Sea. Pepper, esq. on the Chemistry of our Daily Bread, in special relation to that made by the New Process, daily at Two o'clock; and in the Evenings, on the Decoration of Paper. Lecture by Dr Bachhoffner on Electricity and the Electric Light. Open Mornings and Evenings. Admission, 1s.; Schools and Children under Ten Years of age Half price.

BRIDGWATER LOCAL EXHIBITION for WORKS of ART.—The Committee are prepared to furnish Forms of Application for space from parties desirous of exhibiting.—Address, the Honorary Secretaries, Exhibition-rooms, Bridgwater.

"THE VICTORY," with the BODY of NELSON on board, towed into GIBRALTAR seven days after TRAFALGAR. The Celebrated PICTURE, painted by CLARKSON STANFIELD, Esq. R.A. painted for S. Morton Peto, Esq. M.P. will remain on view a few days longer, at the GALLERY OF ART, 23, Cockspur-street Charing-cross, from Ten to Six. Admission on presentation of Card of Address.

J. TYLOR AND SON'S BATH APPARATUS.

To fix a Bath, the apparatus for heating which can be fixed in the same room, and the luxury of an Open Fire retained.

A. Copper Boiler of sufficient capacity to make a warm bath, clasped by an iron band to support it, and fixed in the breast-work of a chimney. A flue is carried all round, and the draught is regulated by a revolving damper, *B*, which covers the opening into chimney. When set, the Boiler is entirely concealed from view.

This Boiler can be adapted for any chimney, by making it of an oval or elongated form.

A soot-door is fixed just underneath the damper for the convenience of cleaning, which, however, is rarely required, on account of the great draught round the boiler preventing any deposit of soot.

C. An ordinary stove front with sliding blower for the additional regulation of the draft.

E. Copper or tinned iron Bath, enamelled white marble inside, having three copper pipes, for the hot, cold, and waste water, which are indicated by the engraved levers on the cocks. The overflow is carried into waste-pipe *K*.

F. Cistern for cold water, say 100 gallons, which can be made of tinned iron, or any suitable material, either fitted into a recess or made of a cylindrical shape to stand on the floor of any room above the bath. The overflow can be carried into the waste or other convenient outlet.

G. Inch pipe from cistern to the pipe which goes to the bottom of boiler to fill it with water. A branch from this pipe also supplies the bath with cold water.

H. Inch pipe from the top pipe of boiler, to deliver the hot water into bath.

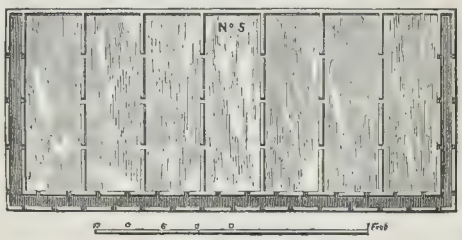
I. Half-inch pipe taken from the hot pipe *H*, and turned over the top of cistern to relieve the boiler.

K. Inch or 1½-inch pipe to take away waste water from bath into soil-pipe or drain, as may be most convenient, and must be well trapped before entering.

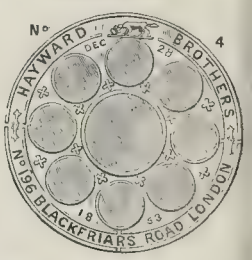
L. Round copper or tinned iron Shower Bath, suspended from ceiling, and filled with hot or cold water by branches from the pipes *G* and *H*, the supply being regulated by the two cocks *M M*, which are let in the wall, and have levers fixed on them, engraved, "hot and cold shower."

A thermometer can be fixed in the shower-bath to regulate the temperature.

N N. Wash-hand basin supplied with hot and cold water, by branches from the pipes *G* and *H*, the waste being carried into the overflow of bath.



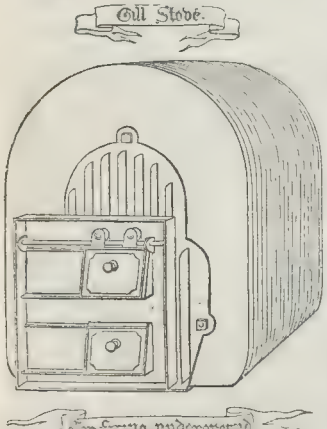
By this simple arrangement, the boiler is always kept full of water, and cannot, by any means, be emptied by the action of the fire. The draught is so regulated by the blower and damper, that a bath can be made in twenty minutes, or an open fire kept continually alight.



WARWICK-LANE, NEWGATE-STREET, LONDON.

HAYWARD'S IMPROVED

COAL-HOLE PLATES. ILLUMINATING GRATINGS. PAVEMENT LIGHTS.



COAL-HOLE PLATES, with Wrought Eyes fitted; ILLUMINATING with Glass Lenses, 6s. each; Ditto, plain Iron, solid, 2s. 9d. each; Ventilating, 3s. each.

ILLUMINATING AREA GRATINGS, thick Glass fitted, 5 or 10-inch openings of any length or number, at per foot super. 12s.

ILLUMINATING PAVEMENT LIGHTS, with Flange, as A, and Glass Lenses, 30s. each, 21 inches diameter.

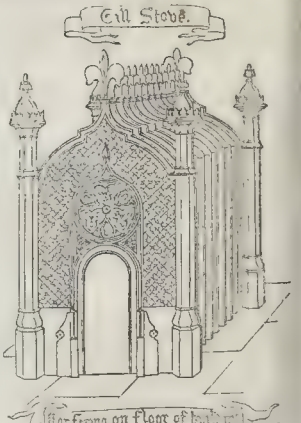
HAYWARD (BROTHERS), MANUFACTURING IRONMONGERS, 196, BLACKFRIARS-ROAD.

STUART AND SMITH'S
PATENT GILL STOVE,

FOR

HEATING CHURCHES AND OTHER PUBLIC AND PRIVATE BUILDINGS.

The constant failures, and enormous expense, consequent upon the endless variety of experiments to warm buildings has left the public in doubt as to whether there exists any certain, economical, and safe mode of effecting that object or not.



STUART AND SMITH,

ROSCOE-PLACE, SHEFFIELD,

confidently assert, that the Air-Warmer they recommend, possesses the desired qualifications, and respectfully request Gentlemen interested in the question, to ascertain the fact from the actual working of the invention.

It has been fixed in the following, besides a great many other private and public buildings:—St. Stephen's, Longsight, Manchester; Grassendale Church, Aigburth, Liverpool; St. Ann's, Aigburth, Liverpool; North Wootton, near Lynn, Norfolk; St. Paul's, Alnwick, Northumberland; Betsanger Church, Sandwich, Kent; St. Mary's, Pitsmoor, and Grimesthorpe, Sheffield; County Lunatic Asylum, Derby, &c. &c. &c.

Prospectuses, and every information, sent on application.

JOHN WALKER,
CORRUGATED IRON ROOF and BUILDING MANUFACTURER,
And GENERAL CONTRACTOR.
Works—Mill Wall, Poplar, London, and Gilbrook, Birkenhead.
Offices—Corner of Arthur-street West, London-bridge; late 63, Gracechurch-street.

HARTLEY'S PATENT ROUGH PLATE GLASS

1-8th thick, or 2 lbs. to the foot; 3-16ths, or 3 lbs.; and 1-4th, or 4 lbs. to the foot, for

RIDGE AND FURROW ROOFS, GREENHOUSES, RAILWAY STATIONS, ENGINE SHEDS, MILLS, MARKET HALLS, AND PUBLIC BUILDINGS GENERALLY.

It being universally admitted that Glass in Roofs of a permanent character should not be less than one-eighth of an inch thick, weighing two pounds to the foot, Messrs. JAMES HARTLEY and CO. have directed their attention to the manufacture of a description of

ROUGH PLATE GLASS, THAT COMBINES SIZE AND STRENGTH WITH ECONOMY OF COST.

The PATENT ROUGH PLATE is manufactured in sizes expressly for Ridge and Furrow Roofs, giving a span of from 8 to 12 feet, at a price not exceeding weight for weight that of common Crown Glass. Not being transparent, blinds are unnecessary, and when used in Greenhouses no scorching occurs; its NON-TRANSPARENCY and strength render it eminently suitable for the Glazing of Conservatories and Roofs of all kinds; also Factories, Workshops, &c. for which purposes it is supplied in squares of all sizes, from 8 by 6 inches and upwards.

For further information apply to Messrs. JAMES HARTLEY and CO. Wear Glass Works, Sunderland.

N.B.—The Patent Rough Plate is supplied at a much lower cost than the common Rough Plate.—May 1, 1851.

GLASS.—HARTLEY AND CO.'S GLASS TARIFF NEWSPAPER

Will be forwarded Gratis, on application, "post-paid," to

Messrs. JAMES HARTLEY and CO. Wear Glass-works, Sunderland; or Purfleet Wharf, Earl-street, Blackfriars, London.

BOWDEN'S BRILLIANT-CUT ORNAMENTAL WINDOW-GLASS.

MANUFACTURED BY MARK BOWDEN AND COMPANY.

WORKS, NELSON-STREET, BRISTOL. OFFICE, 60, ALDERMANBURY, LONDON.

THE BRILLIANT-CUT MAY BE OBTAINED THROUGH ALL WINDOW-GLASS MANUFACTURERS AND MERCHANTS IN THE KINGDOM.

Prices, and every information, forwarded on application to the Works.—MARK BOWDEN and CO. Bristol.

FOREIGN SHEET-GLASS packed in cases of 200 feet, from 38s. to 42s. per case.
GLASS TILES 1 of an inch thick, 37s. 6d. per case, containing fifty tiles.
HARTLEY'S PATENT ROUGH PLATE-GLASS, packed in boxes of 50 feet, from 10s. 6d. per box.
SASHES GLAZED with good Crown glass at 3d. per foot, carting included.
JAMES PHILLIPS, and CO. 116, Bishopsgate-street Without.

E. and W. H. JACKSON beg to call the attention of Builders and the Trade to the LOW PRICES of their PATENT PLATE GLASS, BRITISH PLATE, silvered and for glazing, of unrivalled quality and finish; ROUGH PLATE, CROWN, SHEET, COLOURED, and ORNAMENTAL GLASS, in every variety, of the best manufacture, at the lowest terms. Designs and estimates furnished for ornamental windows, either for house or church decoration.—All applications for estimates and lists of prices to be made at their warehouse, 215, OXFORD-STREET.

MOORE'S PATENT MOVABLE GLASS VENTILATOR, for Windows, Partitions, Factories, Workshops, Warehouses, Greenhouses, Cottages, Stabling, Granaries, and other Buildings, Railway and Private Carriages, &c. For Farms, Dairies, Outbuildings, &c the Ventilator can be made to form a complete window, iron frames and rough plate glass, &c. Ventilators made to any size, and to most forms of sashes; also for sky or fan lights, and other purposes. A considerable saving, and additional safety by having fixed window sashes.
MOORE'S PATENT "LEVER VENTILATOR," forming a regular current of air, is calculated to effect all that is required for improving animal and vegetable health. The vitiated air is emitted at the opening left for that purpose. To shopkeepers they are particularly recommended, as from their capabilities of removing the foul air caused by the gas in the shop and windows, they effectually preserve the stock in good condition, and prevent explosion of gas.
Churches and House Clock-makers to the Hon Board of Ordnance, the Russian Government, and the Emperor of China.
Manufactory, Bekford-works, St. James's-walk, Clerkenwell, London.

SOHO CROWN, SHEET, ORNAMENTAL, PATENT PLATE, AND PLATE-GLASS WAREHOUSE, 26, SOHO-SQUARE.
ALFRED GOSLETT begs to inform Builders, &c. that he is prepared to Tender for the supply of EVERY DESCRIPTION of Glass, now manufactured at WHOLESALE PRICES.

ASPHALTE PAVEMENT.—HENRY WRIGHT is prepared to lay down his Asphalte Pavement, which is particularly adapted for railway platforms, footpaths, garden-paths, court-yards, and school-yards 2½ in. to 3 in. thick, from 1s. 6d. to 2s. per square yard.—Address, 32, Bucklersbury, City.

ASPHALTE.—GERVASE FOOTTIT, Trinidad Asphalte Works, Rotherhithe; established 1834. Every description of Flooring laid well, for above durable material in the best manner. Asphalte for Railway Arches, 35s per ton. Importer of Trinidad Asphalte.
Shipping Depôt, Devon Raytor Wharf, Rotherhithe.
G. H. CLARK, Agent.

PAVING, 2s. 9d. per SQUARE YARD.—Basements, Foot-walks, Malt-houses, Corn Stores, Floors of Warehouses, and every description of Pavement laid down at the lowest price, and the most guaranteed. Apply to JOHN PILKINGTON, POLONCEAU'S BITUMEN PAVEMENT OFFICE, MONUMENT YARD, TIMBER-ST., FISH-STREET-HILL. N.B. Country Agents, and Railway Engineers and Contractors, supplied with the best Bitumen for covering Bridges and Arches.

ARCHITECTURE, CIVIL ENGINEERING, and SURVEYING. Messrs. HYDE, SMITH, and LEWIS, Architects Civil Engineers, Surveyors, &c. beg to inform railway directors, public companies, landed proprietors, Noblemen, gentlemen, solicitors, trustees, and others, that they EXECUTE every description of professional work on the most reasonable terms. Railways, roads, waterworks, &c. planned, surveyed, levelled, and completed. Estates, mines, and architectural plans, sections, and designs, prepared and executed. Estates, manors, parishes, and townships, surveyed and mapped. Land, timber, buildings, &c. measured and valued. Lease surveyed, and plans, notes, and explanations given. Maps, plans, &c. drawn, copied, and reduced with accuracy and despatch.—24, Guildford-street, Russell-square.

ARCHITECTURE, CIVIL ENGINEERING, and SURVEYING. Messrs. HYDE, SMITH, and LEWIS, Architects, Civil Engineers, Surveyors, &c. beg to inform their friends and the public that they have refitted up their OFFICES with every requisite necessary for acquiring a thorough practical knowledge of the profession, including models and instruments of every description. The courses are all remodelled and enlarged, embracing all the latest improvements. Gentlemen who have attended the classes heretofore attended at their residence in any part of the country by Mr. SMITH or Mr. LEWIS. Prospectuses and full particulars may be had by applying at the Offices, 24, Guildford-street, Russell-square.

ARCHITECTURAL, CIVIL ENGINEERING, and SURVEYING OFFICES, established by Messrs. HYDE, SMITH, and LEWIS, Architects, Civil Engineers, Surveyors, &c. Pre-preparation for Students for Architects, Engineers, Surveyors, Jewellers, Draughtsmen, Masters Valuers, &c. and Private Tuition. EVENING INSTRUCTION in Architecture and Civil Engineering, including Colouring, Making Tracings and Working Drawings, Preparing Specifications, Taking out Quantities, Perspective, Isometrical, &c.—Terms, Satisfactory.—Prospectuses, &c. apply at the Offices, 24, Guildford-street, Russell-square.

Oxford, November, 185
GENTLEMEN, Sixteen of your Closets having been put into operation at Christ Church College, I have great pleasure in giving you my testimony as to the efficiency and simplicity.
HENRY J. UNDERWOOD, Architect.
R. S. HOGGAR, Engineer.

Royal Arsenal, Woolwich, June 24, 185
GENTLEMEN,—I have much pleasure in giving my testimony in favour of your Patent Syphon Flushing Basin, with Self-acting Closet Connections. There are several fixed here, which have been in use for upwards of twelve months, giving perfect satisfaction.
I am, Gentlemen,
Your obedient Servant,
WILLIAM CARTWRIGHT.

GREAT REDUCTION.—Pantiles 60s. per thousand; plain 38s.; Cowley Stocks 38s. at WARD'S OLD-ESTABLISHED HONDURAS WHARF, BANKSIDE, London. Builders, Engineers, Gas Companies, and others, supplied with every sort of country Brick and Tile goods; Fire Bricks, Lumps, Tiles and Clays. Patent Malting and Corn-drying perforated Tiles, real Dutch Clinkers, River Sand, Concrete Gravel, Founders' Loam, White and Red House Sand, &c. &c. at the cheapest rate.—Chief Office, 27, Regent-street.

GREAT EXHIBITION 1851, Class 27, No. 111.—JAMES LUFF, Manufacturer of all kinds of ornamental Bricks and Tiles, Red and White, of the best quality, suitable for chimney shafts, mansard-sash cornices, and mouldings of every description, TUDDENHAM, IPSWICH.
N.B. Builders furnished in detail from one line all sorts of ornamental designs executed; a small additional charge made for the moulds.

FIRE-BRICKS, FIRE-LUMPS, TILES, FIRE CLAY, &c. - In addition to their usual stock of ALLOA FIRE-BRICKS, TRAQUAIR and MORGAN have now got to hand a most extensive assortment of Fire Lumps, which they most respectfully invite the attention of Engineers, Furnace Builders, and consumers generally.
N.B. TRAQUAIR and MORGAN, 9, Bankside, Southwark, close to Southwark-bridge.

FOR SALE, Second-hand Price, CLAYTON'S PATENT PRIZE PIPE, TILE, and BRICK MACHINE, nearly new, only in wear six months, in a perfect state, and complete, with patent screen, pipe, and the dies of many sizes, which may be seen at work;—or particulars inquire of JOHN MORGAN, Architect, &c. 25, Keppel-street, Russell-square.

TODD'S PATENT METALLIC PROTOXIDE PAINT.

THE PATENT METALLIC PROTOXIDE PAINT now offered has been found, after the most severe trials, to be peculiarly efficacious in preserving Iron from Oxidation, Wood from Decay, and Masonry and Brickwork from Dampness. Applied to Iron, it unites with it most intimately, forming a complete coating; so that thus protected, it will be found equal to the best galvanized iron. Hence its great value to all Engineers and Iron Founders as an application to iron vessels, iron roofs, steam and water pipes, &c. &c. It adheres firmly to iron, even at a red heat. For stuccoed buildings it will be found to be effectual in preventing the discolourations formed by vegetation, and keeping out all dampness.

For terms, application to be made at the Offices of the Company, 12, Bishopsgate-street Within; or to the following Agents:—
Messrs. PITCHFORD, Island Lead Works, Limehouse, } LONDON. | Messrs. D. and G. BRYMNER ..... GREENOCK.
Messrs. G. and T. WALLIS, 64, Long-acre,..... }

BRICKS.—Malm Cutters, Yellow and Pale Seconds, Paviors, and Pikings, of good and sound quality, constantly on sale at R. DODD'S Brickfields, which are only a quarter of an hour's walk from the City. H. D. earnestly requests purchasers to favour him with a visit, in order to inspect his stock, and to judge for themselves.
Malm Place, half washed Stocks, and Place Bricks, also on sale. These bricks are sound, well burnt, and unusually free from defects; a very large proportion of the stock being suitable for external facing.
App y to HENRY DODD and CO at the Counting-house, Hoxton Brickfields, Grange-walk, near the Rosemary Branch, Hoxton.
N.B. Light-coloured Pit Sand of approved quality constantly on sale upon reasonable terms. This Sand, from its not containing any saline matter, is acknowledged to be preferable to river sand.

BRICKS from COWLEY and KENT. Also WHITE, YELLOW, and RED FACING BRICKS.
BLUE VITRIFIED BRICKS;
Fire Bricks, Lamps, and Tiles.
CHARLES RICHARDSON, 6, SOUTH WHARF, PADDINGTON.

STONE-COLOUR BRICKS, moulded to any pattern, for cornices, copings, labels, &c. at about one-third the cost of stone; also ornamental ridge and other tiles; may be had to order of Messrs. HOOPER and CO. 2, Portland-street, Southampton. Illustrated list of prices or samples forwarded on application

PEAKE'S TERRO-METALLIC TILES, PIPES, &c.—Notice is hereby most respectfully given, that the LONDON DEPOT for this WARE is REMOVED to 31 WHARF, Macclesfield-street North, City-road Basin. Secondly, that the trade term, "TERRO-METALLIC," is the exclusive right of the Proprietor; and, thirdly, that the "REVERSE OF THE MEDAL," page 581, of the Great Exhibition, rank the Manufactories known so long as "The Tileries," Tunstall, Staffordshire, as the first of the kind in the world.

MAW'S ENCAUSTIC TILE PAVEMENTS,
MAW and CO. send free, per post, their NEW BOOK OF DESIGNS,
with prices, adapting this most durable, economical, and decorative production of mediæval art to entrance-halls, passages, conservatories, verandahs, and every description of modern and ancient building.
BENTHALL WORKS, near Broseley, Shropshire.
Specimens at 11, Aldersgate-street.

TO BUILDERS AND OTHERS.
BEART'S PATENT PERFORATED BRICK WORKS, CAMBRIDGE.—This Company is now prepared to deliver at the Goods Station of the Eastern Counties Railway, London, and at all other stations on the line, between Audley, Lowestoft, Yarmouth, Lynn, Wisbech, and Peterborough, superior white facing BRICKS, and common bricks, at LOW PRICES. Terms may be had on application at the Works, Newmarket road, Cambridge.

MR. LEE STEVENS'S PATENT FURNACES.
RECENT TESTIMONIALS.
Larchfield Foundry, Hunslet-road, Leeds, May 23rd, 1854.
DEAR SIR,—In reply to your inquiry, we beg to say that your blast furnace adapted to our engine boiler effectually performs its office in the suppression of smoke, and we are strongly of opinion that the reduction in the consumption of fuel also, will render its use desirable if economy only were the object. We have just completed a second furnace for Mr. John Marshall's Works, Hunslet-road, and have no doubt that a large number on your system will soon be in operation at Leeds—We are, dear Sir, Yours respectfully,
ROBT WOOD AND SON.

Cleveland street, Asile-end, London. 3rd June, 1854.
DEAR SIR,—Quite satisfied with the effect of your invention as applied to the first steam-boiler furnace on my premises, I am happy to say the same success has attended its adaptation to the second; for besides the riddance of the previous nuisance from smoke, I have ample evidence that you do not over-estimate the saving of fuel at 20 per cent.—Yours respectfully,
HY. LE LIEVRE.
Copies of official and other reports, and of testimonials in favour of the invention, as applied to steam boilers; brewery coppers; stills; chemists, dyers, and confectioners' pans; coal ovens, &c. with information respecting licenses to manufacture the PATENT SMOKELESS FURNACES, given by Mr. HENRY LEE STEVENS, the patentee, at the offices, No. 1, Fish-street-hill, City, London

THE PERMANENT WAY COMPANY call the attention of Railway Directors and Engineers to their PATENT RAILS, SLEEPERS, FISH JOINTS, and other important improvements, now in use on upwards of 2,500 miles of railway.
Extract from the half-yearly report of the Directors of the Midland Railway, February 14, 1854:—
"An important feature in the contract for the maintenance of the Permanent Way, is that the contractors are bound to reduce the charges 20l per mile per annum, whenever the Fish Joint, or certain other improvements, are hereafter introduced."
Every information may be obtained on application to Mr CHARLES MAY, C.E. the Manager; or Mr. WILLIAM OWDEN, the Secretary, 26, Great George-street, Westminster.

TARPAULINS for COVERING ROOFS during Repairs. SCAFFOLD CORD and every description of ROPE used by Builders upon the lowest terms. Marquees and Carpet Awnings on sale or hire. Orders per post receive the most prompt attention. WILLIAM PIGGOTT, 115, Fore-street City, Manufacturer, by appointment, to her Majesty's Honourable Board of Ordnance.

GUTTA PERCHA TUBING.—Many inquiries having been made as to the durability of this tubing, the Gutta Percha Company have pleasure in drawing attention to the following letter received from Mr. C. Hacker, surveyor to the Duke of Bedford:—"Office of Works, Woburn-park, Jan. 10, 1852. In answer to your inquiries respecting the gutta percha tubing for pump suctions, I find that the water has not affected it in the least although it will cat lead through in two years. We have adopted it largely, both on account of being cheaper than lead, much easier fixed, and a more perfect job. Yours, &c. C. Hacker." To Plumbers for joining tubes, lining tanks, &c. will be forwarded on the receipt of three postage stamps.—The Gutta Percha Company, Patentees, 18, Wharf-road, City-road, London.

WHARF CRANE for SALE.—A capital second-hand double-purchase iron-post WHARF CRANE, warranted to lift two tons, to feet radius, 16 feet C B, in good condition. For further particulars and price, apply to M. A. HARDS and Son, Engineers, Upper Ground-street, Blackfriars bridge (Surrey side). N.B. Estimates given, fixed complete with brick or stone well included, if required.

HUBBUCK'S PATENT WHITE ZINC PAINT. The PERMANENT WHITE of the Ancients, previously confined by its cost to the use of the artist, is now, by HUBBUCK'S PATENT, reduced to the price of White Lead.
The principal characteristics of HUBBUCK'S ZINC PAINT are—Economy, Health, Beauty, and Durability.
Builders and Contractors find Hubbuck's Paint the only one adapted to all their purposes; possessing the great desideratum of economy, combined with its high excellence as a paint, it ranks alone. Contractors effect a saving of 25 per cent. by using HUBBUCK'S ZINC PAINT.
HUBBUCK and SON feel it necessary a caution should be circulated against imitations of their Paint. These manufactures, containing frequently poisonous ingredients, are baneful to health and worthless in use, whilst the inexperience of these imitators in the production of pigments is evidenced, not alone by the coarse grating appearance, but also by the deficiency of that body in their produce, which is known to the painter to be all-essential. That an imposition be not practised, therefore, notice that the cask is marked with the name of the original manufacturer, thus—
HUBBUCK——LONDON——PATENT.
If not so marked, the reason may be inferred.
Every information in the circular to be had of THOMAS HUBBUCK and SON, Paint and Varnish Manufacturers, Upper East Smithfield (opposite the London Docks), London.

THE VIEILLE MONTAGNE ZINC MINING COMPANY'S PURE PATENT WHITE ZINC PAINT is unequalled for permanency of colour, hardness, and brilliancy of surface; it is unaffected by sulphureous or any other vapours or emanations. Being completely innocuous and free from the pernicious effects of whitelead, it may be employed in all apartments whilst in use without any inconvenience to the inmates.
The greatest caution is recommended to avoid any spurious compounds that might be sold at cheap rates as Pure Oxide of Zinc. If any adulteration be taken place in the oxide, either in consequence of impurity in the material primarily made use of to produce it, an imperfect mode of production, or by mixing with the oxide certain substances calculated to give it increased weight, it then produces a very inferior instead of a very superior paint, and the economy realized by the purchasers of such oxides becomes a very expensive result to the owner of the premises painted with them.
The VIEILLE MONTAGNE'S ZINC OXIDES, dry or ground in oil, are sold with the VM mark—In Hull, by Messrs. BLUNDELL, SPENCE, and CO.; when ground and dry, by Messrs T. B. MORLEY and CO.; and by the Company's Grinding Agents. In London, Messrs. CHARLES DEVAUX and CO. wholesale agents, 62, King William-street, City; JACK and BRABY, wholesale and retail agents, 8, Tottenham-court, New-road, and 98, Upper Thames-street, City. In Manchester and Liverpool, by Messrs. LAWFORD and CO. of 49, Norfolk-street, Liverpool, who are also acknowledged Painters to the Company for Zinc Paints, and undertake painting ships, warehouses, dwelling-houses, &c. In Leith, by Messrs. R. ANDERSON and CO Timber-bush. Dry OXIDES and PAINTS, in kegs of 14, 21, and 28 lbs and upwards, to be had of the Company's Agents in Birmingham, Newcastle, Glasgow, Bristol, Plymouth, Portsmouth, Norwich, Ipswich, Poole, and the Isles of Jersey, Guernsey, Man, and Wight; also in Dublin, Cork, and Belfast.
The Company also employ an acknowledged painter in London, who will undertake any description of painting with Zinc Paint by contract.
For further particulars, apply to the Company's General Agent in London, Mr. SCHMOLL, 12, Manchester-buildings, Westminster.

THE VIEILLE MONTAGNE ZINC MINING COMPANY beg to inform the public that they have appointed Messrs. T. and S. KNIGHT, of Great Suffolk-street, Southwark, as their painters, who will be ready to execute any description of painting and decorating with the Pure Patent White Zinc Paint.

PATENT LIQUID CEMENT for Fronts of Houses, &c.—This valuable and economic material is always ready for use, simple in application, and only one-eighth the cost of oil paint. It will not decompose or wash off. For beauty it stands pre-eminent, giving the appearance of fine cut stone, and 1 cwt. will cover 400 to 600 square feet. Sold in casks of 1, 2, and 3 cwt. at 8s 15s and 24s each, asks exclusive.
PATENT PERMANENT COLOUR is particularly suited for halls, kitchens, school-rooms, railway stations, &c. as a substitute for oil paint: is without smell, dries in an hour, and may be applied over wood, oil paint, stucco, or any other surface. Sold in casks of 1 cwt. at 15s 6d. each.
PATENT ZINC PAINTS. These paints are ready mixed for use, economical, another stain in colour, greatly superior to, and will last much longer than common oil paints, and will cover a much larger surface than the same quantity of white lead paint. Price 6s. per gallon, ordinary colours; Mineral chocolate brown, 8s.
Permanent Brilliant Black, for all kinds of outside work, barges, park railing, &c. 2s. per gallon.
PATENT INDIA-RUBBER PUTTY, which never shrinks, but remains in a tough plastic state, and is permanently waterproof. Price 4s. per stone.
DAMP WALLS.—PATENT ELASTIC PAINT, an effectual remedy, by which they are rendered fit for papering or finished in oil colours. Price 10s. per gallon, which will cover and finish about 150 square feet.
PATENTEES, GEORGE BELL and CO. Steam Mills, 2, Wellington-street, Goswell street, London.

WHITE OXIDE of ZINC and ZINC PAINT. (Langston Scott's Patent.)
CROWLEY, WHITE, and CROWLEY, Sole Manufacturers now supply this new oxide as a substitute for White Lead to shippers and the trade, either in powder or paint, of genuine purity, whole sale and retail, and invite a fair and exact test direct from the Works, Grand Surrey Docks, Rotherhithe.
Zinc Paint is not the color of white lead, possesses equal body, and perfectly unchangeable in colour.
Price, list and prospectus of its superior properties for interior, exterior, and marine purposes, forwarded in answer to letters addressed to Messrs. CROWLEY, WHITE, and CROWLEY, 10 Lombard-street, London.

KEENE'S and PARIAN CEMENTS and FRENCH PLASTER for internal uses.—These well known hard stuccoes dry quickly, and can be painted upon within a few days.—Made and sold by JOHN BAZLEY WHITE and BROTHERS, Millbank-street, Westminster.

PORTLAND CEMENT.—CHARLES RICHARDSON has the greatest confidence in introducing to the Trade the above superior CEMENT, being of uniform colour and quality (a desideratum never before attained in Portland Cements). It possesses extraordinary cementing qualities, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, turn green, or crack; combined with which its eminent hydraulic properties stamp it at once as the first cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly.—Manufactured by R. GREAVES, Esq. at his Works, near the River Avon, and sent to all parts of the Kingdom per boat or rail, at a reduced price to the trade.
6, South Wharf, Paddington.

TO BOARDS OF HEALTH, COMMISSIONERS OF SEWERS, ENGINEERS, ARCHITECTS, DISTRICT AND ROAD SURVEYORS.
W. AUSTIN'S PATENTED INVENTIONS, for sanitary and other purposes, are open for inspection, at Austin and Ord's Wharf, Abingdon-street, Westminster. Trials are requested to prove the merits of the various articles.—Communications, address W. AUSTIN, 27, Holywell-street, Westminster.

PORTLAND CEMENT.—ASPDIN'S PATENT.
Messrs. ASPDIN, ORD, and CO. have much pleasure in informing consumers of this valuable Cement, that they have, by means of a recent discovery (patented by Mr. ASPDIN) much improved the quality of this Cement without any increase in price.
Engineers and architects are recommended to specify "Aspdin's Patent," as there are numerous imitations sold as Portland Cement, resembling it only in colour.
ASPDIN, ORD, and CO. beg to call attention to their SECOND QUALITY, which is equal, if not superior, to most of the Cements sold as 1st-rate, and is considerably cheaper.
A report of experiments made to prove the extraordinary strength of their Patent Portland Cement, may be had at their Office, New Wharf, Westminster, London; at their Works, Gateshead-on-Tyne; or from their Agent, Mr. HENRY ROBINSON, 21, King-street, Liverpool.

PORTLAND CEMENT.—JAMES WESTON having enlarged that portion of his CEMENT WORKS at Mill-sail, Poplar, for Manufacturing the above CEMENT, begs to inform the Trade in general that they can be supplied with any quantity they may require, either at his Works, St. Andrew's Wharf, Earl-street, Blackfriars, or Middle Wharf, Scotland-yard, Westminster. Manufacturer of Roman, Lias, and Mastic Cements, English and French Plaster, &c.

PORTLAND CEMENT WORKS, NORTHFLEET, KENT. Messrs. ROBINS and CO. with much pleasure announce to their Friends and the Public, that they have completed the enlargement of their works, in order to meet the great increasing demand for their Cement; and are now prepared to supply any quantity of the very best PORTLAND CEMENT, manufactured by them for all the purposes Cement is applicable.—Orders received at Great Scotland-yard, and at the Works.

PORTLAND CEMENT WORKS, Northfleet, and Belvedere-road, Lambeth.
KNIGHT, BEVAN, and SWINDINGE, Manufacturers.
For town, country, and exportation.

PARIAN CEMENT, for internal use, to be painted in a few hours, and papered within a couple of days.—CHARLES FRANCIS and SONS, Manufacturers of Roman, Parian (under patent), and all other Cements in use for building purposes, Nine Elms, London.

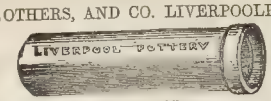
ATKINSON'S CEMENT, so long known and esteemed in London, for plastering purposes, is a quick-setting Cement, that requires no colouring.—Sold exclusively by JOHN BAZLEY WHITE and BROTHERS, Millbank street, Westminster; and Seel-street, Liverpool.

ARTIFICIAL HYDRAULIC or PORTLAND CEMENT combines the valuable qualities of the natural Cements with the additional advantage that it greatly excels them in its cement tious properties, that it is not affected by frosts, does not vegetate in damp situations. Accounts of COMPARATIVE EXPERIMENTS on the strength of this and other Cements (read at the Institute of Civil Engineers), to be obtained from the makers, JOHN BAZLEY WHITE and BROTHERS, Millbank-street, Westminster, who prepare one quality only of Portland Cement.

GEO. & THOS. EARLE, CEMENT MANUFACTURERS, HULL.—Light and Dark, equal to any made. Manufacturers also, and dealers in Plaster, Paris White, Mastic, Hair, Lias Lime, Laths, Slates, and Slate Slabs, Fire-lighting Grindstones, Cement Chimney-tops, ditto Vases, Ridging, &c. Paints, Stucco, &c. Marble Merchants and Importers of Pozzolano

BLUE LIAS LIME.—NELSON and CO. beg most respectfully to call the attention of Engineers, Architects, Contractors, Builders, and others connected with the building trade, to the superior quality of their BLUE LIAS LIME, the natural hydraulic properties of which, and the great estimation in which this kind of Lime is held for buildings in wet and damp situations, such as wharf-walls, docks, &c. and for concrete foundations, is a sufficient recommendation for the adoption of the same in all works of the above description. It is also peculiarly adapted for stucco. Orders received by—London Agents, BLYTH, BROTHERS, 16, South Wharf, Paddington; and at the Works, Stockton-fields, near Southam, Warwickshire.

GREAVES'S BLUE LIAS LIME.—The superior manner in which the above is ground renders it cheaper for concrete or stucco than any other lime or cement. The shrinkage in all works of the above description is scarcely any core. The satisfaction constantly expressed by Engineers, Architects, and Contractors, of the above, is the best recommendation.
Gibbs, Canning, and Co.'s Blue Vitrified Bricks, Pipes, Junctions, Bends, and Fire Goods.
ROMAN, PORTLAND, PARIAN, ANSTON, and LIAS Cements of the best quality.
SECONDS, PAVIORS', STOCKS, and other Bricks.
CHARLES RICHARDSON, 6, South Wharf, Paddington.



GROUND ABERTHAW LIME (for Hydraulic Works), Blue Lias Cement, Cambrian Plaster, Caustic Flour of Lime (for Agricultural and Gardening purposes), and Portland Cement, shipped at Cardiff, in barrels, to all parts of the world, or forwarded by railway direct out of the works, in sacks or barrels, to any part of the kingdom.—JAMES BIRD and CO. Cambrian Cement Works, Cardiff.

LEEDS TERRA-COTTA and SANITARY TUBE WORKS.—Show-rooms, Great George-street, near the Town hall, Leeds.—WILKS and PERKINS Manufacturers of every description of Ornamental Terra-cotta and Sanitary Wares, Trusses, Fonts, Flower Vases and Pots, Chimney Tops, Ridge Tiles, Watercloset Pans, Fire-grate Backs, Fire-bricks, Quarries, &c.

TERRA COTTA.—Vases, Figures, Capitals, Coats of Arms, Friezes, Consoles, Chimney-shafts, Flower traps, &c. &c. manufactured by J. M. BLASHFIELD, Mill Wall, Isle of Dogs, near the West India Docks, and sold at No. 1, Fradd-street, Edgware-road, Paddington.

JOHN DOULTON, BROTHERS, AND CO. LIVERPOOL POTTERY, ST. HELEN'S.

STONE WARE PIPES, BENDS, JUNCTIONS TRAPS, &c.

TERRA COTTA VASES, CHIMNEY-TOPS, &c. FIRE-CLAY FLUE PIPES.

May also be had as follows:—

LIVERPOOL STORES, 70, SOHO STREET, LIVERPOOL.

GLASGOW	J. A. Matheson, Hope-street.	BLACKBURN	W. Hopwood, Clayton-street.
DUBLIN	Robt. Lovely, Poolbeg-street.	CARLISLE	C. Armstrong, Lowther-street.
CORK	W. N. Brash, Denn-street.	WHITEHAVEN	Hugh Todhunter.
WATERFORD	J. Sparrow and Co	CO. KERMODE TH.	John Hird
CARNARVON	Jno. Jackson.	GUERNSEY	Guerin, Brothers.
PRESTON	J. Armstead, Hudson-street.	LONDONDERRY	W. and A. M'Elwee.
KENDAL	Robt. Thompson.	WIGAN	James Fleet Lace, King-street.

The most economical and efficient system of drainage is formed with DOULTON'S STONE WARE PIPES

Testimonials as to their superiority have been received from the Borough Engineers of Liverpool, Glasgow, and other cities.

WILLIAM NORTHEN'S

WHITE ENAMELLED STONEWARE,

UNION POTTERY, 14, VAUXHALL-WALK, LAMBETH, LONDON.

W. N. solicits an inspection of his IMPROVED WHITE ENAMELLED STONEWARE CLOSET PANS, being an entire new description of stoneware, perfectly vitrified and highly glazed, far surpassing anything of the kind yet offered to the public.

SAME PRICE AS BROWN STONEWARE—7s. 6d. Pan and Trap. WITH BLUE INSIDE, ENAMEL, 1s. extra.

HENRY DOULTON and CO.'S DRAIN PIPES in GLAZED STONE WARE

OFFICES—HIGH-STREET, LAMBETH, LONDON, and Granville-street Wharf, Broad-street, Birmingham.
MANUFACTORIES—HIGH-STREET, LAMBETH, LONDON; ROWLEY REGIS, STAFFORDSHIRE; AND SMETHWICK, NEAR BIRMINGHAM.

May also be had as follows:—

BIRMINGHAM	Granville-street Wharf.	WOLVERHAMPTON	Mr. R. Shelton.

BOURNE VALLEY POTTERY
NEAR POOLE, DORSET.

Manufactory of Salt Glazed Stoneware, Pipes, Bends, Junctions, &c. from clay of the finest quality the produce of the estate on which the goods are manufactured, all inferior clay being at once rejected.

MILL WALL POTTERY (near Scott
Russell's). Messrs. WILLCOX and CO invite the atten tion of Contractors, Builders, and Wholesale Dealers to their ex tensive assortment of articles in WHITE EARTHENWARE for sanitary purposes. The only manufactory of the kind in the neighbourhood of London.—Patterns forwarded on application.

TO LOCAL BOARDS OF HEALTH, WATER COMPANIES, &c

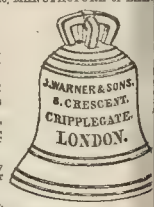
A DESIDERATUM in SLUICE-VALVES
FREEMAN ROE'S Patent Sluice-valve, can be repaired without being removed from the main. All sizes, from 9 inch to 36 inch. Patent Hydrants, self-closing Cocks, fire and othe Pumps, Hot water Apparatus, Baths, &c. Surveys made, and est mates given by FREEMAN ROE, Hydraulic, sanitary, and Gas Engineer, 70, Strand, and Upper Marsh, Lambeth

FINDON'S PATENT WATER-CLOSETS
J. BLACK, late successor to the business of the patentee begs to call the attention of architects, of builders, and the trade to the many advantages of these closets over all others as to economy, durability, and simplicity, only requiring one pipe from either main, for closing which pipe may be branched for an other purpose. May be seen at the Manufactory, 16a, High-Holborn.

REDUCTION of PRICE in UNGLAZED
DRAIN PIPES.
Manufactured by CHAS. FRANCIS and SONS, NINE ELMS

The price in future will be,

6s. 6d.	per foot for the	3	inch bore.
7s. 6d.	"	4	"
9s. 3d.	"	6	"
0s. 8d.	"	9	"
1s. 5d.	"	12	"
2s. 0d.	"	15	"



These pipes are made under steam pressure, and burnt to great hardness, and are capable of bearing nearly double the hydraulic pressure of ordinary glazed pipe. The superior workmanship of these pipes will be discerned by this manufacture. And it is well known that good earthenware, UNGLAZED, is the oldest material discovered in a perfect state in Nineveh, Babylon, Nineveh, &c. &c.

Agent for South Hampton, R. L. FLUDER, American Wharf.

MANUFACTURERS of GLAZED
STONEWARE PIPES, Bends, Junctions, &c.; also FIRE BRICKS stamped Blue Bricks as used by her Majesty's Commissioners of Sewers. White Fire Clay, Facing Bricks, &c. &c. Agents, CHARLES RICHARDSON, No. 6, South Wharf, Paddington, London.

JOHN WARNER and SONS, Patentees
IMPROVEMENTS in the MANUFACTURE of LARGE BELLS.

J. W. & SONS having of late years devoted much time and study to the long neglected art of Bell Casting, have recently invented and patented a new process connected therewith, by which they are enabled to manufacture Bells of any size, note, or weight, of superior tone, truer in form, and at less cost than has heretofore been accomplished.

Bells for Churches, Chapels, Colleges, Schools, Turret Clocks, &c. cast for any size, note, or weight, singly or in peals.

TUNED BY MACHINERY.

Stocked and wheeled ready for hanging. Old Bells recast or taken in exchange.

MUSICAL HAND-BELLS tuned to the Chromatic Scale, with improved Clappers, and pegged on a new system, which gives a superior tone and facility for ringing.

SUCCESSFUL VENTILATION.
WATSON'S PATENT SELF-ACTING DOUBLE-CURRENT VENTILATORS have been successfully applied to Churches, Chapels, Public Halls, Stables, and almost every Kind of Buildings, as well as to withdraw Steam, Smoke, Dust, and Foul Air. Testimonials and other information forwarded on receipt of two postage stamps. Instructions sent for fixing. Apply at the Manufactory to CHARLES WATSON, King Cross-lane, Halifax, Yorkshire, who is the patentee and sole maker.

VENTILATION.

D. and E. BAILEY beg to call the attention of Architects and others to their improved

CIRCULAR ARNOTT VENTILATORS,

which are more slightly than the square ones in general use, and are less liable to get out of order, and the flaps, loaded and from the top, do not admit as much rain caused by down draught.

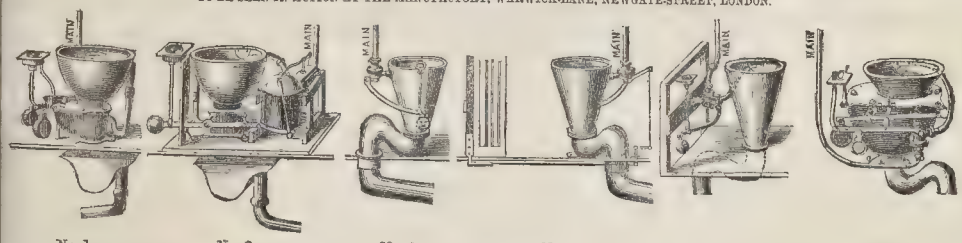
Price, bronzed, from 6s. 6d.

D. and E. BAILEY,
323, Holborn.

NORRIS'S PATENT RAILWAY CHA
COMPANY beg to draw attention to their Patent RAILWAY CHAIRS. This patent has received the highest approbation of some of the most eminent engineers for the most effective, economical and perfect joint in use at the present time, simplicity of construction, and its great superiority over all other joints for strength, durability, and cheapness. The saving in the weight of iron required for the same length of line, and the saving in the cost of laying the line, will be found very great. The extreme simplicity of the construction of Norris's Patent, so that the most inexperienced person can see at once how it is to be used, and the facility with which any number of chairs can be put down in a given time, are points which have obtained for this patent the preference over all others, and have caused it to be adopted on many of the principal railways in the kingdom, as the best and most perfect joint yet discovered. It has been in use for several years, both at the same time, and in all weathers, and has not required the renewal of a single chair, or even a wedge, while many of the chairs originally put down have been worn out and broken. To the railway world in general, and especially to railway engineers, the patentees would call attention to the simplicity and economy of this patent. Every information will be given, and models forwarded for inspection, on application to the Manager, at the Offices of the Company, Wolverhampton.

JENNINGS'S IMPROVEMENTS IN DRAIN-PIPES, AND IN CONNECTIONS TO DRAIN-PIPES.

FOR PARTICULARS OF THE ABOVE, SEE LAST WEEK'S "BUILDER."



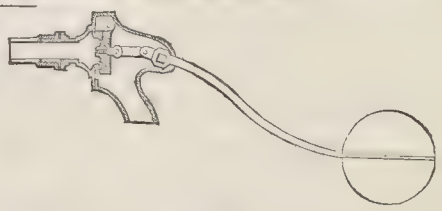
A book, containing illustrations, prices, and particulars of GEORGE JENNINGS'S other inventions can be had on application, or by two postage-stamps inclosed to

GEORGE JENNINGS,
ENGINEER AND GENERAL BRASSFOUNDER,
No. 29, Great Charlotte-street, Blackfriars-road, London.

*** A Sample Closet, with Stool Cock complete, packed and sent to any part, on receipt of a Post-office Order for 30s.

J. TYLOR AND SONS'
PATENT HIGH-PRESSURE CLOSETS, FOR THE MAIN SERVICE.

TO BE SEEN IN ACTION AT THE MANUFACTORY, WARWICK-LANE, NEWGATE-STREET, LONDON.



No. 1. No. 2. No. 4. No. 5. No. 6. No. 3.

THE WHOLE OF THESE CLOSETS ARE SO ARRANGED THAT THE BASINS CANNOT BE LEFT WITHOUT WATER.

HEY ARE EQUALLY ADAPTED FOR FIXING FROM CISTERNS OR HIGH-PRESSURE MAINS, ARE WARRANTED TO STAND ANY KNOWN PRESSURE OF WATER, AND REQUIRE NO CRANKS, WIRES, OR CISTERN WORK, SO THAT ANY NUMBER CAN BE SUPPLIED FROM ONE SERVICE-PIPE.

No. 1.—J. TYLOR AND SONS' PATENT HIGH-PRESSURE VALVE-CLOSET. With Blue Basin, sunk opal handle, 4l. 4s.
No. 2. J. TYLOR AND SONS' PATENT HIGH-PRESSURE VALVE CLOSET, WITH PATENT SERVICE-BOX ATTACHED. This Closet is also particularly adapted for very low pressure, the water rising in the bason after use to any desired height. With Blue Basin, sunk opal handle, 3l. 10s
No. 3.—J. TYLOR AND SONS' PATENT HIGH-PRESSURE PAN CLOSET. With White Basin, flat brass handle, 2l 12s. 6d With Blue Basin and sunk opal handle, 3l 3s.
No. 4.—J TYLOR AND SONS' PATENT HIGH-PRESSURE HOPPER CLOSET. With Enamelled Iron Hopper, sunk brass handle, and cast-iron trap, 1l. 13s. Enamelled Iron Trap, extra, 4s 6d
No. 5.—J. TYLOR AND SONS' PATENT HIGH-PRESSURE HOPPER CLOSET, TO WORK FROM THE DOOR. With Enamelled Iron Hopper, cast-iron trap, and door-action, 1l. 13s. Extra for Enamelled Iron Trap, 4s. 6d. This Closet is particularly adapted for Public Buildings, for which purpose it is made with a larger Valve. With large Valve, Enamelled Iron Hopper and Door Action, 3l 3s. Enamelled Iron Trap, 4s. 6d extra.
No. 6.—J. TYLOR AND SONS' PATENT HIGH-PRESSURE STOOL-VALVE. This Valve is particularly short in its action. ¾-inch Valve, with sunk handle, 14s. 6d.

TYLOR AND SON'S PATENT HIGH-PRESSURE BALL-VALVES.

These Ball-valves can be recommended with the greatest confidence as the most powerful and easy action Valve ever offered to the public. They are entirely free from all those objections of fittings such as spindles, slides, and cylinder fittings, so fatal to Ball valves generally. They are perfectly quiet in action, and not by any means stuck fast, there being no point of friction from fittings in their construction. They are arranged as to accumulate the power of closing against the column of water when most required, and are warranted to stand any known pressure of water.

Complete with Balls:—	½	¾	1	1¼	1 inch.
Plain shank	6s.	6s	6s 6d.	7s. 3d	12s. 6d. each.
Screw ferrule	6s.	6s. 6d.	7s 6d.	8s. 3d.	14s. 6d. each.

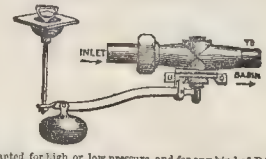
ILLUSTRATED CATALOGUES TO BE HAD ON APPLICATION.

N.B.—ARCHITECTS ARE RESPECTFULLY INFORMED THAT THESE ARE CORRECT PRICES FOR INSERTING IN SPECIFICATIONS.

J.TYLOR AND SONS', WARWICK-LANE, NEWGATE-STREET, LONDON.

DOULTON AND WATTS'S
REGISTERED CLOSET PANS IN
ENAMELLED STONE WARE,
LAMBETH POTTERY, LONDON.

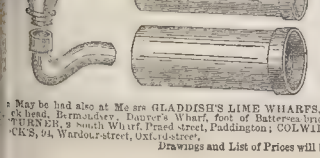
These Closet Pans are manufactured in a new kind of stone-ware, HIGHLY GLAZED, vitreous, of a white colour, are much improved in form, and are used and recommended by the engineers connected with the General Board of Health.



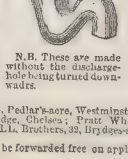
The Traps are smaller at the inlet, gradually enlarging towards the outlet, as a security against the introduction of improper substances into the drain.

They may also be had turned down.

PRICE 7s. 6d. each,



The same as for ordinary stone-ware, and may be had fitted with copper fans of the best construction at 1s. 3d. each extra.

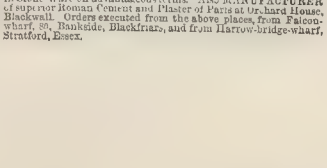


LAMBERT'S SELF-CLOSING
LAVATORY AND CLOSET-VALVE

Is adapted for high or low pressure, and for any kind of BASIN. Many hundreds are in use under continuous pressure of 100 to 200 feet; they are found to be exceedingly durable, and are cheaper than common cocks. Manufactured solely by the Patentees,
THOS. LAMBERT and SON,
Brass Founders and Engineers,
Corner of Short-street, New Cut, Lambeth.

AMES STIFF, MANUFACTURER of GLAZED STONE-WARE DRAIN PIPES,
BENDS, JUNCTIONS, TRAPS, &c. 39, HIGH-STREET, LAMBETH, LONDON. Established 1751.
Water-Closet Pans, with Syphon Traps, 7s. 6d. each.
STRAIGHT TUBES, in Socket Joints, in Two Feet Lengths.

N.B. These are made without the discharge-hole being turned downwards.



The great advantages attending the use of these articles are now so generally understood, as to render any enumeration of them almost superfluous. Their cheapness, efficiency, and durability, are universally admitted; while the rapidly increasing demand for them proves their estimated superiority over every other kind hitherto before the public for similar purposes.

Inspection is invited to an assorted Stock of Drain Tubes, of every form and size, adapted to the various situations for which they may be required, as also to the WATER-CLOSET PANS OF IMPROVED CONSTRUCTION, and interior glaze, far surpassing any other manufactured of Brown Stone Ware.

May be had also at Messrs GLADDISH'S LIME WHARFS, Pedlar's-acre, Westminster-bridge; City-road Wharf, City Basin; Ockbend, Bermondsey; Danver's Wharf, foot of Battersea-bridge, Chelsea; Pratt Wharf, Kingsland-road, Camden New Town; TURNER, 3 South Wharf, Praed-street, Paddington; COLWILL, Brothers, 32, Bryanston-street, Covent Garden; and at EDWARD CKS, 94, Wardour-street, Oxford-street.

Drawings and List of Prices will be forwarded free on application.

VICTORIA POTTERY, LEIGH,
NEAR SOUTHEND, ESSEX.

DAVID MOUNTAGUE,
MANUFACTURER of superior GLAZED STONE WARE PIPES (in accordance with the Rules established by the Commissioners of Sewers), Bends, Traps, Closet-pans, Jars, Bottles, and every article in Stone Ware on advantageous terms. Also MANUFACTURER of superior Roman Cement and Plaster of Paris at Orchard House, Blackwall. Orders executed from the above places, from Falcon-wharf, 39, Bankside, Blackfriars, and from Harrow-bridge-wharf, Stratford, Essex.

PEAKE is directed to SELL by PUBLIC AUCTION, at the AUCTION MART, on THURSDAY, JUNE 15th, 1854, at TWELVE for ONE o'clock, in 2,500 after the sale of Estates, 300 Tons of best WELSH NARVON and PENRHYN SLATES, lying at Pimlico Herring Pier and Wharf, Tooley-street. They will be sold at the long tale of 1,200 to the 1,000.—May be viewed at the Wharf prior to the sale; Catalogues had thereon at the Auction Mart; and at Mr. PEAKE'S Offices, 44, Tooley-street, Southwark.

SALES BY AUCTION.

TO BRICKMAKERS, POTTERS, CAPITALISTS, and Others. Saint John's Common, Kramer, Surrey. Valuable Freehold and Copyhold Property, consisting of about 4 acres 3 roods of Land, with messuage, cottage brick and pottery kilns, warehouse and shops, sheds, buildings and premises, known as "Shaw's Brick and Pottery Works," in the occupation of Mr. Shaw.

MR. WM. KENSETT, at the BURGESS HILL INN, Burgess Hill, on MONDAY, JUNE 26, 1854, in Two Lots, by order of the Trustees under the will of the late Mr. Wm. Shaw, deceased, at THREE for FOUR o'clock in the afternoon precisely.

Lot 1. All those valuable FREEHOLD LANDS and PREMISES, containing about 13a. 1r. 5p. or land, with a messuage and cottage with yard thereto, orchard, and garden, barn, three stables, chaise-house, coachyard, pottery, three pottery and two brick kilns, pottery warehouse, three pottery drying-houses, three spinning-shops, two tile-houses, sixteen drying-beds, a mill-house, rake-shop, steaming-house, stacking-plots, &c.

Lot 2. A piece of part free old land part copyhold land (equal to freehold), containing about 1a. 2r. 6p., called the Pagent Plot, situate near the Potter's Arms Inn, and well adapted for building.

This desirable property is situate adjoining the Turnpike road, in good roads, consequently has very extensive frontage; is within half a mile of the Burgess Hill Station on the London Brighton, and South Coast Railway. The Station-house in 2 or 3 years, and well arranged. The substratum of the land abounds with sands, earths, and clays, which are particularly well adapted to the requirements of a potter and brickmaker's manufactory. A very extensive and lucrative business has been for many years established, and is now in full operation. The whole of the premises are occupied by Mr. James Meeds, who is under notice to quit on the 29th day of September next. The sale offers an unusual opportunity to any person desirous of embarking in the pottery and brickmaking business, to parties in search of building sites, or to capitalists for investment. May be viewed on application to Mr. Charles Shaw, on the Mr. Meeds, the tenant. Particulars and conditions of sale may be had, ten days prior to sale, at the principal inns in the neighbourhood; of Messrs. FREEMAN, CORNFORD, BLACK, and FREEMAN, Solicitors, Ship-street, Brighton; or of the Auctioneer, Ditchling, near Hurstperpoint.

Highly Valuable Freehold Building Land with frontages on the Richmond-road and the river Thames, commanding most attractive views.

MESSRS. GADSDEN, WINTERFLOOD, and ELLIS have received instructions to SELL by AUCTION, at the MART, on THURSDAY, JUNE 29th, at TWELVE o'clock, TWELVE ACRES of remarkably fine LAND, free of land-tax, situate in the parish of Barnes, adjoining the Hammersmith Suspension-bridge, on the east side of the Richmond-road, a much-favoured locality, and one where very great improvements have recently been effected. The above offers unusual advantages, and is well adapted for the wealthy residents, builders, or speculators, as a considerable source is afforded for extensive frontages being formed, and any important or costly improvements carried out; whilst for a profitable resale in smaller portions the opportunity is undoubted.—To be viewed till the sale; and particulars may be had at the Bull's Head Inn, corner of the Richmond and Barnes roads; of Samuel Fisher, Esq. Solicitor, Merchant Taylor's Hall, Threadneedle-street; at the Mart; and of Messrs. GADSDEN, WINTERFLOOD, and ELLIS's Offices, 18, Old Broad-street, City.

Freehold Property, Grays-inn lane.

MESSRS. GADSDEN, WINTERFLOOD, and ELLIS have received instructions to SELL by AUCTION, at the MART, on FRIDAY, JUNE 30th, at TWELVE, an improvable property, comprising THREE FREEHOLD SHOPS and PREMISES, situate at the corner of Verulam-street, and known as Nos. 45, and 46, Gray's-inn-lane, at the west of the central value of 120l. per annum. To builders, speculators, and others, this presents a favourable opportunity.—May be viewed by application to Mr. Jones, Station, 18, High Holborn.—Particulars may be obtained of Messrs. STABLES, BORN, and WARE, Solicitors, Copthall-court, Throgmorton-street; at the Mart; and at Messrs. GADSDEN, WINTERFLOOD, and ELLIS's Offices, 18, Old Broad-street, City.

WITHOUT RESERVE. Freehold Building Land at Peckham.

MESSRS. H. BROWN and T. A. ROBERTS will SELL by AUCTION, at the MART, on THURSDAY, JUNE 29th, at TWELVE, in eight lots, without the least reserve, upwards of 500 feet FRONTAGE to the Queen's Road, 200 feet deep, beautifully situate near the Carshalton station on the London and Epsom Railway, about 11 miles from London.—Printed particulars may be had of Mr. SLADEN, 38, King-street, Cheapside; at the Mart, and of Messrs. H. BROWN and T. A. ROBERTS, 29, Throgmorton-street.

AT GARRAWAY'S COFFEE-HOUSE, CORNHILL, FRIDAY, 16th JUNE, at FOUR precisely, TIMBER, 500 loads, foreign and colonial; deals and battens, 500 pieces ditto, ditto, and other wood goods. H. FREEMAN, Broker, 3, Crooked-lane, London-bridge.

CONEYGERE and NETHERWOOD, REYSOE, BEDFORDSHIRE. 800 OAK TREES and SPIRES TO BE SOLD by AUCTION, by

JOHN SWAN and SON, on MONDAY and TUESDAY, JUNE 19 and 20, 1854, punctually at ELEVEN each day. The above timber is lying near good roads, and will be found worthy the notice of shipowners, timber-merchants, builders, wheelwrights, and others, being of excellent quality; some of the hedgerow timber will vary in measurement from 100 to 140 feet in a tree. Six months' credit, on approved security.—Catalogues will be forwarded on application to the Auctioneers, 19, Sidney-street, Cambridge.

Building Land, Southampton.—Southampton.—Rooks Down, Bevois Mount.—Important Sale of about Twenty-Two Acres of most valuable Building Land, eminently deserving the attention of Capitalists, Freehold Land Societies, Building Societies, Builders, and others.

R. H. PERKINS has been favoured with instructions from Mr. Betts, Jun. to submit to PUBLIC COMPETITION, at MATCHAM'S HOTEL, Southampton, on TUESDAY, the 20th day of JUNE, 1854, at TWO o'clock in the afternoon (unless an eligible offer be previously made), all that very valuable piece of FREEHOLD BUILDING LAND, comprising about Twenty-Two Acres, abutting on the far-famed Avenue entrance to the Southampton Cemetery, and in the parish of Millbrook, Southampton, and within 50 minutes' walk from the Royal Pier, Southampton. Rarely does a property, possessing such unrivalled attractions and capabilities for Building Sites, present itself. The area of the estate will produce upwards of 6,500 feet frontage to the main roads. A large proportion of the land commands views nearly equalled in beauty and variety, well situations almost adjoining the town, and within 50 minutes' walk of the Royal Pier, terminus, docks, and pier, and little more than two hours' reach of the metropolis. The supply of water is abundant and good; the whole of the land lies with a gentle declivity to the south, abounds with good gravel sand, and other printable soil, &c. to such an extent as from that source alone a handsome income is to be realised by the proprietor. While the eligibility of the estate for building is such, that the property must in a double its present value, seeing that the population and importance of the town is rapidly increasing, and is now extending from the commanding facilities of the port, continue to increase, and that in the direction of this land, and to an extent that is incalculable from hereto, as it is the only available land open to opportunity, either for investment or for business enterprise, does too often occur. The proprietor is induced to make a liberal arrangement as to time for the completion of the purchase, while

ADVERTISEMENTS.

PARIS EXHIBITION of 1855.

METROPOLITAN TRADE MEETINGS

The LORDS of her MAJESTY'S PRIVY COUNCIL for TRADE being desirous that the officers charged with the preliminary arrangements for the Paris Exhibition should have the assistance of a few gentlemen practically acquainted with each of the most important branches of trade carried on in the metropolis, have invited all persons engaged in the undermentioned trades, and who may be interested in the Exhibition, to assemble at Marlborough House, on the days hereafter mentioned, for the purpose of considering how those trades may best be represented, and to name the persons they may best wish the assistance that is required:—

The Meetings to take place punctually at ELEVEN o'clock each day.

PHILOSOPHICAL INSTRUMENT MAKERS, on MONDAY, JUNE 19.

MUSICAL INSTRUMENT MAKERS, on TUESDAY, JUNE 20.

MANUFACTURERS of HARDWARE, PEWTERERS, and BRASSFOUNDERS, on WEDNESDAY, JUNE 21.

SADDLERS and HARNESS MAKERS, on THURSDAY JUNE 22.

TANNERS, CURRIERS, and LEATHER DRESSERS, on FRIDAY, JUNE 23.

FURRIERS on SATURDAY, JUNE 24.

Notice of other meetings will appear in due course.

By Order

H. C. OWEN, Captain R.E.

Marlborough House, Pall-mall, June 14, 1854.

PARIS UNIVERSAL EXHIBITION of 1855.—SILK TRADE OF THE METROPOLIS.

At a MEETING of the SILK TRADE, held at the School of Art, on June 13, 1854, present, Messrs. Kemp, Stone, and Co.; Campbell, Harris n, and Lloyd; Wilson, Casey, and Co.; J. S. Marr and Sons, J. and R. Robinson and Co., J. and T. Robinson; J. and W. Thomson; H. Soper, T. R. Lavenery; Brookes; Foot and Sons, W. Bullock, Robert Graham and Sons, &c.

G. T. KEMP, Esq. in the Chair;

It was moved by Mr. Harrison, and seconded by Mr. Casey, and resolved unanimously:—

"That this meeting having heard the explanations of the officers of the Board of Trade in reference to the invitation of the French commissioners of opinion that the silk trade of Spitalfields should be represented at the forthcoming Exhibition, and would be glad to see a complete display of the Silk manufactures of the United Kingdom."

It was moved by Mr Robinson, seconded by Mr. Soper, and resolved unanimously:—

"That a preliminary committee be appointed to confer with the Board of Trade on the proposed Exhibition, with the view of ascertaining the space to be demanded, and that such committee consist of Mr Casey, Mr. Harrison and Mr Wonkworth, with Mr. Humphreys as Honorary Secretary."

Signed, G. T. KEMP, Chairman

It is requested that all manufacturers who have not as yet forwarded their names for space with as little delay as possible, in order that the committee may be able to estimate the space likely to be required for a due representation of the Silk Trade of Spitalfields.

All communications to be addressed to, and information obtained from,

H. C. OWEN, Capt. R.E.

Marlborough House, Pall-mall, June 13, 1854.

COMPETITIONS.

SEATING for PUBLIC ROOM.—REQUIRED, DESIGNS and ESTIMATES for SEATING a MUSIC HALL, to get long by to feet wide. The classes of seats are to be tiered, for which separate Tenders will be necessary, and economy is a great object.—Tenders to be addressed to the Hon. Secretary of the Lynn Athenæum, on or before the 1st JULY next.—King's Lynn, June, 1854.

COMPETITIONS.

TO ARCHITECTS, LANDSCAPE GARDENERS, AND OTHERS.

£10 PRIZE.—DESIGNS, SPECIFICATIONS, and ESTIMATES required for LAYING OUT, PLANTING, FENCING, and DECORATING FOUR ACRES of LAND at Sutton, in the county of Surrey, and for erecting thereon a gentleman's house, brick stables, of plain classical exterior, with lodge and large entrance hall, drawing and dining room, library and morning room, conservatory from morning room opening or to lawn. The rooms to be so arranged as to communicate with each other, to form a suite at pleasure, or to be separately entered from the hall. Above must be a large nursery, also one to communicate for the night, two bed rooms and dressing rooms, bathroom, three servants' rooms front and back staircase, kitchen, scullery, larder, pantry, and all domestic appurtenances, stable, and lumber. The 1st prize offered by the proprietor of the land will be given to the candidate of whose plan, specification, and estimate, he approves, but the unsuccessful competitors will not receive any remuneration, but their designs will be returned to them. Plans, specifications, and designs must be sent in to C. H. E. care of "The Metropolitan Brewery Company," 8 Moorgate-street, City, London, on or before the 10th JULY, 1854, where anyone can see the proprietor's own design of ground-plan, also the plan of the land.

CONTRACTS.

TO BUILDERS.

SEALED TENDERS for COMPLETING the MUSQUITRY KEEP LINES of DEVONPORT, will be received at the Ordnance Office, Pall-mall, London, on or before the 22nd of JUNE instant, at NOON, to be forwarded to the Secretary to the Board of Ordnance, and endorsed "Tender for Musquetry Keep, Devonport," on the left hand corner of the envelope. Plans and specifications with terms and conditions, may be seen and forms for Tenders, and every information had, at the Royal Engineers' office at Devonport, between the hours of NINE and FOUR o'clock on every day from WEDNESDAY, the 7th instant to SATURDAY the 24th instant both days inclusive.

Royal Engineers' Office, Devonport, 5th June, 1854.

TO BUILDERS.

Royal Engineers' Office, Portsmouth, 9th June, 1854.

SUCH Persons as may be desirous of UNDERTAKING from the 1st AUGUST next to the 31st MARCH, 1855, the CARPENTERS' and SLATERS' WORK required in the ORDNANCE DEPARTMENT, at PORTSMOUTH, including Portsea Island, Gosport, and detached works not specified in the map, may be furnished with Tenders of the rules of prices and conditions of contract, on application to the Office. The Tenders will be required to be delivered before TWELVE o'clock at Noon, on WEDNESDAY, the 28th day of JUNE, 1854, at the Office, Pall-mall, London, addressed to the Secretary to the Board of Ordnance. The Tenders to be Tenders shall be approved, will be required to give double securities, and to execute a bond for the due performance thereof, and to pay half the amount of the stamp on the bond.

NOTICE to BUILDERS.—ORDNANCE CONTRACT. The Commanding Royal Engineer of the Woolwich District hereby gives Notice, that the Honourable Board of Ordnance are about to receive Tenders for a general CONTRACT FOR EXTENDING THE MAIN DRAIN IN THE ROYAL ARSENAL

and that such persons as may wish to Tender for the same may inspect the plans, and obtain a copy of the specification and form of Tender for the work, by applying to Mr CARTWRIGHT, Clerk of Works, at the Royal Engineer Office, Royal Arsenal, Woolwich, on or before the 24th of JUNE, 1854, between the hours of TEN and FOUR.

Tenders on the model form, prepaid, to be delivered at the office of ordnance, Pall-mall, London, on the 27th of JUNE, 1854, addressed to the Secretary to the Honourable Board of Ordnance, and marked, "Tender for Work at Woolwich."

The Board of Ordnance reserve to themselves the right of rejecting the whole or any of the Tenders.

Woolwich, 7th June, 1854.

CHELMSFORD LOCAL BOARD of HEALTH. CONTRACT No. II. The Local Board for this district are prepared to receive TENDERS for EXCAVATING the GROUND and LAYING IRON and STONEWARE PIPES, and other works required for the house services. Printed specifications and bills of quantities and form of Tender, may be obtained on or after TUESDAY next, at the Surveyor's office, adjoining the JAMES FINCH, Esq., Local Board for this district, Tenants-square, Chelmsford. Sealed Tenders, on the printed forms only, endorsed "Contract No. 2," will be received by the Clerk to the Board on or before WEDNESDAY, the 28th of JUNE, 1854. The Board do not pledge themselves to accept the lowest Tender

ANDREW MEGGY,
Clerk to the Chelmsford Local Board.

Chelmsford, June 7, 1854.

TO BUILDERS AND CONTRACTORS

PARTIES desirous of TENDERING for the WORKS required in the ERECTION of a MANUFACTORY, OFFICES, PORTER'S RESIDENCE, ENGINE and BOILER HOUSE, CHIMNEY SHAFT, &c., at Wisbech, with Messrs. GRIGG and LAWSON'S Manufactory, are requested to meet the Plans and Specification, at the Office of the Architect, High-street, Wisbech, on and after the 17th inst.

GEORGE BENJAMIN NICHOLS, Architect.

TO BUILDERS

THE WATFORD LOCAL BOARD of HEALTH hereby give Notice, that they are prepared to receive TENDERS for the ERECTION of a BOARD ROOM, OFFICES, and a COTTAGE, at their Water Works, Watford. Plans, specifications and drawings may be seen and the Offices of JAMES HILLBROW, C.E. Tottenham, Engineer to the Local Board, Sealed Tenders, addressed to "The Local Board of Health, Watford," must be sent to me on or before THURSDAY, the 29th instant.—By order of the Board,

Watford, June 13, 1854. JOHN SEDGWICK, Clerk.

CONTRACTS.

BRISTOL LOCAL BOARD of HEALTH.

CLEANSING.—The Committee of the Local Board of Health here have resolved that they are ready to receive TENDERS for SWEEPING and CLEANSING, and for WATERING (by means to be specified) and CLEANING, including WATERING, the streets, squares, courts, and passages, and places adjacent thereto, and all lanes, passages, and places adjacent thereto, within the city and county of Bristol, three in each week, and for TAKING AWAY the ASHES, DIRT, &c to be made in the said streets, once in each week. The committee have separated the said city and county into four divisions, and any person or persons willing to contract for performing the work in all or any other of the said divisions are requested to deliver to the Town Clerk of the said city and county of Bristol, at his office, on THURSDAY morning, the 6th day of JULY next, addressed to "The Committee of the Local Board of Health, 14, Prince-street, Bristol," an Intituled "Tender for Bristol Division No. —." A specification of the works to be contracted for, and the form of Tender and any other information may be obtained either on personal application or by letter addressed to me for that purpose. All Tenders will be returned to find two sound and sufficient sureties for the due performance of the contract. The committee will not send or receive to or from any Tenderer any communication by Local Board of Health or any Tender without inquiry and approval of the proposed sureties.

By order of the Committee,

JAMES HARRIS, Clerk.

Offices, 14, Prince-street, 19th May, 1854.

IRONMONGERY WAREHOUSE established for the exclusive supply of the above trades. Mr. Cook's Registered Model Water-closet. Wilkinson's Hampton Argand and Factor, 18, Blandford-street, Manchester-square, London, running out of Baker-street, Portman-square.

MOREWOOD & ROGERS'S PATENT PLUMBIC ZINC,

A SUBSTITUTE FOR SHEET-LEAD FOR

ROOFING, RIDGES, GUTTERS, FLOORING,

AND ALL OTHER PURPOSES TO WHICH SHEET-LEAD IS APPLICABLE.

This Metal consists of distinct layers of Lead and Zinc, perfectly united in the process of Manufacture, one side of each sheet being pure Lead, and the other pure Zinc; it therefore combines the Softness of Zinc with the Durable Qualities of Lead. The Lead side of the sheet being laid outward effectually protects the Zinc below from those atmospheric influences which so rapidly cause its decay, whilst the Zinc so stiffens and supports the Lead as to make a sheet of Plumbic Zinc equal in strength to one of Lead of a very few times its thickness and weight.

Plumbic Zinc not requiring to be more than one fourth or one-fifth as thick as Sheet-Lead, is consequently much cheaper than that material.

For covering Terraces, Flats, Floors, Stairs, Passages, &c. it is well suited, being like Lead to the tread, whilst the Zinc on the under side of the sheet prevents it from treading out of shape.

The Size of the Sheets is 7 feet by 2 feet 8 inches.

No. 11 Gauge weighs about	18	oz.	per foot super.	
No. 12	„	„	20 oz.	do. do.
No. 13	„	„	24 oz.	do. do.
No. 14	„	„	26 oz.	do. do.

For further particulars apply to

MOREWOOD AND ROGERS, GALVANIZED TINNED IRON WAREHOUSE,

DOWGATE DOCK, UPPER THAMES STREET, LONDON.

IRONMONGERY, NAILS, STOVES, RANGES, &c.

AT WALMSLEY'S,

126, 127, and 128, LONDON-ROAD, SOUTHWARK.

FOR THE SUPPLY OF BUILDERS, CARPENTERS, UPHOLDERS, CABINET-MAKERS, SMITHS, WHEELWRIGHTS, AND OTHERS, AT WHOLESALE PRICES.

Best Sheet Floor brads, 15s. 6d.

Best fine Cut Clasp and Rose { 1 in. 6d. 1¼ 6d. 1¾ 6d. 2 in. 2¼ and 3 inch. } 1s. 6d. 2s. 3s. 4s. each.

Sash Weights. Air Bricks, 5s. per doz. Hooping for bond 12s. per cwt. Cast Lath, 11s. 6d. per cwt. Sash Pullies, 8s. 6d. per gross. Arnott's Ventilators, 1½ each. Elliptic Stoves, with double backs, 3½d per inch. Register Stoves from 5s. per inch.

Improved Self-acting Ranges with oven and boiler { 30 32 34 36 inch. 20s. 30s. 35s. 45s. each. }

Best Self-acting Ranges, with oven and boiler, wrought bars and bright fittings { 36 38 40 inch. 50s. 55s. 60s. each. }

An extensive stock of bright and blank Register Stoves in every variety of design, at remarkably low prices. A large assortment of Rim, Drawback, Mortise, Iron Gate, and every other kind of Locks and Latches. Pinser plates, Levers, and Bellpulls, en suite.

BAR, HOOP, SHEET, AND ROD IRON. RAIN-WATER PIPES AND GUTTERS, ALL SIZES.

The Stock of this Establishment is too extensive to be described in the limits of an advertisement, and the most correct idea that can be given of it is by saying that every trade consuming Ironmongery can be enabled whatever they require at WHOLESALE PRICES.

WALMSLEY'S new Show-rooms are now open with a Modern and Choice Stock of General Furnishing Ironmongery unequalled in variety, and all at unprecedented low prices.

WIRE STRAND FENCING,

as furnished with all its fittings, by R. S. NEWALL and CO. having obtained the undivided approval of practical men, as confidently recommend it as the best fencing for park and farm purposes, or substitute for temporary agricultural hedges and palisades. For any kind of hurdles, for roads, &c. and all other fencing.

The PATENT WIRE STRAND FENCE possesses an economy, security, and durability, not to be found in combination in any other fence in their introduction. This fence, as fitted by R. S. Newall and Co. offer the removal of the fences of this material in the Slopes and Horse park, at Windsor, has the inherent property of remaining equally inclastic in frost, under any variations of temperature.

N.B. Estimates given at so much per running yard, for fencing; also complete specimens, sketches, or any other particulars, will be forwarded, on application to

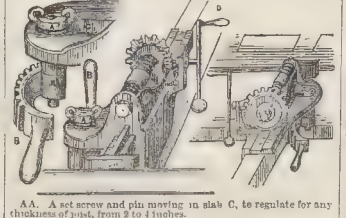
COTTAM & HAILEN, 2, Winsley-street, Oxford street, London



BARTON'S PATENT STABLE

FITTINGS and ENAMELLED MANGERS. These fittings have all the newest improvements, and are the only patented invention of this description.—JAMES BARTON, Iron Founder, Smith, &c. 171, Oxford street, a few doors east of the Pantheon.

PATENT FRAME FOR FLOORS, DOORS, AND SASHES

W. ISSELL, PATENTEE,

WOLVERHAMPTON, Manufacturer of Rein and Mortise Locks and Bar der's Ironmongery

AA. A set screw and pin moving in slab C, to regulate for any thickness of joint, from 2 to 4 inches.

B. An eccentric notched lever, to be turned and pressed against the

Lay the cramp upon the joint close up to the board, move the set screw in the slab up to the side of the board, then fix the set screw with the notched lever B against the cramp, then turn the handle D, the lever will get into its place. The fit the cramp firm: the greater the strain, the more tightly. by its eccentric action, will the lever bind. The flat bottom, drawing the attention of Builders and others, assures them that it secures possesses great advantages. It is a newly cramp of the best kind, and has wells fitted for doors and sashes as for floors. From its superior and most useful principles, it has greater power, and will be found to be more powerful and safer to use than any yet brought out, and at the same time it is light and portable.

JOHN WALKER,

CORRUGATED IRON ROOF and BUILDING MANUFACTURER,

And GALVANIZER and JAPANNER

Works—Mill Wall, Poplar, London; and Gillbrook, Birkenhead.

Offices—Corner of Arthur-street West, London bridge; late 61, Gracechurch street.

WARMING by HOT WATER.—

J. WEEKS and CO. KING'S-ROAD, CHELSEA. HOT WATER APPARATUS MANUFACTORY, whilst respectfully soliciting the attention of Architects, Builders, &c. to their superior apparatus for warming churches, mansions, halls, schools, and public buildings, by the circulation of hot water in pipes, beg to call particular attention to the scientific statement in the "Builder" of Jan. 14, 1854, which fully bears out the able address of the Rev. H. J. Rigge, delivered at a meeting of the Architectural Society, wherein Mr. Rigge shows that heating by hot water is truly the only effective system applicable to warming churches and other large buildings. It is free from all objections, is economical in working, and produces perfect ventilation, with a uniform genial temperature throughout the most extensive buildings.—Messrs. JOHN WEEKS and CO. will guarantee their Hot Water Apparatus for thirty years at 5 per cent.

HOT WATER APPARATUS, adapted for

Horticultural and every other description of Building; most useful for warming in brick work. Warm Air Apparatus, &c.—Apply to SPILLER and TAYLER, Engineers, Battersea.

DEFRIES'S GAS STOVES, RANGES, and BATHS, in action for two years at the above building. A great variety in stock upon the same principle. Gas Baths from 7l. which a warm bath may be obtained for three halfpence. Gas Cooking and Heating Stoves for all classes, from 1l. DEFRIES'S celebrated DRY GAS METERS, upwards of 10,000 in use, over-test notices at the office, 145, Regent-street, or at the Manufactory, New-road, St. Pancras, near Fitzroy-square.

CALORIFERE.—Gold Medal, Paris Exhibi-

tion, 1855.—A Stove to cube feet room warmed by hot air only, at 60 degrees Fahrenheit, in 1 minute 10 lbs. of coal per hour. The most complete safety means. Lire, the heat is not and most powerful ventilation is without any machinery, one of the only BOILESVE'S PATENT CALORIFERE. The constant supply of fresh air carries out instantaneously, by a new well-imported process, and keeps or adjusts air, that makes it very desirable for churches, schools, theatres, long tabs manufactories, clubs, houses of any size, laundries, and green houses. Twelve more have been adopted to heat the Duke of Bedford, at Woburn Abbey, by several architects, and it may be seen in operation in many places in London and country.—Apply, personally, to T. BOILESVE, French Engineer, 5, King William-street, C.S.

PARNELL'S PATENT DEFIANCE and

NATIONAL LOCKS, WHICH CANNOT BE PICKED, are now to be had of all respectable ironmongers, of whom Parnell's Patent Noiseless Latches, and perfect security, also Parnell's Iron Noiseless Bolts, are to be had. FIRE—ROBBERY—VIOLENCE—PIL-

LAGE—MILNER'S HOLDFAST FIRE-RESISTING SAFES, the strongest safeguards in the world against

EXTENSIVE FIRE IN GLASGOW.

MESSRS DAVID DODD AND CO.

Gentlemen,—At the entire fire in Argyle-street yesterday, by which my counting-house was destroyed, I owed the preservation of my books to the MILNERS SAFE in which they were kept. The contents of a wall safe were totally destroyed on the same night. You will please send me immediately another "Milner" of the same size as the one I had, being thoroughly satisfied of their safety, after the test I have just seen.

I am, Gentlemen, your obedient servant,

(signed) JOHN DODD,

27, Union-street, Glasgow, Feb. 23, 1854.

MILNER'S PHŒNIX SAFE WORKS, Liverpool;

FREEMAN, Millbank-street; also by Messrs. Sharp, Tooley-street, and Messrs Braby's, Belvidere-road, where terms may be obtained.

MAGNUS'S ENAMELLED SLATE.—Mr. MAGNUS having, at great expense and hazard, and by dint of unwearied perseverance during a period of FOURTEEN YEARS, succeeded in obtaining for his invention of Enamelling Slate to imitate Marbles the PATRONAGE of HER MAJESTY, PRINCE ALBERT, the Chief of our nobility, and almost every Architect, Builder, and Engineer of any note, and having been rewarded with the MEDAL of the SOCIETY of ARTS and the PRIZE MEDAL of the GREAT EXHIBITION, finds that his success has given rise to a host of pettifogging imitators, who, though they may not affect him in a pecuniary light, inflict vast injury by their wretched imitations of his productions, which are, in most cases, passed off as "MAGNUS'S ENAMELLED SLATE." He therefore respectfully requests those who are disposed to patronize his establishment, to assure themselves that they are supplied from his manufactory, as no imitation IT LESS THAN HALF THE COST AND LABOUR NECESSARY TO SECURE PERMANENCY, a counterfeit can be made which will not endure, and he considers the public will be the greatest sufferers. It is unnecessary in regard to the fittings of the retiring places of railway stations, and wherever there is much wear. N.B. The Tariff of Prices is now ready.

Pimlico Slate Works, Second 49, Upper Belgrave-place.

VENEERS CUT for the TRADE (by Knife only), by the PATENT VENEER-CUTTING MACHINE by which process a hundred per cent. benefit is guaranteed upon the ordinary method of cutting veneers.—For particulars, prices and specimens of work done by the machine, apply to J. CHACK, Sole Patentee, Veneer-cutting Works, 44, Albert-street, Chelsea, adjoining the King's-road Saw-mills.

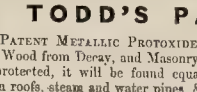
STAINING WOOD to IMITATE OAK Walnut, or Satin Wood. For Churches, Chapels, Schools, rooms, Staircases, &c. Brings out the grain of the wood in a beautiful manner, and when used with the proper varnish will never fade or blister. Oak, 8s.; Wainscot, 5s. per gallon. Varnish, 10s. 6d. per gallon.—Address, WILSHERE and Co. Varnish and Colour Merchants, Bayswater.

STAINING DEAL TO IMITATE ALL KINDS of WOODS. It requires NO SIZING, and will stand the exposure to the weather. Price 5s. per gallon. Varnishes for W. NAYLOR'S Stains may be had at the Factory, 44, and 58, James-street, Oxford-street; also Manufacturer of Improved Knotting and Decorative Varnishes.

TO CABINET AND CHAIR-MAKERS.

TO BE SOLD, a bargain, a parcel of large good quality WALNUT PLANKS.—Apply to S. C. [illegible], Hanover-street, Walworth.

TODD'S PATENT METALLIC PROTOXIDE PAINT.



THE PATENT METALLIC PROTOXIDE PAINT now offered has been found, after the most severe trials, to be peculiarly efficacious in preserving Iron from Oxidation, Wood from Decay, and Masonry and Brickwork from Dampness. Applied to Iron, it unites with it most intimately, forming a complete coating; so that thus protected, it will be found equal to the best galvanized iron. Hence its great value to all Engineers and Iron Founders as an application to iron vessels, iron roofs, steam and water pipes, &c. &c. It adheres firmly to iron, even at a red heat. For stuccoed buildings it will be found to be effectual in preventing the discolourations formed by vegetation, and keeping out all dampness.

For terms, application to be made at the Offices of the Company, 12, Bishopsgate-street Within; or to the following Agents:—
Messrs. PITCHFORD, Island Lead Works, Limehouse, } LONDON. | Messrs. D. and G. BRYMNER ..... GREENOCK.
Messrs. G. and T. WALLIS, 64, Long-acre, ...

SUCCESSFUL VENTILATION.—

WATSON'S PATENT SELF-ACTING DOUBLE-CURRENT VENTILATORS have been successfully applied to Churches, Chapels, Public Halls, Stables, and almost every kind of Building, as well as to withdraw Steam, Smoke, Dust, and Heat. Testimonials and other information forwarded on receipt of a postage stamp. Instructions sent for fixing.—Apply at the Manufactory to CHARLES WATSON, King Cross-lane, Halifax, Yorkshire, who is the patentee and sole maker.

VENTILATION.—PURE AIR.

With single pulley, from 6s. each; with leading pulley, from 8s. 6d. These Ventilators are arranged that the requisite quantity of air may be admitted for the due ventilation of an apartment without the slightest draught being felt by the occupants; and as they are placed in the external wall, their action is not impeded when the house is closed for the evening, at which time a constant supply of fresh air is most required.—HAYWARD, BROTHERS, sole Manufacturers, 190, Blackfriars road, and 21, Union-street, Borough; and of all respectable ironmongers, builders, &c.

JOHN WARNER and SONS, Patentees of IMPROVEMENTS in the MANUFACTURE of LARGE BELLS.

J. W. & SONS having of late years devoted much time and study to the long neglected art of Bell Casting, have recently invented and patented a new process connected therewith, by which they are enabled to manufacture Bells of any size, note, or weight, singly or in peals TUNED BY MACHINERY.

Stocked and wheels ready for fixing. Old Bells recast or taken in exchange.

MUSICAL HAND-BELLS tuned to the Chromatic Scale, with improved Clappers, and hegged on a new system, which gives a superior tone and facility for ringing.

MONEY on LOAN, at 3½ per Cent. per Annum.

ARNEWAY'S CHARITY.—NOTICE HEREBY GIVEN, that the Trustees of this Charity are enabled to lend out the Trust Moneys to poor couppers or traders resident within the City and Liberty of Westminster, that is to say, within the parishes of St. Margaret and St. John the Evangelist, St. Anne, Soho, St. Clement Danes, St. George, Hanover-square, St. James, St. Martin-in-the-Fields, St. Mary-le-strand, and St. Paul, Covent garden. The amount of each loan is not to exceed 20*l.* to be clear interest after the rate of 3½ per cent. per annum. The loan is to be secured by the bond of the borrower, with two sureties. Printed Forms of Application, and all necessary information, may be obtained by applying personally, between the hours of Ten and Three o'clock in the day, at the office of the Clerk and Solicitor to the Trustees, No. 14, Great Queen-street, St. James's Park.

By order, EDWARD S. STEPHENSON,
Clerk and Solicitor to the Trustees.

NOTE.—The Trustees meet on the second Wednesday in every month, to consider such applications for loans as have been sent in one clear week at the least before the first day of the month.—The sureties must be unexceptionable

LOANS.—Persons desirous of obtaining

ADVANCES from 50*l.* to 250*l.* upon approved personal security, repayable by easy instalments, extending over a long-fixed period, are invited to examine the principles of the BRITISH MUTUAL SUBSCRIPTION LOAN ASSURANCE CLASSES. Prospectuses, reports, and every information may be obtained on application at the British Mutual Life office, 17, New Bridge-street, Blackfriars. Rules 6*d.* each copy, or 5*s.* per pct.

Note.—Four new classes are now in course of formation for London, and will immediately commence operations.

PAPER-HANGINGS.—The CHEAPEST

HOUSE in London for every description of PAPER-HANGINGS is CROSS'S WHOLESALE WAREHOUSE, 22 GREAT PORTLAND-STREET, Oxford-street, where you can select from the LARGEST and MOST EXTENSIVE Assortment in the Kingdom, THIRTY PER CENT. CHEAPER than any other house in the trade. Builders, Decorators, Dealers, and large consumers will do well to visit this establishment.

PAPER-HANGINGS.—JEFFREY,

ALLEN and CO. Paper Stainers, beg to call the attention of the trade to their patterns of Paper hangings for the present season, which comprise every description of style and quality, from the most elaborate decoration to the cheapest paper that can be produced, and which they are prepared to offer at very low prices. J. A. and CO also respectfully inform the trade that they have OPENED a WAREHOUSE at No. 56, OXFORD-STREET, where all goods can be obtained on the same terms as at the Factory.

GUTTA PERCHA PAPER FOR DAMP WALLS. J. A. and CO are the sole vendors of this well-known remedy for Damp Walls.

315, Whitechapel, near the Obelisk, and 500, Oxford-street.

NORRIS'S PATENT RAILWAY CHAIR

COMPANY beg to draw the attention of Railway Companies and Engineers to NORRIS'S PATENT RAILWAY JOINT CHAIRS.—This patent has received the unqualified approbation of some of the most eminent engineers of the day, as the most effective, economical and perfect joint in use at the present time. The simplicity of its construction is such as will allow of its application to any line of railway, without causing the slightest hindrance to the ordinary traffic during the time that it is being laid down. The saving in the preservation of the permanent way and rolling stock, by the application of Norris's Patent, is incalculable; and wherever adopted must very considerably decrease working expenses. To railway companies, having old and bad roads, the principle is peculiarly advantageous, as its application will not only restore the road to a perfectly safe and serviceable state for many years, but at the same time, bring into efficient use all the old and broken chairs. To the railway world in general, it is of the greatest value, as it admits of the easiest locomotion and is most simple and economical in principle. Every information will be given, and models forwarded for inspection on application to the Manager, at the Offices of the Company, Wolverhampton.

HUBBUCK'S PATENT WHITE ZINC PAINT.

The PERMANENT WHITE of the Ancients, previously confined by its cost to the use of the artist, is now, by Hubbuck's Patent, reduced to the price of White Lead.

The principal characteristics of HUBBUCK'S ZINC PAINT are—Economy, Health, Beauty, and Durability.

Builders and Contractors find Hubbuck's Paint the only one adapted to all their purposes; possessing the great desideratum of economy, combined with its high excellence as a paint, it ranks alone. Contractors effect a saving of 25 per cent by using HUBBUCK'S ZINC PAINT.

HUBBUCK and SON feel it necessary a caution should be circulated against imitations of their Paint. These manufactures, containing frequently pernicious ingredients, are baneful to health and worthless in use, whilst the inexperience of these imitators in the production of pigments is evidenced, not alone by the coarse gritty appearance, but also by the deficiency of that body in their produce, which is known to the painter to be all-essential. That an imposition be not practised, therefore, a mice that the cask is marked with the name of the original manufacturer, thus—

HUBBUCK—LONDON—PATENT.

If not so marked, the reason may be inferred.

Every information in the circular to be had of THOMAS HUBBUCK and SON, Paint and Varnish Manufacturers, Upper East Smithfield (opposite the London Docks), London.

THE VIEILLE MONTAGNE ZINC

MINING COMPANY'S PURE PATENT WHITE ZINC PAINT is unequalled for permanency of colour, hardness, and brilliancy of surface; it is unaffected by sulphureous or any other vapours or emanations. Being completely innocuous and free from the pernicious effects of whitelead, it may be employed in all apartments whilst in use without any inconvenience to the inmates.

The greatest caution is recommended to avoid any spurious compounds that might be sold at cheap rates as Pure Oxide of Zinc. If any adulteration has taken place in the oxide, either in consequence of impurity in the material primarily made use of to produce it, an imperfect mode of production, or by mixing with the oxide certain substances calculated to give it increased weight, it then produces a very inferior instead of a very superior paint, and the economy realized by the purchasers of such oxides becomes a very expensive result to the owner of the premises painted with them

The VIEILLE MONTAGNE'S ZINC OXIDES, dry or ground in oil, are sold with the VM mark—In Hull, by Messrs. BLUNDELL, SPENCE, and CO.; when ground and dry by Messrs. T. B MORLEY and CO., and by the Company's Grinding Agents in London, Messrs. CHARLES DEVAUX and CO. wholesale agents, 82, Long Acre; William HACK and BRABY, wholesale and retail agents, 8, Tottenham-court, New road, and 80, Upper Thames-street, City. In Manchester and Liverpool, by Messrs. J. WORTHINGTON and CO. of 47, North-street, Liverpool, who are also acknowledged Painters to the Company for Zinc Paints, and on lertake painting ships, warehouses, dwelling houses, &c. In Leith, by Messrs. R. ANDERSON and CO. Timber-bush. DRY OXIDES and PAINTS, in kegs of 14, 21, and 28 lbs and upwards, to be had of the Company's Agents in Birmingham, Newcastle, Glasgow, Bristol, Plymouth, Portsmouth, Norwich, Ipswich, Poole, and the Isles of Jersey, Guernsey, Man, and Wight; also in Dublin, Cork, and Belfast.

The Company also employ an acknowledged painter in London, who will undertake any description of painting with Zinc Paint by contract.

For further particulars, apply to the Company's General Agent in London, Mr. SCHMOLL, 12, Manchester-buildings, Westminster

THE VIEILLE MONTAGNE ZINC

MINING COMPANY beg to inform the public that they have appointed Messrs. T. and S. KNIGHT, of Great Suffolk-street, Southwark, as their painters, who will be ready to execute any description of painting and decorating with the Pure Patent White Zinc Paint.

PATENT LIQUID CEMENT for Fronts of

Houses, &c.—The valuable and economic material is always ready for use, simple in application and only one-eighth the cost of oil paint. It will not decompose or wash off. For beauty it stands pre-eminent, using the appearance of fine cut stone, and 1 cwt. will cover 200 to 250 square feet. Sold in casks of 1, 2, and 3 cwt. at 8s. 15s. and 28s. each, casks exclusive.

PATENT PERMANENT COLOUR is particularly suited for halls, kitchens, school-rooms, railway stations, &c. as a substitute for oil paint. It without smell, dries in an hour, and may be applied over wood, oil paint, stucco, or any other surface. Sold in casks of 1 cwt. at 15s. 2 cwt. at 28s.

PATENT ZINC PAINTS These paints are ready mixed for use, economical, unobjectionable in colour, greatly superior to, and will last much longer than common oil paints, and will cover a much larger surface than the same quantity of white lead paint. Price 6s. per gallon, ordinary colours; Mineral chocolate brown, 5s. Permanent Brilliant Black, for all kinds of outside work, barges park railing, &c. 2s. per gallon.

PATENT INDIA-RUBBER PUTTY, which never shrinks, but remains in a tough plastic state, and is permanently waterproof. Price 4s. per stone.

DAVE WALLS PATENT ELASTIC PAINT, an effectual remedy, by which they are rendered fit for papering or finished in oil colour. Price 10s. per gallon, which will cover and finish about 15 square feet.

PATENTEES, GEORGE BELL and CO. Steam Mills, 2, Wellington-street, Goswell-street, London.

WHITE OXIDE of ZINC and ZINC

PAINT, (Lamont's Scott's Patent)

CROWLEY, WHITE, and CROWLEY, Sole Manufacturers, now supply this innocuous substitute for White Lead to shippers and the trade, either in powder or paint, of genuine purity, wholesale under brand, of unrivalled colour and texture, direct from the Works, Grand Surrey Docks, Rotherhithe

Zinc Paint is below the price of white lead, possesses equal body, and perfectly unchangeable in colour

Price list and prospectus of its superior properties for interior, exterior, and marine purposes, forwarded in answer to letters addressed to Messrs. CROWLEY, WHITE, and CROWLEY, 10, Lombard-street, London.

KEENE'S and PARIAN CEMENTS and

FRENCH PLASTER for internal uses. These well known hard stucco dry quickly, and can be painted upon within a few days. Made and sold by JOHN BAZLEY WHITE and BROTHERS, Millbank-street, Westminster.

6, South Wharf, Paddington.

PORTLAND CEMENT.—

CHARLES RICHARDSON has the greatest confidence in introducing to the Trade the above superior CEMENT, being of uniform colour and quality (a desideratum never before attained in Portland Cements). It possesses extraordinary cementitious qualities, resists the action of frost and heat, and is more durable than any other Cement; does not re-shate, turn green, or crack; combined with which its eminent hydraulic properties stamp it at once as the first cement of the day for work where all the above qualities are required. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly—Manufactured by R. GREAVES, Esq. at his Works, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

TO BOARDS OF HEALTH, COMMISSIONERS OF SEWERS, ENGINEERS, ARCHITECTS, DISTRICT AND ROAD SURVEYORS.

W. AUSTIN'S PATENTED INVEN-

TIONS, for sanitary and other purposes, are open for inspection, at Aspdin and Ord's Wharf, Alma dun-street, Westminster. Trials are requested to prove the merits of the various articles.—Communications, address W. AUSTIN, 87, Holywell-street, Westminster.

PORTLAND CEMENT.—ASPDIN'S PATENT.

Messrs. ASPDIN, ORD, and CO. have much pleasure in informing consumers of this valuable Cement, that they have, by means of a recent discovery fostered by Mr. ASPDIN, much improved the quality of this Cement without any increase in price.

Engineers and Architects are recommended to specify "Aspdin's Patent," as there are numerous imitations sold as Portland Cement, resembling it only in colour.

ASPDIN, ORD, and CO. beg to call attention to their SECOND QUALITY, which is equal, if not superior, to most of the Cements sold as Portland, and is considerably cheaper.

A report of experiments made to prove the extraordinary strength of their Patent Portland Cement, may be had at their Office, New Wharf, Westminster, London; at their Works, Gateshead-on-Tyne; or from their Agent, Mr. HENRY ROBINSON, 31, Pine-street, Liverpool.

PORTLAND CEMENT.—JAMES

WESTON having enlarged that portion of his CEMENT WORKS on Mill wall, Poplar, for Manufacturing the above CEMENT, begs to inform the Trade in general that they can be supplied with any quantity they may require, either at his Works, St. Andrew's Wharf, Earl-street, Blackfriars, or Middle Wharf, Scotland yard, Westminster Manufacturer of Roman, Lias, and Mastic Cements, English and French Plaster, &c.

PORTLAND CEMENT WORKS.

NORTHFLEET, KENT.—Messrs. ROBINS and CO. with much pleasure announce to their Friends and the Public, that they have completed the enlargement of their works, in order to meet the great increasing demand for their Cement, and are now prepared to supply any quantity of the very best PORTLAND CEMENT, manufactured by them for all the purposes Cement is applicable.—Orders received at Great Scotland-yard, and at the Works.

PORTLAND CEMENT WORKS,

Northfleet, and Belvedere road, Lambeth.
KNIGHT, BEVAN, and STURGE, Manufacturers.
For town, country, and exportation.

PARIAN CEMENT, for internal use, to be

painted in a few hours, and papered within a course of days. CHARLES FRANCIS and SONS, Manufacturers of Roman, Parian (under patent), and all other Cements in use for building purposes, Nine Elms, London

ATKINSON'S CEMENT, so long known and

esteemed in London, for plastering purposes, is a quick-setting Cement, that requires no colouring. Sold exclusively by JOHN BAZLEY WHITE and BROTHERS, Millbank street, Westminster; and Seel-street, Liverpool.

ARTIFICIAL HYDRAULIC or PORT-

LAND CEMENT combines the valuable qualities of the natural Cements with the additional advantage that it greatly excels them in its cementitious properties; that it is not affected by frost, and sets or re-sets in damp situations. Account of COMPARATIVE EXPERIMENTS with the celebrated Parian and other Cements (read at the Institute of Civil Engineers), to be obtained from the makers, JOHN BAZLEY WHITE and BROTHERS, Millbank-street, Westminster, who prepare one quality only of Portland Cement.

ROMAN and OTHER CEMENTS,

Manufactured by J. M. BLASHFIELD, successor to the Patentees, PARKER and WYATT, who, in 1796, first introduced PARKER'S ROMAN CEMENT; also Tarras and Portland Cements, English and French Plaster, Terra Cotta Chimney Pots, Trusses, &c.

Manufactory, Mill Wall, Poplar; Depôts Commercial-road, Lambeth; and Paddington-basin

GEO. & THOS. EARLE, CEMENT MANU-

FACTURERS, HULL.—Light and Dark, equal to any made Manufacturers also, and dealers in Plaster, Paris White, Mastic, Hair, Lias Lime, Laths, Slates, and Slate Slabs, Fire-bricks, Grindstones, Cement Chimney-tops, ditto Vases, Ridging, &c. Paints, Stucco, &c. Marble Merchants and Importers of Pozzolano.

BLUE LIAS LIME.—NELSON and CO.

beg most respectfully to call the attention of Engineers, Architects, Contractors, Builders, and others connected with the building trade, to the superior quality of their BLUE LIAS LIME, the natural hydraulic properties of which, and the great estimation in which this kind of Lime is held for buildings in wet and damp situations, such as wharf-walls, docks, &c. and for concrete foundations, is a sufficient recommendation for the adoption of it in all works of the above description. It is also peculiarly adapted for stucco. Orders received by London Agents, BLYTH, BROTHERS, 16, South Wharf, Paddington; and at the Works, Stockton-fields, near Southam, Warwickshire

GREAVES'S BLUE LIAS LIME.—The

superior manner in which the above is ground renders it cheaper for concrete or stucco than any other lime or cement. The shell lime for mortar is burnt on an improved principle, leaving scarcely any core. The satisfaction constantly expressed by Engineers, Architects, and Contractors, of the above, is its best recommendation.

Gibbs, Canning, and Co's Blue Vitrified Bricks, Pipes, Junctions, Bends, and Fire Goods.

ROMAN, PORTLAND, PARIAN, ANSTON, and LIAS Cements of the best quality.

SECONDS, PAVIORS, STOCKS, and other Bricks.

CHARLES RICHARDSON, 6, South Wharf, Paddington.

GROUND ABERTHAW LIME (for

Hydraulic Works). Blue Lias Cement, Cambrian Plaster, Canvey Coarse of Lime for Agricultural and Gardening purposes, and Portland Cement, shipped at Cardiff, in barrels, to all parts of the world, or forwarded by railway direct out of the works, in casks or barrels, to any part of the kingdom.—JAMES BIRD and CO. Cambrian Cement Works, Cardiff.

LEEDS TERRA-COTTA and SANITARY

TUBE WORKS.—Show-rooms, Great George's street, near the Town hall, Leeds.—WILKS and PERKINS, Manufacturers of every description of Ornamental Terra-cotta and Sanitary Wares, Trusses, Pouts, Flower Vases and Pots, Chimney Tops, Ridge Tiles, Watercloset Pans, Fire-grate Backs, Fire-bricks, Quarries, &c.

ARCHITECTURE, CIVIL ENGINEERING, and SURVEYING.—Messrs. HYDE, SMITH, and LEWIS, Architects, Civil Engineers, and Surveyors, &c. beg to inform their friends and the public that they have refitted up their OFFICES with every requisite necessary for acquiring a thorough practical knowledge of the profession, including models and instruments of every description. The courses are all remodelled and enlarged, embracing the latest improvements. Gentlemen who cannot attend at the offices can be attended at their residence in any part of the country by Mr. SMITH or Mr. LEWIS. Prospectuses, a full particulars, may be had by applying at the Offices, 14, Guildford-street, Russell-square.

ARCHITECTURE, CIVIL ENGINEERING, and SURVEYING.—Messrs. HYDE, SMITH, and LEWIS, Architects, Civil Engineers, and Surveyors &c. beg to inform their friends and the public that they have refitted up their OFFICES with every requisite necessary for acquiring a thorough practical knowledge of the profession, including models and instruments of every description. The courses are all remodelled and enlarged, embracing the latest improvements. Gentlemen who cannot attend at the offices can be attended at their residence in any part of the country by Mr. SMITH or Mr. LEWIS. Prospectuses, a full particulars, may be had by applying at the Offices, 14, Guildford-street, Russell-square.

ARCHITECTURAL, CIVIL ENGINEERING, and SURVEYING OFFICES established by Messrs. HYDE, SMITH, and LEWIS, Architects, Civil Engineers, Surveyors, &c. For preparing Designs for Architects, Engineers Surveyors, Levellers, Draughtsmen, Measurers Valuers, &c. and for giving EVENING INSTRUCTION in Architecture and Civil Engineering, Drawing and Colouring, Making Finished and Working Drawings, Preparing Specifications, Taking-out Quantities, Preparing Estimates, &c. &c.—Terms of Guineas per Quarter.—For Prospectuses &c. apply at the Offices, 24, Guildford street, Russell-square.

JAHN, LUETJENS, and WASSNER, Regent street, DECORATIVE ARTISTS, Celebrated Wall Decorations executed in the highest style, at a very moderate charge. Messrs. JAHN, LUETJENS, and WASSNER have given the greatest satisfaction to the artistic and principal public edifices of Munich and Dresden, and during the last twelve months at the Pompeian and Italian Courts of the Crystal Palace, Sydenham. They beg to invite the attention of the nobility and gentry, and of architects, to their economy of ornamental wood-carving and Wall Decorations, for town or country mansions, churches, and halls at the shortest notice, without the slightest inconvenience to occupants of mansion. JAHN and CO. 73, Regent street, Quadrant.

TO ARCHITECTS.

COMPETITION and other DRAWINGS.—Mr. THOMAS S. BOYS, Member of the New Society of Painters in Water Colours, and late Pupil of "The Picturesque Architecture of Paris, Ghent, Rouen," &c. and of "London as it is," offers his services in Tinting Backgrounds Landscapes, Perspective Views, Interiors, &c. From the long experience he has had in such subjects, he is fully aware of the points essentially necessary to be attended to. Drawings and designs lithographed in a superior manner. Address, Mr BOYS, 32, Albany street, Regent's park.

LITHOGRAPHY.—Plans of Estates, Maps, Beds of Quantities, Isometrical Views, and every description of Lithography executed in the best style of the Art. Engineering and Mechanical Drawings correctly detailed by experienced hands. Artists and amateurs supplied with every requisite for Lithography. Crayon Drawing and Oil and Water Colour Painting; Presses, Stone, Chalks, &c. Specimens of every class of work for inspection. Estimates given. Instruction gratuitous.—CHARLES MOODY, 27, High Holborn.

C. LEFTWICH, VARNISH MANUFACTURER, LEAD, GLASS, and COLOUR WAREHOUSE, 21, Minster-street, Regent's park. Begs to call the attention of the Trade, Builders, &c. to his stock of Genuine Copal, Pale, Extra Pale, Amber, Oak, Elastic, and Carriage Varnishes; Patent Glue, Brass work, &c. &c. Sheet lead, and Patent Pipe, Patent Glue, Soft and Hard Putty, White lead, Oils, Colours &c. 20s. PER CWT. GIVEN FOR OLD LEAD. GLASS. ILLUMINATORS for FLOORS, AREA VAULTS, &c.

FOR WATERING GARDENS, DISTRIBUTING LIQUID MANURE, &c.—JAMES LYNE HANCOCK'S VULCANIZED INDIA RUBBER T-PIECE is now manufactured regularly for the above purposes, and is of greater flexibility than any other description of hose or watering pipe. It is also manufactured to resist great pressure, suitable for attaching to the mains of water works or to tanks or water-butts, of high elevations. WATERING HOSE fitted up with brass unions, branches, stop-cocks, roses, and jets complete. Vulcanized India-rubber suction-pipes for pumps, any length or size, to order; HOSE for fire-engines, hydrants, &c. VULCANIZED INDIA-RUBBER WASHER for STEAM and WATER JOINTS, and VULCANIZED RUBBER in SHEETS of ANY SIZE and THICKNESS, both vulcanized India-rubber tubing and cord for the joints of glass doors, sashes, frames, &c.—Prices and every information may be had on application at the Manufactory, Gosweli-mews, Goswell road, London.

THE PERMANENT WAY COMPANY call the attention of Railway Directors and Engineers to their PATENT RAILS, SLEEPERS, FISH JOINTS, and other important improvements, now in use on upwards of 2,300 miles of railway.

Extract from the half yearly report of the Directors of the Midland Railway, February 14, 1854:—

"An important feature in the contract for the maintenance of the Permanent Way is that the contractors are bound to reduce their charges 4d. per mile per annum, whenever the Fish Joint, or certain other improvements, are hereafter introduced."

Every information may be obtained on application to Mr. CHARLES MAY, C.E. the Manager; or Mr. WILLIAM HOWDEN, the Secretary, 28, Great George-street, Westminster.

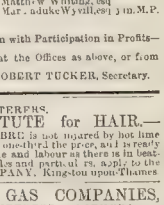
ROBERT TUCKER, Secretary.



TO PLASTERERS.

A GOOD SUBSTITUTE for HAIR.—SHORT COCOA-NUT FIBRE is not injured by hot lime or mortar more than hair; is not one-third the price, and is ready for use without such a loss of time and labour as there is in beating and cleaning hair. For samples and particulars, apply to the PATENT COCOA FIBRE COMPANY, King-tou upon-Thames

PURE GAS.—TO GAS COMPANIES, ENGINEERS, MANUFACTURERS, and OTHERS.
PATENT CLAY PURIFICATION. No cheap process has yet been discovered for freeing gas from ammonia, and the removal of the bisulphuret of carbon (the monster nuisance of gas-burning) has been given up in despair. Clay removes both these impurities, and when taken from the purifiers the bisulphuret of carbon is quite completely blackening the clay. The light of the gas is increased in proportion to its thorough purification. The proprietors of the patent are now ready to grant licenses for its use.—Terms and directions for the employment of clay, may be obtained from Mr. JOHN WHITTAKER, Agent to the Patentees, Gas Works, Wakefield

TO BE SOLD, 300 Navvie Barrows, about 300 Struts, from 3 to 6 feet long, a quantity of Rolling Boards, 50 Sets of Windlasses, Buckets, and Trolley-waggons, for sewer-work.—Apply at the Builder's Office, New Metropolitan Cattle-market, Copenhagen-fields.

KIMBERLEY'S Patent Mortising Machine, 12l. each.
Kimberley's Patent Flooring Cramps, 2s. and 28s. each
Kimberley's Patent Window Stays and Door Springs.
Kimberley's Patent Gas Stoves, Ovens, and Ranges
Kimberley's Registered Fancy Burns, and Shakspearian Brass Foundry.
Thousands of all are now in daily use.
These well-established Articles to be had from ROBINSON, LANGTON, and CO. 7, Talbot-court, Gracechurch-street, London; or from the Patentee, Birmingham; or to be seen at, &c.

Books of testimonials and references to any extent throughout the United Kingdom can be given.

VALUABLE ARCHITECTURAL and ENGINEERING WORKS, in first rate condition, offered at greatly reduced prices by

BRADLEY BATSFORD,
52, High Holborn, London.

N.B. ALL THE BOOKS WARRANTED PERFECT.

L'ART INDUSTRIEL; a Collection of Interior DECORATIONS and ARRANGEMENTS, containing models for every branch of industry connected with the fitting up and furnishing of gentlemen's residences, and with all articles of luxury appertaining thereto, such as wood-carving and wainscoting, hangings, frames for pictures and looking glasses, inlaid and carved furniture, billiard-tables, chairs of all kinds, jewels for persons of both sexes, services for the table in silver or china, candelabra, lamps, candlesticks, lanterns, iron gates and railings, locks, keys, clasps and fastenings, all kinds of church ornaments an 1 plate, organs, chimney-ornaments screens, flower stands, aviaries, &c. Seventy two Plates, designed and drawn by Leon Feuchere, Architect-decorator. Engraved by Varin, Brothers. 2 vols. Paris, 1853

BRITTON'S CATHEDRAL ANTIQUITIES of ENGLAND; or, an Historical, Architectural, and Graphic Illustration of the English Cathedral Churches, illustrated with 300 Plates engraved by Le Keux &c. 5 vols. 4to. newly bound in half morocco, extra, gilt leaves, 6l. 6s. Published at 31l. 10s.

BRITTON'S ARCHITECTURAL ANTIQUITIES of GREAT BRITAIN; a Series of 364 Engravings by Le Keux representing the most beautiful, curious, and interesting Ancient Edifices in this country. 5 vols. half morocco extra, gilt leaves, 6l. 6s. Published at 31l. 10s.

CANOVA'S WORKS in SCULPTURE and MODELLING, engraved in outline, by HENRY MOSES. 3 vols folio, bound in one, half russia, 4l. 4s.

CONEY'S ENGRAVINGS of ANCIENT CATHEDRALS, Hotels de Ville, and other Public Buildings of celebrity in France, Holland, Germany, and Italy, with descriptive letter-press, 42 very large and beautiful engravings. In India proofs. Cloth bds. 3l. 3s. pub. at 14l. 14s.

COTMAN'S ARCHITECTURAL ANTIQUITIES of NORMANDY; with Historical and Descriptive Notices by Lawson Turner. 100 large and highly finished Etchings 2 vols. imperial folio in one, half-bound, morocco, new, 3l. 3s. published at 15l. 12s. 1822.

COTTINGHAM'S PLANS, ELEVATIONS, SECTIONS, and DETAILS of HENRY the SEVENTH'S CHAPEL at WESTMINSTER, interior and exterior. Complete in 1 vol. folio, half-bound, 32s.

DURAND ET LEGRAND, Recueil et Parallele des Edifices Remarquables, Ancients et Modernes 11. large plates exhibiting upwards of 1,000 examples of Buildings, Details, Ornaments, &c.; accompanied by an explanatory volume in 8vo. Sewed, 3l. 12s.; published at 10l. 10s. Brux. 1845-52.

ENGINEER and MACHINIST'S ASSISTANT being a series of Plans, Sections, and Elevations of Steam engines Spinning-machines, &c. By David Scott. 2 vols. folio, bound in one, half Russia. 3l. 3s.; sells in cloth at 4l. 10s.

GRUNER'S SPECIMENS of ORNAMENTAL ART, selected from the best Models of the Classical Epoch Raphael, &c.; 50 very large Plates, most of which are most splendidly executed in gold and colours. Atlas folio, new half morocco, with a 4to. Volume of Descriptions, 8l. 8s. Published at 12l. 12s.

HUNT'S EXEMPLARS of TUDOR ARCHITECTURE, 50 Plates. 4to. half bound, 18s. 6d. Published at 42s.

KNIGHT'S (GALLY) ECCLESIASTICAL ARCHITECTURE of ITALY, complete. 2 vols. folio, half bound morocco, containing 82 beautiful Plates, some of which are coloured. 6l. 10s.

LETAROUILLY'S EDIFICES of MODERN ROME, or a Collection of Palaces, Houses, Churches, Convents, and the other most remarkable Public and Private Monuments of the City of Rome, 240 very large Plates, engraved, of the most famous buildings, with details, &c. 2 vols. atlas folio, complete, and descriptions in 3 sewed. 2l. 8s. Liege, 1849-9. Or half-bound morocco 7l. 15s.

MECHANICS' MAGAZINE.—A Complete Set from the Commencement to 1850 inclusive, forming 97 vols neatly bound in half-calf, binding quite new, 11l. 11s. a fine uniform set.

NICHOLSON'S ENCYCLOPÆDIA of ARCHITECTURE, new edition, edited by Messrs. LOVAIX and GUNYON. 2 vols. 4to. cloth lettered, 3l. 18s. sells at 4l. 4s. 1853.

NICHOLSON'S PRINCIPLES and PRACTICE of ARCHITECTURE. New edition, revised by JOSEPH GWILT, Esq. 218 Plates. 1 vol. royal 8vo. 22s. Published at 31s. 6d. 184

NICHOLSON'S OPERATIVE MECHANIC 4th edition with a Supplement, relating to British Public Works &c. By WARE. 150 Plates, large 8vo. volume, in cloth, 12s. 6d. Published at 28s. 1851

PROUT'S HINTS on LIGHT and SHADOW COMPOSITION, &c. New edition, with additional Examples 32 Plates, fcap. 8vo. 3s. 1848

RUSKIN'S STONES of VENICE. The folio Plates, in Three Parts, 42s 1 published at 63s.

SHAW'S SPECIMENS of ANCIENT FURNITURE, with Descriptions. By SIR SAMUEL RUSH MEYRICK 74 Plates, 4to. 24s. Published at 42s.

SHAW'S HANDBOOK of MEDIÆVAL ALPHABETS and DEVICES. 57 Plates, printed on coloured tints, imperial 8vo. cloth, 12s. Published at 16s. 1853.

SHAW'S SPECIMENS of the DETAILS of ELIZABETHAN ARCHITECTURE, with Descriptions. By THOMAS MOLER, Esq. 60 Plates 4to 30s. Published at 63s.

SHAW'S ENCYCLOPÆDIA of ORNAMENT 59 Plates. 17s. Published at 30s.

SHAW'S SPECIMENS of ORNAMENTAL METAL WORK. 50 Plates. 4to. 18s. Published at 42s.

SHAW'S GLAZIER'S BOOK, or DRAUGHTSMAN for GLAZIERS &c. consisting of elaborate designs for casements, with lines for the guidance of workmen, and rules for the construction of mullions, tracery, garden walks, &c. &c. 117 Plates 8vo boards. 7s. 6d. Published at 12s. 1848

SHAW'S DECORATIVE ARTS (Ecclesiastical and Civil of the MIDDLE AGES. Consisting of beautiful specimens of the various kinds of enamels, enamel, metal work, wood carvings, &c. &c. 41 Plates. 4to 20s. Published at 42s. 1851.

STORER'S HISTORY and ANTIQUITIES of the CATHEDRAL CHURCHES of GREAT BRITAIN. 60 Plates. 4 vols. royal 8vo. half morocco, large paper, 42s. Published at 10l. 10s.

TAYLOR and CRESY'S ARCHITECTURAL ANTIQUITIES of ROME. 3 vols. folio, bound in one, half-calf neat, plates stained, 2l. 12s.

TELFORD'S (THOS.) LIFE, with folio Atlas of 83 Copper Plates, illustrative of his labours. 2 vols. half Russia 4l. 4s.

WEALE'S QUARTERLY PAPERS on ARCHITECTURE. Complete in 4 vols. quarto, handsomely bound in half Russia, gilt edges, 2l. 5s. Splendid copy.

WEALE'S QUARTERLY PAPERS on ENGINEERING. 6 vols. complete in 12 parts, 2l. 5s.

The Builder.

SATURDAY, JUNE 17, 1854.

WE are about to give a medley of London detriments.

> The meanest English plowman studies law,
> And keeps thereby the magistrates in awe;
> Will boldly tell them what they ought to do,
> And sometimes punish their omissions too.
> *Defoe's True born Englishman.*

Visitors to a place, be that place large or small, see certain things in it sooner and more clearly than the inhabitants. They are equally alive to its beauties and defects. That is to say, if provided they are cosmopolitan travellers of average education and ordinary sympathies; not narrow prejudiced people, who think in a small circle, and reason in a smaller. Provided also that they take time to form a correct impression about men, manners, and places. Not with the fashion of some, who dub the character and customs of some quarters according to what meets their ears and vision when passing through, perhaps in a conveyance, or jumping about for an hour or two, much in the style, it may be, of a commercial gentleman doing his half-dozen customers.

Most of all does it behove us to talk warily of London, and, while attending to the grand old rule, "nothing exaggerate, nor set down aught in malice," be at the same time careful to keep the judgment wide awake in examining its actualities and estimating its capabilities.

But taking the visitor's point of view, there are a number of things more or less glaringly observable, the presence or absence of which, as the case may be, is neither safe, prudent, nor creditable to London in the nineteenth century. We shall put the "why" of a few of them, and leave the "because," which we cannot find out, or do not understand, to the ingenuity and learning of our readers. Life's pleasure is said to be made up of small happinesses; its misery must, therefore, we suppose, often result from a combination of small grievances.

To begin with our houses: and let it at once be understood that our observations do not reflect upon the skill or taste of architects. They, poor fellows, feel acutely enough in the vain effort to effect impossibilities, in compliance with imperious orders and dogmatic tastes. Our sympathies are with them.

1. Why are staircases made so narrow in all new houses?

It may be all very well for some stout people passing up or down one at a time, for then they gain a little leverage, one hand on the rail, and another on the wall. But the matter is very different if you happen to be an unfortunate wight condemned to escort some lady from the drawing to the dining room. Many must have performed, and afterwards wondered how they managed to go through, the curious gymnastic exercise required on such occasions. You have either to go through an elongating, or a compound compressing process, which brings painfully to mind those French toys—the elastic faces; and it is quite impossible for two people of most moderate proportions to attempt the passage in the same parallel. You have a choice of two evils. Which of them is the least I have never yet been able to decide. You may, as you ought, go first (by one step) as a pioneer. Your companion acts as a drag, and as she is always one step higher, you have to adopt the elongating process in an attempt to compromise the balance of power, that is, equality of height. On the other hand, should accident place you last, the *diminuendo* must be resorted to. After all, your most praiseworthy efforts are fruitless and annoying. Be thankful if you escape the *gaucherie* of treading on and damaging your companion's dress. It is evident such miserable passage ways would never have been tolerated in the days of our fair ancestors who wore hoops.

2. Why are our bed-rooms made so small; such very packing-cases for stowing away samples of the *genus homo?*

It is said somewhere that six hours' sleep is enough for a wise man, seven for a child, and eight for a fool. Now most of us are fools enough to enjoy, as often as we can get it, about eight hours' sleep. Some one who can afford to do as he pleases may relish twelve hours, and so be set down as a fool and a half. But take eight hours as the average quantity. Here is one-third of our existence actually spent in those portions of our houses which give us least concern either as to space, ventilation, or other essential requisites for health. We lavish all our thought and the chief expense upon dining-rooms and drawing-rooms, where we remain for a short time once or twice a day, but we are careless of the places where we spend the chief portion of our inactive existence. A wide experience tells us that, excepting only a few old and some modern houses of high class, this holds universally true of modern London. Verily our continental neighbours have good reason to regard us as a nation of eccentrics!

3. Why are all means yet employed for ventilating by the window so deficient?

We have panes that open, panes that draw up and draw down, panes with bars, and panes with slits, and none of them seem to answer the purpose perfectly. There is either a disagreeable draught or an insufficient ventilation. There have been elaborate scientific disquisitions on this subject, and we remember reading some of them with delight which promised to remedy the evil. Can nothing be done to get fresh air without blowing it across and beneath and about you with that disagreeable rheumy feeling which warns that you are deliberately catching a vehement cold? Perhaps a sufficient length of time has not elapsed to enable us to mature our ingenuity on this point; for we must remember that long after such windows were introduced we had not genius enough to find out the method of balancing them by weights, but simply propped them up. See State Papers, vol. iii. p. 336, where we are informed that King William nearly had his head knocked off by one coming down suddenly.

4. Why is the gas so dull and dirty?

London is head-quarters for everything. Then would it not be wise to charge a little more (if necessary) for the article, and purify it better? As it is we are outdone by the provinces in the manufacture of a great essential of life. Gas is cheap, but it is bad; at least, it ought and it might be a great deal better than it is. Housekeepers know how soon their tidy rooms are smeared with it, and all must be conscious how much sooner its heavy effluvium is apparent than in those places where it is consumed in a state of greater purity. Both causes retard its more general introduction throughout private houses.

5. Why is there still so much bad water?

Are the filtering processes not yet sufficiently understood or practised; or are they better attended to at some times than at others. Often when drinking the soapy mixture obtained in our houses and hotels, we sigh for a glass cold and clear, from Aldgate or the Goldsmiths' pump. The want of good water is certainly an excuse for the beer-drinkers. It could not be used both *inwardly* and outwardly, as Horace Walpole recommends, for all complaints. "My great nostrum," says he, "is the use of cold water on all occasions, and that with disregard of precautions for catching cold. I have often had the gout in my face and eyes, and instantly dip my head in a pail of cold water, which always cures it, and does not send it anywhere else."

6. Why is most of the London milk like whey in colour, and like chalk or magnesia in taste?

It always makes one shiver to look at it, so cold, and blue, and glary. It is long since friend *Punch* told that it was partly owing to the "cow with the iron tail,"—which phrase is a facetious hyperbole for the pump. If honesty is the best policy, it might have been reasonably expected that a greater number of sharp people would have ascertained the fact and acted upon it. As it is, we rejoice to find there are some. If matters do not by-and-by improve,—we throw out this hint to some benevolent individual—it would be doing a public good to collect and publish a list of all the pure milkmen.

7. Why are all the most needful streets left unwatered in the dusty weather, or watered so late that they might be left alone?

In our larger squares, &c. where the need is least felt, the operation is performed betimes, and, need it be observed, with the most salutary effect upon the lungs of every peripatetic—man, woman, and child. It is infinitely preferable *not* to breathe clouds of finely-pulverised dust from a Macadamized road.

8. Why is not that terror of every portly coachman, and equal horror of every 'busman—Holborn-hill, filled up?

Would it not be better, instead of going on year after year suffering the inconvenience of such a bugbear, to get rid of it at once and for ever? What is to prevent the level being reduced from Hatton-garden down to the junction of Victoria and Farringdon streets. It need not be an absolute level, but it could be an easy gradient. The sides would require to be large blocks of granite, cut into steps, on the outer extremity, next the pavements. An outer and an inner gutter on each side also, the large ones as ordinary for the carriage-way, and small runlets to carry off the water from the pavement and the steps. Oh, but this would be expensive! No doubt it would. But the expense would be trifling compared with the magnitude of the evils that exist—the anxiety—the waste of time—the tear and wear of horseflesh—the accidents to life and limb which occur there. A benevolent suggestion was made, and partially carried out, during the late winter, to throw gravel on the slope. This and every other mitigation, besides entailing a perpetual expense, can only slightly touch the evil.

9. Why should not public vehicles be allowed to go inside the gate at Hyde-park-corner in winter?

During the late frost it was painful to witness the scenes that took place with cab and omnibus horses in that quarter. It is bad enough in London is infested with spots everywhere which demand the most exquisite charioteering skill; but it is worse to find that where we have the means of diminishing the evil, we do not, or somehow cannot, avail ourselves of them. Surely, it would be a small boon to grant the privilege to public conveyances of passing inside in severe weather to escape the inequalities of the outer road. "A merciful man is merciful to his beast." Besides, it is, we suppose, an established principle of political economy, that every absolute loss of private property rebounds as a national disadvantage. Why, then, should we go on cutting and wounding our beasts of burden in this gratuitous fashion?

10. Why is not the liberty of the subject in smoking tobacco either circumscribed or put under regulation?

A new "counter blast" is required. Really, it is painful to go along the streets inhaling at every alternate step the whiffs from the vile compounds which are consumed in this way. If you are alone and agile you can take a spring or a short race every few minutes to get before or under the lee of some of these walking fur-

naces. This furnishes exercise while it accomplishes your primary end of being out of the way of the fumes belched forth. But if you have a lady companion it would neither be decorous nor convenient to adopt such a plan.

11. Why are the nauseous handbills about quack medicines and quack doctors allowed to be thrust in your face everywhere?

Is it not within the province or power of the Society for the Suppression of Vice to attack and put down the nuisance? It is agreeable to find that our newspapers are being gradually cleansed from this evil. Is it not possible to purge our thoroughfares also?

12. Why are so many quack loan societies suffered to victimise the poorer public?

Lord Palmerston has taken in hand the betting-houses and the graveyards. The session promises to be a short one, would not this be a fitting subject for a fresh crusade? It is a notorious fact that plenty of these companies are formed for the mere purpose of cheating the lieges by exacting money for rules and inquiry fees which never by any chance do a fraction of good to the unwary dupes.

13. Why is it that in the second half of the nineteenth century, under the very shadow of St. Paul's, in the centre of the condensed wealth of the whole world, and in the very heart of that street which disseminates the world's intelligence—that in Paternoster row there should be a stench almost daily emitted which pollutes a whole district?

Of a truth we are a conservative people, and every man's house is his castle. But it does not follow that it ought to be a magazine of noxious fumes. The cholera has reminded us of these things, and it will do so again if the warning is not heeded. It is surprising that even in a commercial point of view the inhabitants do not unite to put down or buy up such a nuisance. The men of the Row may go on quietly with an internal groan over the heavy sickening atmosphere which darkens around them. But the sharp shopkeepers of St. Paul's Churchyard ought to understand the loss entailed upon them when they see people hurrying past with handkerchiefs pressed over the mouth and nostrils, glad to escape from the pestilential quarter without examining wares, however tempting.

14. Where were the wits of our railway projectors when they determined that every terminus should be at the greatest possible distance from the other, and all of them as much out of the way as possible?

Perhaps in this arrangement they consulted the good fortunes of the cab proprietors, but in every other respect (their own dividends inclusive) it is a most unfortunate one. How many business men would gladly reside in the country (that is, within a radius of ten or a dozen miles) provided a general and central station-house were introduced. As it is, they say that as much time is consumed in getting to the proper terminus as ought to carry them home. It will not do to say that there are in London insuperable difficulties to such an arrangement. Take, as an example, what has been achieved in the northern metropolis. In Edinburgh, at a prodigious expense, all the lines have been made to converge to one focus, and that the most valuable ground in the centre of the city. Of course, there are short-distance stations to pick up passengers residing in the outskirts. Northern shrewdness has overcome every obstacle because common sense tells that it will ultimately *pay*.

15. Why is the public so shabbily treated in the arrangements at the new House of Commons?

You go with an order from some Right Honourable friend, and fancy it is all right. When you get to "the House" you discover it is all wrong. Everything reminds you of Tantalus. 658 members give one order a-piece for a gallery which holds from 150 to 200. A smart debate is on or is expected, and the gallery is filled with the first-comers—generally *habitués* who know how to take care of themselves. Well, you resolve to exercise patience, and find out the waiting-room. There, in a dismal little lobby at the foot of a stair you try to read by the aid of a solitary blinking light, placed as far out of reach as possible. Altogether it is very miserable. Involuntarily your thoughts revert to the gloomy approaches of the inquisition; or if your fancy is not so discursive, it recalls at least the dismal witness-rooms of a police-court. The whole aspect of the place, together with the attendants, invites such a comparison. If you are a punctual man, you of course arrived about four o'clock, when you believed the House met. If you are a determined man you hold on patiently and wearily as the hours pass. Five comes, six comes, seven, eight, nine, ten, eleven. You count them all. You have tried to read or spell your book or newspaper by the intoxicated-looking light, but that resource has failed. You have applied the science of Lavater to each of your companions, and imagine you have divined all about them, their dispositions and occupations. One by one many of them have dropped off, and these incidents have been oases in the dreary intervals. Everything has been exhausted. You have thought of the time wasted, and how you could have read in the *Times* all you came to hear, without so much loss of temper and bodily discomposure. In fact, you are sinking into a comatose, semi-imbecile state, when steps are heard descending the stairs. You are first or second in order, and at length the attendant Cerberus tells you, you may be admitted. Admitted for about half an hour before the House adjourns, only to find them going through some routine which form demands shall be dismissed before they are allowed to escape. You leave with a feeling of bitter disappointment, and a mental resolution never to come again to the cloisters of St. Stephen. One succedaneum to your mortification there is, although it is rather of the fox and the grapes order. You pity the poor members, who night after night have to sit during these weary hours, they bored in the house as you were in the lobby.

16. Why are there few or no public reading-rooms?

Institutions and coffee-rooms there are without number; there newspapers may be seen, if you are a member, and choose to go in and eat. But for visitors who desire to read newspapers, reviews, and magazines, there is scarcely a single place in all London of the proper character. Look at the noble news-rooms contained in many of our large towns! How does it come to pass that the metropolis, with its millions of visitors, who are members of no institution, and cannot always be feeding when they wish to read, that for them there is absolutely no accommodation whatever of this sort?

17. Why are the vergers in the cathedrals permitted to make a trade of the stalls?

As it is, any one can go into these by opening the door with a silver key. But it is not decorous to see the greed of these worthies manœuvring their customers, and then retiring (as we have seen them) into a corner to count their gains. The practice of charging for admittance into the Roman Catholic churches has often been abused. But after all, it would be better in our cathedrals if the dean and chapter would make a fixed charge for admission to the stalls, and let the proceeds go to some charity or cathedral fund, not as a perquisite to the officials, which it must now be from their eager mien.

18. Why are the meetings of our scientific societies so difficult of access? Unless by introduction from a fellow there is no admission. Now many people know fellows who are either non-residents, or if residents, there has not been sufficient time to communicate with them after deciding that arrangements will permit of a visit to the meeting. Again, very many respectable people, with a very desirable circle of acquaintanceship, do *not* know a fellow. Ought they to be excluded, as they virtually are? If our scientific societies desire to enlarge their sphere of usefulness by enlisting a greater amount of popular interest in their proceedings (and such we believe to be the aim of most), they surely ought to be able to frame some regulations sufficiently stringent to prevent an indiscriminate influx of loungers, and yet more liberal towards earnest inquirers than the present ordonnances.

19. Is the smoke-consuming question to fall asleep?

All are interested that it should not: to keep the face clean in the city of London requires an ablution nearly every two hours; and clean linen is passably pure only for about the same space of time.

Courteous reader! these are things which, like Captain Cuttle, we have found, and made a note of. Perhaps you have done the same, at least with some items. It is the constitutional privilege of Englishmen to agitate by grumbling. This is a good feature in our character, for if the original howler is a querulous fool, his neighbours will grumble at him instead of his supposed grievance. Understand then that in any reformation desired concerning the above matters, we would have it on the principle which Lovelace sings—

> "A reformation I would have
> As for our griefs a sov'reign salve;
> That is a cleansing of each wheel
> Of state, that yet some rust doth feel.
> But not a reformation so
> As to reform were to o'erthrow
> Like watches by unskilful men
> Disjointed, and set ill again."

THE CRYSTAL PALACE AND ITS HAND-BOOKS.

THE Crystal Palace was opened on the 10th. The presence of the Queen and Prince, a brilliant day, a gay crowd, and very complete arrangements, conjoined to render the result successful in the highest degree. Our contemporaries of the daily press have already told the world of all that then took place;—how that the Queen came—to the moment, as usual,—that the effect of the chorus was superb,—that some who presented their hand-books, not being dancing-masters, were incontinently laughed at (the presence of much royalty notwithstanding),—and how that everything went off well, though it did not raise the value of the shares. The fact is, that the number of season tickets sold, although very large, fairly considered, is not so great as some anticipated it would be, and the directors will have to look to the multitude as their main support. The Brighton Railway Company behaved badly, as they have often done before, charging 3s. on the opening-day, for what they advertise their intention of charging 2s. hereafter, and without the slightest ground for doing so, beyond the apparent possibility of making a little money out of the necessities of the public:—"There is which scattereth, and yet increaseth; and there is which withholdeth more than is meet but it tendeth to poverty." Let those who are joint directors of the two companies look to this.

Our principal object in the present notice is to mention the series of excellent Hand-books which have been published for the Company under the superintendence of Mr. Samuel Phillips, who has himself written the general "Guide to the Palace and Park" and "The Portrait Gallery"—a very admirable production containing short biographical sketches, to accompany the series of busts of remarkable men of ancient and modern times which has been brought together in the building.

The English busts, 109 in number, commence with Inigo Jones and Christopher Wren. The whole collection consists of 500 portraits—a good nucleus. To review the handbook (sixteen are already published) would involve a very considerable portion of the whole circle of human knowledge. They illustrate the truth of Mr. Laing's statement to the Queen that "the educational object of the undertaking embraces a complete historical illustration of the arts of sculpture and architecture, from the earliest works of Egypt and Assyria down to modern times, comprising casts of every celebrated statue in the world, and restorations of some of its most remarkable monuments.

"In science—geology, ethnology, zoology and botany receive appropriate illustration on the principle of which has been to combine scientific accuracy with popular effect; and in its ultimate development the directors are bold enough to look forward to the Crystal Palace of 1854 becoming an illustrated encyclopædia of this great and varied universe, where every art and every science may find a place, and where every visitor may find something to interest and be taught through the medium of the eye to receive impressions, kindling a desire for knowledge, and awakening instincts of the beautiful."

THE CENTRAL CHEESE HALL, CREWE.—Mr. Charles Meason, Architect.

Mr. Geo. Scharf has co-operated with Mr. Owen Jones very efficiently in the accounts of the classical courts (his notice of the Roman Court is less good than that of the Greek Court), and the architect of the Byzantine, Mediæval, Renaissance, and Italian Courts has been aided by Mr. J. B. Waring. Mr. Layard and Mrs. Jameson undertake departments for which they are well qualified, and Professor Owen, Professor Edward Forbes, and Dr. Latham throw the light of their knowledge on the ethnological, zoological, and geological departments. These guide-books have the creditable peculiarity of naming all the various artists who have been engaged on the works, and we cordially recommend them to the careful study of all who would make the best use of the works and collections in the Crystal Palace.

Messrs. Routledge, too, have published a shilling Guide to the Palace, which is exceedingly well done, and contains a large amount of information, so pleasantly conveyed that it will interest and instruct those who do not go to Sydenham as well as those who do. We shall next week resume our observations in the various courts, and may find other opportunities to inquire into the merits of the Guides. We fully agree with the writer of the account of the Alhambra, that "If the Art-collections of the Crystal Palace are received by the public in the right spirit, not simply as material enjoyment for the eye, but as affording subjects for contemplation and study, the Exhibition of 1854 cannot fail to exercise a most important influence upon the arts of this country: it may become the commencement of a new era, in which public taste will be raised from its present low standard, and our age, by slow but sure steps, be prepared to rank with the most brilliant periods of the past."

A Painter's Bill.—The following is a true copy of a painter's bill at Cirencester, Gloucestershire, delivered to the parish warden of an adjoining parish:—Mr. Charles Ferebee (church warden of Siddington) to Joseph Cook, Dr.—

To mending the Commandments—altering the Belief—and making a new Lord's Prayer	£1 1 0

THE CENTRAL CHEESE HALL, CREWE.

A cheese fair has been held for some time past at Crewe, on the London and North-Western Railway, but with much inconvenience because of the want of a hall. By the spirited liberality of Mr. John Hill, of Wistaston manor, this want has been supplied, and the building, as depicted above (with the exception of the tower, not yet finished), was opened publicly a few days ago. The hall is 200 feet long, 76 feet broad, and 25 feet high, and gives accommodation for pitching 2,000 tons of cheese. It is built in the Anglo-Italian style of architecture. The principal front has three entrances, with a pediment over each. The centre entrance is for foot passengers, and the other front entrances for carts. There is a branch from the London and North-Western Railway into the building, which saves the cost of cartage. In the interior are raised platforms, and the roof, in two spans, is supported by a row of twelve iron columns down the centre of the building. The light is admitted from the roof, as well as at the sides and ends.

It stands on a piece of ground at the corner of Prince Albert-street and Earle-street, with an approach by railway for loading into waggons and direct transit of cheese. Two lines run the entire length of the interior, close to the side walls, and the space between forms a wharf or platform for exhibiting and weighing each cheese: room has been left for carts to back up to the waggons on the side lines, so that they may load and unload from one to the other. The fronts are of red bricks with white stone dressings.

The work has been executed by Mr. Hill's clerk of the works, Mr. J. W. Bryning, under the superintendence of Mr. Charles Meason, architect.

There was a dinner after the opening, when a testimonial, in the shape of a silver flagon and drinking cup, was presented to Mr. Hill by the tradesmen of the town, and as the architect's name was accidentally omitted in the list of toasts, the committee very properly wrote the next day to the local papers, to apologise for the oversight.

Crewe, a wonderful growth of the railway system, now contains 2,000 railway workmen.

TREASURES OF ART IN ENGLAND.*

Dr. Waagen's new work on our art-collections is one which ought not to have been left to a foreigner to prepare; but this only enhances our obligation to the author, more especially as it is possible that a native of equal or even of greater note might have met with obstacles a foreign connoisseur was not likely to meet with in examining the private art-collections of this country; so that we must perhaps have remained without such a comprehensive record altogether had it not been for the *con amore* labours of such a one as Dr. Waagen. He repeatedly acknowledges the courtesy and attention with which almost all his requests that access would be allowed to art-collections were met; and although our author apologises for not having sufficiently acknowledged or returned these courtesies, we are far from thinking he has really anything to blame himself for in that respect: on the contrary, what he does say gives an air of toadyism to parts of the book, which is not agreeable. The work is a comprehensive and valuable record: at the same time we are bound to say that we could point out not a few errors here, there, and elsewhere; but on so large a subject, treated of by one not quite familiar with the language, we can make allowance for imperfections, which may be afterwards corrected, and which are not to be weighed against the mass of collected intelligence. The translator, or the M.S. may be to blame.

The present work is based on the published result of the author's visit to England in 1835, when he had not time to undertake all the researches, and which he has now completed during renewed visits, in 1850, under the patronage, or with the countenance and support, of the Prussian Government; and again, in 1851, as a juror at the International Exhibition. The author has succeeded in giving an account of twenty-eight collections in and round London, of nineteen in England generally, and of seven in Scotland, not contained in his former work at all. He has especially, too, turned his attention

---

* "Treasures of Art in Great Britain; being an Account of the chief Collections of Paintings, Drawings, Sculptures, Illuminated MSS. &c. &c." By Dr. Waagen, Director of the Royal Gallery of Pictures, Berlin. In three volumes, octavo. London: Murray. 1854.

to modern English art in its various branches. He gives the following list of the most distinguished collectors in England since 1792 :—

"The Duke of Bridgewater, the Marquis of Stafford, the Earl of Carlisle, the Duke of Buckingham, the Earl of Darnley, the Marquis of Lansdowne, the Duke of Richmond, Lord Berwick, Earl Fitzwilliam, Lord Kinnaird, the Earl of Suffolk, Lord Northwick, Sir Abraham Hume, Sir Francis Basset, Lord Farnborough, Lady Lucas (since Countess de Grey), Messrs. Henry and Thomas Hope, Angerstein, Samuel Rogers, Hibbert, Maitland, Wilkt, William Smith, Penrice, Elwyn, Hart Davis, Lord Radstock, Messrs. Aufrere, George Byng, Watson Taylor, Walsh Porter, Wells, Jeremiah Harman, Champerdowne, Sir Thomas Baring, Mr. Coesvelt, Sir Simon Clarke, Earl Grosvenor (now Marquis of Westminster), Lord Dudley, the Rev. Holwell Carr, Mr. Beckford, the Duke of Wellington, the Marquis of Londonderry, Mr. Miles, Lord Ashburton, Sir Charles Bagot, Sir Robert Peel, and Mr. Munro. I have enumerated these collections," he adds, "nearly in the order in which they rose in importance. Finally, I must mention, as one of the most distinguished, the private collection of King George IV the formation of which coincides, in point of time, with the two last. About one-half of these collections are now partly dispersed, partly transferred to public institutions, and partly diminished in importance by the sale of some of the pictures: of the others which still exist several are, however, continually increasing."

As to the various collections which have arisen, or at all events been increased, since 1835, Dr. Waagen remarks, that with respect to pictures the collection of the Marquis of Hertford takes the first place, consisting as it does of a series of *chef d'œuvres* gathered together at the extraordinary sum of 200,000*l*. Next in order he takes Mr. Holford's gallery of Dutch and Italian pictures by masters of the seventeenth century, and of Italian of the golden age of art. This collection, he remarks, is worthily succeeded by those of the same class belonging to Messrs. Tomlin, Baring, and Munro. A few but good pictures of the Italian schools, he goes on to say, are also in the possession of Mr. John Harford, and of the Earl of Malmesbury. Various collections also exist extending not only to the Italian schools of the fifteenth century but even to the Netherlandish and German schools of the same period,—a taste formerly unknown in England. Of such class are the collections of H.R.H. Prince Albert, of Lord Ward, Mr. Labouchere, Mr. Fuller Maitland, Mr. Alexander Barker, and Lord Elcho. Others unite even the Italian forms of art of the fourteenth century, such, for instance, as the collections of Mr. Davenport Bromley and of the Rev. Mr. Fuller Russell. Finally, some collectors have especially devoted themselves to the old Netherlandish and German schools alone, as Lord Ellenborough and Mr. Green. A number of gentlemen have in their collections adhered, though not exclusively so, to the taste of the preceding period, such as Mr. Wynn Ellis, Mr. Heusch, Mr. Charles Bredell, Lord Overstone, Mr. Ford, Baron Lionel Rothschild, Sir Anthony Rothschild, Mr. Fountaine, Mr. Foster, Mr. Henry Bevan, Mr. Morrison, Mr. Frederick Perkins, Mr. Robarts, and Mr. Wombwell.

At the same time, the taste for pictures of the English school has exceedingly increased. Among the larger and smaller collections of this kind which have been formed since 1835, the author mentions the following :—That presented to the nation by Mr. Vernon, and those of Mr. Sheepshanks, of Mr. Baring, of Lord Lansdowne, of Messrs. Bicknell, Young, and Gibbons.

After particularizing some of the more prominent collections of drawings, miniatures, engravings, and sculpture, made within the same period, the author says,—

"Finally, the feeling for the monuments of art of the middle ages, which commenced with architecture, and was mainly promoted by the works of Mr. John Britton, has gone on extending, in widening circles, till it now comprises every kind of vessel and implement for worldly as well as ecclesiastical purposes,—vases, tapestries, glasses, &c. The amount of interesting objects of this kind collected in England was proved by the Mediæval Exhibition in 1850 in London. Among the collectors in this line may be mentioned Mr. Maguire, the Duke of Buccleugh, Lord de Mauley, Baron Lionel Rothschild, Sir Anthony Rothschild, Mr. Morgan, Mr. Auldjo, Mr. A. J. B. Hope, Mr. Slade, Mr. Bernal, Mr. Hodgkinson, Mr. Curzon, Herr Rohde Kaerkins, Herr Schwabe, Mr. Field, and Mr. Hailstone.

You will now be able to form an idea of the astonishing treasures of art of all descriptions which this island contains."

From the index to the volumes under notice, and which is rather a copious one, though still somewhat defective, we have compiled a list of the number of pictures by various masters noticed by Dr. Waagen in the course of his peregrinations throughout the art collections of England and Scotland. There are many others in the list, but we give only the more prominent, in alphabetic order.

By Albano there are 16; Ludolph Backhuysen, 34; Fra Bartolommeo, 6; Giacomo Bassano, 25; Giovani Bellini, 12; Nicolas Berghem, 57; Jan Both, 33; Sir Aug. Calcott, 24; Canaletto, 48 (24 of them at Woburn Abbey); Van de Capella, 11; Michelangelo, da Caravaggio, 15; Polidoro da Caravaggio, 5; Agostino Carracci, 6; Annibale Carracci, 48; Lodovico Carracci, 24; Claude Lorraine, 96; Collins, R.A. 14; Gonzales Coques, 12; Correggio, 13; Lucas Cranach, 8; T. Creswick, R.A. 4; Albert Cuyp, 91; Dobson, 12; Carlo Dolce, 28; Domenichino, 46; Gerard Dow, 26; Carel Dujardin, 32; Albert Durer, 8; Sir Charles Eastlake, P.R.A. 20 (8 of these in Mr. Fuller Maitland's collection, and 3 in Vernon Gallery); W. Etty, R.A. 17; Jan van Eyck, 9; Francesco Francia, 9; Giacomo Francia, 3; Gainsborough, 32; Garofalo, 15; Giorgione, 32; Giotto, 6; Jan Van Goyen, 12; Greuze, 21; Guercino, 49; Jan van der Heyden, 26; Minderhout, Hobbema, 37; Hogarth, 38 (12 of these in Soane's Museum, and 7 in National Gallery); Holbein, 77 (8 of these at Hampton Court, and 7 at Windsor Castle); Peter de Hooge, 12; Van Jan Huysum, 14; Cornelius Jansen, 11; Angelica Kauffmann, 3; Philip de Koningk, 8; Salomon Koningk, 2; Sir Edwin Landseer, 25 (10 of these in Mr. Sheepshanks' collection); Charles Landseer, 4; Sir Thomas Lawrence, 24; Sir Peter Lely, 28 (besides the series at Hampton Court); C. R. Leslie, R.A. 21; Lucas von Leyden, 9; Fra Filippo Lippi, 11; Filippino Lippi, 6; Nicolas Maas, 18; Mabuse, 10; D. Maclise, R.A. 2 (besides frescoes in Houses of Parliament); Michelangelo, 2 (besides compositions and drawings); Pietro Francesco Mola, 22; Sir Anthony More, 26; William Mulready, R.A. 21 (16 of these in Mr. Sheepshanks' collection); Murillo, 90; A. Naysmyth, 4; P. Nasmyth, 3; Peter Neefs, 12; Artas van der Neer, 21; Eglon van der Neer, 5; Caspar Netscher, 17; G. S. Newton, 6; Ommeganck, 11; Opie, R.A. 2; Adrian Van Ostade, 55; Isaac Van Ostade, 18; Palma Vecchio, 16; Parmigianino, 25; Pietro Perugino, 5; Thos. Phillips, R.A. 4; Sebestian del Piombo, 23; Cornelius Poelemburg, 18; Gaspar Poussin, 78; Nicolas Poussin, 66; Pynaker, 10; Raphael, 26 (besides the cartoons and fragments, drawings, &c.); Richard Redgrave, R.A. 4; Rembrandt, 102; Guido Reni, 58; Sir Joshua Reynolds, 112 enumerated, besides various others indicated; David Roberts, R.A. 9; Giulio Romano, 16; Salvator Rosa, 64; Rubens, 158; Jacob Ruysdael, 77; Solomon Ruysdael, 4; Andrea del Sarto, 28; Sassoferrato, 16; Andrea Schiavone, 23; Bartolommeo Schidone, 18; Snyders, 22; Spagnoletto, 7; Clarkson Stanfield, R.A. 8 (besides examples at Bowood and at Mr. Bicknell's); Jan Steen, 63; Stothard, 23 (besides those at Mr. Rogers's); Teniers, 143 (besides others indefinitely alluded to); Terburg, 20; Titian, 85; Tintoretto, 53; J. W. M. Turner, R.A. 33 (and "several" others); T. Uwins, R.A. 5; Vandyck, 235 (with "several" others); Velasquez, 48; Adrian Van de Velde, 49 (besides various "figures" and drawings); William Van de Velde, 65 (besides "several" others); Joseph Vernet, 12; Paul Veronese, 40; Leonardo da Vinci, 15; E. M. Ward, 2; Watteau, 16; Jan Baptist Weenix, 12; Benjamin West, 10 (besides those at Hampton Court); Sir David Wilkie, 41; Richard Wilson, 66 (35 of these in Mr. Ford's collection); Philip Wouvermans, 82 (besides "figures"); Jan Wynauts, 22; Federigo Zucchero, 10.

The extraordinary number of the works ascribed to some of the older masters can scarcely be explained, we should fear, by *their* peerless industry alone.

Numerous drawings are excluded from this list, which, moreover, may not give a *very* accurate account of the number of pictures by the respective masters actually scattered throughout this country, but at least it must comprise a pretty correct account of those contained in all the private and public collections, or galleries of pictures, throughout England.

We cannot conclude without strongly recommending the work under notice to all who are interested in our country's art-treasures, as a laborious and intelligent account of these, so far as they are not still hidden, by ones, and twos, and threes, in the impenetrable sanctuaries of English domestic life.

STAINED GLASS.

St. Mary's, Huntingdon.—A large east window has just been completed by Mr. W. H. Constable, of Cambridge, for Mr. D. Veasey, of Castle-hill House, Huntingdon, and destined for St. Mary's Church in that town. It consists of five compartments, in which are represented our Saviour and the four apostles. These are surmounted by the crucifixion and resurrection.

Bishop Stortford.—An east window, by Messrs. Powell, with three medallions, containing the Nativity, Crucifixion, and Ascension, has just been placed in St. Michael's Church, Bishop Stortford, by Mr. Joseph Taylor.

Church Lench (Evesham).—The whole of the five windows of the newly restored chancel of Church Lench have been filled with stained glass. The subjects are—our Lord rebuking the Jewish accusers of the woman taken in adultery; St. Mary Magdalene anointing the feet of our Lord with the precious ointment; Simeon and Anna in the Temple; the blessed end of the righteous, illustrated by the death of St. Joseph; the raising of Lazarus; our Lord washing his disciples' feet; and the agony in the garden of Gethsemane. The main east window represents the Crucifixion, the whole surmounted by our Lord in glory.

Ludlow.—With the series of restorations and repairs in the chancel of Ludlow Church, two windows are now being fixed on the north and south side, immediately adjoining the large eastern window which contains the legendary history of St. Lawrence, the patron saint of the church. These windows, now being restored by the Clive family, are in the Perpendicular style, and, with the others on the south side of the chancel, display full-length figures of apostles and saints, the apex of each window containing twelve small figures. The masonry is under the direction of Mr. Stead and Mr. R. B. Smith, of Ludlow; the glass, of Mr. Evans of Shrewsbury. It is intended to replace an other of the church windows, to the memory of the late Hon. R. H. Clive.

Conway.—A stained glass window has just been erected by Holland, of Warwick, in the east side of the north transept of Conway Church, at the cost of the Dowager Lady Erskine, and dedicated to the memory of her late husband and daughters. The three lower lights contain the following subjects :—"Christ blessing little children," "Christ the man of sorrows," "Christ appearing to Mary after the resurrection," under canopies, and on pedestals with the lamb, pelican, and cross, and the emblems of the four evangelists occasionally introduced. The larger compartments of the tracery are filled up with angels praising God and the others with the lily and vine, as emblems of the purity and blood of Christ.

Stonehouse.—The parishioners disapprove of the cathedral glass which has been placed in the windows of the new church, it is about to be removed and replaced with clear plain glass.

Bridlington.—An elliptical arch-headed window, above the lesser entrance, at the west end of the old church of St. Mary, Bridlington, has been restored. The stonework was intrusted to Mr. John Holderness, of Bridlington. The glass is from the works of Mr. Wailes, at Newcastle-upon-Tyne, who a few years ago execu-

HOUSE IN THE VERKE STRAAT, ANTWERP.

The Perpendicular window in this church. The tracery of the present work is of varied design, and the five superior openings contain subjects illustrative of the advent and principal events in the early life of Christ, viz.—The Annunciation, the Salutation, the Coming of the Shepherds, guided by the star in the east, the Presentation, and the Baptism. The whole of this restoration is at the cost of Mr. Yarburgh, of Newerby House.

Ripon.—The cast window of Ripon Cathedral has just been completed. The dimensions are, 25 feet in height and 25 feet in breadth. The stained glass was prepared by Wailes, and a small portion of it, five out of the thirteen figures, appeared at the late London Exhibition. It is intended to represent the commission given by our Lord to his apostles to preach the Gospel to all nations, with the fulfilment thereof as historically depicted in other portions of the glass, being a subject deemed appropriate as commemorative of the creation of the see of Ripon. The total cost is stated to be about 5,250*l.*

HOUSE IN THE VERKE STRAAT, ANTWERP.

SEVERAL specimens of the architecture of Antwerp have already appeared in the *Builder*. The curious and suggestive front which we this week engrave is from the Verke Straat, near the Marché aux Chevaux. It is altogether a quaint and not inharmonious mixture of Gothic and Renaissance. The arrangement of the upper windows is worthy of note. W. W. D.

PROVINCIAL NEWS.

Walcot.—The village of Walcot, in Norfolk, which is situated close to the coast about fifteen miles east of Cromer, possesses a church of some size and interest, principally of the Perpendicular period, but being unfortunately built of a soft freestone, and much exposed to the sea-air, the whole of the windows, mouldings, battlements, &c. have become very decayed, and have, as is usually the case, been repaired with bricks or anything that was most handy, in a very wretched manner. Funds, however, having been lately left for its proper restoration, the work has been commenced under the superintendence of Mr. R. M. Phipson, of Ipswich, architect; Mr. Burgess, of Yarmouth, being the contractor. It is to be regretted that the nave was new roofed a few years since by some local carpenter, who removed the remains of one of the fine Perpendicular roofs for which Norfolk is so celebrated, and substituted a wretched abortion in deal covered with slate, in lieu of the old lead. The chancel, which is in a very dilapidated state, is under the care of the lay impropriator, and will probably be restored as soon as the present works are completed.

Worstead.—The exterior of the well-known church of this village (also in Norfolk) has been for some time past little by little restored, as funds would allow, under the superintendence of the architect just named.——The national schools are also being enlarged, and a master's residence added, from Mr. Phipson's designs; the contracts for it being taken by Messrs. Cooper and Rump, of Worstead.

Louth.—The following tenders for the erection of lodge, chapel, &c. and the excavating and laying out of ground in connection with the new cemetery, were lodged:—Mr. C. Clark, 1,697*l.*; Mr. J. Dales, 1,593*l.* 3s.; Mr. W. Kirk, Lincoln, 1,103*l.* 8s.; and Mr. J. Levitt, whose tender was accepted, 1,082*l.* The estimate of the architects, Messrs. Bellamy and Hardy, was 1,190*l.*

Spalding.—The parishioners of Whaplode St. Mary have recently advanced another step towards completing the restoration of their parish church, by the erection of a new pulpit. The design, furnished by Messrs. Maughan and Fowler, architects, of Louth, is Perpendicular in character, and has been executed in oak, with base of Caen stone. The more enriched portions are by Mr. T. Wallis, of Louth, and the whole looks exceedingly chaste and appropriate.

Melton Mowbray.—A new window is being placed in the southern transept of Melton church. Two or three more are still required.

Skellingthorpe.—The parish church of this place is about to be greatly altered and improved. The present nave, north aisle, chancel, and porch, are to be taken down, and a new nave, with south and north aisles, chancel, and porch, erected. The old tower is about to be raised and repaired, and will have new windows and buttresses. The amount of contract, including old materials, exceeds 1,800*l.* The architects are Messrs. Kendall and Pope, of London; and the builder, Mr. W. Huddlestone, of Lincoln.

Retford.—The Retford Gas Company some time since reduced the price of their gas, and now we observe that the retorts, gasometers, &c. of the company, and their works generally, are inadequate any longer to furnish the required quantity of gas consequent on the greatly increased consumption of it by the shopkeepers, railway stations, and private families in Retford, so that the directors have been obliged to obtain extra land, to enable them to erect new and enlarged gasometers and other necessary works, in order to meet the increased demand. The works will be commenced forthwith. A local paper "hopes this outlay will not necessitate an increase of price!" Why it will shortly justify a further reduction in price; and the company would be only undoing what they have done were they to act so absurdly as to check the increasing demand by raising the price again, at the very moment they are preparing to supply that demand which reduced prices have produced.

Egerton.—The church of Egerton, in Kent, which has been restored by a bequest of the late Earl of Cornwallis and Mr. J. G. Hubbard, was reopened by the Archbishop of Canterbury, on Friday. The works have been executed under Mr. Joseph Clarke, the diocesan architect. The whole of the restoration has been carried out in oak, and the stalls and seats are richly carved. The chancel is parted by a parclose. Polychromy has been used in the chancel, roof, and encaustic tiling in the floor and other parts. The total cost has exceeded 2,000*l.* The tower is well known.

Shipston-on-Stour.—The foundation-stone of the new church here was laid on Monday in week before last. Mr. G. E. Street, of Oxford, architect, furnished the plans. The new church will stand on the site of the former one, the old tower remaining. The design is in the style of the thirteenth century. The structure will consist of nave and side aisles, with arcades and columns, and having five arches on each side. The fittings are to be of deal, stained, and all open, with 300 additional free sittings. The chancel will be paved with Minton's encaustic tiles, and the church with Hayward's Staffordshire tiles. The roof will be covered with Guiting slates, and the walls be constructed of stone from Bourton-hill, with Bath stone dressings. The contract for the building, which amounts to 2,630*l.* has been taken by Mr. Mills, of Stratford-on-Avon, builder.

Leek.—The public baths, commenced here about eleven months ago, are now completed, and were opened on Monday in last week. They are erected near the cattle-market. The building is of the Elizabethan style. It contains on the male side two large swimming-baths, six private baths, and a shower-bath. The building was designed by Messrs. F. and W. Francis, of London. Mr. Mathews, of Leek, was the con-

tractor for greater part of the work. The boiler, tanks, pipes, and general engineer's work were executed by Mr. Thomas Potter, of London. During the short time it has been open the average number of bathers per day has been upwards of two hundred. The second-class swimming bath has in the evenings been at times inconveniently full, and the ladies' baths are daily becoming more frequently used.

Church Lench.—The chancel of the church here has been restored under the superintendance of Mr. F. Preedy, architect.

Abertillery.—On 18th ult. the new church, recently erected, from a design by Mr. Norton, and built by Mr. J. H. Evins, of Abergavenny, contractor, was consecrated by the Bishop of Llandaff. The cost of the church was about 850*l.* Immediately after the consecration of the church and burying-ground, the foundation-stone of the new schools connected with the church was laid by Mr. James Brown, mayor of Newport. The building will be of considerable size, and harmonise with the church, which is in the Early English style, with framed and braced roof, stained and varnished. The schools will contain a mixed school-room, for boys and girls, 55 feet by 18 feet; an infants' school-room, 34 feet by 18 feet; and class-room, 19 feet by 18 feet, together with a teachers' residence. The estimated cost is about 1,200*l.*

Cardiff.—The new Town hall being at length completed, its inauguration took place in the new Assembly-room, in shape of a grand dress ball on Thursday in last week. The project of building a town-hall originated with the late Marquess of Bute, about eight years since; and the designs of Mr. Horace Jones having been selected, the first stone was laid by Mr. Walter Coffin, M.P. then mayor for the borough, on 27th June, 1849; the builder being Mr. W. P. James, and Mr. G. W. Chittenden, clerk of works. This portion of the building was speedily completed; and soon afterwards the present front was commenced, and erected by Messrs. Harris and Davis, of this town; Mr. Chittenden again clerk of works. The Townhall has a frontage of 175 feet. The total cost of the present erection is about 10,500*l.*; and the Nisi Prius Court will probably cost about 3,000*l.* more. There will eventually be an adjoining building for judges' lodgings. The assembly-room is painted in lilac and white; the cornices and ornamental enrichments relieved in white and gold. On the shield of the centre window is emblazoned the plume of feathers, the cognizance of the Prince of Wales. The ornamental ironwork and figures of the orchestra are relieved in gold. The whole of the decorations are by Mr. Robert Nicholl, of Cardiff. The room is lighted by three chandeliers, the centre one having twenty-four gas-burners. The *Cardiff Guardian* of 9th inst. gives a view of the building and a report of the opening ceremonial.

Chirbury.—The committee appointed to carry out the restoration of the tower of the church of Chirbury, in Shropshire, have entrusted the execution of the same to Mr. Dodson, of Shrewsbury, builder.

Sheffield.—The ceremony of laying the first stone of St. Matthew's Church, Carver-street district, took place on Thursday in week before last. The site, with old houses—some of them notorious dens of vice—was purchased for 609*l.* The fabric will be in the Perpendicular style. The interior will be 97 feet long by 49½ feet wide, and divided into nave, chancel, and aisles. There will be a small gallery at the west end, in the tower, affording accommodation for thirty-nine children. The edifice will accommodate 731 persons, viz. 273 appropriated seats, 308 free seats for adults, and 150 seats for children. The building will occupy the entire area of the site, so that the interior will have to be lighted solely from windows in the clerestory and at the west end. At this end there will be an octagon tower,—the first in this town—14½ feet diameter, rising from a square base. The tower will be 56 feet high, and surmounted by a spire of 65 feet, making a total height to top of spire of 121 feet. Messrs. Flockton and Son are the architects, and the contracts have been let as follows: Masons' work, Mr. Powell; carpenters' work, Messrs. Dutton and Heald; plumbers' work, Messrs. Johnstone; slating, Mr Roger Brown; plastering, Mr. Harrison. The edifice, it is expected, will be completed in March, 1855. It will cost about 2,500*l.* making, with the purchase of the site, 3,100*l.* Of this sum about 2,600*l.* have been raised, the whole—except a grant of 250*l.* from the Incorporated Society, and 200*l.* from the Church Commissioners—being voluntary subscriptions, amongst which is one under the name of "a friend," for 1,000*l.* which the *Sheffield Independent* attributes to Mr. H. Wilson, of Sharrow.

Dronfield.—A plan has been decided upon for the restoration of the church of this place at a cost of 1,000*l.* It will also be repewed, and there will be an increase of 160 free sittings for adults and 200 for children. The church will also be warmed. We believe the subscription list now amounts to 800*l.* The restoration and alterations are to be carried out by Messrs. Flockton, of Sheffield, architects.

Kildwick.—A proposal has been set on foot for the restoration of the ancient tomb of Sir Robert de Steeton, in the parish church of Kildwick. The amount required is stated in the *Bradford Observer* at 28*l.* which it is proposed to raise by subscription among the inhabitants, and others interested. Considerable ornamental restorations are now in progress in the church, chiefly by individual liberality, and it is suggested that the present is an opportunity during which others may contribute according to their means to the same good purpose.

Askrigg.—The church of Askrigg, in Upper Wensleydale, Yorkshire, having become dilapidated, a subscription for its restoration has been raised of more than 1,000*l.* and a church-rate of 3s. in the pound unanimously voted by a public vestry.

Doncaster.—The foundation-stone of the north tower pier of the parish church was laid by the mayor on the 5th instant, in presence of the town council, and assisted by Mr. Cleverly, the clerk of the works.

Glasgow.—At the north-east corner of Hutchesontown-bridge a capacious shed and market for the sale of fish is in process of erection. The fishing-boats will be accommodated here. The shed will extend to upwards of 70 feet in length, with proportionate breadth and height; and the middle of the roof will be covered with glass in the same style as the great shed erected lately at the bottom of the harbour. A number of stalls for fish-dealers will be arranged at the north side of the market.

Girvan.—A new street or "place" has been erected at the Cross of this town, and the town buildings opposite, according to the *Ayr Advertiser*, are to be improved in front by being fitted up in "the Crystal Palace style."

Jersey.—The new market at St. Helier's, we are informed, is covered with corrugated zinc from the Vieille Montagne Company, not with galvanized metal, as stated by a correspondent.

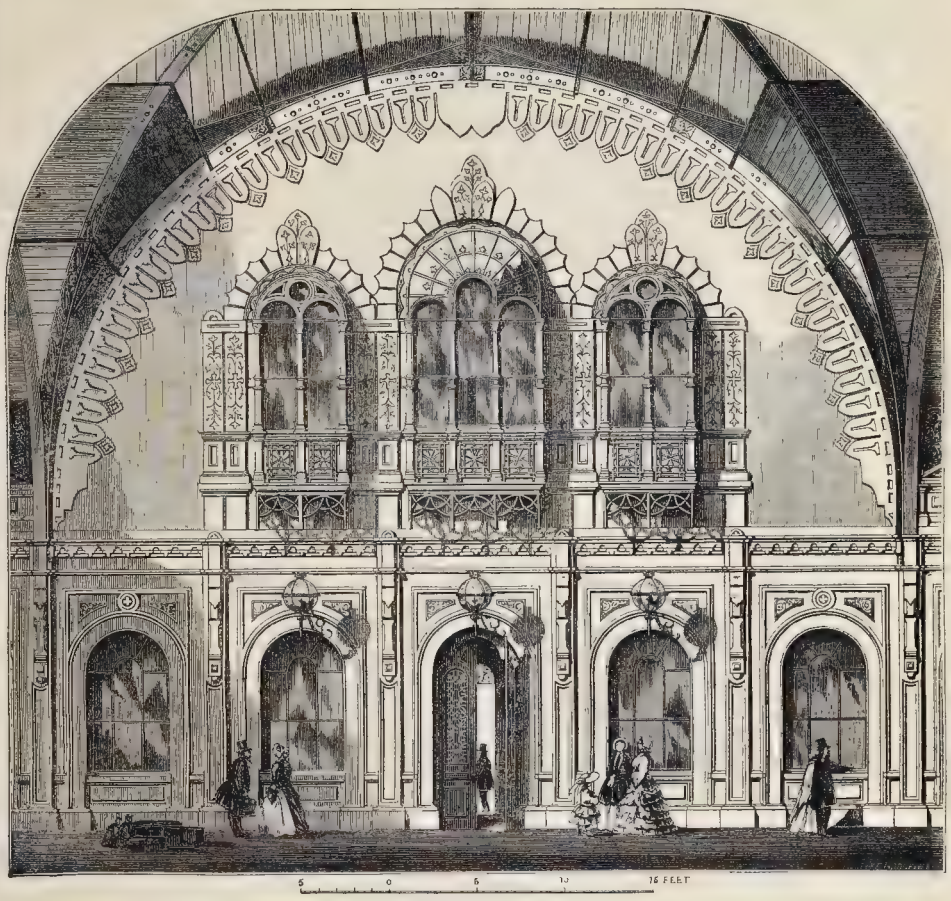
THE HUNDREDTH YEAR OF THE SOCIETY OF ARTS.

THE general meeting to receive the report of the council on the proceedings of the past year, and the auditors' statement of the receipts and expenditure, was held on Wednesday evening; Mr. Harry Chester, chairman of council, in the chair. The report commenced by adverting to the fact that the one hundredth year of the society's existence had now been brought to a close. It then proceeded to give a brief epitome of the papers which have been read, and the discussions which have taken place at the weekly evening meetings during the past session. The subjects dealt with have been numerous and important, and have been mostly made known to our readers. The report went on to state that the union of institutions continued steadily to increase in magnitude and importance. The union now numbers 354 institutions of all denominations, being an increase of 84 in the year. The formation of a trade museum which had been undertaken jointly by the royal commission of 1851, and by the society of arts, had been intrusted to Professor Solly, F. R. S. who had been actively engaged during the past year in obtaining specimens of animal produce and manufactures—that being the department least represented in any existing institution. The organization of the Universal Educational Exhibition, which is to be opened with a conversazione, at St. Martin's Hall, by H.R.H. the President, on the evening of the 4th of July, formed the next head of the report. And in reference to this the council remarked, that they confidently believed it would give an immense stimulus to education, as well by means of the articles exhibited, as by the lectures and practical discussions intended to form part of the plan. There had been an increase of 246 in the number of members during the year, and the auditor's annual statement of receipts and expenditure showed that the monetary prospects of the society were most satisfactory. It is intended to commemorate the Centenary by a dinner, which is to be given in the grounds of the Crystal Palace Company, on Monday, the 3rd of July.

DESTRUCTION OF THE WHEELING SUSPENSION-BRIDGE, UNITED STATES.

ON the 18th of last month the Wheeling Suspension-bridge which spanned the Ohio was swept away by a storm. Nothing remains of it but the dismantled towers looming above the wreck that lies buried beneath them. In the first instance, one of the rods by which the floor was suspended broke, and in a few minutes the whole structure was heaving and dashing about with tremendous force. The cables on the south side were finally thrown off the apex of the eastern tower, retaining their position on the tower on the opposite side of the river. This destroyed the equilibrium of the swinging body; and each vibration giving it increased momentum, the cables, which sustained the whole structure, were unable to resist a force operating on them in so many different directions, and, according to our authority, were literally twisted and wrenched from their fastenings.

THE PADDINGTON STATION OF THE GREAT WESTERN RAILWAY.



IN addition to the view, &c. already published (p. 291, *ante*), we now give a view of the entrance to the offices from the platform.

The office buildings are 580 feet long, varying from 30 to 40 in width. The departments for directing and managing the affairs of the company are carried on in the upper portion of the building, and those in connection with the traffic to and from the station in the lower part.

The decorations to the buildings are in plaster and cast-iron. The space occupied by the platforms and lines of railway under the curved roofing is 700 feet long, and 240 feet 6 inches wide, and contains four platforms and ten lines of railway. The two platforms on the departure side of the station are respectively 27 feet and 24 feet 6 inches wide, and the other two, on the arrival side, are 21 feet and 47 feet. The latter is of stone. The roofing over the above space is divided, as shown in our former view, into three longitudinal openings, with two transepts, each 50 feet wide, at one-third and two-thirds of the length. The lengths of the openings are each 700 feet, and of the respective widths of 70 feet, 102 feet 6 inches (not 90 feet as before stated), and 68 feet.

The roofing contains 189 wrought-iron ribs or arches, of an elliptical form, and arranged in rows of three each, parallel to one another with 12 diagonal ribs at the transepts. The height to the underside of the ribs in the centre opening is 54 feet 7 inches from the line of rails; from the springing it is 33 feet 9 inches. The height in the side divisions is 46 feet. The ribs against the building are supported by sixty-three cast-iron pilasters, or square columns, and those to the other portion of the roofing rest on sixty longitudinal wrought-iron girders, each about 30 feet long, and supported by sixty-nine circular columns. The ribs over central opening are 1 foot 8 inches high, formed of quarter-inch plate with flanges top and bottom, giving a width there of 6 inches. The ribs over the side openings are 1 foot 4 inches high, formed in the same manner.

The central half of each of the curved roofs is glazed, and the other portion is covered with corrugated galvanized iron. The works have been mainly superintended by Mr. Charles Gainsford.

ENTRANCE TO OFFICES, PADDINGTON STATION.

RESTORING WALLS TO THE PERPENDICULAR, THRUST OUT BY LATERAL PRESSURE.

WITH reference to a communication from a correspondent, at p. 257, on "Restoring Walls to Upright," I can, from experience, say that such unwieldy methods as he there describes are not necessary, and that the screwing force is by no means the steadiest for effecting such an object. The work as done with these gigantic appliances might well be termed "an operation of magnitude." Nasmyth's hammer employed to crush a fly might take its station among the same class of "successful" undertakings. Allowing the wall to be 3 feet 6 inches thick from the foundation to its top, which is somewhat unusual, without *recess*, or *door*, or *window* in it—that is, what is called a *blank* and *solid wall*,—its weight would scarcely amount to "1,000 tons:" if there are the usual number of *large windows* and *a door*, it might weigh about 400 tons, if of the thickness specified, not one-fortieth part of which, however, should be calculated for the pull or strain the ten beams have to sustain, that is, about 4 tons each, while a twentieth of even that force would quickly pull the wall down, as those who have moved the Cornish Loggan Stone with one hand would readily credit.

I have professionally rectified church and other walls by much simpler methods; and, not to tire you, I will select one only. At Taunton, in Somersetshire, I undertook to pull back and secure the front of the large house in which Messrs. Stuckey's Taunton branch of banking is carried on, which inclined and bulged outwards very much: with the sole assistance of a bricklayer and a smith, I caused a small hole to be bored on a level with the top floors through the back and front walls, through which were thrust from the back (if I rightly recollect) *four* long 1-inch flat-headed bolts, made by the smith under my direction, to fit the place, having a large washer embedded in the front, on which I had a powerful screw-nut placed, and wrenched up tight. I had four flooring boards taken up for conveniently getting at the bars while in their places, and applied a strong heat to two of them at once, or only one, as I saw was required. It is well known that heat will expand iron, or other metal, and it does so, more in its length than breadth or diameter; indeed, exactly in proportion to their dimensions: this was soon evident by the ends of the two bars showing an evident protrusion, and their screw nuts becoming loose. These were screwed up tight before the lamps were removed, which done, and the whole suffered to cool, the bars naturally recovered their old dimensions. After a careful examination of the wall in its somewhat altered state, I fixed upon that bar or bars, out of the four, against which appeared the greatest projection, and heated that as before described, until I had accurately drawn the wall into its pristine state, *straight* as well as *perpendicular*. Any person will admit that a church wall (ever so thick), could be drawn back in the same way, taking (if possible more) care to stop when it was found exactly as it should stand, because a continuation of the process would draw it inwards. The holes for admitting the bars were neatly stopped, and if its state be as I left it (which I have little doubt of), the two workmen employed could alone easily find the place of insertion. The work occupied but a few hours, was done without scaffoldings, or other appliance except a ladder, and the business of the important bank beneath was not impeded one minute: the iron bars being left in will, doubtless, keep that part of the bank at least from breaking.*

I, perhaps, ought to have said that, on a similar principle, I would, with proportionably sized iron bars, have undertaken to have drawn the thick wall of Howden Church into its former position, with *seven lamps*, or four or five pounds of *large* dipped candles, the rods being supported horizontally under the apex of each arch, I suppose to be made almost invariably in interior church walls. This rectification could not have occupied many hours; and by as many iron wedges as might be required, driven deeply into the outside of the wall at its foot, or wherever it might appear to be necessary, the roof on, and properly trussed and secured thereon, the bars might have been withdrawn without the risk of the wall resuming its for-

* The same mode has been successfully adopted by others.—ED.

mer position. More accurate knowledge of the weight of a foot of the stone used, and the gravity of the mortar, &c. would, of course, have made the calculations above stated much more correct, but I am convinced I am not far off the mark in my rough calculation, nor very wrong in allowing for some large openings in the wall. J. B. B.

MONUMENTAL SCULPTURE.

AT the recent architectural meeting in Leicester, already alluded to, Sir Charles Anderson read a paper on this subject. Sir Charles first reviewed the sculpture of Greece and Rome, to prove that it was nearly allied to architecture, and then went on to show that the practice of burying the dead close to churches was of Saxon origin, on a plot of ground called "God's acre." He then described the shape of the graves in various ages, and the inscriptions on tomb stones, especially at the time when brass figures were introduced, giving a most accurate description of the dresses of the period which no history could so well relate. This description of memorial was not confined to a particular class as they had effigies of kings, warriors, prelates, and women. As this style of tablets became more fashionable, the inscriptions became most improper, and millions of money were lavished in a most absurd way. They seldom found such models of heathenism as in modern times some of them were. Some of the divines were represented with a book on their breast, and warriors with their hands on their swords. To his mind the most fitting way to represent our friends, was to depict them taking their flight to a better state. Some of the statues put up for the dead were considered perfect specimens of anatomical science. Monuments ought to be divided into two classes, the religious and secular. The latter representing the living state, and the former some religious idea. The secular representation was mixed up too much with Paganism, and was allowed to extend itself to our cathedrals and churches; and he pointed to Westminster Abbey as containing a large quantity of these specimens, one of the most prominent being that to the memory of Lady Nightingale. He also called attention to Sir R. Peel's in Westminster Abbey, who looked as if he were about to step in and silence the sermon. In conclusion, he pointed to Kensall-green as showing evidence of a growing disposition to alter our tablets and tombstones, and hoped that better taste would extend itself over the country.

Mr. T. L. Walker remarked that the great cause of failure in our sculptors in treating monumental subjects was the total absence of the true poetry of the Christian's death, and said that until mythological adaptations were done away with, and our sculptors' taste improved, we should have no satisfactory productions in monumental sculpture, as an accompaniment to Christian architecture.

The Rev. G. Gilbert strongly complained of the proposed monument to Dr. Kay, the late Bishop of Lincoln, representing him in the act of dying. Instead of representing him in his last moments, he ought to have been represented at prayer, and he hoped that all would join with him in protesting against it.

SIGHTS AND SCENERY.

The Royal Italian Opera.—Mr. Beverley has painted a charming moonlight scene for the new ballet here, *Un Etoile*, full of truthfulness and beauty. The first scene too, an Eastern porch, is not without merit. In the general getting up of the ballet it is evident Mr. Gye himself does not interfere, or, with his cultivated taste and extensive knowledge of stage appliances and requirements, we should have something more on a par in point of completeness with the *musical* performances. Under this head, Grisi and Mario are alternating with Viardot and Garcia, and achieving a succession of triumphs, supported by Ronconi, Bosio, and Lablache. The retirement of Grisi will be a public misfortune,—it will be long before one is found worthily to supply her place. The music-loving public feel that the opportunity if now lost will not return, and crowd the theatre every night.

Gallery of Illustration.—Messrs. Grieve and Telbin have added views of Sebastopol, with all its fortifications (from the Admiralty drawing by Lieut. O'Reilly); the fortified town of Silistria, and the city of Odessa. When we say that these equal in merit the other pictures with which they are associated we give them high praise.

The Horticultural Gardens.—If it were to be inferred from the comparatively small attendances on recent occasions at the Chiswick *fêtes* that public favour was on the wane, we should offer a strong appeal in favour of the society. There were other circumstances, however, which may have led to the falling off. The society has now been incorporated forty-five years, and has done much for horticulture. The garden at Chiswick is open all the week to fellows and their orders; and from this garden seeds and cuttings of rare species are supplied gratuitously to the members. The council have, moreover, formed a large collection of drawings, and have the most considerable library of horticultural works in the kingdom. We would gladly see a love of flowers and of the garden spread. "A garden," as Bacon says, "is the purest of human pleasures; the greatest refreshment to the spirits of man."

The show of flowers on the last occasion was very fine. With us, a love of flowers is a passion; a walk amongst them an exquisite delight: and though with all flowers a touch of melancholy is associated, since they speak of early death, they ever have to us

> "—— A voice
> Which sings, rejoice! rejoice!"

SMOKE PREVENTION.

THE 1st August is the day on which the statutel 16 & 17 Vict. c. 128, comes into operation.—A "Universal Smoke Consuming Company" has been established in Furnival's Inn, based on Witty's patent, which, it is said, is applicable to all furnaces constructed with a bridge, and consists in constructing the furnace with a perforated bridge, leaving a space between the top of the bridge and the bottom of the boiler; and in other furnaces between the top of the bridge and the top of the furnace. A channel from the ash-pit conducts the air to a chamber behind the bridge, where, having been heated in its passage, it combines with the gases from the fuel as they pass through the perforated bridge, causing complete combustion, and preventing smoke. The patentee estimates that the adoption of the plan will save from 30 to 40 per cent. in fuel; and states that it can be applied to any furnace in a few hours at a moderate cost, and is not likely to be affected by the negligence of firemen.—The principle adopted by Messrs. James Hume and Co. of the Haymarket Flour Mills, Edinburgh, according to the *Darlington Times*, is that of exposing the smoke to an extensive heated surface, and the admission behind of fresh unconsumed air, causing its ignition. It is applied to a double-furnace Cornish boiler of 90-horse power, and the coals used are all Scotch, and consist of one-third dross and two-thirds mixed coal. At the further end of each furnace, the space between the level of the bars and the roof of the flue is divided into eight spaces by seven bricks, each 3 feet 6 inches long, 4 inches thick at the bottom, and 1-inch thick at the top, and reaching to the underside of the boiler, so that they vary in depth or height, with the radius of the boiler flue, from 14 inches in the centre to 6 inches at the sides. From their position at the end of the furnace, these bricks soon attain and preserve a white and intense heat, and separate the smoke, which must pass through them to the flue.

At the end of my letter "On the Prevention of the Smoke from our Household Fires," you add in a note that a scheme of Mr. Davey's, exactly similar to mine, has been published. Now if you refer to that description you will find that while Mr. Davey would draw away the smoke by our common sewers, and thus lose it in the Thames, I would collect the smoke by means of pipes, &c. as described, and thus gain a property to the annual value of 277,000*l*. *Second*, I conceive that it would be impossible to obtain sufficient draught in a common sewer to carry off the smoke, and that much yet would find its way into our atmosphere by means of the street traps, &c. Some of our common sewers present a sectional surface of about 40 *feet*, but the largest sectional surface in any of my pipes would be about 2 *feet*, evidently making an immense difference in the work of the vacuum-creating engines required. It is necessary I should correct a very important error in the calculation of dividend given in my last. I there state it at 6*l*. 6s. 3d. *per cent.* but the correct calculation is 15*l*. 15s. *per cent.*; thus showing the scheme to be one of the best speculations of the day. But as it is said that property in London to the amount of 2,000,000*l*. is annually destroyed by smoke, why should there not be a rate levied upon property, if necessary, in aid of smoke prevention? Let me add that when I wrote my last letter I was quite ignorant of the existence of Mr. Davey's ideas on the subject.

G. W.

THE SANITARY IMPROVEMENT OF CARLISLE.

WE some short time since noticed that, as advised by Mr. Rawlinson,—the engineer employed by the Carlisle corporation to carry out a complete system of drainage for that city,—the corporation were about to appoint (or had appointed, as is now, at least, the case) a special inspector to act as a constant check on the contractors; the resident city inspector, whom the corporation had agreed with Mr. Rawlinson to employ, having been found to have already quite enough to do, as indeed he must have, in a city of 30,000 inhabitants such as Carlisle is. The special inspector recommended by Mr. Rawlinson as one to whom he could confide the interests of the citizens so far as regarded the sufficiency of the workmanship to be done by the contractors, and hence secure the utmost economy in the amount of the ultimate expenditure of the ratepayers, and the thorough drainage of the city, is Mr. McKie, whose salary for the two years will be 500*l*. The corporation grumbled at the amount, but offered to give 200*l*. a year, and as Mr. McKie refused to give up other or more permanent employment elsewhere for less than 250*l*. Mr. Rawlinson, rather than trust the interests of the ratepayers of Carlisle and his own reputation in other hands than those he had full confidence in, offered to pay the additional 50*l*. a year himself. This the corporation agreed to, and so the matter rests — no, not *rests*, any more than the dirty little fellow rests who is about to be well scrubbed against his will. Carlisle is that dirty little fellow: he is sprawling and kicking and brawling about this soft tender touch of true maternal regard, and says it "hurts" him. The sum of 400*l*. to be borrowed on mortgage of the rates and repaid in thirty years, amounts, with interest, to about 30*l*. a year, which the ratepayers of a population of 30,000 have to pay for insuring that their own best interests shall be carefully *seen to* by a constant and vigilant watchman over works to be done by contractors whose *interests* are precisely in the teeth of those of the Carlisle ratepayers, whatever their honour or their honesty may induce them to do. Against this enormous expenditure, of something like the tenth part of a farthing rate we suppose, there is a complete outcry amongst the (in every sense) *small* order of ratepayers, throughout the city, who have the modesty to insist that Mr. Rawlinson, seeing he advised it, shall pay it altogether out of his own pocket! or failing that, shall take up his permanent residence in Carlisle, and act as their watchful and constant inspector, as well as engineer, himself. Do not they see that to have a *constant* and watchful eye over their contractors is the *only* way to insure the sufficient doing of that they themselves as a body have demanded should be done, and so to save, it may be, a hundred times the amount hereafter, in undoing and redoing what was wrongly, carelessly, or scampishly done, besides securing their own health and the health and lives of hundreds of families among the working classes, whose widows and children will otherwise assuredly have to be fed and clothed at *their* cost—the cost of these very ratepayers?

PROCEEDINGS ARCHITECTURAL IN PARLIAMENT.

The Architect of the Houses of Parliament.—On a vote of money for the New Houses being taken, the question of Sir Charles Barry's remuneration was started; and Mr. Hume said he hoped the Treasury would pay Sir C. Barry nothing until his accounts were made out. A committee of the House, with Sir R. Peel in the chair, came to a resolution that the remuneration to be paid to the architect of the new houses should be 25,000*l*. and no more. That resolution was come to before any plan had been selected, and was known to all the competing architects. The Chancellor of the Exchequer said it might be thought at first sight that 40,000*l*. was an extravagant remuneration to the architect, but a little consideration would show that that sum was greatly below what Sir C. Barry was entitled to claim. It was now twenty years since the fire, and the new works had been spread over nearly that number of years.

It must not be supposed that the sum paid to the architect could be regarded as net profits or receipts. Sir C. Barry was subject to very heavy expenses, and he believed that his outgoings in the New Houses of Parliament, for establishment and assistants averaged from 1,200*l.* to 1,500*l.* a-year. If the committee applied that sum to the number of years during which this expenditure had been going on, they would see that it amounted to a very large sum.

Westminster Bridge.—Mr. Kinnaird asked if it were true, as had been reported, that Sir C. Barry had been requested to give in designs for the new bridge, so that it might be constructed in unison with the architecture of the House; and, if so, whether any agreement had been made with Sir C. Barry as to his remuneration? Sir W. Molesworth said, the bridge had been intrusted to the engineer of the Department of Works, and Sir C. Barry had been so kind as to give him his opinion of the design of the work. No agreement had been made with Sir C. Barry, but he had furnished a design, so that, if possible, the architecture of the bridge should be in harmony with the Houses of Parliament.

"*Architectural Assistant,*" *Office of Works.*—On taking vote for 20,124*l.* for office of works, explanation as to a new officer, the architectural assistant, with salary of 700*l.* a-year, was asked for. Sir W. Molesworth replied, that the architectural assistant (Mr. W. C. Smith) had been for some time employed by the Board of Works to carry on the works at the Embassy at Constantinople. On his return to this country he continued in office in connection with the board, and was at this moment employed in their service. Mr. Wilson said none of the public money was wasted by having such an officer to assist them, because if Government did not employ him, they must employ strangers, and that probably at a much increased rate. Sir J. Shelley thought it was quite right that the assistance of an independent officer should be at the disposal of the board to advise them, but thought he ought not to be called the architectural "assistant," but "adviser."

The vote was then agreed to.

ST. MARYLEBONE EXTRAMURAL CEMETERY.

IN reference to the late debate in the vestry upon the report of the Commissioners of the Burial Board being brought up, asking permission to borrow 15,000*l.* to carry out the design for the new cemetery, I observe it stated "that designs had been advertised for, and that the accepted design had been selected in the most *fair and honourable* manner, for *its excellence and nothing else*, so that not one of the competitors could find fault," &c. Now as I happen, perhaps unfortunately for this statement, to be an exception,—and without, at present, observing upon the question of the selection being made for the "excellence" of the design "and nothing else," further than to say it appears to be rather questionable,—I would just touch upon the "fair and honourable" as regards the figures.

In the instructions issued to the competing architects, it was stipulated that the cost of the chapels, including everything, should not exceed, for the

Episcopal chapel,	£1,400
Dissenters' chapel,	700
	£2,100

To which must be added the cost of the keeper's and gravedigger's lodges, the front enclosing wall and gates, which, looking to the small sum stipulated for the chapels, could not reasonably be expected should cost more than (and were estimated in one of the designs submitted at), say..... 3,000

thus making a total of..... £5,100

But what do we find to be the result of the estimates upon which the contracts are to be based, as reported by the Commissioners? Why, these items are stated to be tendered for at 7,486*l.*; thus showing an excess at the outset of 2,386*l.* exclusive of the architect's commission and cost of quantities by Mr. Poland. It is therefore quite clear that if the Commissioners had kept their "instructions" in view in making a "fair and honourable" selection, it would not have fallen upon this design. Moreover, it is a gross act of injustice to the other competitors who may have adhered to the "instructions;" as, in arranging a design so as to meet the requirements at the stipulated cost lies the talent and ingenuity of the architect, which he is led to exercise at great labour and expense, upon the faith of those "instructions" being fairly and honourably acted up to.

With regard to the "excellence" of the design, I might say much which would not be agreeable, but abstain. The total expenditure is now put at 21,000*l.*!

A COMPETITOR.

BUILDERS' TENDERS.

THE statement which I am about to make involves a principle of great importance to the building trade. About a month since, I was invited by an architect to tender for additions to Oakland-house, Cricklewood, for Mr. A. R. Steele; and a few days after, I received a copy of the quantities, with intimation that the Tenders were to be delivered "on Thursday Morning next, at Twelve o'clock precisely; and no Tender will be received after that time." Afterwards I was informed by circular that the Tenders were to be delivered "on Saturday, the 29th inst. at Five o'clock, p.m. instead of on Friday, as appointed." At Five o'clock on Saturday, the clerks of the several builders met with their Tenders; and as no representative of Messrs. Haward and Nixon, who were amongst those invited, appeared, the usual grace, half an hour, having expired, the tenders were opened by the architect in the presence of all parties, and they were found to be as follows:

Chesham	£3,117
Haynes	2,810
Richardson	2,750
Rider	2,730
Sissons...	2,650
Macey.	2,495

On the Monday I called on the surveyor, and not finding him, I on the Tuesday morning called again, and he gave me a set of the drawings, which I now have, and he then told me he had received on the Monday a tender from Messrs. Haward and Nixon, which was lower than mine about 100*l.*, but he intended to take no notice of it as it was delivered nearly two days after time. An appointment was made, and we went into arrangements as to some works desired to be omitted; but shortly afterwards, to my great surprise, I received a note from the employer, stating that as he intended "to omit nearly all the alterations and repairs to the old works, and three or four minor items in the new works, in order to reduce the amount of the contract, the best way of adjusting the unfortunate occurrence of Messrs. Haward and Nixon's Tender being delivered after the appointed time, will be that you and they should each make a fresh Tender;" and further explaining that their Tender had been prepared to send in at the appointed time on Saturday, but that being in the middle of the time during which they pay their men, it had been overlooked till too late. To make a long story short, Messrs. H. and N. are now doing the work: and, as I feel that if such practices are to be allowed, an opening will be made for greater abuses, I respectfully place the case before my fellow builders.

JAMES MACEY.

LIBEL AGAINST AN ARCHITECT.

IN the Bail Court recently, before Mr. Justice Wightman, Mr. Bramwell applied, on behalf of Mr. Hopper, for a rule, calling upon some gentlemen to show cause why a criminal information should not be filed against them for a libel. Mr. Hopper, he said, was an architect of celebrity, and was honorary architect of St. Mary's Hospital, out of which position the matter arose which had given rise to this application. Mr. Hopper had made an offer to be honorary architect, and had stated in writing what his views of the duties of an honorary architect were. Now, Mr. Hopper having made that offer, the committee were very glad to accept his services, and he was appointed honorary architect, and he prepared the plans, specifications, and other things which an architect ought to prepare, and did his duty faithfully. There were some gentlemen who for some reason had an objection to Mr. Hopper from the beginning, and ultimately they caused him to be displaced, and a paid architect was appointed in his stead, and that was done by means of the libel of which Mr. Hopper now complained. Builders were to be appointed, and they were so appointed, and contracted for a gross sum, and were to be paid four-fifths of the estimated value of the work done, upon the certificate of the architect. The charge made was, that Mr. Hopper had certified that work had been done to an extent of upwards of 14,000*l.* whereas the work done did not amount to more than 10,000*l.* Mr. Hopper admitted that if he had made such a report, he would have been guilty of a very gross blunder, or must have had some improper motive Mr. Hopper denied that he had ever made such a report, and he said that this statement was most prejudicial to his character, and, if true, he should be unfit for the situation he held. Before he troubled his lordship with the details of the case, it was right he should state that this took place so far back as 1848; but then Mr. Hopper said, though he knew that the statement had been made, he did not know that it had been entered upon the minutes of the proceedings until two years ago: he could not deny that he had been aware of this latter fact two years The only way in which Mr. Hopper accounted for the delay was that he had been attacked by paralysis.

Mr. Justice Wightman thought the delay was an answer.—Rule refused.

HOUSE AGENCY AND SELLING.

IN the Marylebone County Court, an action was brought by Mr. Booth, a house agent, against a gentleman of the name of Garrett, who, it appeared, is a speculative builder.

The sum sued for was 36*l.* 15s., being commission upon the sale of Kingston House, Regent's-park, which was, as plaintiff alleged, sold for 1,050*l.* through his agency.

The circumstances under which the action arose are important to agents and owners of houses, and were as follow —

The plaintiff was instructed by the defendant to let or sell the house, and procured a party willing to take it. The party was introduced to the defendant, but whilst negotiations were going on, the plaintiff broke them off by introducing a second party. Upon inquiry, however, this second person was found to be a man of straw, and in the end the first person was again applied to by the defendant, and eventually purchased the house.

The plaintiff's solicitor, Mr. Bicknell, contended that his client having introduced the purchaser in the first instance, he was entitled to house agent's commission, the same as if the purchaser of the house bought it at first, and not as he did, when the defendant applied to the party personally.

Mr. Fry, defendant's counsel, said that it was entirely through the plaintiff the purchaser of the house did not take it in the first instance; and having broken off with the party for the purpose of introducing a person moneyless, his client directed Mr. Booth to take no further trouble about the house, and sold it himself. He urged that the first person whom plaintiff introduced had been set aside by plaintiff, and was no longer after this a client of the house agent's, and that the defendant was not liable to pay commission for the first introduction; and with regard to the purchase eventually, it arose from defendant's own application and exertion.

Mr. Garrett deposed to the above facts, and added that his wife had paid plaintiff 8*l.* unknown to witness, for his trouble in the matter.

The Judge (Adolphus) said it was a nice point. It was, however, clear that the party who eventually took the house had been refused by the plaintiff, and that the plaintiff introduced a man of straw in his place. It appeared also that the defendant had after this instructed the plaintiff not to trouble himself any further. Under these circumstances, he thought Mr. Garrett had himself acted as the agent in the disposal of the house, notwithstanding Mr. Booth originally introduced the purchaser of the house. He should give a verdict for defendant with costs.

Verdict for defendant.

Notices of Books.

The Thistle and the Cedar of Lebanon. By HABEEB RISK ALLAH EFFENDI, M.R.C.S. and Associate of King's College. Second Edition. Madden, 8, Leadenhall-street. 1854.

EVERY one now knows of Risk Allah's interesting little volume on his native Palestine. A first edition of 1,000 copies has been already exhausted, and another edition called for. This must be gratifying to one who desires so anxiously as he does to engage the attention and excite the interest of the English nation in the fate and prospects of Syria, to which he strongly recommends the emigration of our industrious and enterprising population, instead of to Australia, forgetting that in the latter country they are still, as it were, under their native laws and among their fellow-countrymen. Doubtless, "a blacksmith, a skilful carpenter, and a good mason, would prove invaluable acquisitions" to the Syrians, but would a home in Syria prove as invaluable an acquisition to these our industrious fellow-countrymen? We

do not mean to imply anything like a decided negative, but the question is one which must be well considered, even although there be now no terrible "three-tailed pacha" to eat them up, as in "days of (not very) old." The emigration of any large number of persons to Syria is decidedly unadvisable. However, Habeeb Risk Allah has our best wishes for the sale of his second edition, and of many more, and for the acquisition of means to do all those patriotic and those charitable deeds to which he aspires, and which say much for his goodness of heart as well as for his soundness of head.

Miscellanea.

IRON CHURCHES FOR AUSTRALIA.—Two iron churches in the building yard of Robertson and Lister, Glasgow, are now about completed. They are similar in size and general appearance, with the exception that one has got two spires, one on each side, and the other one spire, springing from the centre of the pediment. The chief feature of the front elevation is an arcade of ornamental columns and arches, standing out in bold relief, supporting a pediment, and flanked at the sides by massive towers, in which are placed the stairs leading to the galleries. The lower series of columns is roofed by a balcony, forming an open porch, whence access is had to the church and to the stairs of the galleries. The dimensions of each church are 73 feet in length, and 45 feet in breadth. The interior is lighted on each side by a series of circular-headed windows, each 20 feet in length; and at the back by two large stained-glass windows. The vaulted ceiling, supported on cast-iron arched girders springing from iron columns, rises to the height of 40 feet. In the crown of the arched ceiling will be placed iron or zinc perforated gratings, for the ventilation. The external roofing is formed of corrugated iron. These churches were preliminarily opened on Sunday week for Divine service.

THE FIRST LOCOMOTIVE FOR THE GRAND TRUNK RAILWAY OF CANADA.—The first engine made at the Canadian Works, Birkenhead, has been finished and subjected to trial previous to shipment. It is the first locomative ever made at Birkenhead, and was built as number one, each successive engine to be numbered onward, and named after it is completed. The first engine is named the Lady Elgin, the second is to be the Lord Elgin. The Grand Trunk, it may be remembered, is between the narrow and broad guage in width; the Canadian guage being five feet six inches, which will permit the carriages to be more commodious and steady than on the narrow guage. The engine tried has a cylinder fifteen inches in diameter, and twenty inches stroke. It is a coupled engine with driving and trailing wheels. The wheels are six feet in diameter, and the leading wheels three feet six inches in diameter. It is about three and a half months since the Lady Elgin was commenced, but the works are in such a state as to be able now to manufacture one engine in each pit every three months, or at the rate of forty a year in the aggregate. It is expected the railway will require for its own uses this rate of manufacture for the next seven of eight years; or, in other words, 300 locomotive engines. We have already described the works at which this engine was built.

PRICE FOR A PLAN.—It is said that a Swedish officer in Stockholm, who some years ago took a drawing of the fort of Sweaborg, demands for it not less than 4,000*l.* sterling.

THE EDINBURGH SCHOOL OF ART.—The annual distribution of prizes to the students attending the School of Design, at Edinburgh, took place in the Royal Institution on Saturday week, in presence of a numerous and highly respectable assemblage. Professor T. S. Trail presided. On the walls were displayed specimens of the drawings of the students. During the past year the school, according to the report in the *Scotsman*, has been attended by 208 pupils, of whom 152 attended the department of ornamental architecture; 13 being painters, 3 sculptors, and 18 architects and engineers, 75 artizans, and 43 teachers. The department of the antique, &c. has been attended by 56 students; 29 being painters, 2 sculptors, 2 architects and engineers, and 23 artisans. For the new classes for schoolmasters and schoolmistresses, and pupil teachers, upwards of fifty applications have been made.

LANDMARK, PANYER-ALLEY, CITY.—We are glad to be informed by Mr. Haywood, in reply to our correspondent's inquiry, that his district inspector reports to him that "the London Stone still remains untouched in Panyer-alley," and that "it must therefore be within the hoarding, and not visible just now." Such memorials, which make all the difference in the amount of pleasure afforded by an old city above a new, should be carefully preserved.

THE IRON TRADE.—This excitable trade is ever in an intermittent fever. It has just got through the cold stage which succeeded the last hot gambling bout, which ended in ruin to many, and now again the pulse of the market is being forced upwards by artificial stimulants towards the old fever-gallop. A rise of 5s. was talked of quite recently. Now it is alleged that a rise of 20s. has been agreed to by the trade, although, at "a numerous attendance" of iron masters, we were told, a few days previously, the preponderating feeling was not only against any such rise, but against the idea that any advantage, so far as yet appears, would accrue from a future rise, even at the usual quarterly meetings. Into the secret of this new mode of procedure between the quarterly meetings, we let a little light, by anticipation, some time ago. The quarterly meeting masters have been made rather *slow* by dire experience, and the *fast* men seem to have really got up what we feared and anticipated that they were about to try to get up, a sort of *interregnum* or *imperium in imperio*, just to jog the quarterlies on a bit, by preparatory talk, rumour, or assertion, into giving their consent to another and another jump upwards in prices, as each quarterly meeting came round. The time for the next meetings is fast approaching; therefore, something must be done; therefore a rise of 20s. is boldly announced; therefore there is at least a chance of 10s. being, with many misgivings, assented to by the more legitimate authorities themselves, — heretofore no great authorities either, as we long since showed, and as was afterwards fully admitted. Such is the present posture of affairs. Of course there is not a want of *reasons* for a rise; but on these we shall not waste any words at present.

NEW EDITION OF GOUGH'S "SEPULCHRAL MONUMENTS."—It is proposed to publish a new edition of Gough's *Sepulchral Monuments in Great Britain*, incorporating much new matter from the addenda, drawings, &c., bequeathed by Gough, together with his interleaved copy, to the Bodleian Library at Oxford. It is more than half a century since the previous edition appeared, and now it is next to an impossibility to procure a copy even for from 60*l.* to 90*l.* A new impression at a reasonable price is therefore very desirable, and is indeed indispensable to the antiquary and the historian. It is proposed, of this new edition, to print a number of copies (regulated by the application of subscribers) to be comprised in eight volumes, folio, and published in as quick succession as possible, (at the probable rate of two volumes each year). The price of each volume, bound in cloth, will be four guineas. The work is to be edited by Mr. Pettigrew, F.R.S.

THE THREATENED DESTRUCTION OF CITY AND TOWN CHURCHES, PROVINCIAL AS WELL AS METROPOLITAN.—On the 7th instant, a public meeting was held at the London Tavern, at which resolutions against the threatened measure as empowered by Lord Harrowby's proposed bill, professing to "amend the church *building* acts," were passed by large majorities, and a petition to Parliament based on these resolved on. It was pointed out at this meeting, that the bill in question (as, indeed, we were the first to note) had a very misleading title, one of its main purposes being to empower any bishop, without leave asked or given by parishioners, to order the destruction of any church either in town or country, so that it is a measure in which the inhabitants of every town and village in England have a special interest; and we trust that now this has been so distinctly intimated to them, the parishioners of towns particularly, and above all, those of the city of London, will see to the preservation of their churches and of the graves of their forefathers, which also this obnoxious bill empowers any bishop not only to shut up (which might be very advisable), but *to build upon* or to dispose of as building ground. We may here add that a tract has just been published by Bell, of Fleet-street, and others, titled "*Consecration versus Desecration: an Appeal to the Lord Bishop of London against the Bill for the Destruction of City Churches and the Sale of Burial Grounds.*" The title-page is graced with a motto from Isaiah (lxi. 8), "I hate robbery for burnt offering," and the several grounds on which such a bill should be resisted are urged. The *Ecclesiologist* has a good article on the subject

MEDIÆVAL JOKING.—The Rev. G. A. Poole, at the archæological meeting in Leicester, said that in the great window of the north transept of St. Martin's church, in that town, occurred one of those little pieces of satire which the monastic clergy were so fond of levelling at the predicant friars. A fox was represented preaching to geese, from the text, "Testis est mihi Deus quam cupiam vos omnes visceribus *meis*"—a cunning adaptation of the words of St. Paul to the Phillippian converts, with a significant change in the last word:—"God is my witness how I long after you all in *my* bowels," instead of in the bowels of *Christ*.

THE LIVERPOOL ARCHITECTURAL AND ARCHÆOLOGICAL SOCIETY.—The sixth annual report of the council of this society has been printed. It congratulates the members on the continued interest manifested by the public in the society, as evidenced by accession of members. "At one meeting," says the report, "the candidates admitted reached the unprecedented number of thirteen; and the total elected during the session is forty-eight, of whom two belong to the class of professional members, thirty-eight to that of associate members, and eight are student members." The proceedings of the society for the third session are in preparation for the press. The council advise the formation of a practical museum of materials used in the execution of architectural designs. Each specimen contributed or purchased to be accompanied by a brief memorandum of the peculiar qualities of the material, and of the price at which it can be delivered in Liverpool. They recommend that the excursion this year should be made to Wolverhampton, about the latter end of June. The funds of the society are in a promising state.

NEW SYSTEM OF VENTILATION.—A Mr. Billing has patented a plan of ventilation for windows and roofs which seems to be very similar to that often applied to single panes of glass. In windows, pieces of glass are set at an angle slightly inclined from the perpendicular, one piece overlapping another, and divided by an interval through which the air freely passes. For roofs a similar principle is adopted with slates or tiles, the top edge of each tile being turned up with supports for the bottom edge of the next above, leaving open spaces overlapped so as to keep out rain and sleet. With slates these open intervals are arranged with wood, or other material, we presume, intervening.

"THE CENSOR."—A "monthly review of special subjects," edited by a recognised pen, has just been established, to which we would wish to draw attention, without, however, committing ourselves to the views or opinions which may be therein advocated. The first number contains articles on "The Great Strike," and "Modern Trade," written in an attractive style. The interests of the workman, however, seem to be almost exclusively urged, as the sole victims under the present system,—whereas we feel for the employers also as sufferers under a system which we wish, with all our hearts, could be changed, to the advantage of both classes, but especially to that of the workmen, who are indeed by far the most severe sufferers. We feel that "a trader," whose opinions are given approbatively in the article on "Modern Trade," is right, not only as regards his own class, but as regards the employers of workmen, too, and their sympathisers, when he says,—"We are in the unfortunate position that we are bound to support the present system, though many of us feel it to be our destroyer—our slow but sure destroyer. We support it because we do not yet perceive that change is possible: not because we are prosperous, but from the fear of losing what advantage we already have, do we resist innovation." The employer may be a hard taskmaster, but he is an involuntary one in many respects. Nature itself is a stern and severe taskmaster. It makes no allowance for starving workmen, whereas masters in many respects do. Let us fight against the evils of the present system without blaming too severely either its agents or its palliators. "The Censor" will be found to be, what it is refreshing to find in these commonplace times, even where we cannot quite agree with its writers,—original in its mode of treating its subjects, as well as attractive in style,—at least if we may judge from the specimen now before us.

A NEW GLASS SHADE.—Messrs. Rice Harris and Son, of the Islington Glass Works, says the *Birmingham Journal*, "have just patented what they designate a 'sanitary' glass shade, the peculiarity of its construction rendering it an important agent in protecting those employed in apartments where gas is used from the deleterious effects of the smoke and effluvia which most 'burners' allow to be generated. A moveable glass dome, resting on shades of the ordinary form, is the means by which this end is secured. By this simple contrivance, the most complete combustion of everything that escapes from the orifice of the jet takes place. The invention has been thoroughly tested by one of our most eminent gas engineers, Mr. Lowe, of London." We only wish that by "complete combustion" *alone*, of gas or anything else, a really "sanitary" purpose could be served; but we fear the idea here implied is like that of the "self-consuming stoves"—a mistaken one, based on the grossly erroneous notion that "complete combustion," in any instance, "consumes" everything "deleterious." Ventilation is indispensable in both instances, and *more especially* where there is *complete* combustion. It is complete combustion, for instance, which converts sulphur into the virulent sulphuric acid, carbon, or soot, into the noxious carbonic acid.

SANITARY PROSPECTS AT GRIMSBY.—The plans of Mr. Rendell, the engineer to the local board of health, have been lodged with the general board for their approval; but unfortunately Mr. Rendell is at loggerheads with the general board, and it is feared that the result will be anything but rapid sanitary improvement at Grimsby. The *Lincolnshire Chronicle*, in deprecating such a state of things, urges the necessity of changing the engineer, without, however, charging him with any demerit calling for such a line of procedure, although the costly nature of the plans is alluded to as a reason for changing them. The great want of a cemetery is also insisted on.

CASUALTIES OF TUNNELLING.—At the Institution of Civil Engineers, on May 23, a paper was read "On the Casualties of Tunnelling, with Examples," by Mr. W. M. Peniston, which was in reality a relation of the difficulties encountered in the formation of some tunnel headings through chalk and green sand, under a head of water, at Holywell, on the line of the Wilts and Somerset Railway. In sinking the shafts, the water brought away with it such quantities of sand as to create cavities around, and produce serious failures in the timbering, which required to be renewed and replaced several times. Numerous contrivances were essayed for overcoming the difficulties. gullets were cut at lower levels, in hopes of their drawing off the water, but the tenacity of the soil and the numerous faults, precluded any chance of their being useful: nothing but incessant pumping could therefore be relied upon; but the consequence of this was, that the framing of the shaft sunk bodily, until it was retained by a hanging kerb and rods from the surface: then, in spite of close sheathing planks, a lateral settlement occurred, and amidst a recurrence of these accidents the shaft was carried down until the sand and water rose so rapidly in the bottom that it was necessary to close it by a timber platform, through which the water rose to a certain level, whence it was pumped. At length, it being observed that the dip of the sand-rock, which was the water-bearing stratum, was in such a direction as to induce the inference that it might be used to convey the water away, by having it tapped at a lower level, the attempt was made and was attended with success. In consequence of observations on the saturated strata, it was determined to try the effect of a syphon, which was accordingly laid down. It was formed of cast-iron pipes, 6 inches diameter, the short leg dipping into a hole at the bottom of one of the shafts, whilst the long leg extended through the crown heading and terminated in a cistern in the north cutting. By means of a hand-pump at the upper bend the air was exhausted, and the action was so perfect as to draw the blocks of sand and enable the headings to be completed. The meeting was adjourned till November 14th.

GAS IN COOKING.—I am one of those who may be considered in a community non-essentials—viz. a bachelor; yet I seldom obtain any comfort or advantage myself that I do not think in what way it may be rendered serviceable to others. Lately I have hit upon a plan of doing without fire, and the consequent delay and dirt, for cooking. My workshop is on a level with my kitchen: of course I use gas for purposes of trade. A small brass ring of 3 inches diameter with sixteen holes, cost 1s. 9d.: I screw on a horizontal connexion, build a temporary scaffold round to 1 inch and a half or so above the holes, and I get heat sufficient to boil my tea-kettle in nine minutes; and if his honour wants a chop, fritters, *pomme de terre*, frit, &c. a pan takes the place of the kettle, or a saucepan boils potatoes, an Irish stew, &c. &c. as inclination prompts. Put the plan before a company of workmen, at a large building distant from the town shops; how conveniently might this contrivance be applied? Gas is everywhere: a spacious Edgington being hired by the master; an enlarged gas-ring, a capacious kettle—shallow to save time, with one or two taps in it, frying-pan, gridiron, and saucepan to suit. What additional comfort might not these appliances afford to hundreds of men close to their work, instead of rushing in all directions to seek their meals, or sitting down to dry bread and cheese. A willing hand might be made "Cock of the Walk;" and order and despatch preserved to the comfort of all. If you think there is good in the suggestion, pray let it appear in the pages of your *good-will-to-all paper*.—L.

CONDITION OF PORTSMOUTH.—May I be allowed to urge the necessity of improving the town of Portsmouth? Surely such a large town, with, I believe, seventy-two thousand inhabitants, ought to be kept more cleanly. One of the most needed improvements to the town is a good supply of wholesome water. I would suggest that a spacious square should be made around the church. The present state of the churchyard is shocking, the graves literally touching the walls of the adjoining houses. A new post-office is wanted, and a new market-hall.

A DISGUSTED VISITOR.

COMICAL CANDIDATES.—The Durham Board of Health, having advertised for a surveyor, says the *Gateshead Observer*, a rich mine of engineering talent offered itself for their examination and selection. One young gentleman, "at present at home with his father," had apparently worked his way into the affections of some fair lady, for he was "thinking about changing his life," and would be glad to take shelter under the Local Board. Another aspirant, who "for these last four years had been working in an old coal-seam, amongst old falls, driving drifts through them about two feet square," and, moreover, had invented a street-sweeper, thought himself just the man. A third candidate was more brief than the miner. He said:—"Gentilmen It gives me much pleasur to write to you In Behalf Of the town survaars Situation I have been an assistin Inspector Of nucins for the Last nine months In newcastle And can assur you that should I be Elicted to that situation It shall not want anything In my powr to Executo my Duety to the Setisfaction Of my imployers. Under those circumstances I have the honner gentlemen to be yours humbley and Obediently." The *Gateshead Observer*, though giving it an amusing air, as he generally does, to pickings at all susceptible of it under skilful hands, as this appears to have been, only proves, in sober truthfulness, the force of what we have often urged, that salaries so totally inadequate to attract respectable members of the surveying profession are now generally offered, that every blockhead instinctively feels that the office must be, or at least ought to be, one exactly suited to his capacities and acquisitions. We only wish that local Boards of Health could be convinced of this by the sort of applications that are made to them; but they seem to be quite incapable of drawing a just or legitimate inference from the "melancholy *facts*" which they themselves elicit.

THE STRIKE OF THE NOTTINGHAM CARPENTERS.—In a friendly address by the master builders of Nottingham, to their journeymen and the public generally, they state that "a determination still exists on the part a few of the leading journeymen, acquiesced in by a majority of the associated body, to carry a sort of guerilla warfare into the shops of the employers, and, by striking against one or two, or two or three at a time, to inflict personal loss and injury upon each in succession. This policy," they add, "being as mischievous as it is inconsistent, vindictive, and iniquitous, can no longer be quietly borne. Any workman, whether he belong to the society or not, who objects to fix machine-prepared moulding, is individually perfectly at liberty, after due notice, to leave the shop in which he is required to use them, and seek employment in some other, where nothing of the kind may be required of him; but in doing so, he has no right to intimidate or influence others [and these seem to be a large majority], of his fellow-workmen who have no such objection." The masters, therefore, determined to lock out the society men at once throughout the workshops of Nottingham, unless those then on strike returned to their employment on a day appointed. The masters, who were supported by all the architects, were resolved to abide by this decision, but were ready, on the return of the strikers to their work and their senses, to "let bygones be bygones," and so restore such kindly feeling as should ever subsist between employers and their workmen. We have not yet heard the result, but we shall deeply regret to learn that the workmen still resist the force of reason, and even of self interest in this matter. As tersely remarked by the editor of the *Gateshead Observer*, it is indeed ridiculous to think that "carpenters of Nottingham clad in machine-made garments, are rebelling against the use of machine-made mouldings," and so enjoying the advantages of machine labour themselves, while trying to prevent others from enjoying the like advantages.

METROPOLITAN WATER COMPANIES.—From Parliamentary returns it appears that all the companies taking their supply from a low part of the Thames, state that their arrangements for complying with the Act of 1852 will be completed in time, that is, by August, 1855; though two of them are disappointed in their expectation of getting their new works finished this year instead of next. The Kent Waterworks Company state that they are already prepared to give a constant supply. The Grand Junction Company state that they now supply above 300 gallons per house per day; and that with their new works they could deliver nearly four times as much. The Southwark and Vauxhall companies say that they deliver above twenty-six gallons per head per day; and that with their new works they will be enabled to supply more than double that quantity.

A CARPENTER'S EPITAPH.—A carpenter, who had gone through "a great deal" in the way of business, was made the subject, when dead, of the following epitaph:—

> *Posts* oft he made, yet ne'er a place could get;
> And *lived* by *rents*, though he was no wit.
> *Old saws* he had, although no antiquarian;
> And *stiles* corrected, yet was no grammarian.

WET AND DRY GAS-METERS.—We have ever had misgivings as to the strict justice of gas-meters. These misgivings are not likely to be removed by the following account of experiments made by the Leicester Watch Committee, at the town-hall, Leicester, and reported in the local *Advertiser*. "On the first trial," says this report, "the dry meter registered 1,180 feet, and the same gas passing through the water meter was registered only as 330 feet! A second week's result, after both meters had been carefully adjusted by a spirit-level, is said to have been 1,480 feet for the dry and 730 feet for the wet meter. A trial was then made of the meters separately, under an equal pressure of gas, when the dry meter is reported to have registered 73 feet, and the wet 65 feet per hour. A final trial was then made by the gas passing first through the wet meter and then into and through the dry, the result of which was that the wet meter registered 260 feet and the dry 850 feet! Our authority then concludes, that "the wet meter now in use in Leicester does not register unfairly to the consumer, as compared with the dry meter." This remains to be proved, however, by other evidence than the mere self-interest of the gas consumers.

ELECTRO-MAGNETIC ENGRAVING MACHINE.—This machine is somewhat on the principle of the well-known planing-machine. The drawing to be copied and the plate to be engraved are placed side by side, on the moveable table or lid of the machine: a pointer or feeler is so connected, by means of a horizontal bar, with a graver, that when the bar is moved the drawing to be copied passes under the feeler, and the plate to be engraved passes in a corresponding manner under the graver. It is obvious that in this condition of things a continuous line would be cut on the plate, and, a lateral motion being given to the bed, a series of such lines would be cut parallel to and cutting each other, the feeler of course passing in a corresponding manner over the drawing. If, then, a means could be devised for causing the graver to act only when the point of the feeler passed over a portion of the drawing, it is clear we should get a plate engraved, line for line, with the object to be copied. This is accomplished by placing the graver under the control of two electro-magnets, acting alternately, the one to draw the graver from the plate, the other to press it down on it. The coil enveloping one of these magnets is in connection with the feeler, which is made of metal. The drawing is made on a metallic or conducting surface, with a resined ink, or some other non-conducting substance. An electric current is then established, so that when the feeler rests on the metallic surface it passes through the coils of the magnet and causes it to lift the graver from the plate to be engraved. As soon as the feeler reaches the drawing and passes over the non-conducting ink, the current of electricity is broken and the magnet ceases to act, and by a self-acting mechanical arrangement the current is at the same time diverted through the coils of the second magnet, which then acts powerfully and presses the graver down. This operation being repeated until the feeler has passed in parallel lines over the whole of the drawing, a plate is obtained engraved to a uniform depth, with a fac-simile of the drawing. From this a type-metal cast is taken, which, being a reverse in all respects of the engraved plate, is at once fitted for use as a block for surface printing. The machine is the invention of Mr. William Hansen, of Gotha.—*Journal of the Society of Arts*.

AN IRISHMAN'S WINDOW.—A gentleman, a clergyman in the neighbourhood of Bristol, who has property in Ireland, was some time ago written to by his agent there, who stated that there was an old fellow who had been a very long time occupying a cottage, or rather a cabin, on the estate, and whom they thought they ought to try to make more comfortable by *putting in a window* to the house, as the tenement was without that luxury—a door to let in the owner, and a hole in the thatch to let out the smoke, being the sole openings for air or light to the building. The landlord wrote to say "by all means;" and, on visiting the property very recently, called to see the old man, in company with the agent; but on looking round he could discover no window, so he asked what had become of it, and whether it had been put in. "Yes," replied the agent, "it is all safe enough: I have it up in the loft at home. I had it put in with the intention of making the old man happy; but after it was in awhile, he begged to have it out, as he said he had lived so long without a window, he could not feel comfortable with one: he was not used to it, and did not like it, so he hoped I would have it removed and the place stopped up: so I had it done.—*Bristol Times*.

MARLBOROUGH HOUSE.—A collection of arms from the Royal Armoury, Windsor, has been lent by the Queen (for public instruction) to the Museum of Ornamental Art in Marlborough House, Pall Mall, and may be seen daily (except Saturdays).

TELEGRAPHIC PROGRESS.—The cable of the British Telegraph Company has at length been successfully laid across the Irish Channel, from Portpatrick to Belfast Lough. This is the second telegraphic cable at work across the Irish Channel, the former one belonging to the Magnetic Telegraph Company.——The first portion of the Mediterranean telegraph cable, the longest and largest ever yet made, has been completed at Greenwich. It is about 110 miles in length, and weighs somewhere about 800 tons. The moment it is laid London will be in immediate communication with Cagliari through the submarine cable and about four hundred miles of subterranean wire.

BUILDING FOR THE MANCHESTER BOTANICAL SOCIETY.—A building is about to be erected for the general exhibition of plants in bloom, on promenade days, and for the periodical shows of the society. The *Manchester Courier* describes it as very original, springing out of the use of iron or wood and glass for large structures; "for while we traced the ecclesiastical in the general plan, and in some of the details, and the styles of architecture prevalent in Italy or Switzerland at the present day in others, it was not a church, not a palazza, nor a chateau—suitable elements had been drawn from each,—here an arch or a wheel window, there a square campanile, surmounted by its picturesque dwarf spire and flag-staff, and here again the verandah front of the mountaineer's cottage, but all judiciously introduced and blended." Mr. Thos. Worthington is the architect, Messrs. D. Bellhouse and Sons are the contractors.

YORKSHIRE ARCHITECTURAL SOCIETY.—The general Spring Meeting of this society was held on Wednesday before last, at Skipton. The members examined the parish church, and afterwards proceeded to the castle. Papers were read "On some of the Churches in Craven," by the Rev. Wm. Boyd, A.M. rural dean,—"On the Excavations now in progress at Fountain's Abbey; in continuation of a paper read before the Society at Ripon, June 17, 1851," by Mr. J. R. Walbran, F.S.A.,—"On the Priory of SS. Mary and Cuthbert, at Bolton," by Mr. W. H. Dykes, architect." After the meeting the party visited Bolton, and inspected the remains of the priory. On Thursday, an excursion was made to the churches of Broughton, Thornton, Gilkirk, Bracewell, Gisburn, Bolton-by-Bolland, and Marton, and the ruins of Sallay Abbey and Bracewell Hall.

PRICE OF LAND IN BIRMINGHAM.—Some surplus land belonging to the Great Western Railway Company, near the centre of the town, was sold last week by Messrs. Fallows and Smith, and brought, in various lots, prices ranging from 9*l.* to 14*l.* a yard. Three lots were bought in at 10*l.* a yard. The entire proceeds, exclusive of these, realised 10,539*l.*

NEW RULE JOINTS.—Mr. B. Dixon, Summer-lane, has just registered a new invention in rule joints, which appears to have considerable value. It is called the solid back-joint; and its chief advantages are stated to consist in its capability of being made altogether apart from the rule; in its smaller number of parts, and consequent simplicity; and in being constructed of rolled metal (not cast, as by the old process): the improved article can be produced at less cost. We need scarcely point out to those practically acquainted with the subject that the chief defect in rules has been the joints, and that if a fracture took place, it was on their hollow sides. Mr. DIXON has altogether obviated that difficulty; and his invention, we think, will be found to answer every purpose intended. —*Birmingham Journal.*

HOMCHURCH NATIONAL SCHOOL COMPETITION. —We were competitors in this matter, and after the lapse of five weeks we wrote to the vicar under motto. The next post brought us a letter, in which we were informed that our design was one of two selected out of thirty-five others which had been received, and that the remainder had been put aside. We were further instructed to furnish the committee at our earliest convenience with a detailed estimate of our design; so we went to work with all possible despatch on our rough plans, and prepared it accordingly, went down with it personally, and delivered it to the vicar. After this we thought we could take the liberty of asking to see our rival competitor's drawings, when we were informed (inadvertently) that the committee had suggested some alterations in his plans, and that they had been returned to his office for that purpose! But our labours did not end there: two days before the final settlement of the matter we received another letter from the vicar, with instructions to forward for the next meeting a stringent working specification, which we did punctually, with great inconvenience to ourselves. But we wish you to observe, the *very next post* brought a letter which informed us that our design was rejected, and that the other was received. Even now the competitors are quite in the dark as to who is the successful candidate after all.—W. & K.

CAST-IRON FLOWER STAGE.—A newly-designed flower-stage, on a large scale, has been executed at the iron-foundry of Messrs Hollingdrake and Hickman, Great Underbank, for Mr. A. C. Howard, of Brereton. It stands 13 feet high, measures 22 feet across, and 19 feet 6 inches from front to back; in shape, exhibiting five sides of an octagon, being made to run up to a flat wall. The tiers for the plants are nine in number, averaging 18 inches wide, and contain about 500 square feet. The whole weighs between five and six tons. A glass-house is being fitted up at Brereton for its reception.

LARGE SHOP-FRONT IN NEWCASTLE.—A shop-front of large size has been put up for Messrs. Arnott, Cannock, and Co. The front is 89 feet long and 32 feet high: the average extent on the ground plan is 89 feet by 80 feet; the entrance to the general shop is 16 feet by 12 feet 6 inches, and to the woollen department, 6 feet by 12 feet 6 inches: the doors are hung folding, and are open during business hours: the glass in the lower range is 12½ feet high and from 5½ to 6 feet wide in single plates, and the plates above 11 feet high by the same width. Mr. Wardle was the architect. The upper part of the building having been left in its original condition, the new portion does not seem to have any connection with it.

TO TRANSFER THE FORMS OF LEAVES.—The best process E. G. L. can adopt is as follows:—Procure a wash-leather dabber, a little printing ink, and a flat piece of wood, 6 in. by 3 in., on the face of which a piece of leather is glued. Put a little of the ink on the flat leather surface, and, with the dabber, spread it evenly: then, with the dabber, go lightly over the leaf from which the impression is to be made. Place the leaf the inked side downward on a piece of drawing paper, cover it with another piece of paper, and apply a gentle pressure to the back. On the removal of the leaf, an exact copy is found beneath, having all veins, &c. distinctly shown. These impressions can be afterwards coloured.—E. A. C.

SMOKE NUISANCE.—A great impression would be made in the public mind in this matter if the leading builders in any of the new districts (Westminster Improvement Commissioners, or Mr. Cubitt, or Mr. Ponsford, &c.) would adopt the principle you set forth in your paper of the 13th ult. (the Arnott-Cutler Stove); a great advantage would accrue to them by offering to their tenantry a "smokeless district." Individual adoption would speedily follow. Added to the advantage of lessening washing, would be the abolition of the chimney-tops so universal in "beautiful Belgrave-square."—X.

MARKET HALL COMPETITION, RHYL.—The commissioners under the Improvement Act having invited competition for the design of this building, have selected the plans submitted by Mr. Thomas M. Penson, of Chester, as best suited and adapted for their requirements; and have awarded the premium accordingly. We are informed that the principal front to the Wellington-road is in the Italian style of architecture, and is proposed to be executed in brick-work, with freestone dressings. The ground plan consists of a covered market, a lock-up house, with three cells, and two rooms for the constable, office for market clerk, commissioners' office, store-room, and engine shed. Above a portion of this range is a large public room, with a retiring-room adjoining.

STEREOSCOPIC PORTRAITS.—We have lately seen some excellent specimens of one of the most remarkable productions of our day—stereoscopic portraits, made by Mr. Elliott, of 48, Piccadilly; and coloured by Mrs. Elliott. By means of a long focus he is able to take stereoscopic and daguerreotype portraits without the distortion of objects not in the same plane, which is sometimes observable. If our notice should lead any of our readers to visit his rooms and judge for themselves, we shall be glad.

THE STATUE OF PROFESSOR WILSON is to be an out-door statue, and in bronze. The committee are busy, and a London committee is talked of. No sculptor has yet been named.

WORTH AT THE FORGE.—The following inscription is from a tablet recently put up in Letheringsett churchyard, to the memory of Johnson Jex, village blacksmith, whose career has been very remarkable:—

Born in obscurity,
He passed his days at Letheringsett as
a Village Blacksmith.
By the force of an original and inventive genius,
Combined with indomitable perseverance,
He mastered some of the greatest difficulties of Science:
Advancing from the forge to the crucible,
And from the horse-shoe to the chronometer;
Acquiring by mental labour
And philosophic research,
A vast and varied amount of
Mechanical skill
And general knowledge.
He was a man of scrupulous integrity and moral worth:
But, regardless of wealth
And insensible to the voice of fame,
He lived and died a scientific anchorite.

There is a spirit in man, and the inspiration of the Almighty giveth him understanding.

CHARCOAL VENTILATORS, OR FOUL AIR PURIFIERS.—Mr. Stenhouse, who suggested the (not very practicable) adoption of charcoal respirators, writes to the *Society of Arts Journal*, recommending a much more practicable mode of using charcoal, as a ventilator, or rather as a purifier of foul air, as in the close wards in hospitals, in the close apartments in dwellings and ships, or wherever foul air is apt to accumulate. This he proposes to do simply by enclosing charcoal in a suitable framework made with wire gauze, so as to hold the charcoal while freely admitting the air.

SUBTERRANEAN DISCOVERIES IN NOTTINGHAM.—In taking down some buildings in Stoney-street, in this town, about 10 feet below the surface, the workmen found a cave, about 25 feet long by 18 feet wide. It has a groined roof, and is supported in the centre by a pillar cut out of the natural sand rock. This pillar has four shafts, one of them being entirely detached, after the style of architecture which prevailed in the thirteenth century. Over it is an incised cross. It is conjectured that this was one of the places used by the Roman Catholics for worshiping in secret at the Reformation. Similar discoveries were lately made in Stanford-street. The prevailing stratum near Nottingham is new red sandstone, and some portions of it are so soft as to be capable of being easily excavated. The original name was Snotengham, that is, the home or place of caverns.

THE DIGNITY OF LABOUR.—The Rev. Newman Hall, of Hull, lately delivered a lecture on this subject, which contains the following passage:—"Angels are all ministering spirits, and in heaven they rest not day or night. The Supreme Creator himself unceasingly labours in sustaining the governing of the universe. Eloquent voices from every part of the universe, and from the throne of God himself, vindicate the dignity of labour. Messiah, when on earth, went about doing good; and the Creator of all never slumbereth nor sleepeth. Labour is life, glory, and worship. To regard the worker with the hand, however, as the only legitimate labourer, was a mistake. The labour of the brain is equally genuine, and absolutely necessary to the success of manual toil. The magistrate, physician, lawyer, philanthropist, the educator, philosopher, the historian, the man of science, the painter and the sculptor, the poet and the orator, the moral reformer and the minister of religion, are, when genuine, truly members of the working classes, and disastrous to humanity would that day be when their claim to that title should be disallowed. There should be no drones in the human hive; but those who, not needing to toil for themselves, toil for the good of others, are doubly honourable, as their toil is voluntary. Shall that be disesteemed, then, upon which the whole fabric of society rests? Consider the achievements of labour. It fells the forest, drives the plough, drains the morass, reaps the harvest, and makes bread; it provides 900 millions of the family of man with sustenance, and distributes it among them. Who, looking at the vast results of toil, would deny that there was dignity in labour? Judge of labour by its effects on the labourer. Does it blunt the feelings and harden the heart? No, religion and piety find ever their healthiest developments among the labouring poor. The virtues of the poor are such as the rich cannot equal. Their patience is very great; their independence is greater than that of wealthier persons. The early disciples of Christ, of Luther, of reform in all branches, have been the poor. The poor do not ask, as the rich do, before helping the right cause, 'Pray can you tell me, is it respectable?' If such be the wholesome moral influences of toil, who can say there is not dignity in labour? Consider the great men who have risen out of the ranks of toil. How few of the very wealthy have been great enlighteners and benefactors of their race! Labour has been the soil in which greatness has almost invariably rooted itself."

TENDERS

For building houses for Mr. Walters, of Stepney. Quantities supplied by Mr. T. E. Knightly:—

Henner	£2,636	0	0
Webb	2,563	0	0
Chapman	2,362	0	0
Robins	1,921	0	0
Beaton	1,697	0	0
Holme	1,575	0	0

For a public building in the town of Bradford, Wilts, comprising a town-hall, a commodious market-house, police station, reading-rooms, and other offices for public uses. Architects; Messrs. Wilson and Fuller, of London and Bath:—

WANTED, an active YOUNG MAN on a Continental Railway, as TIMEKEEPER, and to take charge of works in the absence of the employer. Salary 24*s.* per week. One having a knowledge of French will be preferred.—Apply personally, or by letter prepaid, to Mr. FOOLE, 3, Fore-street, City. None need apply who cannot be well recommended for steady conduct, and having a knowledge of carrying out railway works.

WANTED, on a Railway on the Continent, TWO or THREE Permanent PLATE LAYERS, and TWO or THREE STRONG YOUNG MEN, used to make Railway Waggons and Barrows. Wages 24*s.* per week.—Apply personally, or by letter prepaid, to Mr. FOOLE, 3, Fore-street, City, London. None need apply who cannot be well recommended for steady conduct and being workmen.

WANTED, an IN-DOOR APPRENTICE to a BUILDER. A premium will be required.—Apply at 115, Aldersgate-street, City, between the hours of Five and Six.

WANTED, a respectable YOUTH as an APPRENTICE to SIGN and GLASS WRITING and SIGN PAINTING, to be free of the City.—Apply to G. HAROLD, 7, Fountain-place, City-road

TO MASONS.

WANTED, immediately, an experienced FOREMAN, to superintend about twenty five men. He must be thoroughly conversant with architectural drawings.—Application to be made to Messrs. FERGUSON and SON, Builders, Nottingham

TO BUILDERS.

WANTED, by the Advertiser, aged 35, a carpenter and joiner by trade, a RE ENGAGEMENT as GENERAL FOREMAN, or as SHOP FOREMAN. Understands the measurement of work, construction of roads and sewers, &c. No objection to the country. Satisfactory testimonials as to ability, &c. can be given.—Address, A. Z. No. 8, Paulton terrace, Church-street, Chelsea.

WANTED, by a thoroughly practical Carpenter, aged 40, a SITUATION as SHOP or GENERAL FOREMAN of WORKS; has had upwards of twenty years' practice in London. Country preferred.—Address, G. L. Post-office, High-street, Notting-hill.

TO BUILDERS, RAILWAY DECORATORS, &c.

WANTED, by a Young Man, a SITUATION as WRITER, and its various branches. No objection to town or country.—Direct to H. C. 13, Bartholomew-square, St. Luke's, Middleex.

WANTED, by an experienced practical Man, aged 40, a SITUATION as FOREMAN, or Working Foreman, of BRICKLAYERS; he is thoroughly competent in the building, jobbing, or fire work. Can have nine years' good reference. No objection to the country.—Address, prepaid, stating particulars, to Y. Z. Mr. Pithen's, Tobacconist, No. 2, Harrow-road, Paddington.

TO CAPITALISTS WISHING TO EMBARK IN THE STONEWARE AND DRAIN-PIPE MANUFACTURING.

WANTED, a SITUATION as MANAGING FOREMAN, by one that well understands the business, and likewise the white enamel glaze for closet pans; suitable also to hand, tongue, and bread pans; also well acquainted with the latest improvements in the drain-pipe making.—Address, J. A. HEATH, 40, Tyer-street, Lambeth, London.

WANTED, by a respectable Young Man, a SITUATION as Plumber, Painter, and Glazier, &c. A respectable reference can be given if required.—Address, J. C. M. 1, 7, Craven place, Kensington.

TO CARPENTERS, BUILDERS, &c.

WANTED, by a respectable Youth, aged 19, a SITUATION as IMPROVER in a CARPENTER'S SHOP.—Address, W. J. WILSON, 8, Exeter-street, Brompton.

TO BRICK AND TILE MAKERS.

WANTED, a SITUATION, to MAKE, SET, and BURN any quantity of RED BRICKS, PIPES, or TILES, &c. by contract, or superintend, by a person who has been brought up in the business. References will be given.—Address to G. G. Surbiton-hill, Kingston, Surrey.

TO BUILDERS.

WANTED, by the Advertiser, a RE-ENGAGEMENT as SHOP or GENERAL FOREMAN. No objection to the country. Satisfactory testimonials as to ability, &c. can be given.—Address, C. W. L. Office of "The Builder."

TO CARPENTERS AND JOINERS

WANTED, by a Lad, 15 years of age, a SITUATION as an IN-DOOR APPRENTICE in the above line.—Apply to PHILIP LUCK, Victoria Villa, Eastbourne Sussex

TO BUILDERS AND CONTRACTORS.

WANTED, a SITUATION as FOREMAN of BRICKLAYERS, or as General Foreman, having fulfilled the above situation for the last twelve years in extensive firms in town.—Direct, G. H. 40, Anne-street, Waterloo-road.
P.S.—No objection to the country.

TO CARPENTERS, JOINERS, AND BUILDERS.

WANTED to APPRENTICE a respectable well-educated YOUTH, as above, aged 16, as OUT-DOOR apprentice.—Apply, Mr. J. BROOM, No. 1, Rochester-row, Westminster

TO BUILDERS, ARCHITECTS, AND OTHERS.

WANTED to fill a few leisure hours. Competition, working, and other drawings made with accuracy by a young Practitioner, upon very moderate terms.—Address ZETA, Phillips's Library, Store street, Bedford-square.

WANTED, by a Person of steady and sober habits, a SITUATION as ENGINEER in a FLOUR or SAWING MILLS, &c.; is perfectly conversant with all kinds of machinery. A character can be given from his last situation as working foreman for the last twelve years.—Address, A. B. 10, Roupell street, Cornwall-road, Lambeth.
N.B. Has no objection to go abroad.

THE Advertiser, a neat and expeditious Draughtsman, competent to make working, finished, and perspective drawings, is open to an ENGAGEMENT. Salary moderate.—Address, O. Office of "The Builder"

TO RAILWAY COMPANIES, CONTRACTORS, &c.

THE Advertiser, an ENGINEER, is open to an ENGAGEMENT. He is well versed in mechanics, has a thorough knowledge of the building trades, and is a fair draughtsman; is used to the direction of a body of men; testimonials from gentlemen of eminence in the scientific world; no objection to go abroad.—Address, C. C. Porter's-lodge, Barnard's-inn, Holborn.

TO ARCHITECTS AND BUILDERS

THE Advertiser wishes an ENGAGEMENT in an Office as above, where he would have an opportunity of seeing the construction, measuring, taking out quantities, and valuation of building-work. Can draw tolerably. No salary expected at first.—Address, B. 4, Sebbon-street, near Cross-street, Islington.

TO BUILDERS

THE Advertiser, a middle-aged Man, of steady and sober habits, and a fair workman as carpenter and joiner, wishes to ENGAGE HIMSELF as HOUSE CARPENTER, or to a BUILDER, where he could get constant employment. Unexceptionable testimonials can be given.—Address, V. W. 16, Southwark-square, Borough, London.

TO ENGINEERS, RAILWAY COMPANIES, AND CONTRACTORS.

THE Advertiser, having had nineteen years' experience, practically and theoretically, in all branches of engineering construction, and the superintendence of erection, is now leaving a firm where he has the management of the civil engineering department in Paris, is open to an APPOINTMENT for England or the Continent. High references given. Apply by letter, to B. R. Office of "The Builder."

TO NOBLEMEN, GENTLEMEN, and PUBLIC COMPANIES, who are about to build, make alterations, or repair property

THE Advertiser offers his SERVICES to prepare plans, sections, elevations, and explanatory drawings, specifications, estimates, measure up work, &c.; and generally superintend the buildings to their completion, at a reasonable per centage or fixed salary. Has had a great deal of experience, practically and theoretically, in every description of building, including the most improved arrangements of farm-buildings workmen's dwellings, drainage, &c.; has a thorough knowledge of the properties and value of material, and labour, the direction and management of workmen. &c. No objection to go to Scotland, Wales, or Ireland. Testimonials will be furnished.—Address, A. Z. Mr. Eldershaw, Newspaper Agent, Brown-street, Manchester

AN active and experienced Clerk of Works, aged 26, having seven years' reference from his late employers, is in want of an ENGAGEMENT; fully competent to manage extensive works. Address, ALPHA, Byron-villa, Battersea, Surrey.

TO BUILDERS AND OTHERS.

A PERSON of experience wishes to take a share of the MANAGEMENT of a BUILDER'S BUSINESS, with a view to a succession or partnership.—Address, T. J. care of T. A. Woodbridge, Esq. Solicitor, 8, Clifford's-inn, London.

TO CARPENTERS AND JOINERS.

A RESPECTABLE YOUTH wishes to ARTICLE himself for three or four years to the above trade. A small premium will be given.—Address L. G. care of Mr. J. Lyon, 39, Princes-street, Cherry's-gate, Westminster.

TO GENTLEMEN, ARCHITECTS, AND BUILDERS.

AN experienced CARPENTER and JOINER (with two sons), who also possesses a general knowledge of the building department, is desirous of taking piece work, and superintend works if required.—Apply to A. B. care of Mr. Baldwin, 30, Bernes-street, New North-road.

TO ARCHITECTS.

A YOUNG GENTLEMAN, a good Draughtsman, and capable of getting out working drawings, &c. wishes for an ENGAGEMENT for further improvement. A small salary only required.—Address, A. S. 39, Ely-place, Holborn.

A YOUNG MAN, aged 21, is in want of a SITUATION as IMPROVER in a good joiner's shop, for a term of two years.—N.B. Could assist in the office if required, as he perfectly understands bookkeeping, timber measuring, &c. No objection to the country.—Address, A. Office of "The Builder."

TO ENGINEERS, ARCHITECTS, &c.

A YOUNG MAN accustomed to Mechanical and Architectural Drawing, who has just completed an engagement in an engineer's office, wishes to meet with an immediate RE-ENGAGEMENT. Apply, if by letter post paid, to A. B 10, Great Queen-street, Westminster.

TO SMITHS, IRONMONGERS, &c.

A YOUNG MAN having considerable Experience in the various branches of the white-smithing business and gas fitting, wishes to ARTICLE himself for improvement in the same.—Address, G. H. 70, Queen's road, Notting-hill.

TO ARCHITECTS, SURVEYORS, AND CIVIL ENGINEERS.

A YOUNG MAN, of good connections and education, and of unexceptionable references, who has been articled to a builder upwards of three years, is desirous of an ENGAGEMENT with an Architect, surveyor, or Civil Engineer, whom he could assist in the carrying out of his designs. He is a fair draughtsman, can assist in taking and measuring dimensions, and taking out quantities, &c.—Address, Z.—Tomkin's, Esq. 3, Bartholomew-lane, London.

TO BUILDERS.

A YOUNG MAN, practically acquainted with the carpentering trade, accustomed to measure off works, take out quantities, and the duties of the office generally, wishes for a RE-ENGAGEMENT.—Address, L. B. Office of "The Builder."

AN ARCHITECT and SURVEYOR of long-established practice and connection, from failing health, is desirous of meeting with a gentleman who might be disposed to TREAT for succeed to his BUSINESS, either by par nership for a short time, with this ultimate view, or otherwise. None but principals need apply. A moderate capital only required.—Address, post-paid, to A. Z. care of Mr. Hearne, Bookseller, 81, Strand.

TO HOUSE DECORATORS, PAINTERS, &c.

AN old-established TRADESMAN, commanding a first-rate connection, wishes to meet with a practical and active man to join him in PARTNERSHIP. It is necessary for the parties applying to be possessed of a capital of at least 500*l.* and to be able to exchange references of undoubted character.—Address, by letter only, to ALPHA, care of W. Wood, Esq. 126, Chancery-lane.

ARCHITECTURAL PARTNERSHIP.—A fully qualified Architect, whose connections are of the highest standing, will give a premium, not exceeding 1,000*l.* for the half or whole of an old-established practice.—Apply, per letter, to A. B. 46, Drummond-street, Euston-square.

PARTNERSHIP.—Wanted, a PARTNER in an OLD-ESTABLISHED BUILDER'S BUSINESS. An industrious, active man, who can command a small capital, will find this an advantageous opportunity.—Apply to E. T. 4, Rodney-buildings, New Kent-road.

PARTNER, with £700 to £800, in the Engineers' Tool and Iron Foundry Business, either active or otherwise. None need apply that are not willing to exchange first-class reference.—Apply by letter, A. B. 245, High-street, Borough.

TO CONTRACTORS AND OTHERS.

FOR SALE, a quantity of SURPLUS MATERIALS, consisting of Rotary Pumps with driving gear complete, pile engines, waggons, barrows, &c. For particulars, inquire of Mr. EDWARDS, Chelsea New Bridge.

THE OLD MATERIALS of TWO HOUSES and OUTBUILDINGS, Nos. 9 and 10, Great Wild-street, Drury-lane, TO BE SOLD by TENDER, for immediate clearance.—Additions may be seen between Ten and Five daily, at Mr H. BAKER'S, Architect, Upper Gower-street.

ELECTRIC COLOURS.—The ELECTRIC POWER LIGHT and COLOUR COMPANY is prepared to supply the trade generally with their Colours, which for quality and brilliancy of price are unequalled. Samples of the Colours may be seen at the Offices of the Company, No. 31, Pall-mall-place. W. PROSSER, Esq. Commercial Manager, Fromore lane, Wandsworth, Surrey.

TO TIMBER-MERCHANTS, BUILDERS, PLASTERERS, &c.

MR. JOHN RICE, 79, Tithebarn-street, Liverpool, has ON SALE at all times a quantity of PLASTERERS' HAIR of the best description, which he offers to the trade in general.—Price and terms on application.

TO DECORATORS, &c. AT THE CRYSTAL PALACE.

UPHOLSTERERS' CLOTHS, BAIZES, and DRUGGETS in every width, colour, and quality, at BILLAU and SON'S, 88 and 89, St. Martin's-lane, Charing cross.

GUTTA PERCHA TUBING.—May be buried for years, without injury, and it is therefore valuable for conveying water, chemicals, &c. It is peculiarly valuable for liquid manure, drain, and soil pipes. Being a non-conductor, it is not affected by the frost of winter or drought of summer, like metal or leather. Its strength is extraordinary; the small half-inch diameter tubing having resisted a pressure of 250 lbs. on the square inch, without bursting. The smaller sizes may be had in 100 feet, and the larger in 50 feet lengths. The joints are easily made. As a conductor of sound it is most valuable for conveying messages in lieu of bells. ELECTRIC TELEGRAPH WIRES INSULATED WITH GUTTA PERCHA. The GUTTA PERCHA COMPANY, Patentees, 18, Wharf road, City-road London.

HOUSE DECORATIONS.—J. MAC LACHLAN, Painter and Decorative Artist, 35, St. James's-street, and 7, Clapham common, informs Architects, Surveyor., and Others, that he is practically acquainted with his trade in all its details, and respectfully requests a trial from those who may wish to have their work nicely executed at a very moderate charge, and punctual to time. J. Mach. will be glad to make designs for the decoration of rooms, or public buildings, in any part of the kingdom, with estimates.—Tenders for general repairs.

TO ARCHITECTS AND OTHERS.

AN experienced CLERK of WORKS having completed, is now open for RE ENGAGEMENT.—Address, A. E. care of T. Campbell, Esq. 55, College-place, Camden-town.

TO ARCHITECTS AND SURVEYORS.

AN ARCHITECTURAL DRAUGHTSMAN is in want of an ENGAGEMENT; he can make fair and working drawings and specifications, plans of houses, &c.—Address, X. Y. Z. 11, King's road, Gray's-inn, London.

TO BUILDERS AND OTHERS.

A CLERK of WORKS and GENERAL FOREMAN of sixteen years' experience in superintending buildings of various kinds (some on railways), measuring from drawings for carpenters' and joiners' estimates, making working drawings, &c. is open for an ENGAGEMENT. For ability, integrity, and sobriety, unexceptionable references. No objection to the country.—Address, A. P. 2, Wakefield-street, Brunswick-square.

TO BUILDERS, &c.

TO BE LET on LEASE, for 75 years, an EXTENSIVE PLOT of BUILDING LAND in Lambeth, suitable for the erection of numerous fourth class houses, for which there is a great demand in the neighbourhood, or for manufacturing premises. Also several Railway Arches.—Apply to Mr J. B. CLARK, 9, Guildford-place, Kennington-lane; or to Messrs HODGSON and BURTON, Solicitors, 10 Salisbury-street, Strand.

BUILDING LAND TO BE LET.—An eligible PLOT of GROUND, situate at Peckham Rye hill, facing the Common. Frontage 46 feet by 200 deep. Long lease.—Apply to J. S. 16, Warwick-place, Peckham Rye.

FREEHOLD BUILDING LAND, KILBURN.—Two eligible Plots for Eight Houses. One piece 90 feet frontage by 90 feet in depth, for five houses; one piece 54 feet frontage by 90 feet in depth, for three houses. TO BE LET on building lease, or SOLD.—Apply to JAMES BOUTELL, 8, George-court, Piccadilly.
